London, Saturday.—Middlings after being easy are again inactive demand. Bran and pollard, with continued mild weather, is quiet for both town and country makes at 2s 6d decline from recent figures Feeding flour scarce and dear. Maize germ meal firm, both spot and forward. Rangoon rice-meal, owing to plentiful supply, is comparatively very cheap, being 12s 6d per ton lower than maize germ meal, whilst last winter both articles were at about the same figure. Quotations :—Middlings, fine, £6 5s to £6 7s 6d per ton ; coarse, £5 5s to £5 7s 6d ; bran, broad, £5 7s 6d to £5 12s 6d ; medium, £4 17s 6d to £5 ; fine, £4 12s 6d to £4 15s ; pollard, fine, £4 15s to £4 17s 6d ; coarse, £4 13s 9d to £4 15s ; white maize germ meal, American, £5 7s 6d ; yellow maize germ meal, English, £5 12s 6d ; ricemeal, Rangoon, £4 13s 9d to £4 15s, free on rails for London.—BLOTT, LANG AND CO., LTD., 9, Catherine-court, E.C.

Mark Lane, Monday.—Linseed Cakes : The amount of business passing is small, the trade being quite of a retail description, and with some fairly heavy arrivals of foreign, values are weak and irregular. Russians meet a slow sale and are unchanged, while Americans offer at 2s 6d per ton less money ; English also are obtainable on slightly better terms. Cotton cakes : There has been rather more activity in the trade during the past week, especially in Egyptians, which have found a ready sale at last week's prices, with English offering a trifle under. Decorticated : Some prime quality cake afloat sells quietly at £6 17s 6d to £7, and meal unchanged. Rape cakes remain scarce and unchanged. Maize germ meal : Stocks of American are small and command a full price, while English is only sparingly offered. Rice meal : Rangoon in warehouse is firmly held but [illegible] nearly due is procurable at £4 5s 0d to £4 10s ex ship.

—PINNOCK BROS., Mark Lane

Hull, Tuesday.—The wheat trade has ruled fairly steady since last Tuesday, and prices remain much the same. Malting barley continues as of late, fine quality sought after and inferior neglected at unaltered prices. Oats meet a fair demand at last week's rates. No change in beans. Flat maize has fluctuated somewhat during the week but closes at 25s 6d the same price as last Tuesday. Round corn has found a lower level than of late. Linseed.—The market has been disappointing throughout the week, that is to say, values have been fairly steady, but very little business passing. Calcutta, old crop, makes about 38s 9d to London, to Hull nothing offers ; new crop April June 47s. Black Sea, on passage, is nominal at 55s 6d. Petersburg, a little business done at 47s 6d, and small lots of Riga and Libau have been sold at 54s. December loading. River Plate, Dec.-Jan. 47s 9d, Jan.-Feb. 46s 6d. Cottonseed.—The market has been steady, though slightly lower prices accepted at close of last week, when spot and near sold at £6 13s 9d, but more inquiry again yesterday with a fair business done at £6 15s in these positions. November loading done at £6 13s 9d to £6 12s 6d ; also December to March at same prices to-day, there being a quieter tone to-day without quotable change in values. Linseed cakes.—A steady market at a decline of 2s 6d per ton on the week all round. Hemp.—Unchanged, dull.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 17s 6d PER TON ; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 5s 0d PER TON ; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 2s. 6d. PER TON ; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 10s 0d PER TON ALL F.O.R. HULL.

MOLASSINE, packed in bags of 1 cwt. each. Price per cwt. 7s. 6d. Price per ton £6 15s. on rail at works Silvertown, Essex.

HAY AND STRAW.

Whitechapel, Saturday.—Trade ruled quiet. Best clover, 85s to 100s ; inferior ditto, 80s to 85s ; specially picked hay, 92s 6d ; good ditto, 85s to 87s 6d ; inferior ditto, 50s to 60s ; mixture and sainfoin, 70s to 80s ; and straw, 25s to 30s per load.

Bristol, Tuesday.—The prices quoted in to-day's market were :—Old clover hay, 75s to 80s per ton ; old meadow hay, 70s to 75s ; straw, 45s to 50s.

FOREIGN HAY AND STRAW.

London, Saturday.—There is very little variation to report this week, the lightermen's strike still being unsettled, but there are signs of a better inquiry all round and it the question of the lightermen could be settled no doubt it would give a fillip to the trade. We quote Canada timothy and clover mixture, 85s. Dutch 1st cut clover, 88s 6d ; Dutch and French 2nd cut clover, 90s to 92s 6d ; good Dutch hay, 75s ; inferior Dutch hay, 55s to 60s. Old bale wheat straw, 46s 6d ; small bale French wheat straw, 45s ; and small bale oat straw, 43s, all per ton, delivered by barge alongside wharf.—FULLER AND PRENTIS, 9 and 10, Great Tower Street, E.C.

MANURES.

Liverpool, Friday.—Basic slag is in fair request, other fertilisers idle. The demand for feeding stuffs is very slow, and an easier feeling is prevalent in the market. Values of linseed and decorticated cotton cakes, and also in the quotations of new season's make of the latter have been reduced in quality ; particulars of the various qualities on request. Nitrate of soda, best quality, i.e., guaranteed 95 per cent. pure, in bags, £8 7s 6d to £8 10s per ton. Bean meal ; in bags, £4 7s 6d to £4 10s per ton ; kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton ; palm nut cake, prime, in bags, £5 5s to £5 7s 6d per ton ; linseed cake, American, thin oblong, prime, in bags, £7 11s 3d to £7 15s per ton ; linseed cake, English, prime, in bulk, £8 17s 6d to £9 per ton ; linseed cake, foreign round, prime, in bags, £8 15s per ton ; cottonseed cake, N.A., decorticated, prime, but fairly hard, in bags, £6 15s to £7 per ton ; cottonseed cake, English, decorticated, prime, very soft, in bags, £7 5s to £7 10s per ton ; cottonseed cake, English, undecorticated, prime, in bulk, £4 17s 6d to £5 2s 6d per ton ; cottonseed cake, crushed, £5 7s 6d per ton ; maize germ meal, in bags, £5 per ton ; maize germ meal, prime, in bags, £5 7s 6d to £5 10s per ton ; rice germ meal, Rangoon, as imported, in bags, £4 15s to £4 17s per ton ; Indian meal, coarse to fine grinding, prime, in bags, 12s to 13s per 240lb ; linseed, fine bold feeding, in bags, £3 5s per qr. 416lb ; N.A. decorticated, new crop, [illegible] nominal ; D.N.S. Brand superphosphate of lime, guaranteed, 30 to 35 per cent. phos., nominal ; D.N.S. Brand superphosphate of lime, guaranteed, 35 to 40 per cent. phos., nominal ; D.N.S. Brand superphosphate of lime, guaranteed, 38 to 45 per cent. phos., in bags, nominal ; basic slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, £1 11s to £1 12s 6d per ton ; basic slag, prime quality, guaranteed, 35 to 40 per cent. phos., in bags, £1 13s 6d to £1 14s 6d per ton ; basic slag, finest quality, guaranteed, 38 to 45 per cent. phos., in bags, £1 16s to £1 17s 6d. per ton, at the producing depots.—H. JONES (LANCS) AND CO.

Winsford Cheshire, Saturday.—Quotations for salt at the works for quotation amongst other fertilisers :—Common [illegible] 1s per ton ; [illegible] 3s 6d per ton ; packets and bags extra.—THE SALT UNION LIMITED.

Farmer's Son Accidentally Shot.—A farmer's son, named Marsh, who resided near Maryport, Dorset, met with a shocking death while rabbit shooting on Thursday. He was getting over a stile when his gun exploded, and he received the charge in his face, his head being blown to pieces.

LIVE STOCK.

OUR ILLUSTRATIONS.

The Shorthorn heifer, Cicely, with which Her Majesty the Queen secured the principal champion prizes at Birmingham Fat Stock Show on Saturday, was bred at The Prince Consort's Shaw farm, Windsor, her sire being Prince Victor 73320, and her dam Cristobell, by Crœsus 58706. Cicely on Saturday carried everything before her, winwinning, in addition to the first prize in her class, the Elkington, Thorley, and Messrs. Webb and Sons' challenge cups, all valued at 100 guineas, the President's silver cup, value £25, and the special prize of £50 for the best Shorthorn. The three challenge cups mentioned before becoming the absolute property of the winner have to be won three times, and this the Queen has now done, having won them in 1895 and 1899. Our photograph was taken at the last show of the Royal Counties Agricultural Society, where Cicely won first in her class. Last year this heifer was very successful at the Summer Shows. At the Maidstone Royal she won first in her class, and the champion prize-for the best Shorthorn cow or heifer. On Saturday she was 2 years 9 months and 1 week old, and weighed 16cwt. 1qr.

The Dexter steer Patriot is the property of and was bred by H.R.H. The Prince of Wales, Sandringham, its sire being Pat 212, dam Tranquil 524. Patriot is not being exhibited at Birmingham, but at Norwich he came out top of the class for steers, not less than eighteen months, and not exceeding three years old, nor exceeding 10cwt. live weight in the Small Cattle section, and won the special prize of £10 for the best animal in these classes. At the time of exhibition Patriot weighed 9cwt. 1qr. 4lbs., and was 2 years 10 months and 2 weeks old. At Smithfield Show last year Patriot was successful in winning the first prize in his class.

Mr. R. Mattocks, The Green, Burlingham, is the owner and also breeder of the Shorthorn heifer Heather Belle, sire Bannockburn, by Prince Geneva 59659; dam Shorthorn cow. At the Norwich Fat Stock Show Heather Belle was awarded first prize in the class for Shorthorn cows that have produced at least one live calf, or heifers under four years old, and also the special prize of £15 for the best beast in the show bred and fed in Norfolk. She is not being exhibited at Birmingham. At Norwich her age was given as 2 years 4 months 3 weeks, and her weight 14cwt. 1 qr. 21lbs.

STOCK AND SHOW NOTES

By Herdsman.

The annual show of stock and implements of the Suffolk Agricultural Association will be held at Beccles on Wednesday and Thursday, June 5th and 6th, 1901. All entries close May 8th to Mr. Robert Bond, Secretary, Old Bank House, 6, Butter Market, Ipswich.

Owing to the yards and buildings at Windsor being too full of cattle the annual sale of fat stock fed by Her Majesty the Queen will take place at the Slough Christmas Cattle Show on December 11th.

The members of the National Sheep Breeders' Association have recently passed a somewhat curious resolution. "We (says the *Yorkshire Post*) are not prepared to find fault with it, because it is more or less in the right direction, although it does not exhibit that firmness with which this question ought to be handled. The association deprecates the excessive colouring of sheep, although it is of opinion that as little interference as possible should be exercised in allowing exhibitors to show their sheep in the best possible form. In the first place, it will be observed that the association does not oppose colouring, only excessive colouring; and in the next place, it is apparent that the members are of opinion that colouring helps the exhibitor to show his sheep in good form. It may perhaps be a foolish belief, but our townspeople are naturally more or less ignorant with regard to the stock of the farm, yet there are many who firmly believe that the different colours which will be seen as usual at the Agricultural Hall in December are the actual colours of the wool of the different breeds."

"It has of late become difficult," continues the journal above mentioned, "to dissociate specific colours from specific breeds, but it would be interesting if the association were able to inform the country in what way colouring assists the exhibitor, and what they regard as excessive colouring. There are plenty of men who are too conscientious to colour their sheep, just as in the past there were men who declined to blacken their pigs, where, as in the case of the Berkshire, there were occasional white patches to cover, or, as in the case of the black-faced Suffolk, white wool was removed, as, indeed, we have seen it, by shepherds in the showyard. If colouring enhances the value of the sheep in the eyes of the judge the exhibitor who declines to perform the trick—for in this case it is a trick—is handicapped, and handicapped unfairly too, for while he shows his sheep honestly the exhibitor who colours does not, if the association's suggestion is correct. We do not say so, but we can draw no other inference from the resolution."

But three or four weeks ago I mentioned in this column that Messrs. J. Thornton and Co. had just isued "Thornton's Circular" for April 1st to June 30th. This number was rather late in appearing, so that although the publication is a quarterly one the next number—130—has been sent out during the past week. This gives particulars of Shorthorn transactions from July 1st to September 30th, and among the shows dealt with are the Yorkshire, Royal Lancashire, Highland Society's, Norfolk, Lincolnshire, etc.

The 1901 show of the Nottinghamshire Agricultural Society has been fixed for Tuesday and Wednesday, May 28th and 29th.

Messrs. Alfred Mansell and Co., live stock exporters, of Shrewsbury, shipped per ss. "Gothic," from the Port of London, on November 20th, a high-class Shropshire shearling ram, specially selected by Mr. Tom Mason on account of Mr. S. Wellard from the prize-winning flock of Mr. Andrew Mansell, and owning as his sire that successful getter, Rose Bush 10104 (sire of Mr. Mansell's 2nd prize ram at York, sold at 150 guineas) from the same ewe as Fortification, the sire of Mr. Mansell's 1st prize ram at York, recently sold to go to Australia at 240 guineas. In selecting this ram special attention was paid to securing a heavy dense fleece and clear cherry skin, two attributes in high favour with Australian breeders.

On Thursday last Messrs. Alfred Mansell and Co., the well-known live stock exporters, of Shrewsbury, shipped from Liverpool, per the ss. "Persic," of the White Star Line, twenty-four of the choicest Shropshire shearling ewes, including several prize-winners, to Mr. James Gibb, of Melbourne. These ewes had all been selected with great care from several leading breeders, and were in lamb to the best sires obtainable. Full particulars will appear in our next issue.

Messrs. Alfred Mansell and Co., of Shrewsbury, have received a letter from Mr. Geo. Saeurbier, announcing the safe arrival of seventeen Shropshires and four Southdowns, shipped to Adelaide in July last. Mr. Sauerbier adds that the sheep gained flesh on the journey, and were greatly admired by all the leading breeders in the district.

One of the most interesting matters to come before the members of the Royal Northern Agricultural Society at their next meeting is the report of the committee appointed to look out for a fresh site for the Society's show, the present one at Kittybrewster being now too small. It is reported that the committee have been offered a piece of ground, 13 acres in extent, lying on the north side of the Great North of Scotland Railway line, between Kittybrewster and Woodside, the purchase price of which is about £5,200. The gentlemen who have visited the ground on behalf of the Society have expressed an opinion that with an adequate outlay in preparing the site for the purposes of the exhibition, the place will make a convenient and ample showground.

H.R.H. THE PRINCE OF WALES'S DEXTER STEER "PATRIOT," CHAMPION OF THE SMALL CATTLE SECTION AT NORWICH FAT STOCK SHOW.

CATTLE.

Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

Newtownstewart Fair (co. Tyrone), was held on Monday. It was a small one composed chiefly of calves and a few lots of second and third-class cattle, for which demand was fair. Springers were scarce and met a good demand. Prices:- Calves, second class, £3 16s. 8d. to £4 10s.; third class, £2 11s. 3d to £3 2s. 6d.; yearlings, first class, £8; second class, £6 5s. to £7; third class, £5 to £5 2s. 6d.; two-year-olds, second class, £7 15s. to £8; third class, £6 18s. to £7 2s. 6d.; springers, first class £16 5s.; second class, £13 to £15, third class, £9 to £10 12s. 6d.; young pigs, eight to ten weeks old, sold at from 15s. 6d. to 18s. each.

The fair at Bruff, co. Limerick, on Wednesday, was an average sized one, composed of first and second class cattle. There was a good demand for young stock with those suitable for shipping, but the

animals were hard to sell, and a number failed to find purchasers. The small supply of springers met a very good demand. Prices:—Calves, first class, £5 5s. to £6; second class, £4 to £5 2s. 6d.; third class, £2 15s. to £3 10s.; yearlings, first class, £9 to £10 10s.; second class, £6 15s. to £8 10s.; third class, £5 10s. to £6 5s.; two-year-olds, first class, £12 2s. 6d. to £13 10s.; second class, £10 6s. 10d. to £11 10s.; springers, first class, £15 10s. to £20; second class, £11 15s. to £15.

SHEEP.

Marlborough Fair.

This fair was held on Marlborough Common on the 23rd ult. Mr. T. Lavington had a full catalogue of some 6,000 Hampshire Down ewes and lambs and forty head of cattle. In comparing the entry of sheep with the last few years, the numbers show a considerable increase, attributable, no doubt, to the favourable season and the abundance of keep enabling flockmasters to hold back many which in former dry seasons would have been sold at the earlier fairs. The attendance of buyers was above the average. Trade, although lacking the briskness which has characterised the autumn fairs, was fair, and figures were a slight advance on Andover Fair. Prices fluctuated somewhat between the start and the finish, and buyers were apt to show at times a certain amount of inconsistency.

There was a good demand for fresh wether lambs and working lambs, and only one vendor in the whole sale was unwilling to accept the prices offered. Mr. C. J. Hibbard's registered chilver lambs, purchased by Mr. J. B. Stevens, made as high as 67s.; Mr. Sam Darling's wether lambs, 53s.; while for ewes Mr. G. Knowles secured 50s. 6d.; chilver lambs may be quoted from 67s. to 33s. 6d.; fat or fresh wether lams from 53s. 6d. to 44s.; working lambs, 40s. to 27s., a few culls being sold for less money; two-teeth ewes, 50s. to 43s.; four and six-teeth ewes, 50s. 6d. to 43s.; full-mouth ewes, 44s. to 40s. The auctioneer who generally secures top prices for wether lambs at this fair made only 52s. 6d., being displaced by Mr. Sam Darling, whose flock, however, he manages.

Glasgow and Leith Wool Sales.

Business in Scotch wools has been, as is frequently the case at this season, rather quiet. There have been no public auctions during the past month, and quotations of all classes have not suffered any material alteration. The improvement that was generally looked for after the Presidential election in the U.S. has been as yet more evident by enquiries than by actual transactions.

Whitefaced wools have been in small demand, and, on the other hand, stocks are not large and there is no pressure to sell.

In blackfaced there has been rather more activity. A number of enquiries have been made on American account, but so far the volume of actual transactions has not been extensive, and prices are very low. In the home trade there has also been a moderate turnover, mostly for the supply of immediate wants. Stocks are of fair dimensions, and are firmly held. On the whole, the feeling in the market is hopeful.

J. AND W. GREIG.

Darlington Hirings.—The last, or runaway, hirings at Darlington took place on Monday, but there were not many servants, most having been engaged the previous week. Those who wanted situations were mostly youths, and they were engaged at about the rates ruling at the main hirings.

At the annual hiring fair held at Market Weighton on Monday, female servants were scarce. There was a fair gathering of men servants, but, on the whole, little hiring was done. Foremen obtained £24 to £30, shepherds £20 to £27, beastmen £20, waggoners £19 to £24, third lads £16 to £19, plough lads £12 to £15, and lads first time out £6 to £9.

Presentation to Mr. Charles Whitehead.—At Maidstone last week Lord Harris, on behalf of the Governors of the Kent County Ophthalmic Hospital, handed to Mr. Charles Whitehead his portrait for presentation to the hospital, and a replica for his family, on account of his services as member of the Board of Management and its chairman for forty years. Lord Harris alluded to Mr. Whitehead's devotion to the duties connected with the hospital as well as to the county business generally. Lord Harris also spoke of Mr. Whitehead's useful work as a member of the Royal Commission on Agriculture and as technical adviser to the Board of Agriculture.

BIRMINGHAM FAT STOCK SHOW.

The Championship again Goes to Windsor.

On Saturday the Fat Stock Show annually held at the Bingley Hall, Birmingham, opened its doors to the public, when the whole of the judging was satisfactorily got through. The show will remain open until Thursday next, and a good attendance of visitors is expected. The value of the prizes merited keen competition, and the expectation was not disappointed. The £3,200 offered was apportioned as follows:—Cattle, £1,715; sheep, £275; pigs, £170; roots, £50; corn, £30; potatoes, £36; poultry and preserved eggs, £1,080; and pigeons, £380.

The total number of entries was 4,157, a decrease of two upon last year, but an increase of 152 upon 1898. Cattle numbered 176, a decrease of ten; sheep 56, an increase of one; and pigs 54, an increase of 17. Her Majesty is the largest exhibitor in cattle, being represented in the classes for Herefords, Shorthorns, and Devons; while the Prince of Wales is also represented. Amongst other prominent exhibitors in addition to the President are Lord Rosebery, the Duchess of Newcastle, the Earls of Coventry, Durham, and Carnarvon, Lords Tredegar and Llangattock, Lady de Rothschild, Viscount Portman, Sir W. H. Walrond, M.P., Sir J. Blundell Maple, M.P., Sir R. Cathcart, of Aberdeen, Colonel H. Platt, of Llanfairfechan, and Mr. Clement Stephenson, of Newcastle-on-Tyne.

Her Majesty the Queen was adjudged to have the best animal in the show, the award being given to her roan Shorthorn cow Cicely. With this animal she secured the President's Prize, the Elkington Challenge Cup, the Thorley Challenge Cup, and Webb and Son's Challenge Cup. The Birmingham *Daily Post* Challenge Cup also goes to Her Majesty for a very solid Devonshire steer, which took premier award in its class. The Queen, by her success with Cicely, secures outright the Elkington, Thorley, and Webb and Son's Challenge Cups, having won each of them for a third time. Each of the trophies is valued at 100gs.

The champion of the show has had a successful career. The age of the animal is 2yrs. 9m, and it was bred by Her Majesty on the Prince Consort's Shaw Farm, Windsor. As a yearling at the Royal Agricultural Show the animal took first prize, and was adjudged champion of the show. She was also champion at the Highland Society's Show at Edinburgh last year, and took first prize and the championship at the Royal County Show at Winchester last summer. Cicely will be exhibited at the Smithfield Show, which commences on December 10th. She at present turns the scales at 16cwt. 1qr.

Championships.

The contest for the champion prizes was very close, and watched with considerable interest, as there were three competitors, each of which had their supporters perhaps in about equal force; these were the Windsor Shorthorn heifer Cicely, Mr. Learner's Norwich champion heifer, and Mr. Wortley's Hereford steer, reserve champion at Norwich. After considerable discussion and examination Her Majesty the Queen was awarded the coveted honour, the reserve falling to Mr. Wortley's Hereford steer. The award was not received with any great outburst of applause, a great number of north country visitors leaning strongly to the Norwich heifer.

Cattle.

HEREFORDS.

The juicy-fleshed white faces of the Midlands take precedence in the Birmingham catalogue, and it is to be desired that such a profitable beef breed may always continue to do so. The three classes open to this breed brought out a good display, though generally speaking not quite up to some previous years; this is especially noticeable in the steers under two years, in which really good animals were scarce, doubtless owing to the very high prices now being paid for bulls of this breed having caused the most promising of the calves to be retained for that purpose. The older steer class contained eleven entries, of which the first, entered by Her Majesty the Queen, was absent. This steer, of which we hear a most pleasing account, will, it is to be hoped, be seen at Smithfield next week. Mr. John Wortley's steer, first in class and reserve for the championship at Norwich last week, again repeated both these victories; he was fully described in last week's issue, and came out at Birmingham in beautiful bloom and scaling some 30lbs. more than at Norwich the previous week. A very worthy second was Mr. W. H. Cooke's very shapely, good-looking, high quality, and ripe steer by Ruler; and the third proved to be Mr. J. J. Cridlan's entry, a beast with capital pole end and top and excellent beef. One or two other entries were h.c. There were twelve entries of steers under two years, Mr. John Price taking priority with a very big one for age sired by Tremont; he was also very good in flesh and good quality. Her Majesty the Queen came second, a good quality steer, but poor behind the shoulder, and Mr. A. P. Turner's third was extremely good meat and about as symmetrical as any of them. A reserve to Mr. Barneby completed the class. With the exception of Mr. A. C. Hughes's beautiful heifer Ladylike 2nd, first in the class, the females were rather moderate. Mr. W. H. B. Cane and Mr. William Taylor took the other money. The best of the breed was very easily Mr. Wortley's steer.

SHORTHORNS.

There was rather a short entry of the good old breed, though the steer classes filled up quite as well as usual. Females had but a single representative. Steers over two and not exceeding three years were eight in number, and several of them were very creditable, to say the least of them, though nothing was of outstanding excellence. Both first and second prizes were accorded to Miss A. de Rothschild for the two very level, good quality, and well fed steers Juryman and Sabinus, bred by the late Baron F. de Rothschild. There is not one pound of difference in the weight of the two animals, the heavier being 15cwt. 3qrs. 22lbs. Sir J. B. Maple carried off the third prize with a capital bullock nearly three cwt heavier than the others and capital beef, though not quite as neat in shape or breed character. The Earl of Durham occupied the reserve position with a biggish, useful bullock of his own breeding, just a little uneven in his flesh. There were seven steers of this breed not exceeding two years old, several very level and good-looking ones. Her Majesty the Queen came to the front with a very level, topped, good handling one of 13cwt. 2qr., sired by Prince Victor, and the second honour went to Miss A. de Rothschild's steer by Cabin Boy, a squarely-built, good steer, well brought out, a little heavier then the winner, and a close second. Lord Tredegar provided a very nicely shaped and capital beef steer, though much smaller, for the third prize; and a level useful steer of Sir John Swinburne's was reserved. The only female of this breed was Her Majesty the Queen's heifer Cicely, who also carried off the extra prize as best Shorthorn and the championship of the show. Cicely, it will be remembered, is a daughter of Prince Victor, and out of Christobel, and was the leading light at several of the summer shows. She has fed very evenly, is covered with a good coat of hair, and her symmetry, style, and finish are very pleasing, the fore-end, top, and bottom line being especially good, her greatest detraction being a rather lumpy setting on of tail. Her weight is 16cwt. 1qr.

DEVONS.

Are the palmy days of the exponents of the red rubies of the West gone, never more to return, and is there any probability of specimens of this breed again winning the championships of either Bingley Hall or Smithfield? Many would say such a probability was far distant, judging by the small amount of support afforded to this breed by residents of the counties where the Devon breed is indigenous. Thus at Bingley Hall there were only five exhibitors in the class for Devon steers exceeding two and not exceeding three years old. One of these was shown by Her Majesty the Queen, one by Mr. John Wortley (Norwich), two by Lord Rosebery, and one by Viscount Portman (Dorset). Thus it will be seen that not a single exhibitor in this class hailed from Devon or Somerset. First prize went to Mr. John Wortley with Baden Powell, a steer bred by Mr. A. C. Skinner, Bishop's Lydeard. This steer has a wonderful sirloin and good, deep rounds, but might have been better at the fore part of the shoulder. Though only having a couple of weeks to spare to reach the third year, it turned the weighbridge at 14cwt. 1qr. 23lbs. This animal also won the £20 prize for the best animal in the Devon classes. The second prize was won by an exhibit from Her Majesty's herd at Windsor. He was exceptionally good forward. The loin was rather small, a rather bad tail, and narrow behind. Viscount Portman's Willie has evidently had enough forcing diet, and he has scarcely fulfilled the promise made last year; he secured the reserve ticket. There were nine entries in the young steer class, and the judges mentioned the lot. Here Her Majesty the Queen led the way with a much better one. He had a most beautiful fore-end, had a rare loin, but a trifle rough around tail; he was placed reserve for the championship. Mr. Alfred Bowerman was placed second with Domino, a very useful sort to keep on for next year. He has a good rump, true butts, and well hooped ribs, but had been scarcely done well enough for this year. Mr. Bowerman was also reserved with Tit Bits, a rather even quality bull, but a trifle light in the shoulder. A highly commended mention went to Her Majesty the Queen for a rather uneven-backed one.

A weak entry comprised the class for Devon cows and heifers. First prize went to Her Majesty the Queen with a two-year-old heifer, with a back none

of the best, plain rump, and most decidedly thin on the ribs. Sir William H. Walrond took second with Bradfield Pearl 1st, a very uneven, plain Devon.

POLLED ABERDEEN-ANGUS.

The entry of this breed is again rather short at Birmingham, probably owing to a good number of the northern feeders holding their stock for Edinburgh this week. The quality in nearly every instance is very good, especially of the prize winners. Steers exceeding two and not exceeding three years of age were represented by three entries only, the best of which was Sir W. Gordon Gordon-Cumming's entry, sired by First Quality. He is only just under the age limit of three years, and is a very ripe, neat beast, level in his flesh, capital in his wasting parts, and both symmetrical and full of quality; his weight is scarcely as good as it should be at that age, being but 15cwt. 2qrs. This steer was reserved as best Scot. The second prize went to a steer of Mr. Henry Casswell's, of Lincolnshire, sired by Somerby Blossom. This is a beautiful steer, well fed and good in quality, full of excellent wasting beef, and he scales more than a cwt. heavier than the winner, whilst two months younger. Mr. R. W. Hudson was reserved for a steer of very even outline, and weighing well, pulling up the beam at 16cwt. 0qrs. 15lbs., but he looked a little off bloom; he was bred at Danesfield, and sired by Eric Macdonald. Steers of this breed under two years old were practically a failure, as only two were entered, and one of them absent; the one on view was shown by Mr. James McWilliam, and bred by Mr. Donald Cameron; he was awarded first prize, but is altogether of very moderate pretensions, weighing but 10cwt. 3qrs. 8lbs., and not of any especial merit otherwise.

The female class in a measure atoned for the shortcomings of the males, though there were but four entries of these, which, however, included the best Scot in the hall; this was the Earl of Strathmore's Aquilegia, a daughter of the famous bull Boaz of Ballindalloch; she is 2 years and 10 months old, and is a particularly attractive heifer, though not up quite to Luxury, Benton Bride, and one or two other stars of this breed in the past. In weight she is rather light, having but 13cwt. 2qrs. 3lbs. to her credit; her quality, however, is of the best, and her symmetry and style very satisfactory. Sir J. B. Maple came second with a very good heifer (a close runner up), bred by Mr. Greenfield at Haynes Park; this is Benefit 10th of Haynes, sired by Black Prince of Ardingly; she is very symmetrical and famous beef, with a weight record of 15cwt. 1qr. 1lb. The reserve card went to Mr. R. W. Hudson's Tippet of Danesfield, a good, deep, massive heifer with capital top of roasting beef and generally well shaped. She was sired by Albion, her weight 14cwt. 3qrs. 23lbs. Captain H. L. Townshend was h.c. for a red heifer, well fed, but a little uneven, bred by the late Mr. W. H. Lumsden.

GALLOWAYS.

This breed were conspicuously short, steers having but two entries, and the female class being entirely blank. Of the two steers, both of which were very good representatives, the winner proved to be Sir John Swinburne's, bred by Mr. C. Graham, sired by Pathfinder 3rd; he is a very good level-backed bullock, and handles like a remarkably good cutter, and scales 15 cwt. at three years and six months old. The second steer, shown by Captain H. L. Townshend, was shown in the younger class in London last year; he has done well, and is very even and good beef. He scales 14cwt. 3qrs. 2lbs. at under three years, and was bred by Mr. Murray-Stewart.

WEST HIGHLAND.

This breed made an extraordinary good display. The steers, it is true, only numbered five, but the females were seven in number. Sir Reginald A. E. Cathcart won first prize in the steer class with his fine red Tearlach Ruadh, of considerable substance, his scale being 17cwt., and his Eauchunn Ruadh was placed second, this steer being handsome and of nice style and quality, but having nothing like the substance of the other. Sir Reginald exhibited a trio, the one most appreciated by the judges being 3qrs. 23lbs. heavier than the first prize one. The third prize steer was Lady Hardy's Brindle, smaller but very symmetrical. The Earl of Durham furnishing the reserve with Fitzclare, a much younger one, not yet at his best. This nobleman was first in the female class, with a handsome heifer of nice quality, of a cream colour, and was second with a compact sister of the other, both being of the same sire. H.R.H. the Prince of Wales exhibited two in the class, one of which, of nice flesh and level form, was selected for reserve, the other receiving a c. ticket. Mr. Yerburgh, M.P., had also two, and one of them, which was h.c., seemed also very symmetrical and of nice character.

WELSH.

There were two well-filled classes of Welsh steers, one for two-year-olds the other for yearlings. In the former the Hon. F. G. Wynn had two, one of which was selected for first prize, the other winning h.c. The former scaled 17cwt. 2qrs. 28lbs., and stood very well proportioned except being a little narrow behind, the other had a grand middle, but was a little light in the fore and hind-quarters, but both were of excellent quality. Mr. R. M. Greaves and Mr. W. E. Oakley had also two each. Those of the former received second prize and h.c. ticket, the prize winner being tall and of good form, the other also shapely. Mr. Oakley's reserve steer possessed a handsome front, and his other, which was h.c., was very even proportioned. The steers under two years, like the others, formed an even lot of high merit, in grand form and high quality. Mr. Robert Hughes was first and reserve with a good pair, the winner lengthy and of fine form, the other wealthy and carrying good flesh. Mr. Greaves also exhibited two, to one of which second prize was awarded, the others receiving a h.c. ticket. The prize winner carried a handsome head, and was of nice style, the other being of excellent quality; Colonel Platt was also h.c. for a fine, upstanding one, with a very level top, the heaviest in the class.

CROSS-BRED CATTLE.

There was again a very large and good entry in this section, and some of the best beef and best animals in the Hall were included in their classes. Steers between two and three years old, with seven entries, made up a very good class, the winner turning up in a red Angus and Shorthorn, shown by Captain Townshend, bred by the late Mr. Lumsden, and sired by Cock o' the North. This bullock stood fourth in the younger class at Smithfield last year, and has laid on a good deal of weight since, is very ripe and even in shape, with capital quality of beef; he was also reserved for the extra prize open to the best beast of this section. Miss A. de Rothschild came second with the Norwich winner in this class last week, the other steers weighing 17cwt. 3qrs. 13lbs. and 17cwt. 3qrs. 22lbs. respectively, both just under three years. Mr. H. Casswell was reserved with a ripe blue-grey. There were nine entries of steers not exceeding two years old, the best in the class being a quite white one shown by Mr. J. A. Horn, with two crosses of Shorthorn and one Aberdeen-Angus; he is a very neat and level good-quality steer, and very close to the age limit of his class. Sir J. B. Maple had a very nice steer of similar breeding to the winner that was placed second, and Mr. J. Douglas Fletcher came third with a very neat one, also of Angus and Shorthorn cross. Several others were h.c. Heifers between two and three years were a very large class, and rather variable in point of quality, as the class included the Norwich champion described last week, and a new comer of similar breeding (Angus and Shorthorn), shown by Mr. Clement Stephenson, who never shows a bad one; this was placed second, and is a heifer of remarkably fine quality and symmetry, with even flesh. The reserved, a very neat and pretty heifer, also of good quality, was shown by Mr. C. Emmerson. There were not many minor honours bestowed in this class.

Heifers not exceeding two years old were a small class, only seven animals being entered. Mr. Leopold de Rothschild exhibited the first prize winner in these, a wonderfully level, square, blue-grey, sired by Ringleader, and of first-rate quality, a very promising heifer for further feeding. Another plum of the Aberdeen Angus and Hereford crossbred, and shown by Mr. Douglas Fletcher, very ripe and good beef, was placed second. The latter heifer weighs considerably heavier than the first, being 11cwt. 3qrs. Mr. Emmerson's reserve heifer did not show the same quality and symmetry, but in weight eclipsed the others a great deal, pulling up 15cwt. 2qrs. 9lbs. at one year ten months. Two or three other heifers were h.c. and c. The special prize for best beast in this section was awarded to Mr. Learner's heifer.

THE BUTCHERS' PRIZES.

There were twenty animals entered for the butchers' prizes, as usual a very miscellaneous collection, big and small, weighty and light, polled and horned, symmetrical and gaunty. There were some good black Polls among them, and some of the Hereford and Welsh breeds that were likely to be favourites with the knights of the cleaver, but the bulk were cross-breds. The butchers chose for their first prize winner an Aberdeen-Angus exhibited by Mr. Hickman, of wide span over the middle, of good quality, and compact. The second prize one (Mr. Pooley) was of the same breed, and a good handler. The reserve, Mr. Winn's cross-bred Hereford, was also of excellent quality. Three others were h.c., a wealthy cross-bred belonging to Lord Llangattock, Sir J. Swinburne's Maggie, cross-bred, deep, broad, and massive, which scaled 19cwt. 2qrs. 14lbs., and Col. Platt's Madryr Queen, full-shaped and very well covered with thick flesh, her scale being nearly 18½ cwt. The prize for the heaviest beast was won by a gigantic blue-grey, three years nine months old, which weighed 22cwt. 2qrs. 13lbs. Two others in the class were commended.

There was a class for cows and heifers not previously exhibited in Bingley Hall, and six animals had been entered, only two of which put in appearance. These were two prime Welsh heifers belonging to Mr. R. M. Greaves and Co. Platt. Bryngwern, belonging to the former, received the first prize, she being of very full shape and considerable weight, yet possessed of quality. The Colonel's heifer, Madwyn Belle, was of less substance, but very shapely and nice. Bryngwern at under two years eleven months scaled 16cwt. 1qr. 11lb.

EXTRA STOCK

Only four animals were entered for the extra stock class, by far the weightiest of which was a very fine well-covered Aberdeen-Angus, three years four months old, and belonging to Mr. Pooler, Newport, Salop. A smaller, but nice, well-shaped Black Poll—entered as a cross-bred—belonged to Mr. Albert Green. The latter was, however, a yearling, which might have been exhibited in another class. Mr. Pooler's steer received first prize, and he was one of the heaviest in the show, his weight being 20cwt. 1qr. 14lbs. Second prize was awarded to Mr. Weatherspoon's steer of Hereford character, which wanted more space of rib, but was of a useful ordinary characted.

The following table shows the age, weight, and average daily gain of the prize-winning animals in the cattle classes:—

Breed and Owner.	Age.	Weight.	Average Daily Gain.
HEREFORD.	Days.	lbs.	lbs.
(Steers over 2 and under 3 years old.)			
1. Mr. J. Wortley (Lord Roberts)	936	1985	2·00
2. Mr. W. H. Cooke	1018	1911	1 87
3. Mr. J. J. Cridlan (Red Indian)	985	1991	2·00
(Steers under 2 years old.)			
1. Mr. J. Price	685	1680	2·45

2. Duchess of Newcastle (Kerry)	993	1083	1·07

Sheep.

The sheep section of the show compares very favourably with previous exhibitions of the Society, except, perhaps, in some one or two breeds which are rather sparsely represented, such as the Oxfords and cross-breeds; both these, however, are deficient in numbers only, in merit they are quite up to date.

SOUTHDOWNS.

The catalogue of this division commenced with the Southdowns, of which there is an excellent show, both of sheep and lambs, the latter being especially good. The wether class has half a dozen entries of very choice sheep. Colonel McCalmont, as at Norwich, takes the lead with a very high quality and well matched pen, ripe in flesh too; their weight is 5cwt. 1qr. 27lbs., as against 5cwt. 1qr. 9lbs. in Mr. Adeane's second pen and 5cwt. 1qr. 1lb. in H.R.H.

the Prince of Wales's third prize lot. The second pen are very fine in quality, pretty level sheep, and the third handle as uncommonly well finished. Mrs. Montefiore was reserved with a well-bred pen. There were seven entries of Southdown lambs, one of the finest classes that could possibly be imagined. Colonel McCalmont again came to the front and also carried off the third prize with a second pen. The first pen are extremely good meat and well display the character of the true Southdown in their countenances; their weight, too, is very good, being 4cwt. 0qrs. 4lbs. The third pen are rather lighter, 3cwt. 2qrs. 16lbs., otherwise of the same high caste. These two pens were divided by a very beautiful pen of Mr. Whitaker Wright's, of extra neat and taking breed, appearance, and very ripe; these weighed 3cwt. 2qrs. 7lbs. Mr. C. R. W. Adeane's reserve were also very good in their quality, and especially well filled in their legs of mutton.

Shropshires.

The great down breed of the Midlands were well at home, and gave an excellent account of themselves, both in numbers and quality, and amongst other of their good stamp succeeded in carrying off the Cooper Challenge Cup for the best pen of sheep of any breed. There were nine entries of wethers, all of which were noticed by the judges. Both first and second honours were awarded to Mr. P. L. Mills, for two pens of capital mutton sheep, the first prize pen weighing 6cwt. 3qrs. 24lbs., a square good pen of sheep, short-legged, and full of ripe mutton; the second pen were three-quarters of a cwt. lighter, and very good in quality. The third prize went to a pen of Captain H. L. Townshend's, scaling 6cwt. 3qrs. 4lbs., a second pen from the same flock being also reserved. These are very good heavy-fleshed sheep, and display fine breeding as well. A very good pen of Mr. R. P. Cooper's were h.c., and all the others shown by Mr. A. S. Berry, Mr. Mitchell, and Mr. Cooper were c. Mr. Mitchell's pen were very solid weighers, pulling up the beam at 7cwt. 3qrs. 2lbs. Shropshire lambs were represented by eight entries, some remarkable pens amongst them. The Ruddington flock followed up its victories commenced in the wether class by again taking first and third, the first prize pen scaling 4cwt. 3qrs. 11lbs., and lambs of good-bred points, well matured and well matched. The third pen were also of very good quality, and about half a cwt. lighter than the winners. These two pens were divided for the second honour by a beautiful pen of Dr. Wall's, displaying excellent breed and character, well matched, and full of quality; in weight, however, they suffered rather considerably. Lord de Rothschild was reserved, and Mr. R. P. Cooper and Captain Townshend c.

Oxfordshires.

This breed do not make a very large entry at Birmingham. Wethers were represented by two pens only, both the property of Miss Alice de Rothschild, capital sheep and well brought out, and very nearly of equal weight, the heaviest pen being 7cwt. 1qr. 4lbs., and the other 4lbs. lighter. The first prize was awarded to the lighter pen and second to the heavy ones. In the lamb class the breed was still weaker, as only one entry made its appearance, bred and shown by Mr. H. W. Stilgoe, a good ripe pen and well shown; the scales gave them in to be 5cwt.

Hampshire and other Downs.

Wethers of this section consisted of five pens, all of which were Hampshires. The first honour went to a pen of Mr. T. F. Baxter's well matched square sheep, ripe and good in their quality, with also a good weight record; scaling 6cwt. 2qrs. 12lbs. The reserve pen was also furnished by the same flock. A grand pen from Lord Rothschild's flock secured the second place, sheep of considerable weight, being 7cwt., and with style, good breeding, and a capital finish. A second entry from his flock was also c., as was also a pen shown by the Earl of Carnarvon. There were seven entries of lambs in this category, and again all were Hampshires. This time the Tring Park flock took precedence with a very beautifully matched and well ripened pen at 4cwt. 3qrs. 18lbs.; a second entry also was given the reserve card, the second and third prizes going to Mr. T. F. Baxter for very good pens, rather heavier than the first prize ones, being 5cwt. 2qrs. 18lbs. and 5cwt. 1qr. 4lbs. respectively. Mr. L. H. Baxendale was also c. for a pen.

Crossbreds.

A single entry of Mr. Rush's Hampshire and Oxford crosses constituted the wether class, and were awarded first prize, big ripe sheep weighing 8cwt. 0qr. 17lbs. Lambs were represented by three entries, all of the same cross. Mr. Rush was first and Mr. Matthews second and reserve. The first prize pen, which was the heaviest, scaled 5cwt. 2qrs. 21lbs. and were very ripe.

Butchers' Class.

There was a large entry of these, the first prize being awarded to Mr. Rush's pen of Oxford and Hereford cross (lambs of the present year), scaling 5cwt. 1qr. 24lbs., and the second prize to a pen of Shropshire wethers of Mr. P. L. Mills that weighed 6cwt. 1qr. 22lbs. Two other pens of Shropshires were h.c. and reserve.

Below we give our usual table, showing the age, weight, and average daily gain of the prize pens in the sheep classes:—

Breed and Owner.	Age.	Weight	Average Daily Gain.
	Days.	lbs.	lbs.
Southdowns.			
(Wethers under 23 months old.)			
1. Mr. H. L. B. McCalmont	668	615	·92

Lambed in 1900.			
1. Mr. T. Rush	288	637	2·21
2. Mr. J. Matthews	303	589	1·94

Pigs.

It seemed good again to see pigs in their accustomed pens, but it was very evident that harassing swine fever regulations have deterred breeders from paying such attention to pigs as in the days of yore. In the classes for twos, the Berkshires were decidedly good. Mr. Arthur Hiscock had rather an easy win with his capital pair, with even, level backs and nice hams. Mr. Julius A. Fricker's scarcely came out so well. Only two entries in the Tamworths. Here the judge went for some meaty ones, exhibited by Mrs. Esther Ibbotson, though Mr. D. W. Philip had some with rare coats that were placed second. Mr. Arthur Hiscock's entry was the only one, but he would have won had there been a dozen. In the class for Middle or Small Whites he was again to the fore, Mr. E. Henry Lloyd being second and reserve, Mr. Sanders Spencer receiving a commendation. The class for two Berkshires exceeding nine and not exceeding twelve months old was an excellent win, and this made Mr. Arthur Hiscock's success all the more deserving, as he had rather a close competitor in Mr. Nathaniel Benjafield. In the class for Tamworths of the same age, Mr. D. W. Philip secured first for two of rare quality, with straight, well-picked loins. Mr. Henry Mitchell coming in next with a pair that scarcely carried such good coats. With Large Whites Mr. Hiscock came again to the fore. He has evidently now settled down on a choice line of blood; Mr. Benjafield, who was second, also showing improvement. However, the latter turned the tables on Mr. Hiscock in the class for Middle or Small Whites, Mr. Alfred C. Twentyman taking the reserve. In the cross-bred class Mr. Julius Fricker secured first with a Large White and Berkshire cross. The classes for single pigs exceeding twelve months old filled [illegible] Earl Egerton of Tatton having [illegible] in the Berkshire class with a pig having a capital [illegible] and very deep, second prize going to a rather [illegible] pig of Mr. Alexander Henderson, M.P. In the Tamworth class the judge went for Mrs. Ibbotson's big weight sow against the more even quality of Mr. D. W. Philip's exhibit. Mr. Sanders Spencer had no competition in the Large White class and took first and reserve in the Middle White. Mr. E. Henry Lloyd was placed [illegible] backed pig that lacked at tail, Mr. Alfred C. Twentyman being reserved and Mr. Sanders Spencer commended. This was a rather weak class. In the cross-bred class Mr. Sanders Spencer took first in a class of three, Mr. Julius A. Fricker being reserved. The total entries of pigs were fifty-four. It is to be hoped that next year they will increase in numbers as well as in quality.

Corn, Roots, Potatoes, &c.

There was a larger exhibit both of corn and roots than usual. The latter, besides having [illegible] classes, presented to view both mangolds and swedes of marvellously heavy weights, many of which were also well shaped. Popular opinion as to [illegible] directed to them than to the sole of the [illegible] taining the potatoes and corn. Mr. John Perry, The Grange, Oswaldkirk, Yorks, was again successful, carrying off the cups for the Procter and Ryland prize for best collection, and that given by Messrs. Webb and Sons for the best exhibit of three varieties of their famous varieties of mangolds. Messrs. Webb also offered a cup for the best exhibit of their Mammoth Long Red mangel, but this was won by Mr. T. Penn, Worminghall, Oxon.

In the open class for long mangels, white and fourteen entries, Mr. Penn was also victorious with Webb's Highly Selected variety, the second prize and reserve going to Mr. P. E. Le Feuvre. Mr. Perry competed with Webb's sort, and was h.c. for fine specimens. In the other open class for Globe and Intermediate mangels Mr. Perry again came to the front.

The kohl rabi open class had eight entries, and Mr. Perry won again with very fine but good quality specimens grown from Webb's seed. The exhibit of the Birmingham Sewage Farm came second, and their specimens were weighty, but not so nice as the first prize ones, or, indeed, of those of the two other lots which had h.c., grown by Mr. Perry and the executors of Joseph Smith.

The cup given by Messrs. Webb for the best exhibit of their Imperial swede drew [illegible] entries, and Mr. Perry won again with some broad-shouldered fine specimens, Mr. W. L. Anson, Iverley, Stourbridge, being reserve with very fine roots. The open class for swedes had eighteen entries, and there was general elimination from [illegible] marvellous size [illegible] many of the roots. The judge seemed to give [illegible] to the most weighty ones, and it is generally thought they might have had more regard to quality. The first prize was won by Mr. W. L. Anson with exceedingly [illegible] Webb's seeds, the second prize going to Mr. F. W. Price, Cranbrook. Mr. John Perry [illegible] and [illegible] Mr. Penn [illegible] Mr. [illegible] Hayter and Son [illegible] both having barren honours.

The white Portugal onion class [illegible] great attention owing to the beautiful [illegible]

H.M. the Queen's Shorthorn Heifer "Cicely," the Champion Beast at the Birmingham Fat Stock Show.

the Duke of Portland of Sutton's Green Globe sort. These were placed for first prize, reserve, and h.c., the second prize going to Mr. W. H. Davies for fine turnips. In the class for yellow-fleshed Mr. J. Hayton, Wigton, was first with very fine roots from Webb's seeds, the executors of J. Smith being second with weighty ones of Sutton's variety.

For white Belgian carrots the Duke of Portland was again first, also taking reserve with Sutton's variety, Mr. T. Penn winning second prize with Webb's and the executors of J. Smith being h.c. also with Webb's. Carrots of any other variety brought a class of a dozen entries, in which there was keen competition, the Duke of Portland being first and reserve with Webb's Intermediate, Mr. R. W. Hudson, Danesfield, Great Marlow, being second with Sutton's Intermediate.

The ox cabbage excited as much wonderment as anything, owing to their enormous size combined with high quality. Mr. John Perry won another first with broad, sound-hearted ones from Webb's seeds, Mr. Hollinworth being second with his own selected variety.

Potatoes were considered to be well up to the ordinary standard, and among the exhibits were several of the old familiar names, who shared very evenly the prizes. The classes were ten in number. The first for twelve varieties, the second for six, the third for four, two being white and two coloured; the fifth for the two varieties most suitable for farm culture, after which there were distinctive classes for kidney-shaped and round, a class for the most handsome dish, and one for the best new variety.

In the corn section there was a very interesting departure in an additional barley class for the silver cup of the value of 10gs., given by Mr. H. Mitchell for the best sample of a bulk of not less than 10qrs. Mr. R. Preece won this trophy with a very prime malting sample of Webb's Chevalier variety. In the ordinary barley class Mr. Preece again won second prize with the same kind, the first prize going to Mr. T. Coleman, Mobberley, Cheshire, for Garton's Invincible. The two prizes for white wheats brought nine samples into competition, some of which were nice specimens.

There were seven exhibits of white oats and ten for black. In the former Mr. Horwood was first, and Mr. Coleman second. In the competition with black oats both prizes fell to Webb's varieties. Mr. H. S. Dane, Huyton, Liverpool, winning the first, and Mr. Charles Showell, Snitterfield, Stratford-on-Avon, second.

Beans and peas were remarkable for their symmetrical, even samples. Mr. Horwood was first for beans. Mr. T. W. Purser won both prizes for peas.

Judges.

CATTLE (Shorthorns, Scots, and Crosses).—Mr. P. A. Evans, Sherlowe, Wellington, Shropshire; Mr. Alexander Strachan, Wester Fowlis, Alford, N.B. (Herefords, Devons, Welsh, Kerries, and extra Stock.—Mr. Edwin F. Maunder, Crichel, Wimborne; Mr. W. Thomas, The Hayes, Sully, Barry.

BUTCHERS' PRIZES.—Mr. T. H. Crutchley, Stratford-road, Birmingham; Mr. Stephen Slattery, Smithfield Market, Birmingham; Mr. W. J. Walter, Dale End, Birmingham.

SHEEP.—Mr. Allan Cooper, Norton, Bishopstone, Lewes, Sussex; Mr. Andrew E. Mansell, Harrington Hall, Shifnal.

PIGS.—Mr. Arthur S. Gibson, The Elms, Ruddington, Nottingham.

CORN.—Mr. Henry Mitchell, The Cedars, Augustus-road, Edgbaston, Birmingham; Mr. R. F. Todd, Blythewood, Edgbaston, Birmingham.

ROOTS.—Mr. John Myatt, Lynn House, near Walsall; Mr. Francis H. Yates, Blackbrook, Weeford, Lichfield

POTATOES.—Mr. W. Halliday, Patshull Gardens, Wolverhampton; Mr. J. M. Johnston, The Gardens, Hints Hall, Tamworth.

Hickman, Red Hall, Broome, near Stourbridge; r, Mr. E. B. Wynn, Welcombe Bank, Stratford-on-Avon; hc, Sir John Swinburne, Bart.; Colonel Platt, C.B.; c, Mr. A. Wotherspoon, Monks Kirby, Lutterworth; the Exors. of the late Mr. J. Smith.

EXTRA STOCK, NOT QUALIFIED TO COMPETE IN CLASSES 1 to 24.

Class 26.—Oxen or steers, not exceeding four years old: 1, Mr. A. H. Pooler; 2, Mr. A. Wotherspoon; r, Mr. A. Green, Howers Farm, Ombersley, near Droitwich.

Class 27.—Cows or Heifers not previously exhibited at Bingley Hall: 1, Mr. R. M. Greaves; 2, Colonel Platt, C.B. [Madryn Belle).

SHEEP.

WETHER CLASSES.

SOUTHDOWNS.

Class 28.—Three fat wethers, not exceeding twenty-three months old: 1, Mr. H. L. B. McCalmont, Cheveley Park, Newmarket; 2, Mr. C. R. W. Adeane, Babraham Hall, Cambridge; 3, H.R.H. the Prince of Wales; r and hc, Mrs. Montifiore, Worth Park, Crawley, Sussex.

SHROPSHIRES.

Class 29.—Three fat wethers, not exceeding twenty-three months old: 1 and 2, Mr. Philo L. Mills, Ruddington Hall, Nottingham; 3 and r, Capt. H. L. Townshend; hc, c, Mr. R. P. Cooper; c, Mr. A. S. Berry [2], Pheasey Farm, Great Barr, Birmingham, Mr. Herbert Mitchell, Longnor Hall Farm, near Penkridge, Staffs.

OXFORDSHIRES.

Class 30.—Three fat wethers, not exceeding twenty-three months old: 1, 2, Miss Alice de Rothschild.

HAMPSHIRE AND OTHER DOWNS.

Class 31.—Three fat wethers, not exceeding twenty-three months old: 1, r, Mr. T. F. Buxton, Waters-place, Ware, Herts; 2, c, The Right Hon. Lord Rothschild, Tring Park, Tring, Herts; c, The Right Hon. the Earl of Carnarvon, Highclere Castle, Newbury.

CROSSBREDS.

Class 32.—Three fat wethers, not exceeding twenty-three months old: 1, Mr. T. Rush, Mitchells, Saffron Walden, Essex.

LAMB CLASSES.

SOUTHDOWNS.

Class 33.—Three fat wether lambs, lambed in 1900: 1, 3, Mr. H. L. B. McCalmont; 2, Mr. W. Wright, Lea Park, Godalming; r, c, Mr. C. R. W. Adeane; c, Mrs. Montifiore.

SHROPSHIRES.

Class 34.—Three fat wether lambs, lambed in 1900; 1, and 3, Mr. P. L. Mills; 2, Dr. B. Wall, Hazelwood, Coleshill; r, The Lady de Rothschild, Aston Clinton, Tring; hc, Captain H. L. Townshend, Caldecot Hall, Nuneaton; c, Mr. R. P. Cooper, Shenstone Court, Lichfield.

OXFORDSHIRES.

Class 35.—Three fat wether lambs, lambed in 1900: 1, Mr. H. W. Stilgoe, The Grounds, Adderbury, near Banbury, Oxon.

HAMPSHIRE AND OTHER DOWNS.

Class 36.—Three fat wether lambs, lambed in 1900: 1, r, The Right Hon. Lord Rothschild (Hampshire); 2, 3, Mr. T. F. Buxton (Hampshire); c, Mr. L. H. Baxendale, Greenham Lodge, Newbury, Berks (Hampshire).

CROSSBREDS.

Class 37.—Three fat wether lambs, lambed in 1900: 1, Mr. T. Rush (Oxford and Hampshire); 2, r, Mr. J. Matthews (Oxford and Hampshire).

THE BUTCHERS' PRIZES.

(The gift of the Butchers of Birmingham and District.)

Class 38.—Three Butchers' wethers, pure or crossbred, of any age: 1, Mr. T. Rush (Oxford and Hampshire cross); 2, Mr. P. L. Mills (Shropshire); r, Captain H. L. Townshend (Shropshire); hc, Mr. H. Mitchell (Shropshire); c, Mr. J. Matthews (Hampshire).

PIGS.

BERKSHIRES.

Class 39.—Two fat pigs, not exceeding nine months old: 1, Mr. A. Hiscock, jun., Manor Farm, Motcombe, Shaftesbury, Dorset; 2, Mr. J. A. Fricker, Burton Mere, Wiltshire; r, A. Henderson, M.P., Buscot Park, Faringdon, Berks.

TAMWORTHS.

Class 40.—Two fat pigs, not exceeding nine months old: 1, Mrs. E. Ibbotson, Gun Hill, Arley, Coventry; 2, Mr. D. W. Philip, The Ashes, Whitacre, Birmingham.

LARGE WHITE BREED.

Class 41.—Two fat pigs, not exceeding nine months old: 1, Mr. A. Hiscock, jun.

MIDDLE WHITE OR SMALL WHITE BREEDS.

Class 42.—Two fat pigs, not exceeding nine months old: 1, Mr. A. Hiscock, jun.; 2, r, Mr. E. H. Loyd, Langleybury, Kings Langley; c, Mr. S. Spencer, Holywell Manor, St. Ives, Hunts.

BERKSHIRES.

Class 43.—Two fat pigs; exceeding nine and not exceeding 12 months old: 1, Mr. A. Hiscock, jun.; 2, hc, Mr. N. Benjafield, Shorts Green Farm, Motcombe, Shaftesbury, Dorset; r, Mr. R. W. Hudson; hc, Mr. J. A. Fricker.

TAMWORTHS.

Class 44.—Two fat pigs, exceeding nine and not exceeding twelve months old: 1, Mr. D. W. Philip; 2, Mr. W. H. Mitchell; r, Mrs. E. Ibbotson.

LARGE WHITE BREED.

Class 45.—Two fat pigs, exceeding nine and not exceeding twelve months old: 1, Mr. A. Hiscock, jun.; 2, Mr. N. Benjafield.

MIDDLE WHITE OR SMALL WHITE BREEDS.

Class 46.—Two fat pigs, exceeding nine and not exceeding twelve months old: 1, Mr. N. Benjafield; 2, Mr. A. Hiscock, jun.; r, Mr. A. C. Twentyman, Castlecroft, Wolverhampton.

ANY OTHER PURE BREEDS OR CROSSBREED.

Class 47.—Two fat pigs, not exceeding twelve months old: 1, Mr. J. A. Fricker; 2, Mr. A. Hiscock, jun.; r, Mr. H. Wynne, Hadley, near Droitwich; hc, Mr. S. Green, Hadley Farm, Ombersley, near Droitwich; Mr. A. Green.

SINGLE PIGS.

Class 48.—Fat Berkshire pig, exceeding twelve months old: 1, r, the Right Hon. Earl Egerton of Tatton, Tatton Park, Knutsford; 2, Mr. A. Henderson; c, Mr. J. A. Fricker.

ROOTS.

Class 1.—1, Mr. J. Perry, The Grange, Oswaldkirk, Yorks (Webb's); r, Mr. T. Penn, Worminghall, Thame, Oxon. (Webb's).

Class 2.—1, Mr. T. Penn (Webb's); r, Mr. J. Perry (Webb's).

Class 3.—1, Mr. J. Perry (Webb's Yellow Globe); r, Mr. T. Penn (Webb's).

Class 4.—Long Mangold; Wurzel: 1 and hc, Mr. T. Penn (Webb's); 2 and r, Mr. P. Le Feuvre, Morville House, St. Owens, Jersey (Webb's and Carter's); c, the Right Hon. Lord Wantage, V.C., Lockinge House, Wantage (Sutton's).

Class 5.—Globe and Intermediate Varieties of Mangold Wurzel: 1 and hc, Mr. J. Perry (Webb's Yellow and Webb's Yellow Globe); 2, r, and hc, Mr. P. E. Le Feuvre (Carter's Globe, Carter's Yellow Intermediate, and Carter's Globe Windsor Prize-taker).

Class 6.—Kohl Rabi: 1 and r, Mr. J. Perry (Webb's); 2, Birmingham Tame and Rea District Drainage Board, Home Farm, Tyburn, Birmingham; hc, the Exors. of late J. Smith, Esq. Webb's).

Class 7.—Swedes: 1, Mr. J. Perry (Webb's); r, Mr. W. L. Anson, Iverely, Stourbridge (Webb's).

Class 8.—Swedes of any variety: 1 and hc, Mr. W. L. Anson (Webb's); 2, Mr. T. W. Purser (Carter's Elephant); r and c, Mr. John Perry (Webb's and Webb's Imperial); hc, Mr. Joseph Hayton, Beck Farm, Wigton, Cumberland (Webb's); c, The Right Hon. the Earl of Wemyss, Craigielaw, Longniddry, N.B. (Webb's).

Class 9.—Common Turnips, white flesh: 1, r, and hc, his Grace thd Duke of Portland, K.G. (Sutton's Green Globe); 2, Mr. W. H. Davies (Webb's); c, Mr. John Perry (Webb's Green Globe); Mr. W. Cross, Astley House, Alveley, Bridgnorth (Webb's).

Class 10.—Common Turnips, yellow flesh: 1, Mr. J. Hayton (Webb's); 2, the exors. of late J. Smith, Esq. (Sutton's); r, J. D. Fletcher, Esq. (Green Top); hc, Mr. W. Sim, Gourdas, Fyvie, Aberdeenshire (Webb's); c, Mr. W. Maxwell, Sparnel Bank, Galston, N.B. (Sutton's).

Class 11.—Carrots, white Belgian: 1 and r, his Grace the Duke of Portland, K.G. (Sutton's); 2, Mr. T. Penn (Webb's); hc, the Exors. of late J. Smith, Esq. (Webb's).

Class 12.—Carrots, any other variety: 1 and r, his Grace the Duke of Portland, K.G. (Webb's Intermediate); 2, R. W. Hudson, Esq. (Sutton's Red Intermediate); hc, the Right Hon. the Dowager Lady Hindlip, Hadsor House, Droitwich; Mr. T. Penn (Webb's).

POTATOES.

Class 14.—Twelve varieties, distinct, of each twelve tubers: 1 and 2, Mr. D. H. Wells, Tysoe, Kineton; 3, Mr. E. S. Wiles, The Rookery Gardens, Down, Kent.

Class 15.—Six varieties, distinct, of each twelve tubers: 1 and 2, Mr. D. H. Wells; 3, Mr. E. S. Wiles.

Class 16.—Four varieties, distinct, two white and two coloured, of each twelve tubers: 1, Mr. D. H. Wells; 2, Mr. F. Williams, High Street, Thornbury; 3, Mr. S. T. Parker, Scotforth, Lancaster (The Dean, Pink Perfection, General Roberts, Satisfaction).

Class 17.—Four varieties, distinct, most suitable for field or farm culture, of each twelve tubers: 1, Mr. F. Williams; 2, Mr. B. Parker; 3, Mr. T. Penn (Motor, Goldfinder, Renown, Pink Perfection).

Class 18.—Two Varieties, distinct, long or kidney shaped: 1, Mr. F. Williams; 2, Mr. S. T. Parker (Reading Giant, General Roberts); 3, Mr. T. Chettle, Manor Farm, Reading (Sutton's Reliance, Up-to-Date).

Class 19.—Two varieties, distinct, round, of each twelve tubers: 1, Mr. T. Penn (Webb's Goldfinder, Satisfaction); 2, Mr. F. Williams; 3, Mr. S. T. Parker (Cigarette, Scottish Triumph).

Class 20.—One variety, long or kidney shaped, twelve tubers: 1, Mr. F. Williams; 2, Mr. D. H. Wells.

Class 21.—One variety, round, twelve tubers: 1, Mr. T. Penn (Satisfaction); 2, Mr. F. Williams.

Class 22.—The most handsome dish, any variety, twelve tubers: 1, Mr. F. Williams; 2, Mr. D. H. Wells.

Class 23.—The best new variety, not yet offered in commerce: 1, Mr. E. S. Wiles; 2, Mr. F. Williams.

*** Owing to the great pressure on our space we are compelled to hold over until next week several reports of shows and societies.

Lord Tredegar's.

The fame of the annual west country exhibition of fat and other cattle, horses, sheep, pigs and poultry established by Lord Tredegar is only equalled by the popularity it enjoys, and consequently it is hardly necessary to mention that the show which took place on Tuesday and Wednesday was visited by the usual large number of farmers and others. As regards the entries they were not quite so numerous as in previous years, but the quality was above the average, and the competition in many classes was keen. Shorthorns and Herefords, as usual, practically monopolised the cattle show. There were 66 of the former compared with 63 last year, but numerical improvement cannot be reported with regard to the Herefords, which numbered 64 against 77 last year. There were 38 entries of cattle without regard to breed compared with 33 last year. In sheep and pigs there was a falling off, the former numbering 16 entries against 19, and the latter 21 against 34. Cheese is an insignificant section, the entries being 11 against 18. In cart horses, hacks, etc., there was an improvement, 109 being entered, against 97 at the previous show. Hunters, for some reason, showed a great falling off, numbering but 25, against 42.

The great feature of the show is undoubtedly the trials of hunters, which take place on the second day some four miles out of Newport at Lord Tredegar's stud farm at Coedkernew, and it is rendered a most sporting event by reason of the fact that all the competitors are required to jump a stiff mile of natural hunting country and acquit themselves to the satisfaction of the judges before they become qualified to be judged for their good looks. No doubt the test is too severe for many show hunters to succeed in, and this year the going was not at all easy, owing to the heavy rains of Monday night, but for all that the refusals were very few, and the majority of horses showed excellent form. The heavy-weight class numbered twelve entries, a third of which failed to put in an appearance, and here premier honours were bestowed upon a short-legged, extra good-looking, nameless grey gelding exhibited by F. Phillips, which negotiated the stiff course without making the slightest mistake. The second award was not so popular, as it was bestowed upon the bald-faced bay, President, exhibited by Mr. Cubitt, which was very deficient in manners, in which respect Mr. Nixon Grey's commended pair, Donnerhuil and Marquis, both excelled, whilst the former was the most bloodlike competitor in this class. Lightweights numbered 16, but of those a trio were absentees, the first prize falling to Mr. Nixon Grey's brown Merthyr Girl, which jumped faultlessly, and is good looking enough to win at most shows. Next to her came Mr. Brain's Gipsy, another very smart performer, as also are Mr. Benyon's King of Meath and Dr. Rutherfoord Harris, M.P.'s., Burnett. Next to the hunter trials in popular interest comes the contest for honours which annually takes place between the two great breeds—Herefords and Shorthorns. Here, certainly, the spectator was treated to one of the finest displays of Herefords to be seen anywhere in the kingdom; and of late years Shorthorn breeders have turned their keen attention to Tredegar, with a full appreciation of the estimation in which prizes awarded there are held in the cattle world. At one period, Herefords had matters pretty well their own way, and then the Shorthorns for some time pushed aside their white-faced relations. Latterly, Herefords have been coming slowly and surely to the front, and the sunshine of public favour has added unquestionably to the old time claims possessed by this fine breed. As above mentioned, Shorthorns were more numerous than the Herefords, but the fanciers of the latter breed had the satisfaction of knowing that in the opinion of the judges Herefords made up in quality what they lacked in numbers. This is especially emphasised by the fact that both the champion prizes went to specimens of that breed. It is a rare thing for one breed to take both prizes, honours being generally even, but this year the Hereford breed had the great distinction of securing both honours. To do battle for the Shorthorn bulls Mr. Stratton's well-known Alto was selected. He was the winner on his side in the old bull class, and his ring performances in many parts of the country have proved his claims. This fine specimen is by Excelsior, and is five years six months and sixteen days old. His rival was Sir J. Pulley's Protector, aged three years ten months and five days, one of Albion's offspring. After mature consideration, the champion piece of plate, value 20 guineas, was awarded to the Hereford, which has a distinguished record. Last year the male champion prize at Tredegar also fell to the Hereford breed, the winner on that occasion being M. Farr's Britisher, which this year had to be content with second honours in the old bull class. The decision of the judges was next taken on the claim of the contestants for female championship honours, and here Mr. D. Evans, of Ffrwdgrech, Brecon, won with his Hereford Friend II., aged two years ten months and three days, by Tut's dam Friend.

As to the class prizes it may be mentioned that there was a large entry of Shorthorn bulls above two years old, the first prize going to Mr. Stratton's Alto. Mr. G. F. King was held in reserve with Chewton Oxford Cupellus, a bull which has made for itself a very first-rate reputation. In the under two-year-olds the contest lay between Rothwell Augustus, shown by Colonel Makins, of Henley-on-Thames, and Lord Fitzhardinge's Lord Love-me. The latter was the junior, and had to be content with second place. The bull calves were really a grand lot, and here, as in several others, the judges did not hand out their favours freely. Mr. Deane Willis won with Treasure Trove, and Mr. W. Heaton (Lancashire) was second, the reserve being Mr. G. F. King's Lord Bruce, a youngster of the very brightest performance possible for the best stock breeder has ever reared. The cow class was headed by Colonel Makins, who thus scored on both sides of his herd, he having won the class for two-year-old bulls. The two-year-old heifers was a win for Mr. Deane Willis, with White Heather. The yearling heifers quite deserved the attention which they attracted, and the calves were even a lot better. So good indeed were they that the judges had to call in a third. This gentleman practically reversed the standing of the first four, and discarded the second animal altogether. The latter was Mr. R. Stratton's Calico Belle. Looking over her from behind she left nothing to be desired, but, glancing at her all round, she appeared to be too tucked up altogether. In the end the called-in judge awarded the first prize to Mr. J. Thorley's There's Hair, and second to Mr. J. Deane Willis's Vain Duchess. These decisions did not meet with general approval. The best in the class to outsiders seemed unquestionably to be Mr. J. Dean Willis's Bapton Jewel, which was only awarded a v.h.c. In the senior bull class for Herefords just half a dozen were stalled. The first prize, after a close inspection, fell to Sir J. Pulley, Bart., with Protector. The young bulls made up an especially strong class, and was well headed by Captain Heygate's Iron Duke. The two-year-old heifers were a small but grand lot, and Mr. D. Evans's Friend II. is sure to be heard of again. The other Hereford classes were, from the point of quality, well filled.

There was a very good show of fat stock, and also of poultry and pigs, but sheep were rather scantily represented. In the long wool section Mr. W. Thomas, The Hayes, Sally, Barry, carried off the whole of the prizes, whilst in short wools, Mr. Tanner, Shrewsbury, and Mr. J. Matthews, Winterbourne, were the chief winners. The pigs were a complete success, and aroused a good deal of interest. In this section Lord Southampton, the Rev. Booth Corfield, and Mr. J. A. Fricker were to the front, so far as the white breeds are concerned, while Mr. A. Henderson, M.P., swept the board at most prizes in Blacks, of which Mr. Fricker and D. Radcliffe and Harris, M.P., were also successful exhibitors.

The judges were as follows:—Shorthorns, Mr.

Mr. R. Mattock's Shorthorn Heifer "Heather Belle," Winner of Special Prize at Norwich Fat Stock Show for the Best Beast Bred and Fed in Norfolk.

W. Tindall, Wainfleet, Lincolnshire, and Mr. H. Butler, Badminton Farm, Chippenham. Hereford: Mr. F. Evans, The Weston, Bredwardine, Hereford, and Mr. Rees W. Bridgwater, Llangorse, Talgarth. Sheep and pigs: Mr. A. C. Skinner, Pound, Bishop's Lydteard, and Mr. P. A. Evans, Sherlaw, Wellington, Salop.

Prize List.

CATTLE.

SHORTHORNS.

Bull above two years old: 1, Mr. R. Stratton, The Duffryn (Alto); 2, Mr. C. W. Brierley, Brimfield, Herefordshire (Ben Lee); r, Mr. G. F. King, Chewton Keynsham (Chewton Oxford Comelius); hc, Rev. W. Booth Corfield, M.A., Llangatto, Mon. (Usk Rport).

Bull above one year and under two years old: 1, Colonel Mirams, Henley-on-Thames (Rotherfield Augustus); 2, Lord Fitzhardinge, Berkeley Castle (Lord Inverness); r, Lord Morton, Chipping Norton (Sir Barrington); c, Mr. J. Deane Willis, Bapton Manor (Bapton Diamond); Mr. J. T. Hobbs, Maisey Hampton (New Year's Gift).

Bull calf: 1, Mr. J. Deane Willis (Treasure Trove); 2, Mr. W. Heaton, Thorneyholme, near Bolton (Tommy Atkins); r, Mr. G. F. King (Lord Bruce); vhc, Colonel Sir N. Kingscote, K.C.B., Kingscote, Gloucestershire (Lord of the Winches).

Cow, in calf or in milk: 1, Colonel Makins (Welsh Gem); 2, Mr. C. W. Brierley (Ingram's Queen); r, Lord Tredegar (Snowdrop 8th); hc, Mr. C. W. Brierley (Autumn Queen).

Two-year-old heifer: 1, Mr. J. Deane Willis (White Heather); r, Mr. G. D. Lloyd, Wrexham (Ringdale Nonpareil 2nd).

Yearling heifer: 1, Lord Tredegar (Lassie 3rd); r, Mr. S. Hill, Langford, near Bristol (Azalea); c, Mr. J. Richards, Llanelly (Lady May).

Heifer calf: 1, Mr. J. Thorley, Faringdon (There's Hair); 2, Mr. J. Deane Willis (Vain Duchess); vhc, Mr. J. Deane Willis (Bapton Jewel); c, Lord Tredegar (Marigold 23rd); Mr. R. Stratton (Calico Belle); Mr. S. Hill (Trilby 4th).

HEREFORDS.

Bull above two years old: 1 and c, Sir J. Pulley, Bart., Lower Eaton, Hereford (Protector); 2, Mr. E. Farr, Court of Noke, Pembridge, Herefordshire (Britisher); r, Mr. A. R. Firkins, Bishops-Frome (Lurdan); hc, Earl of Coventry, Worcester (Mercury).

Bull above one year and under two years old: 1, Captain E. S. A. Heygate, Leominster (Iron Duke); 2, Mr. J. Tudge, Craven Arms, Salop (Albany); r, Sir J. Pulley, Bart. (Eaton Defender 12th); hc, Lord Llangattock, The Hendre (Rougemont); Mr. H. Haywood, Hereford (Wintercott); c, Mr. W. Tudge (General Buller).

Bull calf: 1, Mr. A. K. Firkins (Lucifer); r, Mr. W. Tudge (Happy Christmas); hc, Captain P. A. Clive, M.P., Treville (Whitfield Roberts); Mr. H. W. Taylor, Ledbury (Abergavenny); c, Mr. W. H. Davies, Hereford (De Weston); c, Captain P. A. Clive, M.P. (Whitfield Buller).

Cow in calf or in milk: 1, Mr. E. Caddick, Froomes Hill, Ledbury (Antippa 2nd); 2, Mr. J. Tudge (Rustic Maid); r, Mr. J. Tudge (Rubella).

Two-year-old heifer: 1 and c, Mr. D. Evans, Ffrwdgrech, Brecon (Friend 2nd); 2, Mr. A. E. Hughes, Wintercott (Ladylike 2nd); r, Mr. R. Green, Kington (Waterwed).

Yearling heifer: 1, Mr. R. Green (Ladysmith); 2, Mr. R. Green (Imperatrix); r, Mr. W. Tudge (Peggy Primrose); hc, Mr. S. H. Armitage, Kinnersley (Delta); c, Mr. H. W. Taylor (Violet Agnes).

Heifer calf: 1, Mr. R. Green (Prudentia); 2, Mr. R. Green (Maysie); r, J. Tudge (Royal Gem); hc, Mr. W. H. Davies, Defaney; c, Mr. Ross Keene, Llanfihangel Court, Chepstow (Miss Rokeby); Mr. D. Evans (Ruby); Mr. H. Haywood (Gipsycraft).

WITHOUT REGARD TO BREED.

Fat ox or steer: 1, Mr. J. Thorley (Bobs); 2, Mr. P. Coats, Clifford; r, Lord Tredegar.

Fat cow or heifer: 2, Mr. J. Joicey, Poulton Priory, Fairfield, Gloucestershire (Sanitas); r, Mr. H. Chambers, Path Farm, Othery, Bridgwater (Ruby).

Fat ox, steer, cow, or heifer (the property of a tenant farmer farming not more than 150 acres): 1, Mr. J. H. Hale, Cold Harbour, Nash, Newport.

Dairy cow in calf or in milk (to be milked overnight): 1, Mr. G. Gerrard, Offerton Farm, Hindlip, Worcester (Blanche); 2, Mr. A. Hiscock, jun., Manor Farm, Motcombe; r, Mr. G. F. Cullimore, Berkeley, Gloucestershire (Princess).

Pair of two-year-old steers: 1, Mr. P. Coats, Clifford; 2, Captain Heygate, Buckland, Leominster.

Pair of two-year-old steers (the property of a tenant farmer farming not more than 150 acres): 1, Mr. T. J. Cox, Newport; 2, Mr. W. Lewis, Llangibby; r, Mr. F. Carter, Newport.

Best pair yearling steers: 1, Lord Tredegar; 2, Captain E. S. A. Heygate; r, Mr. D. Evans.

Two-year-old breeding heifer (the property of a tenant farmer farming not more than 150 acres): 1, Mr. J. Tudge; r, Mr. J. H. Hale, Newport.

SHEEP.

LONGWOOL.

Three shearling ewes: 1, Mr. W. Thomas, The Hayes, Sully, Barry.

Ram lamb: 1, Mr. W. Thomas.

Three ewe lambs: 1, Mr. W. Thomas.

Three fat wether lambs: 1, Mr. W. Thomas.

SHORTWOOL.

Three shearling ewes: 1, Mr. A. Tanner, Shrewsbury; vhc, Mr. J. Matthews, Winterbourne.

Ram lamb: 1, Mr. T. Fenn, Ludlow; r, Mr. A. Tanner; vhc, Mr. A. Tanner.

Three ewe lambs: 1, Mr. J. Matthews; vhc, Mr. A. Tanner; hc, Mr. T. Fenn.

Three fat wether lambs: 1, Mr. J. Matthews; r, Mr. H. Bridgman, Cove Hill Farm, Downend.

PIGS.

Boar: 1, Lord Sherborne, Northleach, Gloucestershire; r, Rev. W. Booth Corfield, M.A.

Sow and litter of pigs: 1, Rev. W. Booth Corfield, M.A.; vhc, Mr. F. Haggett, Newport.

Horsham

The annual show of fat cattle, sheep and pigs, etc., at Horsham, took place on Wednesday in a meadow in the Worthing road. The number of entries largely exceeded those of previous years, and in all hands there were signs of increased interest in this annual event.

The show was considered to be the best held for some years. There was an excellent show of fat beasts, and the champion, an Aberdeen Angus-Sussex, which secured the champion prize, sent by Mr. G. F. Stanford, was considered to be an extraordinary beast out of the end to any show. The horses were a very useful lot, while the sheep were also of a nice quality. The display of roots was very good indeed. The judges for the fat stock were: Beasts, Messrs. W. Greig and A. Williamson; horses, Mr. Clement Keevil; sheep and pigs, Mr. Newton Clayton.

Prize List.

CATTLE.

Steer, under three years of age: 1, Mr. Alfred Scrase (Sussex); 2, Mr. G. F. Stanford (Aberdeen-Angus).

Steer, under two years and six months of age: 1, Mr. C. A. Bryant (cross-bred, Hereford and Shorthorn); 2, Mr. E. E. Braby (Sussex).

Steer, under two years of age: 1, Mr. W. G. Fladgate (Sussex); 2, Mr. E. E. Braby (Sussex); 3, Mrs. Montefiore (Sussex); hc, Mrs. Montefiore (Sussex); c, Mr. G. F. Stanford (Aberdeen-Angus).

Heifer, under three years of age: 1, Mr. G. F. Stanford (cross-bred Aberdeen-Angus-Sussex); 2, Sir M. R. Burrell, Bart. (Sussex); vhc, Mr. W. G. Fladgate (Sussex); Mr. J. E. Barnett (Shorthorn); hc, (2) Mr. W. P. M. Dennett (Devon).

Two beasts, under two years of age: Mr. G. F. Stanford (Aberdeen-Angus-Sussex, and Aberdeen Angus-Shorthorn).

Steer or heifer of any age, the property of a tenant farmer: 1, Mr. W. G. Fladgate (Sussex); 2, Mr. W. G. Fladgate (Sussex); vhc, Mr. T. Luckin (Sussex); c, (2) Mr. W. P. M. Dennett (Devon).

Bull of any pure breed under two years of age, which shall be for service in the Horsham market district at a sum not exceeding one guinea: 1, Mr. E. E. Braby (Sussex); 2, Mr. C. W. Schroeter (Aberdeen-Angus).

Two beasts of any age or breed, that have not been housed or yarded between June 1st and September 1st, 1900: 1, Sir M. R. Burrell, Bart. (Sussex); 2, Mr. W. G. Fadgate (Sussex); 3, Mr. G. F. Stanford (Shorthorn); c, Mr. H. C. Lee Steere (Devon); Mr. W. Stanford (Devon).

Bull of any pure breed, which shall be for service in the Horsham market district, at a sum not exceeding seven shillings and sixpence: 1, Mrs. Montefiore (Sussex); r, Mr. E. E. Braby (Sussex); hc, Mr. J. E. Barnett (Shorthorn).

SPECIAL PRIZES.

Champion prize, £10 10s., for the best beast shown: Mr. G. F. Stanford.

£5 5s. for the best beast shown (except Sussex), and to which the Town prize shall not have been awarded: Mr. C. A. Bryant.

£5 5s. for the best beast shown of pure Sussex breed, and to which the Town prize shall not have been awarded: Sir M. R. Burrell, Bart.

A piece of plate for the best beast shown, bred and fed by the exhibitor: Mr. E. E. Braby.

£5 for the best beast shown by a tenant farmer, not being an owner of more than 200 acres of land, and living in the Crawley and Horsham fox hunting country, and over whose land the hounds have been in the habit of hunting or drawing: Mr. Alfred Scrase.

A perpetual challenge cup, of the value of £50, for the best Sussex beast in the yard: Sir M. R. Burrell, Bart.

SHEEP.

Five sheep, under twelve months of age, not having been trimmed or sheared after September 29th: 1, Mrs. Montefiore (Southdown); 2, Mr. H. F. Locke-King (Southdown); hc, Mr. C. A. Bryant (Southdown); Mr. H. F. Locke-King (Southdown).

PIGS.

Fat hog, under one year and three months of age: 1, Mr. G. F. Stanford (Berkshire-Sussex); 2, Mr. J. Innes (Berkshire); r, Mr. W. G. Fladgate (Berkshire); c, Mr. James Innes (Berkshire); Mr. W. G. Fladgate (Berkshire).

HORSES.

Cart mare in foal, or having had a foal within the last twelve months, in the former case the prize to be withheld until such time as the mare has foaled: 1, Mr. R. Barrow; 2, Mr. E. M. Bethune.

Cart gelding or filly under two years of age, exhibited by a bona-fide tenant farmer: 1, Mr. Thomas Luckin; 2, Mr. Thomas Watson.

Cart colt or filly under twelve months of age: 1, Mr. R. Barrow; 2, Mr. T. Luckin; r, Mr. T. Luckin; hc, Mr. R. Barrow.

Cart colt or filly under three years of age: 1, Mr. R. Barrow; 2, Mr. George Duck; r, Mr. T. Luckin; hc, Mr. T. Luckin.

Special prize (silver medal), given by the Shire Horse Society to the owner of the best Shire mare, filly, or filly foal that is registered, or eligible for registration in the Stud Book: Mr. R. Barrow.

Tonbridge.

The fourteenth annual show of fat stock, roots, etc., at Tonbridge, took place on Monday in the Agricultural Hall. In comparison with last year the entries, as a whole, were about the same, the number of beasts being a few less, and the sheep a few more. Indeed, with the exception of the beasts the entries were all well up to the average, the poultry being just about the same, and the same remark applying to roots, hops, butter, and corn. Potatoes, which were an extra class, contained seven entries, and, in common with other exhibitions which have been held in the county, they were of very good quality and size. The cattle attracted, perhaps, most attention, and the beasts shown were a very good lot. The judges were:—Cattle, Mr. H. Woods, Welbeck, Notts, and Mr. A. Parks, Bexhill; sheep, Mr. Julian Finn-Kelcey, Old Romney, and Mr. Allan Cooper, Lewis; pigs, Mr. John Noakes, sen., Lamberhurst; hops, Messrs. Matthews and Son, Borough, London, and Messrs. Latter and Sons, Borough, London.

Prize List.

CATTLE.

SUSSEX.

Fat steer, over two and under three years; first prize given by Mr. J. F. W. Deacon, J.P.: 1, The Earl of Derby, Bertley, Witley; 2, Mrs. E. Hills, Redleaf, Penshurst.

Fat steer, over one and under two years: 1, Mr. W. W. Hubble, the Elms, Hunton; 2, Mr. G. Warde, Tutsham Hall, West Farleigh.

Fat heifer, over two and under three years: 1, The Earl of Derby; 2, Mr. W. F. Winch, Tylsden, Cranbrook.

Fat heifer, over one and under two years: 1, Mrs. E. Hills; 2, Mr. W. W. Hubble.

ANY OTHER BREED.

Fat steer, over two and under three years: 1, Mrs. E. Hills; 2, Mr. H. M. Simmons, Alexandra Hotel, Eastbourne.

Fat steer, over one and under two years: 1, Mr. A. Ross, West Heathley, Sussex; 2, Major M. G. Best, Park House, Maidstone; 3, Mrs. E. Hole.

Heifer, over two and under three years: 1, Mr. G. J. Drummond.

Fat heifer, over one and under two years: 1, Miss Catley, Claydene, Edenbridge; 2, Mr. G. Osenton, Mariners, Westerham; 3, Mr. W. L. Campbell, Brantridge Park, Balcombe; hc, Mrs. E. Hills; r, Lords A. and L. Cecil, Orchardmains, Tonbridge.

ANY BREED.

Steer or heifer, under one year, not fatted expressly for slaughter: 1 and 3, Mr. D'Arcy Reeve, The Friars, Matfield; 2, Mrs. E. Hills.

Cow or heifer, over three years: 1, The Hon. R. Nevill, Birling Manor, Maidstone.

Steer or heifer, over two years, fed and shown by tenant farmer within a radius of ten miles: 1, Mr. R. Children, Howden, Tonbridge; 2, Mr. A. Langridge, Edenbridge.

SHEEP.

KENT OR ROMNEY MARSH.

Three wethers or three maids, over one and under two years: 1, 2, and hc, Mr. C. G. Neame, Faversham; vhc, Mr. H. Rigden, Lyminge, Hythe.

Three lambs (not rams), lambed in 1900: 1 and c, Mr. C. G. Neame; 2, Mr. H. Rigden.

SOUTHDOWNS.

Three wethers or three maids, over one and under two years; first prize given by Mr. O. E. D'Avigdor Goldsmid, J.P.: 1, Mrs. Montefiore, Worth Park, Crawley; 2, Mr. T. Miles, Buckwell, Wye; vhc and hc, The Earl of Derby; c, Tunbridge Wells Corporation, Great Lodge, Tonbridge, and Mrs. E. Hills.

Three fat ewes that have brought up a lamb this year: 1, Mr. T. Miles; 2, The Earl of Derby; vhc, The Earl of Ashburnham, Battle, Sussex.

Three lambs (not rams), lambed in 1900: 1, Mr. Whitaker Wright, Lea Park, Godalming; 2 and hc, Mrs. Montefiore; c, Mr. T. Miles.

ANY OTHER BREED.

Three wethers or maids over one and under two years old; prize given by the Tonbridge tradesmen: 1, Mr. G. J. Drummond; hc and c, Lord Hillingdon.

Three lambs (not rams), lambed in 1900: 1, Mr. C. W. Sofer-Whitburn, West Malling; hc, Mr. T. Joyce, Leybourne; c, Mr. G. J. Drummond.

ANY BREED.

Three sheep, any age, exhibited by a tenant farmer within fifteen miles of the show: 1 and 2, Mr. A. F. Finn-Kelcey; hc and c, Mr. R. Children, Hawden, Tonbridge.

PIGS.

ANY BREED.

Fat pig, over thirty weeks and under one year; first prize given by the Tunbridge Wells tradesmen: 1, Earl of Ashburnham; 2, Messrs. H. White and Son, Wateringbury.

Fat pig, under thirty weeks: 1, Mr. G. T. Tomkin, the Moat, Marden.

Three pigs, under twenty weeks: 1, Mr. G. T. Tomkin.

HOPS.

Best grown and managed sample, grown by exhibitor in Mid Kent, 1900; second prize given by the Anglo-Continental Guano Company: 1, Mr. W. Rogers, Farningham; 2, Mr. J. Taylor, Barnes Place, Hadlow.

Ditto in the Weald of Kent, or Sussex, 1900; first prize given by Messrs. W. H. and H. Le May: 1, Mr. A. Fairbrother, Wadhurst; 2, Mr. J. Waters, 1, Colman's Hatch, Tunbridge Wells.

Best grown and managed sample of Foggle hops, grown by exhibitor in 1900 within a radius of six miles from Capel church (Kent): 1, Mr. G. J. Drummond.

Best sample of hops, grown by the aid of Kentish manure: 1, Mr. T. Taylor, Paddock Wood; r, Mr. J. Taylor.

SOCIETIES.

Scottish Chamber.

A meeting of directors of the Scottish Chamber of Agriculture will be held within No. 5, St. Andrew Square, Edinburgh, on Wednesday next, the 5th inst., at 10.30 a.m. A note of the business is appended:—

I. Association with London Central Chamber of Agriculture.

II. Communication from Cheshire Chamber of Agriculture on swine fever.

III. Sheep-worrying case in Ross-shire. Communication from Easter Ross Farmers' Club.

IV. Proposal that the stated meetings of directors should be held quarterly instead of monthly as at present.

Bedfordshire Chamber of Agriculture and Farmers' Club.

A general meeting of members will be held in the large room under the Corn Exchange (not the Town Hall), Bedford, on Saturday, December 8th, at 4 p.m. The agenda is as follows:—

1. Consider the following subjects which are down for discussion at the Central Chamber of Agriculture in London, on Wednesday, December 12th, 1900—(*a*) the working of the Agricultural Rates Act of 1896 and the question of its renewal; (*b*) tuberculosis, and the working of the "Model Milk Clauses" in the private Bills of local authorities; (*c*) question of registration of pig-dealers and the inspection and disinfection of their premises. In relation to the above the following resolutions have been prepared by the Business Committee:—Mover, Mr. James Crouch; seconder, Mr. G. E. Brown: "Pending the report of the Royal Commission on Local Taxation, and action thereon, this Chamber asks the Government to continue the Agricultural Rates Act, 1896." Mover, Mr. J. R. Eve; seconder, Mr. H. Campion: "That this Chamber considers that the Board of Agriculture should have power to enforce the inspection, cleansing, and disinfection of pig dealers' premises in the same way as railway cattle tracks, cattle docks, and sale yards."

2. In view of the Right Hon. Walter Long having ceased to be Minister of Agriculture, the Business Committee have prepared the following resolution:—Mover, Mr. G. E. Brown; seconder, Mr. W. Ell: "That this Chamber gratefully acknowledges the

good work done by Mr. Long, the late Minister of Agriculture during his term of office."

3. Mr. Loudon M. Douglas, A.I.M.E., will read a paper entitled "Bacon Curing." The lecture will be illustrated by limelight with slides which have been collected from all parts of Europe. Samples of bacon produced by different processes will be shown in the room.

4. Vote of thanks to Mr. Douglas, and discussion.

National Sheep Breeders' Association.

The annual general meeting and Council meeting of the above Association will be held in the club-room, at the Royal Agricultural Hall, Islington, on Tuesday, December 11th, at 3.15 p.m. The agenda includes:—To receive hon. treasurer's report and statement of accounts for the past year; to consider and adopt annual report; to elect officials for ensuing year, and representatives on Mansion House Association on Rail and Canal Traffic; to receive report of special committee on affiliation of foreign and colonial sheep societies, etc. (if ready), and to consider and approve of programme for the International Conference of Sheep Breeders at Cardiff in June next.

Scottish National Fat Stock Club.

The Council of the Scottish National Fat Stock Club, in their report to the annual meeting of members, state that the accounts are in a satisfactory state, the balance at credit being £131 5s. 4d., against £72 19s. 9d. at the close of the books in 1899. The number of members on the roll at 30th September last was 622, an increase of 67 over the previous year. The Council desire to express the hope that the roll of members will be largely augmented by the end of another financial year.

The Council embrace this opportunity to tender their best thanks to all the subscribers to the prize fund, which amounted to £232 5s., and to the donors of additional challenge cups, special prizes, medals, etc. They desire also to place on record the invaluable services of Sir John Gilmour, Bart., during his three years' term of office as president, and also a cordial acknowledgment of his unbounded generosity towards the funds of the Club.

Somerset County.

The Prizes Committee met at the Municipal Offices, Bridgwater, on Wednesday last, Mr. Herbert Farthing in the chair.

The committee went through the prize list for the Taunton meeting to be held next year (as a preliminary), and adjourned further deliberations thereon before bringing up their final report for approval of a subsequent council.

The Poultry Committee met at the Municipal Offices, Bridgwater, on Wednesday, 28th November, at 12 o'clock, Mr. A. G. Pitts in the chair.

The committee went through the prize list of the poultry and pigeon departments for the Taunton meeting, to be held next year, and adjourned further consideration thereof before presenting their final report for the council's sanction.

Meeting of the Council.

The council assembled at the Municipal Offices, Bridgwater, on Wednesday, 28th November, at 2.30, under the presidency of Mr. James Cook, J.P.

The following resolutions of condolence were unanimously carried:—

Proposed by Mr. T. Penny, seconded by Mr. Cook, as follows:—"The council of the Somerset County Agricultural Association hears with sincere regret the loss which its president, Mr. C. E. J. Esdaile, J.P., of Cothelstone House, has sustained by the recent death of his son in China, and begs to offer Mr. Esdaile and its family its earnest sympathy and condolence."

Proposed by Mr. W. Thompson (Mayor of Bridgwater), seconded by Mr. W. S. Bevis, as follows:—"The council of the Somerset County Agricultural Association desires with very great respect to offer its most sincere sympathy and condolence to Mr. E. J. Stanley, M.P., of Quantock Lodge (a former president of this association), and members of his family in their very sad bereavement by the recent death of Lieut. H. T. Stanley (a life member of this association) while fighting for his Queen and country in South Africa."

Proposed by Mr. Cook, seconded by Mr. Stuckey, as follows:—"The council of the Somerset County Agricultural Association, at its first meeting since the lamented death of Colonel Helyar in South Africa, desires to place on record its deep sorrow at the loss sustained by this association and the county generally in being deprived of his generous, liberal, and zealous services through his falling a victim to Boer treachery when so ably serving his country, and at the same time to express to the bereaved members of Colonel Helyar's family sincere sympathy and condolence in their sad trouble."

The minutes of the last meeting were now read and confirmed.

Site for the Taunton Show.—The secretary read the minutes of the Sites Committee held at Taunton on the 28th August last, wherein the site adjoining Vivary Park was approved and selected.—After some observations by Mr. T. Penny, the chairman of this committee, upon the approaches and other matters, such minutes were approved and adopted. The secretary reported that he had prepared the necessary agreement with the Taunton authority, and that same had been duly signed by the various parties thereto.

Prizes Committee.—The minutes of this committee held to-day were now read, approved, and adopted.

Poultry Committee.—The minutes of this committee held to-day were also read, approved, and adopted.

New Member of Association.—On the proposition of the secretary, Mr. Chas. Napier Skinner, of Hawkhurst Farm, Bridgwater, was duly elected a member of this association.

A vote of thanks to the chairman for presiding closed the business.

Stockton Chamber

At a meeting of the Stockton Chamber of Agriculture, held on Wednesday (Mr. T. B. Bainbridge presiding), Mr. J. Nattrass made a complaint against the North-Eastern Railway Company with respect to short weight in agricultural produce on delivery. The railway company not guaranteeing weight he had no means of recovering that loss.

Mr. F. Raines said that the present system of the North-Eastern Railway Company with regard to the carriage of agricultural produce was an invitation to fraud on the part of railway servants and dealers, because there was no means of showing whether there had been pilfering practised, or whether the produce was short in weight on delivery by the consignor.

It was agreed to urge upon the railway company the necessity of ascertaining the correct weight of produce received by them and delivered by them to the consignee. It was also resolved to ask the Central Chamber of Agriculture to take the matter into consideration.

Mr. J. T. Wilson moved that a communication be sent to the railway company and the Board of Trade relative to through rates upon agricultural produce, and ask them to adhere to a five ton rate which was granted about five years ago, but which had passed the experimental stage.

A discussion took place upon the working of the Agricultural Rates Act of 1896, and it was agreed to express to the Central Chamber the opinion that the Act should be renewed and that the rates paid by the farmers should be reduced from one-half to one-quarter.

Staffordshire Dairy Farmers.

The annual meeting of the Uttoxeter and district branch of the Staffordshire Dairy Farmers' Association was held at the Town Hall, Uttoxeter, on Wednesday, Mr. J. W. Philips, C.C., in the chair. Mr. E. Smithells (county secretary) stated that arrangements had been completed whereby an agent had been appointed in London to watch the interests of the members. It was a joint agency between the Derbyshire Association and the Staffordshire Association, and bore every promise of proving of incalculable benefit to all who were unable and desirous of getting the highest possible price for their milk and produce.

Mr. F. E. Richardson (Bromshall) moved a resolution in favour of the agency, which was carried. Mr. S. Barlow (Birchwood Park) moved: "That the executive be urged to continue its efforts to procure legislation in the direction of an amendment to the law of trespass, so as to secure the protection of all products of the soil having a marketable value; and also to provide for compensation to all sufferers from loss by fire occasioned by sparks from locomotive engines." Mr. E. Averill (King's Bromley) seconded, and it was carried.

Cheshire.

The annual meeting of the Cheshire Agricultural Society was held at Crewe on Wednesday, Mr. J. Macfie (Rowton) presiding. A letter was read from Mr. T. C. Toler, of the Jodrell Estate, suggesting that a committee of hunting men be asked to associate themselves with the society and endeavour to get from the hunting men in the county a sufficient amount of money for prizes to be given to hunter classes. It was resolved to try and carry out the suggestion.

The annual report was submitted. It dealt with the Congleton Show held by the society this year, when the receipts were the highest ever taken at a one-day show. The society started the year with a balance against it of £1 16s. 8d. The year's operations had changed this into a credit balance of £98 14s. 7d. The report was adopted.

It was resolved to hold next year's exhibition at Chester, the mayor having promised the society a hearty invitation. The date was fixed for the last Wednesday in August.

A letter was read from Col. W. Lloyd stating that the Duke of Westminster had consented to become patron of the society. It was resolved to ask his grace to be the president for the year for the Chester Show. Mr. S. R. Wood was re-appointed treasurer, and Mr. T. A. Beckett was re-elected secretary.

LITERARY NOTICES.

We are in receipt of a copy [illegible] in New South Wales during [illegible] extensively [illegible] all [illegible] and [illegible] Government [illegible] the [illegible] Secretary for Mines and [illegible] Secretary of the Department [illegible] sections which [illegible] were most interesting, the [illegible] all [illegible] all cases of crops have been [illegible] As an instance of this steady [illegible] mention that at the date of [illegible] under wheat alone was 1,605,000 acres, being an increase of 307,750 acres for the year [illegible] the last season the area under wheat comprised 1,839,626 acres, of which 414,661 acres were cut for hay, leaving 1,424,965 acres to be harvested for grain, which resulted in an average of 9.5 bushels for the colony. Although, as in the past season, the [illegible] from rust were minute, it is to be regretted that a very wide extent of hops have suffered heavily from the fungus pest known as blight or sinking sickness.

During the past week there has come to hand the eighth annual report of the New Zealand Department of Agriculture, for the year ending March 31st last. It is an octavo volume of between four and five hundred pages, and gives full and exciting facts concerning the various branches of the dairy industry. It is most freely and beautifully illustrated, and the information given should prove of great service to the agriculturists in the colony. The writer of the report, the Secretary for Agriculture and Chief Inspector of Stock, who states that the harvest of 1899-1900 was satisfactory, in so far as the yield of grain was concerned, but it is to be regretted that the price of wheat especially leaves a very small margin of profit. Oats, however, have maintained a fair price. The dairying industry has made very rapid strides during the season, the total of butter being 161,792 cwts. valued at £693,701, as against 102,479 cwts. valued at £433,481 in 1898-1899, whilst the respective figures for cheese are 98,001 cwt., value £208,258, and 50,490 cwts. £100,992.

From the Durham College of Science, Newcastle-on-Tyne, we have received a copy of the calendar for the session 1900-1901. As in former years it is a substantial volume of over four hundred pages, and contains a mass of information concerning the College and what is taught there. The subjects treated at this College are very numerous, and include agriculture, dairying, estate management, etc. Special certificates are granted to students who follow the prescribed courses in agriculture, engineering, and mining. Classes are held in the evenings as well as the day, and are open to both sexes, the women also being able to take the rules and degrees in science and letters of the University of Durham.

The present number of the British Dairy Farmers' Association's Journal, Part III. of Volume XV., opens with a paper entitled "Breeding Versus Purchasing Dairy Cattle," written by Alex. Holm, Jun., F.H.A.S., Gold Medal R.A.S.E. This is followed by an article from the pen of Robert Laird, who discusses "Is Soft Feeling Economical on the Farm?" In the same number there is an interesting and practical paper on the "Relative Value of Mangolds and Swedes for Cows," by W. P. J. Allsebrook; and the following articles: "Soiling Hay v. Feeding Hay on a Dairy Farm," by Christopher Middleton; "Early Ducklings," by Henry Digby; "Turkey Breeding for Market," by Henry Abbot; and some notes on the progress of dairy farming and dairying.

Although the December number of the *[illegible] Magazine* is the last of Volume XL., in it there is the first instalment of a contribution by Lord Willoughby de Broke, entitled "Advice on Fox-hunting," the advice in this number being for Masters of Foxhounds. This article is given premier position, and it is followed by a capital shooting story, entitled "Teddy," and written by W. M. Wilcox. Besides this story, shooting men are provided with two other items, namely, "Stag Sport on Active Service in South Africa," by Captain J. P. Law, and "Capercailzie Shooting in the Australian Alps," by Count Douglas Thurn, both interesting illustrated papers. Of the rest of the contents, mention may be made of an account of the "Duke of Buckingham's Hunt and Its Successors," by Katherine Duncombe, "Egyptian Memories," recalled by C. Hill Wilson, and a paper "More About the Cricket Problem," by the Hon. and Rev. E. L. Dutton. The Editor makes a welcome announcement in this issue, namely, that, commencing with the new year, some of the illustrations will be coloured, so that the future volumes of the magazine may, to use the Editor's own words, "become books of reference to which he [illegible] can turn with the confident assurance that the illustrations in them [illegible] as they can be made." Four coloured plates will given in the January number, and it may be [illegible] to add that the readers of this popular magazine will look forward to the new [illegible]

BARLEY AND MALT.

By Hordeum.

Bad Beer.

The improper and excessive use of bad materials in brewing has at last reached the inevitable result of visibly affecting the health of a large number of consumers. Unhappily, it seems to have led to the death of many of the sufferers, and public attention as a consequence is very forcibly and painfully drawn to the whole matter, and its seriousness cannot be lightly set aside. The centre of the evil seems to be located in Manchester, Stourbridge, and other towns where the proportion of sugar used is excessively high, and so far as the evidence yet to hand goes, the price is more carefully considered than the quality.

The chief interest of the outbreak rests in the fact that at length we have clear evidence not only that improper material is deleterious when used, but that the harm it can do involves many innocent people in

The Death Penalty.

The confiding British public is once more cruelly deceived, and those who have so confidently asserted their ability to protect it have displayed their ignorance or incapacity.

By one of those strange strokes of justice, we have been allowed to witness the curious spectacle of the chairman of Her Majesty's Inland Revenue proposing the health and prosperity of the Country Brewers' Society at the very time when deaths were occurring, and hundreds of helpless and innocent sufferers were having their health shattered and nerves unstrung by the use by brewers of materials approved by the Excise authorities. At the time everyone fully acquainted with the facts was pained and shocked at the gross impropriety of a prominent Government official going so far out of his way to say things that were alike unwarranted and undesirable.

The agricultural witnesses of the Beer Materials Committee deserved the thanks of a public servant and responsible official fully as much as the chemists employed by brewers, whilst surely one of the Committee cannot plead ignorance, and ought not to urge forgetfulness of the existence of

The Minority Report,

signed by Mr. Clare Sewell Read. This report is still fresh in the minds of all interested in the subject, and had its recommendations been carried out, it is now certain much needless pain and evil could have been avoided, and much loss averted.

The time has come when consumers can now see for themselves that their interests largely coincide with those of the growers of hops and barley. Witness after witness testified to many of the more serious aspects of this many-sided question, yet apparently the only conclusion formed in the minds of the Excise officials was an utterly erroneous and mistaken conception of the position of the brewer as the person paying the duty.

The view was also fully promulgated that the careful watch kept by the Department on the character and quality of all materials used was sufficient safeguard of the public health, and that

No Deleterious Materials

either were or could be used. Witnesses urged then the fallacy of this conception, and, in the face of the facts now published, it seems monstrous that no attention was paid to the warnings so emphatically given.

The awakening is a rude one, and it leaves no alternative as to the necessity of doing something promptly. The beer duty is now 7s. 6d. per barrel, and although this high amount was intended to last for only a limited time, there can be little hope entertained that we shall see it reduced next August. But there ought to be a lower duty charged on all pure beer which is the product solely of genuine malt and hops.

The statements made that the collection of such differentiated duty is impracticable or impossible deserve exactly the same credence as should have been given to the assertions that Somerset House officials protected the public sufficiently. It has been often pointed out in these columns that they did nothing of the sort.

The Public Knows Now

which guides they can most safely follow.

Another step which must be promptly taken is the publication of fuller details concerning the use of substitutes. We at last know the quantity of beer actually brewed in the bulk. We must know the quantities of materials used and beer produced by each and every brewer. The notion that it is publication of confidential information is a Departmental fiction which should not be allowed to prevail for another month. It is now proved beyond doubt that we cannot longer blindly trust such advisers, and the information is useful and necessary in the public interest.

We must also have separate entry of hops and hop substitutes used by all brewers, and it is a very good occasion to make such items of real utility by putting a duty of a pound a cwt. on all substitutes used.

The time also is opportune to re-assess the duty charged upon all malt substitutes. Priming is a direct loss to the Revenue, and rice and maize are too lightly charged, and deadly sugars ought not to be permitted at any price.

Future Tactics of Barley Growers.

Introduced by Mr. A. E. Mansell, Harrington Hall, at the Shifnal Agricultural Society.)

At the commencement of my paper I wish to say that I have endeavoured to frame my resolution so that, if carried into effect, it would entail the least possible change in the law relating to brewing. My suggestion is that no brewers be allowed to use more than 20 per cent. of malt substitutes, and those substitutes to be defined. There are enormous quantities of substitutes used in some of the large breweries, including rice, maize, raw grain, and other substances. To show the extent of this, we find that twelve large breweries use two million bushels of substitutes to only five million bushels of malt. The Midland towns are the worst in this respect, for some of them have been using about 40 to 50 per cent., and in Stourbridge 66 per cent. of substitutes have been used. These facts fully account for the

Depressing State of the Barley Trade

we are experiencing, because the bulk of our barley is used in the Midlands. Besides preventing the demand for barley, the use of maize in breweries takes an immense amount of food that we should otherwise buy to fatten our stock. There are, however, some brewers who leave all substitutes alone, and conspicuous among these are the firms of world-wide fame—for instance, Guinness and Co., of Dublin, use the large quantity of 470,000 quarters of malt and no substitutes at all; also some of the famous Burton brewers for the most part use only malt and hops. These figures are from official returns, but I have taken them from the MARK LANE EXPRESS. Perhaps some may think that in suggesting the amount of substitutes to be allowed I have put it too high, and no doubt it would be better if a less quantity were allowed, but I think the important point to secure is the principle that the

Amount of Substitutes Used

should be restricted and defined. It must make a vast difference to barley growers if the outside quantity of substitutes allowed is reduced to 20 per cent. The practice of using other materials in lieu of malt is continually increasing, and the state of things will become worse and worse if this is not checked, as these materials will find more favour year by year, for with more experience brewers will learn how to increase the quantity of these inferior ingredients with profit to themselves. The alteration I suggest is of the simplest character, and is put forward to open discussion, but especially to try to direct the principle and the policy upon which it would seem desirable that we should proceed. Barley, although by far the most important crop that is grown by arable farmers in this district, and of a great many of the best parts of the kingdom, becomes a greater drug on the market every year. In a bad season deterioration of the grain is supposed to account for low prices, and in good seasons we are told that so much good malting barley is offered from so many quarters, and rushed into the market so early, that the result is prices are brought down. Of course, seasons will always affect prices, but the long and short of it is, the supply exceeds the demand, and this fact always places

The Producer at a Disadvantage.

It is our object here to-night, however, and it should be the object of all barley-growers throughout the kingdom, to find out if there is any way to increase the demand for barley, for it must be against all national interests to allow the supply to fall off. On the face of it, we have the best of reasons for thinking that there should be good use for all the malting barley that can be produced in this country. This is the finest country in the world for producing barley, and brewing has increased by leaps and bounds, then why is it that there is such a poor demand for the raw material that alone is required to make wholesome and good beer? The answer is, "Bad laws." Laws have been framed without any care as to how they would affect the great agricultural interest, and it seems most difficult to get our Minister of Agriculture or anyone who is in power to make a study of this and other questions, and

Help us in a Practical Way.

We are more apt to be told that we cannot agree among ourselves, and therefore cannot expect anyone to champion our cause, but there always will be divisions among agriculturists. This is easily accounted for, "Many men, many minds," and the British farmers bear out the truth of this saying, for there is no class where you find more difference of opinion, or more variation in circumstances and mode of life. Coming back to the barley question, there seems no reason why we cannot devise some means of improving our position. I feel convinced that if we are to expect to have practical and speedy legislation, we must urge what is most practical and moderate. For this reason I think we must give up advocating the Pure Beer Bill in the form it has been presented in the past. This bill has been before the country a great many years, and still remains in the same place, and is an obstacle to any alternative legislation. It has also been introduced into Parliament, but all that resulted from that opportunity was the appointment of an expensive inquiry on a foregone conclusion, for no one expected any good to accrue from this inquiry, constituted as it was. The reimposition of the Malt Tax was urged by this society, and unanimously supported by the Shropshire Chamber of Agriculture, but it was not supported to the same extent elsewhere, and the appointment of the Pure Beer Bill committee compelled us, if we wished to appear in good taste, to stop all agitation in this direction. The object of the Pure Beer Bill and the reimposition of the Malt Tax is the same, viz., to prevent the use of substitutes, and we must continue on the same lines, only we must

Change our Tactics,

and be diplomatic in our proceedings. We must bury the old methods in which we have failed, and try to attain the same object under a different name. The old pitfalls can be avoided by the experience we have had, and we must urge only what is most reasonable and practical, and so not only avoid any dissensions among the agriculturists but also disarm the opposition of all reasonable and fair-minded men. It is only by avoiding extremes that we can secure the co-operation that is necessary to present a united and determined front. If we can so put the case before Parliament and the country they must and will attend to it. As the law now stands brewers can use any quantity of substitutes they please; in fact, they need not use any malt at all if they find they can make larger profits by using other materials; and I wish to ask, in the name of fairness, if there is any moderation or wisdom in allowing this? The effect is most injurious to agriculture and to the community at large. The brewers have been given the "free mash tun," but there appears to be no doubt that this privilege is carried a great deal too far by a large proportion of brewers. I think, however, that it is well for us to admit that there is some reason in what brewers say against the Pure Beer Bill. There may be some justice when they urge that it is not fair and reasonable to deprive them of the right of calling their beer pure, if they use any substitutes at all, after being allowed them for so long a period. Some of them say, further, that they consider a certain proportion of substitutes necessary to enable them to use the nitrogenous malt that a good deal of the British barley produces. It would seem to be the best diplomacy to show the brewers that we don't wish to ask for any change that is unreasonable or detrimental to their interests. On the other hand, we must ask the brewers to admit that the agriculturists and the public have a right to see that their interests are safeguarded. The brewers have had the power because they are so well organised, and if barley growers mean to have their interests consistently protected, they should

Form an Organisation

for the purpose. Such an organisation would be able to find out where the interests of barley growers lie, and watch over them, and it would be received as having authority and power. Each section of agriculture should thrash out its own affairs. Great numbers only constitute a weakness unless well organised, and this is the case with the agricultural party. The British Dairy Farmers' Association is the only section that is well organised. Since I have prepared this paper a great sensation has occurred in the brewing trade. In Manchester hundreds of persons have been most seriously injured, and some deaths have taken place, through drinking beer which contained arsenic, and, from the reports, this poison seems to have been produced from the use of sulphuric acid in the manufacture of a malt substitute. After this, I think we may expect all respectable brewers to join us in this agitation. Farmers have for years been suffering a gross injustice with regard to their barley, but when people are poisoned through drinking the national beverage it is high time everyone joined hands to protect at the same time the health of the community and the welfare of the British farmer.

After the paper the following resolution was passed unanimously:—"That no brewers be allowed to use more than 20 per cent. of malt substitutes, and those substitutes to be defined."

Newark Martinmas Hiring Fair was held on Wednesday, when there was a great scarcity of servants. Waggoners obtained £26 to £28: second hands, £16 to £18; young boys, £8 to £12. Female servants were difficult to engage. General servants asked £12 to £16; young girls, £8 to £10. No cooks offered themselves for hire.

Thirsk Hirings. The last of the Martinmas statutes at Thirsk was held on Monday, when there was a large attendance, and farm hands obtained £2 to £5 more money for the twelve months than they got three weeks ago. Farm house servants were scarce. Good managing farm men and hinds got £25 to £28, first plough boys £18 to £22, second hands £15 10s. to £17 10s., farm boys £10 to £12, head farmhouse girls up to £21, second girls £14 10s. to £16, cooks for town places up to £20, general servants £12 to £15, housemaids and chambermaids £10 10s. to £14 10s., head nurses up to £11, and nurses first time out £8 to £10 for the twelve months.

HOPS.

By Lupulin.

Home Notes.

The Borough.

The course of business during last week provides me with but little material for comment, for the general trade has not yet been materially affected by the extensive purchases by customers to which I referred in my last report. A few enquiries have been circulating, and some transactions have resulted, the prices arranged in such cases being about on a par with the previous currency. Merchants, being of course guided by the wishes of their clients, fight rather shy of high-priced parcels, the principal demand by brewers being for medium and low graded hops, for which they are willing to pay proportionately full figures. These, therefore, continue to be firmly quoted, but we cannot as yet discern the tendency to an upward movement in general values, which has been so long expected, and which, in my opinion, cannot fail of development eventually. Considering the crop, and the trade which is probable between this date and next autumn, the reserve stocks held by growers are extremely limited. Therefore, after taking note of all the possible holdings of yearlings, and estimating the utmost amount of imports available this season, I cannot find cause for any anticipation other than a strong market throughout the coming year, with gradually increasing values, proportionate to the consumption and the consequent diminution of stocks in every position.

It is suggested that this outlook may be interfered with by the decreased consumption of beer, brought about by the recent revelations of the

Arsenical Poisoning

of drinkers of our national beverage. The reports we have all been reading with so much concern are of sufficient weight to claim our serious attention, especially when we gather that the sale of beer has been already reduced by so many hundreds of barrels in this or that city, and that in Liverpool 1,100 barrels have been thus far emptied down the sewers on account of the suspected danger of their contents. But it is quite certain that the public will speedily be reassured as to the wholesomeness of their beer by the searching investigations that are even now being conducted, and although there may be some temporary check to its consumption it cannot continue for any length of time, and I expect we shall find that the normal conditions of the brewery trade will be soon restored. Therefore I dismiss the argument that for this reason we are likely to experience any practical diminution of the demand for hops as hardly worth our consideration.

There is, indeed, another aspect of the matter which may affect us favourably, for it is not improbable that the present well-founded alarm, created possibly by the grasping by some brewers after greater profits, in the pursuit of which they are using cheaper and therefore inferior materials, will bring about stricter supervision by the officers of the Excise. Should this result in the brewing of sounder beers, of more old-fashioned quality, an increased consumption of hops will necessarily follow. I trust we shall be able to congratulate ourselves on such an outcome of the present scare, and that "pure beer," according to the well-known, simple, and approved formula, "barley-malt and hops," may once again become the common drink of our people.

Poison in Beer.

The direct interest of hop-growers in the serious statements that have recently appeared in the columns of all our newspapers is but limited, inasmuch as the presence of the deadly arsenic cannot with any degree of justice be traced to our product. Nevertheless, certain accusations have been made. One theory was attributed to an agricultural lecturer to a County Council, who was reported to have said that the beer poisoning epidemic was due to the spraying of hops with Bordeaux mixture, which is composed of sulphate of copper and lime. The said lecturer has since denied that he said anything so "absurd" or "untrue." Nevertheless, I may remark that, whatever might be the result of the use of such a wash in hop gardens, I can confidently assert that it is never put to this purpose. The majority of growers apply a solution composed of soft soap and the bitter extract of quassia wood, and although other similar and inocuous compounds are sometimes used, they are all sprayed upon the plants previous to the development of the flowers, and in no case are the cones that are picked for brewing, touched by any spraying compound, Bordeaux mixture being, moreover, absolutely unknown as a hop wash.

Dr. Leith, of Birmingham, with more show of reason, refers to the distribution of sulphur upon the hop plants to check fungoid disease, suggests that the poison may be thus communicated. It is true that arsenic is sometimes found in infinitesimal quantity in impure sulphur, but inasmuch as only the flowers of sulphur, which is the purest form, produced in the process of evaporation, is used for this purpose, it is impossible to imagine that any arsenical influence can be thus exercised upon the hop flowers. It is, indeed, practically useless to sulphurate hops after the cones have been formed, the applications being made in the previous stage of the growth, viz., when the dangerous fungus first appears upon the surface of the foliage.

Mr. Schidowitz, a well-known chemist, who gave evidence before the Beer Materials Committee, remarks upon this branch of the subject that "even if the sulphur contained a very large amount of arsenic, it would be very remarkable indeed if any appreciable quantity of the poison were introduced into beer from this source."

The sulphuring of hops in the kiln during the curing process has also been referred to, and the possibility of the presence of arsenic in the sulphurous acid, which, being a compound of sulphur and oxygen, is created by burning this element in dry air, and the consequent deposit of poison upon the hops, is suggested. There is not a shadow of basis for such a supposition. The quantity of sulphur used is relatively small, only the purest samples are acceptable, and the effect of the product of combustion is chiefly some alteration of colour of the bracts, with the addition of the destruction of any insect life or fungoid growth that may be hidden within the cones. Hops that have been subjected to this influence are cleaner and purer, and are thus more wholesome and better fitted for use as a constituent of beer.

The whole of the assumed connection between hops and the detection of arsenic in beer falls to the ground, when examined in the presence of the facts and the light of common sense and experience, and it is hardly needful to refer to the statements made, except to dispel any illusions that may be formed in the minds of those who are not familiar with the conditions of the hop-growing industry.

The general aspect of the question of pure v. impure beer, however, comes prominently to the front of the discussion raised by these startling events. For

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interest and benefit to the members of the society.*

Established 1808.

WIGAN

Telegrams: "PECK, WIGAN."

many years the gallant president of our Association has been the champion of pure beer, *i.e.*, beer brewed only from barley-malt and hops. He and those who have supported him, have predicted that the day would arrive when the licence given to brewers to concoct beer out of any conceivable or inconceivable substances would culminate in disastrous results. The time he has so long foreseen has come upon us, and despite the comforting conclusions of the Raw Materials Committee, the nation will now be roused from its self-satisfaction, and will demand a thorough inquiry into the whole matter, and a definition, which must be simple and exact, of what is meant by the purity of the beverage which has so much influence upon the health and vigour of the people. Not arsenic alone has to be eliminated from our beer, but the thousand and one chemical components which the wide scope of the law now permits. At present not one brewer in our breweries use only the materials which tradition and custom have marked as being alone legitimate; the list of substances used by the remainder is appalling. Substitutes for malt are numerous; there are several substitutes for hops, including some compounds whose nature is known only to the manufacturers of them, and amongst the legalised chemicals are vitriol, bisulphide of lime, salicylic acid, chalk, carbolic and citric acids, sulphide of ammonia, chloride of calcium, and others for the enumeration of which I have not space.

Surely, this state of things must be put an end to. All our previous arguments for reform in the manufacture of beer and the prevention of adulteration having hitherto failed, the *argumentum ad hominem* by which we are now faced ought certainly to succeed in convincing our Government of the urgent necessity of practical legislation on this vital subject.

(*For Hop Market Reports, see pages* 719, 721.)

Emigration to Canada.—During the past few years there has been an increased movement of settlers from the United Kingdom, and from Europe, to Canada. This is not to be wondered at when we think of the great advantages the country offers to new arrivals. Free grants of land may be obtained in several of the provinces (Manitoba, the North-West Territories, and parts of Ontario). Crown grants may be acquired on nominal terms in New Brunswick, Nova Scotia, Quebec, Ontario, and British Columbia, while in all parts of the country improved farms can be purchased at reasonable prices. The position of the farmer in Canada is somewhat exceptional from the fact that the Government has made great endeavours to encourage the industry. Experimental farms are provided at the public expense, and the experiments are all made with the object of furnishing useful object-lessons to agriculturists. The farm and dairy produce has in consequence improved in quality and increased in quantity, and the result is seen in expanding exports of meats, grain, flour, butter, cheese, eggs, and fruits, all of which are now becoming well known on the British markets. There are millions of acres of land still waiting occupation and cultivation, destined to provide homes for a large number of people in future. Full particulars may be obtained on application to the High Commissioner for Canada, 17, Victoria Street, London, S.W. It is not only agriculture that has developed in a gratifying manner in Canada. The same remark applies to its great wealth in timber, its fisheries, its manufactures, and especially to its mineral resources. All are showing great signs of progress, and afford excellent opportunities for the investment of capital and the employment of labour.

Cows Burnt to Death at a Farm Fire.—During the early hours of Monday morning a fire broke out on the farm of Mr. T. Scatchard, of Scorah Farm, Ripley, near Harrogate, and resulted in the total destruction of the farm buildings (apart from the farm-house), and their contents, including five valuable cows, and a couple of sheep dogs. The farm-house is fortunately separated from the fold yard and buildings by the Pateley Bridge high-road, or the probability is that the whole of the farmstead would have been destroyed. The fire was not discovered until the flames were through the roofs, but messengers were despatched to Ripley Castle, for the estate manual engine. The Harrogate Corporation Fire Brigade were also telephoned for, and speedily arrived. In the meantime 15 valuable beasts and horses had been rescued, but five cows in one mistal, where the fire raged most furiously, it was impossible to save, and they were burned to death. Some implements, feeding stuff, and a large stack of hay were destroyed, in addition to the buildings. The damage amounts to several hundred pounds. The buildings, which are the property of Sir Henry D. Ingilby, Bart., of Ripley Castle, had only lately been renovated. The damage to these is covered by insurance, but the tenant, Mr. Scatchard, who values the beasts burned at £100, is not fully insured. The origin of the fire is not known.

MOLASSINE

A STAPLE FOOD AND CONDIMENT COMBINED.

FOR

HORSES, CATTLE, SHEEP, PIGS.

Replacing an equal quantity of Fodder.

***Annual Consumption* 1,200,000 cwt.**

Manufactured by Messrs. HENRY TATE & Sons, Ltd., Sugar Refiners,
LONDON & LIVERPOOL.
Exclusively for "The MOLASSINE Co, Ltd."

EXPERIENCE shows that the following advantages result from the use of MOLASSINE.

1.—It is **cheaper** than any other provender of equal feeding qualities that has been put on the market.
2.—It has a **sweet taste,** and is a valuable addition and **welcome relish** to the usual fodder.
3.—It is a **concentrated wholesome food,** which **improves the digestion** and **appetite** of animals
4.—It is a special preventive **against gripe, diarrhœa,** and similar diseases.
5.—It is a special preventive **against cough.**
6.—**Horses** fed on Molassine, after three or four weeks, show **remarkably smooth and glossy coats** —a sign of their good condition.
7.—As it contains about **35 per cent. of sugar,** it is **nourishing, refreshing,** and **vivifying,** and **increases** the **working power** and **endurance** of horses.
8.—No fodder is wasted, horses eating with avidity, and entirely clearing the mangers.
9.—When it is used regularly, cows give **richer milk** and the **supply is increased.**
10.—SHOW AND STOCK CATTLE, SHEEP AND PIGS, THUS FED, QUICKLY **INCREASE IN WEIGHT,** AND THE **FLESH IS OF THE FINEST QUALITY.**
11.—ESPECIALLY IN THE **LAST PERIOD OF FATTENING, IT INCREASES THE APPETITE.**
12.—Compressed with oats, brewers' grains, and other kinds of forage, it makes **cakes** of almost unlimited **durability.**
13.—If kept in a dry place it preserves its virtues for many years.
14.—If used as an **absorbent for Skimmed Milk, Whey, etc.,** it acts as an excellent preservative.
15.—The farmer **saves in compost,** as Molassine contains—

Potash	5 per cent.
Phosphoric Acid	½ ,,
Nitrogen	1 ,,

The value of mineral matters contained in 5 tons of Molassine, as Manure, is about £6 16s.

THE BEST MEANS OF ASCERTAINING THE TRUTH OF THESE STATEMENTS is a TRIAL.

Packed in Bags of 1½ cwt. each.

SOCIETIES.

CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE.

NOTICE OF MEETINGS.

The following MEETINGS of the CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE will be held (by permission of the Society of Arts) at the House of the Society of Arts, John Street, Adelphi, on Wednesday, December 12th, 1900, viz.:—

1.—10.30 a.m., the Business Committee.

2.—11 a.m., the Council Meeting, at which Members of the Council representing either the Central Chamber or Associated Chambers are requested to be present.

AGENDA.

To transact General Business.

To receive Communications.

To receive Reports of Committees (if any).

To draw up the Annual Report of the Council.

3.—11.30 a.m. (or at such hour as the business of the above Council Meeting is concluded), the ANNUAL MEETING OF THE CENTRAL CHAMBER, at which all Deputies and Subscribing Members are requested to be present.

AGENDA.

To receive the Auditor's Report.

To appoint an Auditor for the ensuing year.

To receive the Annual Report of the Council for 1900.

To consider Alterations in the Laws, as recommended by the Business Committee and adopted by the Council on November 6th, 1900. The Business Committee also recommend that Law No. 37 shall in future read as follows, the Alteration consisting of the additional sentence printed in italics :—

37.—The Officers of the "Central Chamber" shall be a "Chairman" and "Vice-Chairman," a "Treasurer," "Auditor," and "Secretary," the retiring "Chairman" not being eligible to the "Vice-Chair" for the space of one year. *The "Council" shall have power to fill up any vacancy caused by the death, resignation, or incapacity to act of any such officer.*

N.B.—A copy of the Laws, including the Alterations proposed, will be sent to any Subscribing Member of the Central Chamber upon application to the Secretary.

To consider the following subjects :—

1. The working of the Agricultural Rates Act of 1896 and the question of its renewal.
2. Tuberculosis and the working of the "Model Milk Clauses" in the Private Bills of Local Authorities.
3. Question of the registration of pig dealers and the inspection and disinfection of their premises.

Associated Chambers and Clubs are requested to consider the above subjects, and to send up any resolutions which they may pass thereupon to the Secretary of the Central Chamber before the Meeting of the Business Committee, at 5 p.m. on Tuesday, December 11th, 1900. Suggestions of subjects for discussion at future Meetings of the Council should be forwarded at the same time.

ERNEST H. GODFREY, Secretary.

ANNUAL AGRICULTURAL DINNER.

SMITHFIELD WEEK, 1900.

Notice is given that the ANNUAL AGRICULTURAL DINNER (under the auspices of the Central and Associated Chambers of Agriculture and the Farmers' Club) will be held during the Smithfield Club Show-Week, in the THRONE ROOM of the HOLBORN RESTAURANT, LONDON, on TUESDAY, DECEMBER 11TH, 1900, at 7 p.m.

The Chairman of the Farmers' Club (Mr. J. R. EVE) will preside, and it is hoped that the President of the Board of Agriculture will be present, as well as his immediate predecessor.

All farmers and others interested in agriculture are invited to attend.

The price of tickets (exclusive of wine) will be as follows :—

If purchased before December 8th, 1900, 5s. 6d. each.

If purchased after December 8th, 1900, 6s. each.

Members and others who propose to attend are requested to apply as soon as possible for tickets, with a postal order for the amount. (Evening dress optional.)

ERNEST H. GODFREY, Secretary.

November 14th, 1900.

COW MILKER! COW MILKER!! The celebrated self-acting Cow Milker supersedes hand labour. Milk each cow in four minutes effectually. Price 6s. each, delivered.—Circular, with testimonials, on application, N. BUCHANAN, 9, Sandon Place, Sheffield.

DISTRIBUTOR for Basic Slag sows 7ft. wide; price £9.—Patentee, T. A. MEGGESON, Stockton-on-Tees.

SWINE FEVER.—Not a cure, but a certain preventative. I have used a preparation of my own make for thirty years, and have never had swine fever; also, given to sows, prevents them losing or having heated milk, which is the cause of so much loss with young pigs. It keeps feeding pigs healthy, so that they are fit for the butcher in a much shorter time. I will send enough for twenty pigs for six months for 10s.—JOHN WARTH, Farmer and Dealer, Chatteris, Cambs.

CHEAP PORK.—After years of study I can at last bring before pig keepers a Medicated Meal that will produce pork at much less per stone than any other on the market. Try it and publish results is all I ask. Price 9s. per cwt., 140s. per ton, in bags, on rail Chatteris; cash with order.—JOHN WARTH, Farmer and Dealer, Chatteris, Cambs.

BASIC SLAG, 38/45 per cent. Phosphates guaranteed. We sell thousands of tons, and can quote lowest prices. Order now to secure delivery when required. Try our celebrated CORN SACKS. Special prices. Catalogue of Manures, &c., free. Cannock Agricultural Company, Limited, HENRY R. HART, Managing Director, Cannock, Staffs.

BASIC SLAG or Thomas Phosphate Powder. The cheapest and most efficacious fertiliser for grass land. Please note guarantee 38 to 45 per cent. Phosphates. Order early. Purchasing agents wanted. THOMAS BRADBURN, Wolverhampton

BASIC SLAG (Thomas' Phosphate Powder).—State quantity required and station, when prices, with guaranteed analyses and full particulars, will be sent by return of post.—CLEMENT SWAFFIELD, Derby.

HORSE CLOTHS! HORSE CLOTHS!! 30in. by 36in., 4s. 3d.; 36 in. by 48in. 5s. 6d., both lined and strapped. Heavy quality lined best pure woollen check, strapped, 36in. by 54in., 6s. 9d.; 54in. by 54in., 9s. 6d.; 60in. by 60in., 10s. 6d. All marked free. Samples and lists free.—E. B. HAWTHORN AND CO. Limited, Reading.

REGISTER OF BRITISH LIVE STOCK BREEDERS.

HORSES.

HACKNEYS.

MOORE, HENRY, Burn Butts, Cranswick, Hull. — Pedigree Stud of HACKNEYS, including many prize-winners, yearlings, two years, and others.—Can be seen on application to Henry Moore.

HACKNEYS.—JOHN N. ANTHONY, Sedgeford, near Lynn, Norfolk, breeder of Pedigree Hackneys. On hand, Colts and Fillies by most of the leading sires.

LLOYD, WALTER, Heaselands, Hayward's Heath, Sussex.—Small but select Stud of PEDIGREE HACKNEYS, Mares, Fillies, and Colts of best blood, including stock by Champion Ganymede, Agility, Winnal Fireaway, Model II., and other noted Stallions, at moderate prices. Appointments to view the stud (which is 1½ miles from Hayward's Heath Station, L.B. and S.C. Railway), on application to the owner, as above.

CLEVELANDS

F. WILSON-HORSFALL, Potto Grange, Potto Station, Northallerton, Breeder of CLEVELAND BAY HORSES. Winner of more prizes than any man in England with Cleveland Bays for many years at the Royal, Great Yorkshire, and other important shows. Also first prize and gold medal at the Paris Exhibition, 1900. Thoroughbreds and Shorthorns are also bred on these farms. Mr. Wilson-Horsfall, Potto Grange, Northallerton, has sold to Mr. Mellish, Cape Town, South Africa, the well-known Cleveland Bay Stallion Broomgrove Pride 1364. This horse is considered to be one of the best of his breed, and combines the action of a hackney with the limbs and quality of a Cleveland, and has been used at stud at Potto Grange for the last two years.

SHIRES.

MUNTZ, P. ALBERT, M.P., Dunsmore, Rugby. — SHIRE-BRED STALLIONS, COLTS, MARES, and FILLIES. About a hundred of all ages. Prize-winners London and other leading shows. Also high-class Shropshire SHEEP, winners first prize at Royal Agricultural, 1886, second in 1887, and first in 1888.—Apply, THOMAS EWART, Dunsmore Farm, Rugby.

DUDDING, HENRY, Riby Grove, Gt. Grimsby, Lincolnshire, has always for inspection and sale a large flock of pure LINCOLN LONGWOOL SHEEP, including many prize-winners, having taken the leading prizes for many years at the Royal and other shows for both rams and ewes including champion medals at both the Paris Exhibitions, Vienna, Amsterdam, Canada, Australia, New Zealand, and all the leading prizes at Chicago; also the first for the best collection of Lincoln fleeces of wool at the Royal Windsor Show, which proves the character of this flock, which is most famous for their great size and 125 years' good breeding. Rams from this flock made the highest average on record last year. Riby Grove is seven miles from Great Grimsby, and three from Stallingboro' Station. Telegrams, "Dudding, Keelby."

WENSLEYDALE SHEEP.—ON SALE, 20 good and pure-bred Shearling Ewes, in lots; also 10 Gimmer Lambs.—HANDLEY, Brighatts, Sedbergh.

HAMPSHIRE DOWN.

FLOWER, JAMES, Chilmark, Salisbury. Undoubtedly the leading flock of the day; in show yard records at all the largest shows, including the Challenge Cup at the Salisbury Great Prize Sheep Fair six years in succession; also highest average for same period for 100 ram lambs at annual sale, at Britford Fair, August 12. The Flock is one of the oldest existing, combining fine quality, strength, constitution, and true character. "Fossil," sire of the highest-priced Hampshire Down Ram ever sold, was bred at Chilmark, and in service there last two seasons.

COLES, CARY, late C. and T., Manor House, Winterbourne Stoke, Salisbury.—Registered HAMPSHIRE DOWNS, prize-winners at the Royal, Bath and West, Royal Counties, and other shows. Sheep of all ages for sale; selections from 1,000.

SHROPSHIRE.

COOPER, WILLIAM, AND NEPHEWS, "Cooper's Dip" Works, Berkhamsted, England. Breeders and Exporters of pure Shropshire Sheep. First and Third Prize for Ewes, Royal Show, 1898. Five hundred breeding Ewes. The largest export flock of Shropshires in England. The sires used present season include 310 Guinea Champion "Royal Record," Two First, One Second, and One Third Royal Show Prize winners.

LIVE STOCK AGENTS.

INVERNESS, WEST HIGHLANDS.—JAMES ARNOTT, Scotch Live Stock Agent, Ellandonan, Inverness, established 1870, selects and supplies on commission all classes of SCOTCH STOCK. He attends all the leading markets to purchase Stock at lowest rates. References can be given if desired to customers who have been annually supplied. All orders are personally attended to. List of classes and approximate prices sent on application. Reference required; terms cash. Telegrams: "Arnott, Inverness." J.A. is now booking orders. N.B.—Polled Angus or West Highland Heifers and Black-faced Gimmers, Ewes, Weddera, and Lambs for crossing or feeding, in truck loads, at moderate prices. Fat Stock of all classes also purchased.

LARGEST Live Stock Agency in England.—E. GOODWIN PREECE, Portland House, Shrewsbury, will be glad to receive orders for RAMS, EWES and WETHERS, of various breeds, of which he buys annually large numbers on commission. SHROPSHIRES, CLUNS, and KERRIES, a SPECIALITY. HAMPSHIRES, OXFORDS, SOUTHDOWNS, LINCOLNS, LEICESTERS, and COTSWOLDS. Also CATTLE of various classes for GRAZING or DAIRY. References to practical farmers all over England, who have been regularly supplied for many years. All personally bought. Prices on application.

HALL'S
SANITARY
WASHABLE
DISTEMPER
PATENTED

A NEW SANITARY WATER PAINT,

HAS GREAT ADVANTAGES

SOME OF WHICH ARE AS FOLLOWS:-

It sets hard, Kills Vermin, and Disinfects.

It is washable in 3 weeks, does not scale, and can be Painted or Varnished. Made in two qualities, for inside and outside work.

It is made in Dark Rich Shades as well as in Light Tints, contains no Lead, and does not Turn Black.

It only requires the addition of Water to make it ready for use, so that anybody can apply it.

It is Cheaper, Cleaner, Healthier, and more Artistic than Wall Paper.

It makes an excellent Shading for Greenhouses, the inside quality lasting about 9 months, the outside quality several years.

Sole Manufacturers of "Aperfectol Paints," the best Paints manufactured, and "Rustikol," for preserving woodwork.

Sold by Leading Chemists, Drysalters, and Ironmongers, and Manufactured by—

SISSONS BROS. & Co., LTD.,
HULL,

MOLASSINE

A
FOOD AND CONDIMENT
COMBINED
— FOR —

HORSES,
CATTLE,
SHEEP,
PIGS,

Replacing an equal quantity of Fodder.

BY ROYAL LETTERS PATENT.

Patented in all the Principal Countries in the World.

Annual Consumption

1,200,000 cwt.

EXPERIENCE shows that the following advantages result from the use of

MOLASSINE.

1. It is **cheaper** than any other provender of equal feeding qualities that has been put on the market.
2. —It has a **sweet taste**, and is a valuable addition and **welcome relish** to the usual fodder.
3. —It is a **concentrated wholesome food**, which **improves the digestion** and **appetite** of animals.
4. —It is a special preventive **against gripe, diarrhœa**, and similar diseases.
5. —It is a special preventive **against cough.**
6. —**Horses** fed on Molassine, after three or four weeks, show **remarkably smooth and glossy coats** —a sign of their good condition.
7. —As it contains about **35 per cent. of sugar**, it is **nourishing, refreshing**, and **vivifying**, and **increases** the **working power** and **endurance** of horses.
8. —No fodder is wasted, horses eating with avidity, and entirely clearing their mangers.
9. —When it is used regularly, cows give **richer milk**, and the **supply is increased.**
10. —SHOW AND STOCK CATTLE, SHEEP AND PIGS, THUS FED, QUICKLY **INCREASE IN WEIGHT**, AND THE **FLESH IS OF THE FINEST QUALITY**.
11. —ESPECIALLY IN THE **LAST PERIOD OF FATTENING, IT INCREASES THE APPETITE.**
12. —Compressed with oats, brewers' grains, and other ke[illegible] fo[illegible] cakes of almost unlimited **durability.**
13. —If kept in a dry place it preserves its virtues for many years.
14. —If used as an **absorbent for Skimmed Milk, Whey, etc.,** it acts as an excellent preservative.
15. —The farmer **saves in compost,** as Molassine contains—

Potash	5 per cent.
Phosphoric Acid	½ ,,
Nitrogen	1 ,,

The value of mineral matters contained in 5 tons of Molassine, as Manure, is about £6 10s.

The best means of ascertaining the truth of these statements is a trial.

Only what have proved the best cropping, quality, disease resisting, and paying varieties offered.

British Lion and East Anglia, wherever grown from reliable selected stocks, have this season produced much greater tonnage of marketable potatoes than any other maincrop variety grown under similar conditions. Sample stone of each sent railed on receipt of 7s. 6d.

Write SCARLETT, Market Street, Edinburgh, for Prices, &c.

SILCOCK'S CALF REARING.

CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake-feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 *per cwt., carriage paid. 5 cwt. lots,* 12/-.

R. SILCOCK & SONS, Poulton-le-Fylde, Lancs.

The Patent "HANDY" GRINDSTONE

Registered.

INVALUABLE TO

Farmers, Gardeners, Joiners, Butchers, Amateurs, etc.

AWARDED FOUR SILVER MEDALS BY LEADING AGRICULTURAL SOCIETIES

Attention is directed to this exceedingly useful and effective little Grindstone. It is the only Grindstone fitted with a seat and double treadles, by which arrangement the weight of the operator when seated keeps the machine as steady as a rock, and the double treadles balance the body and prevent the hands from wobbling during the process of grinding. Another special feature is its portability. It is splendid value.

THE

LIVERPOOL VESTA CAKE CO.

In submitting their List of Cakes and Meals wish to bring to the notice of their customers that the same are manufactured for the several purposes for which they are respectively recommended. The Company will consequently feel obliged if when ordering customers will take note of the following descriptions, which may be some guide in their selection.

VESTA FATTENING CAKE OR MEAL

ANALYSIS.—Oil, 11·13; Albuminoids, 21·25; Carbo-Hydrates, 36·40.

For Stall Feeding and finishing purposes the Vesta Fattening Cake is the very highest class of food by reason of its maximum total of feeding constituents, combined with its quick assimilation, which makes it the most rapid fattening cake of the day.

VESTA FEEDING CAKE OR MEAL.

ANALYSIS.—Oil, 10·12; Albuminoids, 20·24; Carbo-Hydrates, 36·40.

For Milking and Feeding at same time, and also for young stock and sheep, the Vesta Feeding Cake is the standard quality, its total constituents being equal to that contained in the best cake of other makers, and the very best value for the money.

VESTA GRAZING CAKE.

ANALYSIS.—Oil, 9·11; Albuminoids, 28·32; Carbo-Hydrates, 31·38.

For Feeding and Fattening at Grass the Vesta Grazing Cake is the best substitute for decorticated and undecorticated cotton cakes. It combines the qualities of both without their drawbacks, and cattle can be fattened and ready for any show or market as quickly as if fed in stall.

VESTA DAIRY CAKE OR MEAL.

ANALYSIS.—Oil, 8·10; Albuminoids, 20·24; Carbo-Hydrates, 44·48.

For Milk, Butter, and Cheese Productions the Vesta Dairy Cake will furnish a maximum flow of rich milk without impoverishing the cow; the materials used in its manufacture are of a character to keep the animal in a most healthy and improving condition.

VESTA LAMB FOOD.

For Ewes and Lambs the Vesta Lamb Food is a highly palatable and a most nutritive food. It keeps the Ewes in grand milking condition and promotes strong, healthy growth in Lambs, ensuring early maturity and early fattening, which are of vital importance to breeders.

VESTA CREAM AND MILK MEAL.

For Calf Rearing.

The Cream Meal is as near perfection as possible; new milk can be dispensed with when the calf is a few days old. The Cream Meal used in conjunction with separated milk is an excellent food.

The Milk Meal, although not so perfect a food, is very nutritious, prevents scour, rears fine healthy calves.

N.B.—In reference to the above Meals it would be a great advantage to give the Calf a little Fattening or Feeding Cake when it is two months old; same must be given in a dry state, say a small handful to start, increasing gradually, reaching about 2 lbs by the time the Calf has arrived at six months old. But in no case whatever must the cake be given in the form of gruel.

Established over 100 Years.

BIBBY'S "CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

DIRTY WOOL.

Since we referred to the question of the use of tar and pitch by sheep farmers a short time back there has been a most important meeting in Bradford, when the subject and other kindred matters were dealt with. The meeting took place on Thursday last, and was attended by a good number of representative growers, merchants, and auctioneers, who make a speciality of such business. The meeting was called by the committee of the Bradford Chamber of Commerce, which has special charge of matters affecting the wool trade. The excuse was the decision given by a county court judge in favour of the defendant in a case where the plaintiff had purchased 245 fleeces of wool and found 207lbs. of what he described as dirt therein. The meeting very wisely decided to deal with the whole question. In the first place it expressed the opinion that the practice of tying fleeces with vegetable band or string is dangerous, on account of the risk of damage being done by such fibre getting into the manufactured article. The Winchester case was then referred to by the chairman, who pointed out that he was not so much prepared to discuss the legal points raised, as he was anxious to call attention to the possible effects of such a precedent. There had been a certain amount of tarkings wrapped up in the fleeces, and the learned judge accepted the contention that, as the buyer had the opportunity of making an examination before the purchase, he must rely upon his own judgment. In other words, it was simply an application of the legal maxim *caveat emptor*, which, being freely translated, means that the buyer must look after himself. This may be, and probably is, good law, but it will be very difficult indeed to get away from the remark of

the speaker, that whatever the legal position may be, there was something morally wrong in such a course. We can hardly think that the wool grower will object to such a view; and it certainly seems only natural to expect that such a practice can only tend to make buyers not only more suspicious but more particular in their bargains. We must also agree with the expression of opinion to the effect that such a case would have been much better settled by private arbitration rather than by a visit to the county court. There was some suggestion as to an appeal, but it was so vague that we need not notice it, at any rate for the present.

Another resolution which was adopted declared that the meeting was of opinion that the members of the wool trade ought to most strongly condemn the practice of farmers leaving "clags, dockings, locks, and tailings in fleeces, whether washed or unwashed"; the reason given for this was that practically it is not possible for a purchaser to examine the whole of the fleeces. This must be admitted; and, therefore, we are compelled once more to admit that the dealer has some ground of complaint. Probably, if he is not treated more considerately in the matter, he (and we include the trade in the singular pronoun) will make it an excuse for a still further reduction in price, on the ground of the additional waste of time, which a business man may reasonably contend is also a waste of money. The real difficulty in the matter is that the man who, as a rule, has to suffer the loss is the auctioneer, who acts as middleman in the matter, for he has to make allowances, too often, to a purchaser which he cannot expect to recover from a vendor. We certainly cannot agree with the remark of one of the speakers that the farmer has the least desire or intention to be dishonest in the matter; but all the same it is fully time that attention was paid to the matter. There seems to be some amount of evidence which cannot be ignored, and which tends to show that the dealers have ground for complaint. If that is so, it ought to be removed as soon as possible. There is no smoke without a fire; and in this case there is a good deal more smoke than has yet been generally made public. We do not know what the fire is; it may be a few isolated cases, or it may be fairly general. We cannot say; but we are convinced that no harm could be done if the matter was fully considered. We do not suppose that there could be any harm done if the Central Chamber of Agriculture could see its way clear to fully discuss the matter; and perhaps it might be worth while to suggest a conference to "the other side," and see if it is not possible to come to some understanding, and so save any more "Winchester cases." The wool buyer is just as much necessary to the farmer as the corn dealer. He will also find the wool-grower equally necessary to him. When two classes of persons are necessary to each other they will find it well to try and be reasonable with each other. We trust that such spirit will actuate both sides in this matter. If it does, there ought not to be the least difficulty in arriving at a satisfactory solution.

American Anarchist Sets Fire to a Haystack.—At the Munster Assizes on Friday, Roy Kreuglar, an American Anarchist, was convicted of having set on fire and destroyed hay valued at £600, the property of Captain Woodley. The prisoner, who was arrested in the act, resisted violently, and said he would stagger humanity. To a remark by Chief Justice O'Brien prisoner said defiantly, "I should have burned the house around him. He refused to give me some socks, and threatened to break every bone in my body. I will make Europe tremble." The judge: "Like others of your class, you are full of vanity." Prisoner was sentenced to ten years' penal servitude.

SAMPLES.

By a Man of Mark Lane.

The Royal Agricultural Society has just published through Mr. John Murray a useful sixpenny pamphlet on the new Agricultural Holdings Act, 1900, which comes into force on the 1st January next. In addition to the text of the new Act (which is only an amending and not a consolidation Act), the pamphlet contains a summary by Mr. S. B. L. Druce, barrister-at-law, on the whole of the existing statute law on the subject. This should prove very convenient to landlords, farmers, valuers, and others who are affected by the present Acts, by saving them the trouble of referring to different volumes of the statistics.

In opening the Assizes for the Province of Munster, at Cork, on Tuesday, Lord O'Brien, Lord Chief Justice of Ireland, commented on the state of the country. He said he found in County Clare eleven persons were receiving constant police protection, which meant the presence of police in the house of the man who is protected, or in adjacent huts built for the purpose. Twenty-six persons were also receiving protection by police patrol. There were 120 evicted farms, forty-seven of which were derelict, which meant abandoned by landlord and tenant, the former being unable to stock them. That was a serious and suggestive matter.

In County Limerick twenty-eight persons were receiving police protection by patrol; there were ninety evicted farms, fourteen being derelict. The state of North Tipperary was fairly satisfactory, though one gentleman had been under police protection for eighteen years. In South Tipperary twenty-five people were under police protection by patrol. In County Kerry thirty-two men were under constant police protection, and sixty-four were receiving protection. Evicted farms in the county numbered 241, of which twenty-five were derelict.

The Quebec correspondent of the *Standard* states that the Great Northern Railway has contracted for five Leyland liners for five years to carry grain hence to England by a weekly service next season. The largest steamers now running to Boston, United States, will then run to Quebec.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to December 1st, 1900, were £69,370,991 against £67,438,499 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £117,897,187 against £74,036,049 to the same date in the previous year. The Treasury balances on December 1st, 1900, amounted to £3,197,330, and at the same date in 1899 to £3,692,343.

The Smithfield week is noted for the maximum attendances at Mark Lane, and while trade is busy by day there is also on more than one occasion "a sound of revelry by night." On Tuesday, while the elect of agriculture are gathered round the Minister of that Department, there will be a humbler but probably no less festive gathering in the Pillar Hall of the Corn Exchange Restaurant, Mark Lane, where the "Hurst and Son Musical Society" have their annual Smithfield Week smoking concert.

Some surprise has been excited by the decision of the Mark Lane Markets Company to close the two exchanges not only on December 26th—that was taken for granted—but also on December 24th. There will be no markets markets between December 21st and December 28th. The suppression of the Monday market when it falls neither on a religious festival nor on a Bank Holiday is said to be absolutely illegal, and to entitle any farmers to petition the Crown for the grant of a fresh market. The law relating to *market overt* is both ancient and obscure, but it seems difficult to believe that a Royal grant con be suspended at the will of a limited liability company, and without authority from any statute.

Visitors to Mark Lane who have heard (how can they help hearing?) of the lightermen's "strike," the bargeowners' "agitation," and the "discontent" of the wharfingers, were alarmed this morning to find the street barricaded with overturned trucks, deep entrenchments, and cross trenches. Red flags waved on the top of newly-erected earthworks, and long tubes projected in a threatening and "four point seven" manner over convenient embrasures. Evidently the contending parties had come to the dread arbitrament of arms! But no; the local policeman was strangely unmoved, and on inquiry I learnt that while the Postmaster-General was studying the public convenience on one side of the street, the electric light people were equally obliging on the other. Mark Lane is "up"!

The Right Hon. R. W. Hanbury was on Saturday re-elected at Preston without opposition on his appointment as President of the Board of Agriculture. At the General Election Mr. Hanbury's majority over Mr. Keir-Hardie, the Labour candidate, now one of the members for Merthyr, was upwards of 4,000.

The Right Hon. Henry Chaplin, M.P., late President of the Local Government Board, in replying to a letter from the Chairman of the Sleaford Conservative Association, stated that when asked to resign his office he was offered a peerage, but that he would not accept it.

AGRICULTURAL POLITICS.

By a Lobbyist.

There is one remarkable fact about the new House of Commons, and that is its concentration, its business-like intention, and its eagerness of resolve. Is this to be utilised for the advantage of the agricultural interest? Aye, there's the rub. It is not. Not even the personality of Mr. Hanbury—and let me say that after my comments of last week I feel that a renewed tribute is due to it—has induced a closer sympathy with the interest. If you were to ask a man in the lobby whether he did not think there was a prospect of a renewed interest being given to agriculture he would probably reply, with an air of petulance, "Are you not satisfied? You have had two of your agricultural M.P.'s, Mr. Ailwyn Fellowes and Mr. Grant Lawson, given posts of some distinction; surely this should be enough." If you were to speak about the possibility of an agrarian policy you would be laughed at. Agrarian policy, forsooth? Didn't we have the Agricultural Holdings Act Amendment Act last session; and haven't we the Bœotian Boer to settle this session. Isn't that sufficient.

Mr. Chaplin may console himself with the reflection—if consolation he need—that he has the sympathy of a united House over the unfortunate incident which resulted in his resigning his Ministerial appointment. The petty whipsters who, in their infantile conceit, have girded at him and at his Parliamentary method now comprehend the dignity of his life and the honesty of his purpose. I heard in the lobby more regrets at the ill-fate which has befallen Mr. Chaplin than I have ever heard during my fifteen years' association with the House of Commons. There was only gratifying alloy in these regrets, and that was bred of the reflection that the right hon. gentleman will for awhile at least remain a member of the Lower House.

All at once it was borne in upon the youngsters who have in the past expressed their poor irony in taunting jeers that the removal of Mr. Chaplin would mean the removal of one of the last relics of the stately time of the great Parliamentarians. He and Sir William Harcourt are the two last remnants of the Gladstonian period, the period which has a direct connection with the period of Peel, with the period of Charles Buller, with the period of Pitt, of Fox, and of Sheridan. Their style may not be crisp and incisive, as is the present business-like manner. It is, however, stately and imposing. It is the Gothic manner of oratorical architecture. The present fashion is the commercial-traveller manner.

Sir Henry Campbell-Bannerman's tribute to Mr. Chaplin was echoed by all the more distinguished members of the House. Mr. Balfour, Sir William Harcourt, Mr. Chamberlain, and Mr. John Morley all uttered an acclamatory

cheer in appreciation of the Liberal leader's tribute to his genial manners and his sonorous rhetoric. I see that in some of the papers the word "laughter" is interposed after the report of Sir Henry's remarks. The "laughter" was the ebullition of a few jaunty youths who have naught to commend themselves to political reputation but their conceit, and was instantly rebuked by the general reproval of the House. I was keenly watching Sir Henry at the moment, and I noted that he was moved as he gave utterance to the compliment, and that he had no sympathy with the burlesqueing-stupidity of his petty-minded followers.

Mr. Chaplin is really a great figure in the House. I agree that he is somewhat out of harmony with the modern Parliamentary manner, the manner, that is, which has been introduced by Mr. Chamberlain—a manner that is, say, clear-cut, and is coldly cynical; but he has what is better—he has the grand style, the Grandisonian style if you like. And, frankly, I think that Sir Charles Grandison was a better type Englishman than Mr. Chamberlain.

I was talking with certain members of the Conservative party, and I found that they were chiefly irritated over the fact that Mr. Chaplin's supersession had meant a supersession in favour of the Salisbury family. It is no use disguising this. It is the absolute and indisputable fact. And yet let us ask ourselves these two or three questions: Has Lord Selborne, son-in-law though he be of Lord Salisbury, shown such a monumental capacity that he should usurp the place of one of the most esteemed men in the last Ministry? Let us go farther, and ask: Was Mr. Gerald Balfour, Lord Salisbury's nephew, so great a success as Chief Secretary that he deserved to take the place which Mr. Chaplin filled with distinction? A step even further—had Lord Cranborne imposed his personality so much on the House that he deserved to be included in the Ministry?

These thoughts and suggestions are not mine alone. They are the reflection simply of the view of the lobby or, rather of the best men in the lobby. It would be idle to deny the fact that there is a wide feeling that Mr. Chaplin has been badly and ungenerously treated. Lord Rosebery, it is true, got some humour out of the situation in the brilliant speech which he delivered on Thursday night in the Lord's. This, however, I can say—that Lord Rosebery's speech did not indicate his real view. That view is—and, as a fact, he really indicated this in his speech—that in the desire for what I may call a "family-inflation" the Premier has sacrificed a man of fine political lineage, and of great political capacity. The salient fact of the situation is that the agricultural interest has lost from the Cabinet a generous and unswervingly faithful exponent and friend. The promotion of Mr. Ailwyn Fellowes and the elevation of Mr. Grant Lawson—both excellent and able and promising men—are no compensation for this. If I use an old phrase of mine, I will say that the manner of the supersession of Mr. Chaplin leaves a very bad taste in the mouth. This is the view of the lobby. Nobody likes it but the ribalds.

The Right Honourable Robert Spencer—I like me much that "Right Honourable"—was this week the object of a good deal of attention in the lobby. "Ah," would say one old legislator after another, as they greeted him, "can it be still the fact that you are not an agricultural labourer?" Of course, the subtle allusion was to the day when Mr. Spencer rose, and with haw-haw manner, hair-parted-in-the-centre dignity, and arrayed in all the Solomon-like panoply of glossy boots, perfect-fitting clothes, and scintillating eye-glass, declared, "I am not an agricultural labourer." The Right Honourable Bob seemed, I must say, to tremendously enjoy the rather poor joke.

A rumour is in circulation in political circles—an excellent rumour if it be true. It is that the new Minister for Agriculture is devoting himself to the question of foreign competition and its effect upon British agriculture. Is Mr. Hanbury, after all, to prove himself a blessing in disguise?

Will the arsenical beer scare have any effect on the pure beer agitation? Of course it will. The men associated with that movement—men like Sir Cuthbert Quilter, M.P., and Mr. F. Wilson, M.P.—are not the kind of politicians to neglect such an opportunity of pursuing a laudable purpose. Indeed, they have to my personal knowledge already proceeded to take advantage of it. The Government will not prevent a revival of the movement by the complacent assertion that there is a law already applying to the adulteration of beer. Of course there is; but there is not a law preventing beer being a product of the chemist's laboratory rather than of the hop-field. To define "beer" and its ingredients is an excellent suggestion; but even that would not go far enough. Sir Cuthbert Quilter should re-introduce his Bill with, perhaps, an additional clause in harmony with the suggestions of recent experience. I say that Sir Cuthbert should do this. As a fact, he will do this.

Agricultural Returns of Great Britain, 1900.

Produce of Wheat, Barley, and Oats.

Preliminary statement showing the estimated total produce and yield per acre of wheat, barley, and oats in Great Britain in the year 1900, with comparative statements for the year 1899, and for the average of the ten years 1890-99.

		England.	Wales.	Scotland	Great Britain.

Sir J. H. Gilbert on the Wheat Crop of 1900.

An estimate of the average yield of wheat per acre in the United Kingdom has been made at Rothamsted for each year (with one exception) from 1852 up to the present time, founded on the produce on selected plots in the experimental wheat field which has now grown the crop for fifty-seven years in succession, from 1843-4 to 1899-1900 inclusive. Further, commencing with 1863, such an estimate has been issued annually. With the death of Sir John Lawes it would seem not inappropriate that the annual publication should be discontinued. It happens, however, that Sir John watched very carefully the progress of growth of the crop this year up to harvest, and frequently commented on its indications; and as the meteorological and statistical data have been got together, I have decided to draw up the results for publication in the usual form. It is, it is true, later than desirable, but absence from home, and full engagements when at home, have rendered it impossible for me to take up the subject sooner. Obviously, too, it is quite impossible to make any promises for the future.

Referring to the wheat crop of 1900, the first point to consider is what were the characters of the season which grew it? The greater part of September, 1899, was warmer than average, with a considerable deficiency of rain. Then followed several weeks of lower than average temperature, with at the end of September and the beginning of October a considerable excess of rain, leading to drainage from the pipes in the experimental wheat field. With the exception of a cold period about the middle of December, the temperature ranged unusually high from the last week in October to nearly the end of January; and after the excessive rain early in October there was a period of dry weather favourable for working the land and getting in the seed. But again at the end of October and in the beginning of November there was a great excess of rain, with considerable drainage from the experimental plots. Then followed a period from the middle of November to nearly the end of December of considerable deficiency of rain, succeeded then and early in January by excess of rain, and drainages from the pipes. Locally, on the ground there were, with little exception, lower than average temperatures to the end of March, and there was a great excess of rain and much drainage from about the middle of February to early in March. The explanation of so much autumn and winter drainage will be seen as we proceed.

With the exception of some warm days in April and the beginning of May, there was cool weather in March to the end of May, on the whole lower than average temperature, with at the same time great deficiency in rain. From that time to August the temperature was, with the exception of short periods, considerably over average, three months being with great deficiency of rain up to nearly the end of July, though there was a fair amount towards the end of June. There was, in fact, considerable deficiency in March and April, much greater deficiency in May and July, but a slight excess in June. In August, with again prevailing high temperature, there was considerable excess of rain.

Such were the conditions of the weather at Rothamsted, which gave the crop of 1900. We have next to consider what was the amount and character of the produce on the experimental plots. The following table gives, in the usual form, the produce of the selected plots in the past season, which was the fifty-seventh year of the successive growth of the crop on the same land. It also gives, for comparison, the average produce of the same plots over the preceding ten, thirty-eight, and forty-eight years, 1852-99 inclusive:—

	Unmanured Plot 3.	Farmyard Manure Plot 2.	Artificial Manures. P.Q. Plot 7.	Artificial Manures. P. Q. Plot 8.	Artificial Manures. Plot 9 or 16.	Mean of Plots 3, 7, 8, and 9 or 16.
BUSHELS OF DRESSED GRAIN PER ACRE.

TOTAL STRAW, CHAFF, ETC., PER ACRE, OATS.						
Present year 1900	9	32	30¾	39¾	31¾	33¼
Averages:—						
10 years, 1890-99	9¼	41¼	41	43¾	40	38
38 years, 1852-89	10¾	41¾	42¾	40	41	38
48 years, 1852-99	10¾	43¾	43	42	42	38

(a) Equal to 27¾ bushels at 60lb. per bushel. (b) Equal to 30½ bushels at 60lb. per bushel. (c) Equal to 27 bushels at 60lb. per bushel. (d) Equal to 27½ bushels at 60lb. per bushel.

The table shows that without manure there was rather less grain, and also less straw, than over the preceding ten years, and in a greater degree less than over the earlier periods. The farmyard manure, with its great accumulations, gives nearly eight bushels less grain than the average of the preceding ten years, and more than two bushels less than the average of the forty-eight years. There was also nearly 8cwt. less straw than the average over the preceding ten years, and slightly less than over the forty-eight years. Turning to the results on the three artificially manured plots, Plot 7, with full mineral manure and 86lbs. of nitrogen as ammonium salts, gives between three and four bushels less grain, and from 7cwt. to 8cwt. less straw, than over either of the preceding periods. Plot 9 (or 16), again, with the same mineral manures, and the same amount of nitrogen as Plot 7, but as nitrate of soda instead of ammonium salts, and all sown in the spring, gives about five bushels more grain, and over 8cwt. more straw, than Plot 7; though less straw than over either of the preceding periods. Lastly, Plot 8, with the same mineral manures as Plots 7 and 9, but with an excessive amount of nitrogen, as ammonium salts, gives the large produce of forty-four bushels of grain, which is more than six bushels over the average of the preceding ten years, and more than seven bushels over the average of the forty-eight years. Further, it gives not much less straw than the average of the preceding periods. The general result is, then, that without manure, with farmyard manure, and with two of the artificial manures, there was more or less deficiency of both grain and straw compared with the average produce of the plots, whilst on Plots 8 alone, with an excessive amount of nitrogen as ammonium salts, was there more than average produce of grain, and nearly average produce of straw. How is this to be explained?

Attention has been called to the frequent and considerable autumn and winter drainage from the plots, and analysis of the drainage waters has shown that they contained considerably higher than average amounts of nitrogen as nitrates. Even the farmyard manure plot, which, owing to its greater porosity and absorptive capacity, gives pipe drainage very seldom compared with the artificially manured plots, in this season gave drainage far in excess of that in the average of seasons. As in previous years, the composition of the drainage of Plot 7 with that of Plot 15, the two plots receiving the same amount of ammonium salts, only one quarter of which, how-

ever, is applied to Plot 7 in the autumn, and the remainder in the spring, whilst on Plot 15 the whole is applied in the autumn, the result was that the total autumn and winter drainage showed a loss of nearly twice as much nitrogen as nitrates from Plot 15 as from Plot 7. Accordingly, the produce of Plot 15 (which is not given in the table) showed 9½ bushels less grain, and more than 8cwt. less straw, than Plot 7, with the less loss by drainage. It has been shown, too, that there was considerable reduction of produce both with farmyard manure, and on Plots 7 and 9 (or 16), due to loss of nitrates in the autumn and winter drainage. The effect of this was evident in the restricted winter and early spring growth.

Then followed, as has been stated, first a period of low temperatures and great deficiency of rain, and afterwards considerably over average temperatures with great deficiency of rain up to the end of July, continuing the condition of restricted growth almost up to the ripening period. The crops were indeed prematurely ripened, though aided somewhat by the rains of the last week of July and the beginning of August. Nevertheless, the grain was small, and showed the character of "strength" rather than of adequate starch accumulation. The weight per bushel was in every case lower than the average of the preceding ten years, but higher than that of the forty-eight years. The general result was very short straw crops and deficient yield of grain, excepting in the case of Plot 8, with the excessive amount of ammonium salts. This latter result is quite consistent with the supposition that in the other cases there had been loss by drainage in the autumn and winter, and defective action of the nitrogenous manures in the spring and early summer when only applied in moderate amount, whilst with the excessive quantity enough became available under the conditions of drought and heat of the spring and early summer; and under the same conditions the crop, which usually is laid, stood up well, and so yielded a high amount of grain.

The next question to consider is how far the climatic conditions and the character of the crop were similar in the chief wheat-growing districts of the country. The Meteorological Office records show that in the eastern, midland, and southern districts there was, as at Rothamsted, an excess of rain at the end of September and the beginning of October, a considerable excess towards the end of October and the beginning of November, at the end of December and the beginning of January, and a great excess in the latter half of February. In the north-east of England there was also considerable excess about the first, third, and fourth of the above periods; and in the east of Scotland at the end of September, early in November, at the end of December, and the beginning of January, and towards the end of February. There was in all probability, therefore, loss of nitrates by drainage in the autumn and winter in the chief wheat-growing districts of the country, as well as at Rothamsted; whilst later in the season there was generally, as at Rothamsted, over average temperatures, with great deficiency of rain up to the middle or end of July; leading to premature ripening in some southern districts, whilst in the north the later crops suffered more from rain at the ripening period.

Quite consistently with the above, the published records of the wheat crop, especially in the eastern, midland, and southern districts of the country, show it to have been short in straw, and very generally only average or under average, and but seldom over average, in yield of grain. Further north the records are rather more favourable.

Whether the crop of the country as a whole suffered less or more in its early stages from loss by drainage, and later from drought and heat, than the Rothamsted figures indicate may be a question. Further, as the Rothamsted average is influenced by the unusually high produce of Plot 8 (forty-four bushels), which would be only reached in the country at large in the case of some soils in high condition, the figure arrived at would, so far, be probably too high rather than too low. But as the area under the crop is unusually low, and the yield per acre is also low, it would make little difference in the estimate of the requirements from stocks and imports whether the actual figure obtained or a somewhat lower or higher one were adopted. Taking, however, the figures as they stand, the result would be as follows:—The average of Plot 3, Plot 2, and the mean of the three artificially manured plots indicates a produce of 27¼ bushels at 60¾lbs. per bushel, which, reckoned at the official weight of 60lbs., gives an average of 27⅝ bushels. The area under wheat in the United Kingdom was only 1,898,839 acres, or lower than has been reached in any years excepting 1895 and 1896. Assuming this area to have yielded an average of 27⅝ bushels per acre at 60lbs. per bushel, the gross produce of the country would be rather more than 6½ million quarters (6,556,928). Deducting from this two bushels per acre for seed, the estimated available home produce would be rather over 6,000,000 bushels (6,082,218). The average population for the current harvest year is estimated at 41,168,808; and, taking the consumption per head at six bushels of 60lbs. per bushel, the total requirement for the harvest year would be nearly 31,000,000 quarters (30,876,606). Deducting from this the available home produce (6,082,218 quarters), the requirement from stocks and imports would be about 24¾ million quarters (24,794,388).

POISONED BEER.

MORE CASES AND DEATHS.

Beer Turned into the Sewers.

Letters from Sir C. Quilter and Mr. C. Sewell Read.

During the past week cases continued to be reported of persons affected with peripheral neuritis, due to drinking arsenically-contaminated beer, but they have somewhat diminished in number. The epidemic has caused great excitement, not only in the districts specially involved, but all over the country. Annexed will be found various items of interest relating to it.

No Bill to be Introduced into Parliament.

Mr. F. Wilson, on Friday, asked the President of the Local Government Board if he would take steps to define the word beer like bread, butter, etc., or whether beer was still to be made of any imaginable article grown, manufactured, or imported into this country.

Mr. Grant Lawson, who was received with cheers from all parts of the House, asked to be allowed to answer the question, in the absence of the President of the Local Government Board. He said: Legislation is necessary to give effect to the wishes of the hon. member. My right hon. friend, the President, cannot undertake to introduce a Bill for the purpose the hon. member desires, but I may point out to him that the adulteration of beer can be dealt with under the existing law.

What Does the Government Intend to Do?

Sir Cuthbert Quilter intends to ask the First Lord of the Treasury on Tuesday what action the Government intend to take in view of the epidemic in Manchester and other places attributed to the presence of poison in beer.

Local Government Board Inquiry.

The Local Government Board (says the *British Medical Journal*) has instructed one of its medical inspectors (Dr. G. S. Buchanan) to watch the epidemic on its behalf, and that he is already engaged in visiting the various places that have been principally affected.

Sir Cuthbert Quilter on Pure Beer.

Sir Cuthbert Quilter, M.P., writes:—Will you permit me to reply through your columns to the numerous requests which have reached me from all quarters for some indication of the views of myself and friends interested in the pure beer movement on the lamentable epidemic of poisoning in Manchester and other towns? Without anticipating the result of the scientific investigations now in progress, there would appear to be little doubt that the epidemic is a striking illustration of the public danger to which we have for many years directed attention, arising out of the liberty permitted to brewers to use any materials they choose in the brewing of beer. This liberty is enjoyed under what is popularly known as the "free mash tun," a concession granted by Mr. Gladstone when he repealed the malt tax in 1880. So largely did the brewers avail themselves of this freedom in the choice of ingredients, that within a few years a movement was inaugurated with the object of securing a definition of "beer," and for many years subsequent to 1885 a Bill was annually introduced in Parliament for the purpose of obtaining such definition. In 1896 the Bill, which, with the assistance of members on both sides of the House, had been amended and amplified, reached the second reading stage, but on the Chancellor of the Exchequer offering a Departmental Committee to inquire into the matter the Bill was withdrawn. The sittings of this Committee extended over two years, the outcome being a majority report against any alteration of the existing law, and a minority report strongly insisting on the necessity of safeguarding the interests of the public. We are of opinion that recent events are a complete justification of the minority report, and that had the Government acted on its recommendation the present epidemic might never have occurred. It was pointed out that the fact of brewers being free to make beer of any materials they pleased, so long as the revenue did not suffer, rendered necessary much more scrupulous regulations for the protection of the public against the use of deleterious ingredients than at present exist. Though there is no article of food consumed on anything like the scale of beer, in the manufacture of which the indiscriminate use of any chemical or other material is permitted by law, the system of examination followed by the excise officers in the breweries, and by the Inland Revenue officials at Somerset House, is designed for the protection of the revenue and not the detection of deleterious ingredients, so that the presence of any dangerous impurity is never likely in existing circumstances to be discovered until after the mischief has been done. Notwithstanding that the Treasury may be "empowered" to prohibit the use of anything noxious or detrimental, the evidence taken by the Committee went to show that this power has never been exercised save in the case of saccharin, a preparation believed to be harmless, but which was regarded as "detrimental" to the revenue. Further, the fact remains that the present epidemic has occurred in spite of official precautions, whatever they may be. And so long as the present system is allowed to continue, so long will the door remain open to the use of poisonous or deleterious ingredients. It was also demonstrated to the Committee by public analysts of high standing that they were powerless in the matter, as the provisions of the Food and Drugs Act were inoperative as regards beer. Surely, the time has now come when a period should be put to this subordination of public health to the interests of the revenue. Sir Henry Primrose, the chairman of the Board of Inland Revenue, was congratulating the Country Brewers' Society the other day on the excellent relations which subsisted between his Department and the great brewing interest, and he thought the attacks on the "free mash tun" might be regarded as at an end. As he is further reported to have said that he entered on the "beer materials" inquiry with the "blank impartiality which is born of blank ignorance," one is tempted to imagine, having regard to the strange way in which the conclusions of himself and the majority of the Committee have been falsified by recent events, that he must have emerged from the investigation in much the same state of "ignorance," minus the "impartiality." I only refer to these utterances of Sir Henry Primrose because they are typical of the attitude which has been habitually adopted by the Department over which he presides on this important question. Every brewer knows perfectly well that the employment of invert sugar, glucose, etc., in the preparation of which dangerous chemicals are used, is not necessary to the successful manufacture of beer. They enable beer to be matured more quickly and therefore larger quantities can be turned out with the same capital, plant, and storage room, and there is this further advantage, that by keeping down the demand for barley its price is correspondingly depressed, and brewers are able to purchase such quantities as they are obliged to use at a cheaper rate. It is in the light of these facts that Mr. Read, in his report, asks that the complaints about British barley and the statement as to the necessity of getting "sun into the mash tun" should be regarded. Abroad the use of substitutes has, in some States, been for centuries absolutely forbidden. In Bavaria it is a criminal offence, and not only the public, but the brewers themselves, are most active in seeing that the law is strictly enforced. It is difficult to see why that which is found not only desirable but practicable there should be regarded as impossible here. At any rate, the wholesale poisoning which has, unfortunately, occurred only goes to prove the necessity for still greater exertions in prosecuting the movement for better securing the purity of beer, and certainly justifies the opinion of Mr. Read, based on a careful consideration of all the evidence placed before the Beer Materials Committee, that legislation or other provision is necessary to prevent the use of deleterious substances in brewing. We propose to bring the matter again before Parliament at the first opportunity, feeling as we do that the time has surely come when the same protection as is afforded to the purchaser of other articles of diet, such as butter, milk, coffee, etc., should be extended to the immense number of our fellow-countrymen whose regular and favourite beverage is beer.

Letter from Mr. Clare Sewell Read

Mr. Clare Sewell Read writes:—

I trust that in justice to Sir Cuthbert Quilter and the other witnesses who gave evidence before the Beer Materials Committee, you will insert the following extracts form my minority report dated January, 1899, which have a significant bearing upon the beer poisoning in the North:—

"It has been shown that in the past certain ingredients (such as cocculus indicus, quillaia bark, grains of paradise, capsicum, tobacco, copperas, etc.), which are commonly known to be of a poisonous nature, *have* been used; and there is strong ground for stating that, at the present time, materials which are possibly of an injurious nature are still employed. For instance, *sulphuric acid is largely employed for inverting sugar*, and the use of salicylic acid as a preservative is open to grave objections. It is significant that it is forbidden in Germany, *except in beers destined for exportation*.

"It is certain that *hardly any of the glucoses used are pure*, particularly those made from potatoes, which Dr. Schidrowitz told us he knew to be still imported from Germany and sold in this country for brewing purposes. And he stated, further, that the results of experiments upon cats made by Dr. Tunnicliffe had been sufficiently striking to suggest that *certain glucoses* may have *deleterious effects*, and that further investigation is certainly desirable in the public interest. Although a glass or bottle of beer may contain but a small quantity of an injurious substance, if these small quantities are constantly taken very harmful results are likely to follow.

"The fact that a brewer is free to make 'beer' from *any materials he pleases*, so long as the Revenue does not suffer, renders necessary much more scrupulous regulations for the protection of the public than at present exist."

It is quite possible that if these precautions had been heeded this most lamentable sacrifice of life and health might have been averted.

At the recent Country Brewers' festival, the chairman of the Board of Inland Revenue made great fun over the experiments upon cats. As it turns out an accidental experiment was at that very time being made with ghastly effect upon human beings.

In summing up my conclusions I stated in my report:—

"That at present the public have no adequate protection against the use of deleterious substances in the manufacture of beer.

"That it would be neither difficult nor vexatious to enforce such legislation as would ensure to the purchaser his right when he asks for beer—the national beverage—to obtain a beer brewed entirely from malt and hops."

A Revenue Official's Opinion.

The following letter is from "A Revenue Official": It is an ill wind that blows nobody any good. If the recent disclosures in the Midlands and North-West help to give a fillip to an important but declining industry, by creating an increased demand for English barleys in lieu of other substitutes used in brewing, the public agitation and unrest of the past few weeks will not have been in vain. Having had a practical experience of twenty years' supervision and inspection of breweries, I am strongly of opinion that a return to the old system of malt and hops would be beneficial all round. In the first place, it would benefit the farmer by increasing to some extent the present ruinous price of barley, and, secondly, the beer consumer would gain by having a purer and more wholesome drink at a very little, if any, enhanced cost.

The benefits accruing to the farmer will be better understood by a glance at the following figures:—In 1871 there were 271,483cwt. of sugar used in brewing in the United Kingdom. In 1881 the numbers rose to 1,125,342cwt., and in 1891 to 2,045,524cwt. These figures are steadily going up year by year. When we reflect that, for brewing purposes, 2cwt. of sugar are equivalent to a quarter of malt, it will readily be seen that the enormous quantity of malt displaced by the use of so much sugar is a distinct loss to the farming interests. But this is not all. Maize, rice, and foreign grain are also largely used by brewers, and the demand thus created helps considerably to keep down the price of home-grown barley. From the brewers' standpoint, some eminent authorities consider that a reversion to the old duty on malt and hops would be a step in the wrong direction, and would inflict hardships of a restrictive character on a great industry, without any compensating advantages. They argue, and with some show of reason, that, in the present state of our fiscal system, other trades, no more legitimate or useful, are free from irritating restrictions. The corn merchant, for example, is free to buy when, where, and what he pleases. The foreigner can dump down on our shores any quantity of foreign wheat or barley, raw or prepared, without the least Governmental interference. In fact, we encourage it.. The brewers, therefore, object to experiments of a hampering character which would practically confine them to certain markets for their requirements, and absolutely put a veto on the use of other articles which they consider essential to their business.

There is certainly some plausibility in this argument. When we consider, however, that a large number of brewers, some very eminent in the trade, have long since discarded the use of any substitutes for malt and hops with good results, that there is a strong public opinion in favour of malt and hops only, and that the change from the present system would benefit our oldest and most important industry, the argument loses much of its weight. Moreover, the "trade" has had a pretty good innings, the average price of barley for the twenty years the Act has been in operation having been somewhat less than thirty shillings per quarter. The price of beer during the same period has practically remained stationary.

It is somewhat curious to note that, in the allied industry of distilling, the use of sugar has not by any means kept pace with the ever-increasing quantities of that article used in brewing. The whole subject is a very important one, and well within the realms of practical legislation.

A Burton Analyst on the Use of Glucose.

Mr. H. A. Hobson, who has had twenty years' experience as an analytical and technical chemist to a very large firm of Burton brewers, states that it pays the beer manufacturer to use glucose, because it saves him malt, which is much more expensive, giving a gain of 4s. to 6s. per barrel. If the brewer employs glucose, it should be good, because it can be obtained quite easily without arsenic, for there is plenty of it supplied to confectioners perfectly free from poison. In the process of boiling maize, starch, or very common cane sugar with sulphuric acid, the acid is neutralised with chalk, which forms a white precipitate of sulphate of lime, and that is strained off, but some of the arsenic remains in the glucose solution. The arsenic comes originally from iron pyrites, which are burned. It is quite possible to get pure sulphuric acid without arsenic. He, upon analysis, has found arsenic in glucose in quantities that would have led him to refrain from using it for brewing. The operations of the Foods and Drugs Act should extend to the analysis of glucose and brewing sugars. He maintains that it is not necessary to use glucose or sugar, except for cheapness, and if pure beer is required, brewers must go back to malt and hops, to which, indeed, some brewers confine themselves.

A Medical Expert on the Arsenic.

The *British Medical Journal* says:—"Pure beer brewed from malt and hops is, it appears, not within the reach of the classes who mostly drink that beverage, because the malt sugar is costly. To make the drink cheaper, two other kinds of brewing sugar are used; one obtained by the action of sulphuric acid on inferior grades of cane sugar, called in the trade glucose; and the other by the action of the same acid on starch, usually obtained from maize, sago, or tapioca, and called in the trade invert sugar. The brewing sugar so produced is in itself wholesome. But, no doubt from similar considerations of cheapness, 'commercial,' sulphuric acid is used in the process, and certain specimens of this have recently been shown by Dr. Harold Dixon, F.R.S., Professor of Chemistry in the Owens College, to be highly contaminated with arsenic. In his report quoted in the paper by Professor Delépine and Dr. Tattersall, M.O.H. for Salford, printed in another column, he writes:—'I can say that it contains more than 1.4 per cent. by weight of arsenic acid'; also that 'there is strong evidence that this glucose contains fully 0.05 per cent. by weight of arsenious acid.' The means by which the arsenic gets into the sulphuric acid is comparatively obvious. The chief source of sulphuric acid in commerce is the roasting of iron pyrites, which, besides containing the essential sulphur, contains also arsenic, and both are passed over in the form of vapour into the condensing chambers, to appear later as 'commercial' acid. Therefore, because sulphur and arsenic occur together in nature in a substance suitable for the purposes of manufacturers of sulphuric acid, beer drinkers have, it is believed, contracted arsenical neuritis. The amount of arsenic which actually gets over into the beer varies from 0.01 grain to 0.28 grain per gallon, and it has been estimated that one grain in three gallons of beer would be a very dangerous amount.

Substitutes and Deceit.

The *Lancet* indicates that it is not satisfied that all trouble is passed, and hints that mischief may yet arise in fresh places. "We venture to suggest that a special Government order should be issued instructing all county authorities to institute an analytical inquiry in their districts. The investigation could be conducted legally under the provisions of the Food and Drugs Act, but it is a mistake to suppose that proceedings can be taken on finding arsenic in beer, at any rate in the first instance, for there is a clause in the Act which provides that guilty knowledge of the presence of an injurious ingredient in food or drugs is essential to the proof of offence. Once warned, however, the beer-seller may be severely punished if he attempts to sell beer which he is informed is contaminated. This serious occurrence affords a fresh and startling argument for the interdiction of substitutes unless very definite steps are taken to secure the absolute purity of such substitutes. . . . The introduction of food substitutes on all sides requires a very complete and searching inquiry, and, in our opinion, the substitute is so often a means to fraud that some very special legislation should be directed to this question. However expedient a substitute may be, the public have a right to be protected from the deceit of being tendered a substitute in the place of the genuine article."

The Brewers' View.

A special meeting of the Parliamentary Committee of the Country Brewers Society was held in order to consider the question of arsenic in beer. Following a previous meeting, a notice was sent to all members of the Society, strongly advising them to use no brewing sugar which had not been previously examined for arsenic, and to withdraw all beer which had been brewed with sugar found to be impure. The secretary now reported that the brewing sugar of many of the principal manufacturers had been already analysed by an experienced chemist, who reported that "in no instance was the slightest trace of arsenic present." The committee entered upon a lengthy inquiry, with expert advice, into the source of the contamination, and came to the conclusion that, though undoubtedly there has been arsenic found in the sugar of a single firm in the North of England, there is no reason whatever to suppose that arsenic exists in any beers except those brewed with the particular sugar in question.

Wholesale Employment of Sulphuric Acid.

Mr. Fairley, the city analyst of Leeds, in reply to a query as to the extent to which sulphuric acid came into connection with food products, replied that as it was made use of in most chemical operations and as one or other of the ingredients of almost every manufactured article of food was at some stage subjected to chemical treatment, it might be said that sulphuric acid played as important a part in the trade as did iron and steel in other industries. Few people realise to what an extent chemistry is practically concerned with the daily life of everyone.

Increased Use of Spanish Sulphur.

The *Daily Mail*, in its money article, states that at only the old-fashioned sulphuric acid, made from brimstone, were used there would be little risk to beer or wine drinkers. But the modern demand for it is so large that fresh sources of supply have had to be resorted to, and much of it now comes from the Spanish copper mines. The pyrites mined at the Rio Tinto and Tharsis Mines contain a large percentage of sulphur, which formerly was a mere bye-product; but now it can be treated profitably, even if there be no copper in it. Among other things, it yields the impure sulphurous acid with which cheap glucose is treated and dessert wines are sprayed. How rapidly the trade in Spanish sulphur is growing may be gathered from a circular recently issued by the directors of the Rio Tinto Company to their shareholders. Referring to the operations of the past half-year, it said:—"The consumption of pyrites continues to increase, and there has sprung up a large demand for ore containing practically no copper, and which is sold for its sulphur only." The new uses for this sulphur must be numerous to produce so large and growing a demand. It enters directly or indirectly into other drinks than beer; but, so far, not the slightest legal supervision has been exercised over it."

Yorkshire Farmers to the Front.

The Selby Farmers' Club, on Monday, resolved: "That the Yorkshire Agricultural Union and the Central Chamber of Agriculture be requested to take immediate steps to remedy the great injury done to the British public and the farmers by beer being brewed from other materials than malt and hops as the principal ingredients."

At a meeting of the West Riding Chamber of Agriculture, held at Wakefield on Friday, it was resolved to recommend (1) that a Bill be introduced to make it compulsory upon all brewers who use other materials than malt and hops to declare the same, and be registered accordingly, and that guarantees be supplied by all brewers of the purity of their productions; (2) that the Excise duty be largely increased on those using other ingredients than malt and hops; (3) and that analyses of beer sold be more frequently taken by inspectors under the Food and Drugs Act.

Shropshire Views.

At the annual meeting of the members of the Ludlow Agricultural Society it was resolved: "That this meeting of the Ludlow Agricultural Society views with alarm the injurious effects caused by the beer brewed from other ingredients than malt and hops, and trusts Her Majesty's Government will at once cause inquiries to be made with the view of promoting legislation which will provide that beer should be brewed only from malt and hops and water."

"A Shropshire Farmer" writes:—I think the time has come when the English farmers and landlords should ask the Government to pass a Pure Beer Bill, which has been denied them so long, when the scandal is revealed of the poisonous rubbish that some large brewing companies are now flooding the country with. But what else can one expect as long as the abominable "tied houses" are allowed to stand? It is impossible to get thoroughly pure beer while the brewery companies pay 15 to 20 per cent. at the cost of agriculture, it being a very significant fact that every year the price of barley gets lower, although this year the yield is less. I know it is very hard in these days to get legislation to help agriculture, but surely it is not asking too much for a law to be passed to compel brewers to do the same as other tradesmen. What about the various fines imposed every day on retailers of other manufactured articles which are adulterated? In some papers people are writing to say that farming is better, and wants no Government assistance, but I should think they are totally ignorant of what they are talking about, or they would see by the cattle market the dulness of the "stores," the reason being not that farmers are short of keep, but short of money to purchase. I wish that every county member would take a Pure Beer Bill up, and not let it fail for want of co-operation, as is usual with everything agricultural. Now that there is such a cry out for keeping the working men in the country, surely the Government can help us a little without feeling afraid of losing office. If agriculture is finally ruined, where are our yeomen to come from with sufficient stamina and love of home to fight for our country? We know farms are readily filled, but with a poorer class of men employing no labour, and letting their land get into an uncultivated state, producing barely sufficient to exist on. It should set us all thinking when we hear of a man like A. E. Mansell, whom we have all looked upon as a type of the best Shropshire farmer, contemplating leaving the Mother County for Tasmania.

Lincolnshire Farmers Meet.

A crowded meeting of Lincolnshire farmers was held in Boston Town Hall on Wednesday to consider the

question of the adulteration of beer. The Mayor of Boston presided. Sir W. C. Quilter, M.P., sent a telegram sympathising with the object of the meeting, and the following resolution was carried:—"That this meeting records its regret at the knowledge acquired through the Press of the poisonous character of beers largely supplied to the trade at the present time, and pledges itself to use its utmost endeavours to influence through Parliament the production of beer brewed solely from malt and hops, and to be sold as such, beers brewed from any other substance to be declared and sold under another name." A representative committee was appointed to continue the agitation on the lines of the resolution.

Hop Growers on the Move.

The hop-growers in Kent and Sussex have secured the services of Mr. Griffith Boscawen, M.P., and Colonel Brookfield, M.P., with a view to the introduction of a Pure Beer Bill into Parliament. As beer is the national beverage, the hop-growers point out that the present question is one of national import. They express the hope, now that the feeling in the country has been aroused, that strenuous efforts will be made to compel brewers to discontinue the use of substitutes for malt and hops. The present use of chemicals, they say, not only endangers life, but is a source of deception to the consumer. They further state that until the recent revelations were made 99 per cent. of beer-drinkers were unaware of the fact that they had been partaking of a liquid which was not produced by malt and hops. The real cause of the impurities in beer is, the hop-growers contend, the result of the brewers' endeavour to put on the market a cheaper article. In Germany the question of impure beer is watched by the Government, and why, they ask, should not the same practice be adopted in England?

Beer Poured into the Sewers.

The Liverpool medical officer, in a report submitted to the City Council on the question of beer poisoning, says there is evidence that certain brews of ale have been contaminated, this being due, so far as ascertainable, to impure sulphuric acid being mixed with glucose. In three cases the deleterious beer had been run into sewers, and in other cases the barrels had been sealed under the Food and Drugs Act. It was also stated that between 200 and 300 samples of beer had been analysed, and thousands of barrels of beer had been emptied into the sewers, and that the brewers and publicans were co-operating with the authorities to check the evil.

Nearly the whole of the employés of a big Manchester brewing firm have been seriously affected with the symptoms of arsenical poisoning. As is usual in the trade, a certain quantity of beer is served out to each man daily, the ale being forwarded direct from the company's brewery. For some time the men have been affected by losing alternately the use of their legs and arms, and have shown dropsical tendencies. In one case the sufferer turned the colour of a mulatto, whilst his skin is scaling off. The only man who has escaped is a total abstainer. With the exception of three, all the men are now off work and under medical treatment. On Friday the beer in stock for the use of the men, comprising four 56-gallon casks, was run off into the public sewers.

On Saturday one of the brewery companies in Market Drayton stopped the sale of beer at twenty-five of their houses, and decided to destroy the whole of their present stock, amounting to over 25,000 gallons.

At Bilston (Staffordshire) a brewer stated on Friday that on finding traces of arsenic in the glucose supplied to him he immediately withdrew his ales on tap at his different houses, and poured over 12,000 gallons of ale down the sewers.

Growth of the Burton Trade.

A correspondent at Burton has had personal interviews with many of the principal directors, managers, or brewers of the leading firms in the brewery metropolis on the all-absorbing topic of poison in beer. In reply to the question, Has it affected you adversely or otherwise? perfect unanimity existed. There had been an enormous increase in their output. Not only were numerous orders arriving from entirely new customers, but several firms were executing orders for thousands of barrels to local brewers in various parts of the country, but more particularly up north. The output capacity in some cases is being strained to its utmost limits. In the case of Messrs. Bass and Co., the great abnormal run has been upon pale and bottled beers. The leading firms of the town have not deemed it necessary to take any action beyond replying to individual inquiries, but most of the others are extensively circularising their customers, and forwarding analytical certificates, demonstrating that their products are absolutely free from arsenic or any deleterious ingredient, and in the case of the Burton Brewery Company a guarantee certificate is attached to every invoice. Of the millions of barrels annually sent out no case of adulteration has ever occurred in Burton beer.

Speaking generally, the Burton ales are brewed entirely from malt and hops of the very finest quality. Pure Burton malt and hop beer requires from four to six months to properly mature, whereas in many of the small breweries in various parts of the country, where 25 per cent. of saccharine matter is used, beer is consumed the day after "racking"; hence it is possible, and often the case, that within nine days of the first process of mashing, beer has been sent out and the casks returned empty to the brewery. The difference in the cost of producing the Burton ales and the cheaper quick consumption beers of other towns depends upon the qualities of the ingredients, but the principal saving is in avoiding the enormous outlays of the Burton brewers in casks and storing room and the lying idle of fabulous capital.

Hints and Suggestions.

We are requested to state that Sir Cuthbert Quilter, M.P., whilst very grateful for the interesting suggestions and information which have reached him, finds it impossible to reply individually to the immense number of correspondents in all parts of the kingdom who have written, encouraging him to persevere with the pure beer movement.

LITERARY NOTICES.

The Agricultural Annual and "Mark Lane Express" Almanack.

This highly useful volume for the year 1901 is published to-day. It is printed in first-class style, on best quality paper, and is beautifully illustrated on the same lines that gave so much satisfaction last year. As a frontispiece, a very lifelike portrait is given of the Right Hon. R. W. Hanbury, M.P., the new President of the Board of Agriculture. The general contents of the book include important articles by numerous writers on topical and practical subjects. Few agriculturists will disagree with the views of Mr. T. G. Read, who treats upon "Agriculture and National Defence," showing what our great industry has to perform if the country is to continue to flourish, enunciating a policy of the "Three B's," namely, bread, beef, and beer, and suggesting the terms of a Bill that might be brought into Parliament with a view to placing British agriculture in the prosperous position it should fill. In "Profitable Barley Growing," Mr. H. Stopes draws attention to the breeds of barley now used for malting, and directs attention to the fact that six-rowed barley, though longest in cultivation, has for a long period not had a fair chance to compete with rival sorts. Whether the six-rowed or two-rowed sample should be grown is a question which absolutely rests upon the type which pays the farmer best. With the present low prices ruling for malting grain approaching so closely to the food value of barley for stock, it is most desirable to inquire and experiment as to what kind should receive the attention of the farmer. "Garden Crops on the Farm," by Mr. G. H. Hollingworth, is full of suggestions of a practical character, and may be thoughtfully read and adopted in a very large number of cases. Miss E. A. Roberts, probably the cleverest of our dairy experts, contributes a clear explanatory article entitled, "How to Make Good Butter," from which anyone at all acquainted with dairy work can gain such knowledge as will enable a maker to improve the quality of the butter he or she is at present producing. A very timely paper is that by Mr. Eldred G. F. Walker on "Horse-breeding as Affected by Motor Traction," a feature which is now and will be for some time of absorbing attention. The writer still believes in a future for the horse; for he considers that "whereas many can purchase and own a horse, it is confined to the few to be owners of mechanical motor power, and usually in the long run the majority wins, especially as the horse can do most of the things the motor can, and several things that the motor cannot do." Mr. A. Dewhirst contributes a short article on "The Profitable Breeding of Pigs." He is a successful breeder and exhibitor, and his paper is constructed on the lines intended to be useful to the ordinary raiser of swine rather than for the benefit of those who breed principally for exhibition purposes. "The Decadence of Agricultural Shows," by Mr. A. W. Stanton, is sure to attract attention by reason of the falling-off of interest which has taken place in these gatherings on the part of the public, and especially as the Royal Agricultural Society (which, amongst others, is referred to) seems to be in a state of indecision, if not transition. Another article deals with "Agriculture in Parliament" during the last Session, by "J. C.," and Mr. W. W. Chapman gives a record of "Agriculture During the Year 1900," the two forming a brief retrospect of the twelve months through which we have just passed. "Manures and Their Use" is contributed by a well-known agricultural chemist, Mr. A. E. Sibson, and a member of the Royal College of Veterinary Surgeons provides a very timely and exceedingly useful article on "Difficult Parturition," which is one of the troubles experienced at lambing time. Mr. R. E. Turnbull deals with the question of the wages of agricultural labourers, concerning whom he says, "Their present condition is more satisfactory than in any other former period during the century; every labourer can find employment, and all who are efficient can obtain good wages." The close of the century, he considers, is full of promise for farm labourers throughout the whole of the kingdom. Farmers will be interested and also benefited by Mr. A. E. Bromehead Soulby's article on "Firewood," who puts the legal position of the farmer on this question in a very understandable light. Mr. J. Darby treats on "Minor Breeds of Cattle," and a well-known contributor ("B.") gives a good description of "Sheep Dogs: Working and Otherwise." Other articles are "Potatoe Cultivation," by "J. R. S.," and "The Poultry Yard." Mr. A. J. Stanton, the editor, introduces the contributors in a brief preface expressing the opinion that the twentieth century will see wonderful developments and changes, many of which may directly affect agriculture on one or more of its various sides, and that "we are entering upon it with grand hopes and a bright outlook for the enlargement and consolidation of the Empire—a prospect so favourable to future permanent strength as the nation has never previously experienced." The volume is completed with a very valuable selection of tables for agriculturists, and there are more than fifty illustrations, making up a book which will be acceptable to, and warmly welcomed by all agriculturists. This volume of 240 pages, in coloured printed wrapper, is published at the low price of sixpence, and can be had through any bookseller or newsagent, or direct from the MARK LANE EXPRESS office, 1, Essex Street, Strand London, W.C. (in the latter case postage extra).

The Christmas number of "Bibby's Quarterly" has just made its appearance. It is eight pages larger than the autumn issue, there being altogether sixty pages, of which nineteen are devoted to the literary supplement, and this part of the Quarterly will help to while away some dull half-hours. The level of merit in the articles is maintained, whilst the illustrations, which number over a hundred, are up to their usual standard of excellence. Of the numerous items in this number, perhaps the most interesting are "Some Champion Winners of the Year" (this is accompanied by capital photographs); "Pure Water for Stock"; and "Water." At the conclusion of the latter article the editor makes the following announcement:—"In thinking over the above matter, and remembering the difficulties under which our country readers labour with regard to obtaining reliable information as to the purity of their water supply, we have come to the determination to fix up and equip a separate laboratory at our works, where we will analyse water for our customers both chemically and bacteriologically, free of cost during the year 1901." Full particulars can be had from the Manager, Bibby's Laboratory, Formby Street, Liverpool.

"The *Melbourne Argus* Tables of the Australian Mails for 1901" is a small book, suitable for the pocket, consisting of twenty-eight pages, containing complete official British and foreign mail services to and from Australia and New Zealand, rates of passage, postage, and cable charges, with an excellent Orient Line coloured track chart of the world, showing distances from port to port and differences in time. It is illustrated with pictures by W. L. Wyllie, A.R.A., of the fine mail steamers Ophir (chartered to convey their Royal Highnesses the Duke and Duchess of York to Australia) and Ormuz, calendar, etc., etc. Copies may be obtained gratis at the London offices of the *Argus*, 80, Fleet Street, or by enclosing a penny stamp to cover postage.

Messrs. E. Marlborough and Co., 51, Old Bailey, E.C., have just issued the first volume of the Marlborough Series of Foreign Technical Manuals. It is an English-French and French-English dictionary of technical and business terms and phrases used in commerce, arts, sciences, professions, etc., the aim in its compilation being to collect terms and phrases not to be found in the ordinary dictionary. As an appendix are given tables, moneys, weights and measures, so arranged as to show at a glance the various units and standards, and the correct methods of finding equivalents in both countries. To travellers in France and those who have dealings with people in that country this work, which was compiled by J. A. Standring and C. A. Thimm, F.R.G.S., should be invaluable; and as it is printed on light paper and is of pocket size it can be carried about and be always handy for reference.

The December issue of *Blackwood's Magazine* might very well be termed a war number, for the greater part of its contents touch upon the South African conflict. First of all there is the continuation of "Army Reorganisation—The Home Army," the subjects dealt with in this instalment being training and redistribution in relation to training and to mobilisation for war. Then there is an interesting narrative headed "With Plumer to the Relief of Mafeking," written by one of his troopers; a description of "A Reconnaissance," by Ernest Dawson; a paper entitled "Christmas Under Arms," by Capt. Neill Malcolm, D.S.O., Argyll and Sutherland Highlanders; and "The Passing of a Nation" The Boers, by "Linesman"; whilst three parts of "Musings without Method" are taken up with war topics. The other items in the number include "The Watcher by the Threshold," by John Bucan, and "The Casket Letters," by Andrew Lang.

FARM PROSPECTS.

Bedfordshire.

We are having beautiful spring weather, the roses are still blooming, we can sleep with the windows open, the grass on the good land is growing like mad, we shall probably enjoy Christmas Day picnicing in the woods, and as we polish off the turkey and sausages for dinner, we shall almost fancy we are eating young duck and green peas! We have not dreamed of getting the cattle into the yards yet; they are doing too well on the grass for that. This is advantageous, as we are short of straw, and the new year will soon be here. Those of us who have weak lungs need not trouble about going abroad for the winter. Yet the yield and price of corn is enough to freeze the very marrow in our bones. I hate to write about it; in fact, I hardly dare, for, according to some people, "T. S." is always grumbling. The wheat has come up quickly and well. Buyers are easily found for store cattle.

The Right Hon. Henry Chaplin.

The agricultural world was staggered as it read Mr. Henry Chaplin's letter to his constituents, dated November 30th. Having lived in Lincolnshire for nearly nine years, next to the Sleaford Division, I well know how the Lincolnshire agriculturists have always looked up to Mr. Chaplin as their best friend. We, in other counties, independently of politics, also know that he is altogether with us, and I firmly believe, Sir, that many farmers during the recent election would never have voted Tory had they been aware that their noble industry would be so

Slighted by Lord Salisbury.

It is for us now to let the Prime Minister plainly understand what we think of his action. He has left out of the Cabinet a splendid man, whose heart and soul was in agriculture, and given us a Minister who professes to know nothing about it. Why is this punishment inflicted upon agriculture? Is it because Mr. Chaplin, a short time ago, bravely spoke somewhat in favour of a reimposition of the shilling duty upon foreign corn? If so, it is

A Burning Shame.

I am a well-known Radical, but also a Protectionist, and not ashamed to own it, although I am a hopeless heretic, as our chief county paper calls me. In losing the services of Mr. Chaplin, I am confident we have lost one of the best men who ever took up the cudgels to fight for agriculture.—T. S. (December 7th).

Carmarthen.

Beautiful open weather for December, with plenty of pickings for the cattle and good keep for sheep, which will save much of the hay and straw for winter fodder. The ground is often covered with snow this month, and great consumption of winter keep. The weather during November has been very wet—rain day after day—and has kept farm work backward, but has been very mild on the whole. Turnips in most places are a good crop and are growing now. Farm servants are very scarce, and ask higher wages, and are getting the advance they are asking, too.

No Farmer Grows any Corn for Sale.

They use all for feeding, and buy much Indian and barley meal, as the Americans can grow it cheaper than we can. Cattle are in demand at our fairs and markets, and are selling at good prices; from £10 to £13 each are given for two-year-old steers and heifers, and from £12 to £16 are given for cows with calves. Sheep are not so brisk; breeding ewes sell at about £2 each.—D. P. (December 7th).

Essex.

The prospect for farmers in the Chelmsford district is anything but encouraging, wheat, barley, oats, and beans not coming up to the promising anticipations of harvest time as to yield. Roots are a fair crop, but owing to the prolonged drought of the summer and autumn the pastures have been very bare of feed. This district has experienced less rainfall than almost any in the kingdom. The high price of all feeding stuffs and the low price of anything the farmer has to sell makes the outlook for the present year very discouraging.—J. C. (December 5th).

Leicester.

Farming prospects improve none; outlook worse. Beef down 6d. per stone, mutton about the same, pork lower, good samples of barley selling in our market at 25s. It is time the brewers were compelled to brew from pure malt and hops. We should not have this adulterated stuff that is causing such a commotion throughout the country. We have just had our Martinmas hiring of servants, waggoners getting from £24 up to £30, cowmen about the same lads from sixteen to eighteen, if willing to milk, £1 a year according to age. I know a youth last year had £6 hired this at £15. I ask it is possible for the farmer to pay these high wages out of the low price of corn he has to sell? I know several farmers working harder and considerably more hours than their labourers, and cannot make the two ends meet.—W. C. (December 7th).

North Devon.

Wheat a good average, 100. (Taking 100 to represent healthy state, freedom from injury, and average growth and development.) Barley, 95 per cent.; oats, 100 per cent.; potatoes, 60 per cent.; roots, 100 per cent.; grass, 100 per cent. Wheat sowing forward, gone in well. Late potatoes one half poor. Apples small and keeping badly. All stock healthy and selling at fairly good prices. Agricultural prospects fairly good.—J. H. (December 6th.)

Shropshire.

Weather open—a little damp, but mild; bar., 30.17; ther., 50. The storing of turnips and mangolds has been almost completed under very favourable circumstances. The threshing machines have been at work, and with good engineers there were no stoppages. Plenty of hands came to do all the work, but the barley yield was defective, after all. It faltered before it reached the banking account. Oats yielded better. Wheat not very prolific. Foreign countries compete well for pedigree stock, one New Zealand customer giving Messrs. Mansell and Co. £240. It seems that a lot more money can be made from high-pedigreed stock, but it costs a lot to get into pure breeding. Still, it pays.—J. G. (Dec. 7th).

West Somerset.

The weather continues mild, with slight occasional frost and frequent rain; the previous drought, however, has been such that there are still many complaints of springs not having yet broken. The work on the farm is well forward, and I think

More Wheat

than for some years has been planted, the season being propitious and this year's barley proving very unsatisfactory. The sales of Christmas beef have been somewhat variable, but on the whole where quality has been good there is an improvement on past years. Mutton, on the other hand, keeps low, and sales drag. Keep for all kinds of stock with an ordinary season should prove sufficient, the roots having improved considerably in the late season. The

Dorset Horns are now Lambing.

The crop, so far as can be seen, does not promise to be a heavy one, and the continual wet is trying to both ewes and lambs. The year 1900 now drawing the century to a close cannot on the whole be recorded in red letters, a general opinion being that it is the worst for many years.—S. K. (December 5th).

Foreign Prospects.

FRANCE.—There is nothing in the appearance of the wheat crop to strengthen the market, for the fields present a fine appearance.

HOLLAND.—Weather has been too wet for farm work. Supplies of home grain were not large in interior markets.

GERMANY.—With a continuance of mild, damp weather, there is no interruption of supplies, which overlapping demand, the markets generally have been steady to firm.

ITALY.—The weather has been rainy throughout the Peninsula, but the condition of the young crops is generally satisfactory.

TUNIS.—The recent rains have enabled farmers to begin sowing.

SPAIN.—From most parts of the Peninsula satisfactory accounts are received of the young crops.

NORTH AFRICA.—Algeria: The ploughings are being prosecuted in good conditions.

RUSSIA.—Temperature has risen over the greater portion of the Empire, and then became general: rainfall is under the average. Snow still covers the fields in Central, Eastern, and Northern governments. Both inland and at the seaboard markets are quiet, and in some instances the turn easier.

UNITED STATES.—The *Cincinnati Price Current* says that the wheat crop situation continues favourable, and that marketings are being readily absorbed by the prevailing milling demand. The corn situation shows no change, and offerings are moderate.

The American Apple Crop.

After deducting losses through September gales, the United States crop of apples, according to the final report of the *American Agriculturist*, approximates 48,000,000 barrels, as against 37,500,000 barrels in 1899, and 69,000,000 barrels in the bumper year of 1896. Not in many years has it been so extremely difficult to form a close approximation of the crop. After the middle of July, climatic conditions became very trying in Michigan, Indiana, Illinois, and the South-West, and crop returns from there were not brilliant. New York, as a whole, has a good crop; Michigan better than further West. Ohio uneven. New England is securing a good many winter apples, and the crop is considerably larger than a year ago, except in Connecticut. Nova Scotia apple growers lost heavily by high winds, and estimates are for not over half a full crop. Ontario yield is considerably larger than last year. The authority named says the season opened with medium to low prices; duration somewhat mixed, growers generally showing a disposition to sell direct from the orchards. While the trade has fallen into [illegible] and markets are over supplied, it is not improbable that good fruit, well packed, will command fair prices later in the season.

British Corn Averages.

Alterations of Returning Towns.

In the *London Gazette* of Tuesday the following notice appears with regard to the collection of the British Corn Returns:—"Whereas it has been represented to Her Majesty in Council that certain towns should be omitted from such list of returning towns and certain other towns added in substitution and in addition thereto, and that the weekly returns of purchases of British corn should be made from the towns 190 in number, enumerated in the Schedule to this Order, it is hereby ordered that weekly returns of the purchases of British corn shall on and after the 1st day of January, 1901, be made from the towns enumerated in the Schedule to this Order."

SCHEDULE

London:—London.
Middlesex:—Uxbridge.
Essex:—Romford, Chelmsford, Colchester, Braintree, Saffron Walden.
Hertfordshire:—Bishop's Stortford, Hertford, Ware, Hitchin.
Bedfordshire:—Luton, Bedford.
Huntingdonshire:—St. Neots, St. Ives.
Cambridgeshire:—Wisbech, Ely, Cambridge.
Suffolk:—Haverhill, Sudbury, Hadleigh, Ipswich, Woodbridge, Stowmarket, Bury St. Edmunds, Saxmundham, Framlingham, Eye, Halesworth, Bungay, Beccles.
Norfolk:—Diss, Harleston, Yarmouth, Norwich, North Walsham, Holt, Fakenham, East Dereham, Watton, Lynn.
Lincolnshire:—Spalding, Stamford, Grantham, Sleaford, Boston, Louth, Lincoln, Gainsborough, Brigg.
Yorkshire, E.R.:—Hull, Howden, Beverley, Bridlington.
Nottinghamshire:—Retford, Worksop, Mansfield, Newark, Nottingham.
Leicestershire:—Loughborough, Leicester, Melton Mowbray.
Rutland:—Oakham.
Northamptonshire:—Peterborough, Kettering, Northampton.
Warwickshire:—Coventry, Birmingham, Warwick, Stratford-on-Avon.
Oxfordshire:—Banbury, Oxford, Bicester.
Buckinghamshire:—Newport Pagnell, Aylesbury.
Berkshire:—Abingdon, Wallingford, Hungerford, Newbury, Reading.
Surrey:—Farnham, Guildford, Redhill, Kingston, Chertsey.
Kent:—Rochester, Sandwich, Canterbury, Ashford, Maidstone, Tunbridge.
Sussex:—Lewes, Brighton, Haywards Heath, Horsham, Petworth, Chichester.
Hampshire:—Newport, Fareham, Southampton, Winchester, Basingstoke, Andover, Ringwood.
Dorsetshire:—Wimborne, Wareham, Dorchester, Blandford, Bridport.
Devonshire:—Tiverton, Barnstaple, Exeter, Newton Abbot, Totnes, Kingsbridge, Plymouth, Okehampton.
Cornwall:—Liskeard, Wadebridge, Truro.
Somersetshire:—Bridgwater, Taunton, Yeovil, Frome, Bath, Bristol.
Wiltshire:—Warminster, Salisbury, Devizes, Swindon.
Gloucestershire:—Cirencester, Gloucester, Cheltenham, Tewkesbury.
Monmouthshire:—Chepstow, Newport, Abergavenny.
Herefordshire:—Ross, Hereford.
Worcestershire:—Evesham, Worcester.
Shropshire:—Ludlow, Bridgnorth, Shrewsbury, Oswestry, Market Drayton.
Staffordshire:—Wolverhampton, Stafford, Burton-on-Trent.
Derbyshire:—Derby.
Yorkshire, W.R.:—Sheffield, Doncaster, Goole, Pontefract, Wakefield, Leeds, Knaresborough, Ripon, York.
Yorkshire, N.R.:—Easingwold, Malton, Scarborough, Thirsk, Bedale, Northallerton.
Durham:—Darlington, Stockton-on-Tees, Bishop Auckland, Sunderland.
Northumberland:—Newcastle-on-Tyne, Alnwick, Berwick.
Cumberland:—Carlisle, Cockermouth, Penrith.
Westmorland:—Kendal.
Lancashire:—Garstang, Preston, Manchester, Warrington.
Cheshire:—Chester.
Anglesey:—Llangefni.
Carnarvonshire:—Carnarvon.
Denbighshire:—Denbigh, Wrexham.
Montgomeryshire:—Welshpool.
Cardiganshire:—Cardigan.
Pembrokeshire:—Haverfordwest.
Glamorganshire:—Cardiff.
Brecknockshire:—Brecon.

The Towns omitted are Huntingdon, Daventry (Northamptonshire), Dulcot (Berks), Reigate, Surrey, Dorchester (Kent), Honiton (Devon), Monmouth, Egremont (Cumberland), and Carmarthen.

The additions are:—Redhill (Surrey), Abergavenny (Monmouthshire), and Cockermouth (Cumberland).

Sutton's Amateur's Guide in Horticulture is one of the very few annuals that have been issued continuously since the dawn of the nineteenth century, and from the first number to the present time this periodical has steadily increased in interest and in usefulness. Almost every page of the edition for 1901 is illustrated with one or more admirable reproductions from photographs, showing the highest types of vegetables and the most beautiful examples of flowers. Many of these are modern types of old favourites; others are comparatively recent introductions which have secured a firm position in popular favour. The work is not merely a record of progress, but it contains a gallery of horticultural fine art, and some of the illustrations will be specially valued for their suggestions of decorative effect. The publishers, Messrs. Sutton and Sons, are evidently enthusiasts in their work, and they have succeeded in inspiring enthusiasm in the public mind. As a result, the period of almost all [illegible] vegetables has been considerably extended, and there is now greater variety than ever, combined with a marked advance in those qualities which ensure success on the exhibition stage.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt, a moderate inquiry at about late rates. Barley, grinding quiet; rather more doing in malting without alteration in price. Wheat was 3d to 6d per qr cheaper. Oats and maize firm. Flour rather easier on the week.—NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—The attendance at to-day's market was small, but demands, although not frequent, were not readily met. English wheat continues in short supply, and the little submitted goes to the local markets; while with north German still remaining a competitor, the condition is fairly good as a rule. Fine white, 31s; and good red, 30s 63lb delivered up. American kinds on hand remain abundant, and supplies coming up from most foreign sources afford no prospect of any immediate advance, although prices tended in sellers' favour. The flour market, although well supplied tended in sellers' favour, American brands being frequently held for 3d advance since last Monday. The London Millers' Association made no alteration at this afternoon's meeting. Grinding barley in moderate supply. Persian, 17s 3d to 17s 6d ex ship, 17s 9d to 18s ex quay; Azoff, 18s 6d to 19s in these positions. Oats continue in short supply, and holders of both American and Russian continue to regard the present situation favourably, well-conditioned sorts being in most support, while quotations are frequently better since last Monday.

Mark Lane, Friday.—English wheat continues in small supply and unaltered, both here and on the country exchanges, with an extremely small business passing, and showed no material alteration. Fine white, 31s; and well-conditioned red, 30s 63lb delivered. Foreign descriptions unchanged. American flour occasionally easier since last Monday, English being steady. The London Millers' Association made no alteration at this afternoon's meeting. Grinding barley fairly maintained. Persian, 17s 3d to 17s 6d ex ship, 17s 9d to 18s ex quay; Azoff, in these positions, 18s 6d to 19s respectively. English malting remains neglected as a rule. Fine samples up to 39s per 448lb, and medium up to 29s. Oats well maintained, especially Russian, good qualities still commanding attention. Flat maize generally unchanged and in moderate supply. Mixed American held for 21s ex ship arrived, and 21s 9d on landed terms. The market for beans and peas remains unaltered.

COUNTRY.

Ashford, Tuesday.—Trade very quiet, but no further reduction. White wheat fetched 29s to 30s; red ditto, 27s to 31s; malting barley of first quality 30s to 33s; ditto second quality, 26s to 30s; grinding barley, 22s to 25s; black oats, 13s to 20s; white ditto, 18s to 21s; mazagan, 29s 6d to 31s; tick beans, 32s to 34s; flat maize, 24s; round ditto, 27s to 28s per quarter. Flour, scaling, 25s; seconds, 26s; households, 28s; whites, 29s per sack.

Aylesbury, Saturday.—Good attendance and fair quantity of grain on offer. Wheat firm at full prices of last week. Barley, beans, and oats unchanged.

Banbury, Thursday.—Wheat, white (old), 27s to 29s per qr; wheat, red (new), 27s to 28s 6d per qr; oats (new), 15s to 20s per qr; oats (old), 16s to 18s per qr. Wheat a quiet trade at the figures of last week.

Boston, Wednesday.—A small attendance, and a slow trade. Wheat, 26s 6d to 27s; malting barley, 24s to 30s; grinding barley, 22s to 23s; oats, 17s 6d to 19s; peas, 45s to 60s; beans, 28s; maize, 23s per qr.

Braintree, Wednesday.—Small supply of wheats; prices were maintained. Barley an average supply, prices up 6d to 1s per qr.

Bristol, Thursday.—There has been a moderate trade since our last market. At to-day's English wheat was in rather less supply, and farmers asked full prices; foreign firm at late rates. Grinding barley and maize 3d to 6d. decline. Oats unaltered. Flour only a bare consumptive demand.—GRACE BROTHERS.

Cambridge, Saturday.—During the week the wheat trade has been without any material alterations. Supplies are larger, but condition remains very poor. At this market to-day there was a better show of wheat on offer in poor condition, and trade was very dull at unchanged prices. Barley was in better demand, and last week's rates, in some cases, were rather exceeded. Wheat, red, 27s to 29s; and white, up to 29s per 504lb. Beans soft and neglected. Oats in good demand, and prices quite firm.

Canterbury, Saturday.—A slow trade for wheat at the recent reduction. Barley dull. Oats firm. Ruling prices:—White wheat, 30s to 32s 6d; red ditto, 29s to 30s 6d; malting barley, 28s to 35s; grinding ditto, 21s to 24s; white oats, 18s to 21s; ditto black, 15s to 20s; peas, 30s to 33s; tick beans, 32s to 33s; mazagans, 27s to 29s; flat maize, 23s; round ditto, 27s to 28s per qr; winter tares, 6s to 6s 6d per bushel.

Carlisle, Saturday.—Smaller show of oats in market to-day, poor quality, 16s 9d to 18s 9d per 336lbs. No old oats or wheats shown.—THOMAS ROBINSON.

Chester, Saturday.—At this market, where there was a fair trade in English grain, wheat of an inferior quality changed hands at 1d per bushel lower. Oats steady; and Indian corn, in good demand, was 3d per sack dearer. Quotations:—Wheat, white and red, 4s to 4s 1d 75lb; grinding barley, 3s to 3s 6d 64lb; beans, new, 4s 10d; old, 5s 6d 80lb; oats, new, 2s 3d to 2s 6d; old, 3s 6d to 3s 9d 46lb; Indian corn, 11s to 11s 3d 240lb

Chichester, Wednesday.—Wheat was in small supply, and trade was quiet at unaltered prices. The same remark applies to other departments. Weather very wet and attendance thin.

Colchester, Saturday.—Fair supply both of wheat and barley, slow trade for both at about last week's prices. Beans and oats, not many offering, steady trade at full prices. —FRANCIS AND CO.

Dorchester, Saturday.—Owing to the continued wet weather farmers have been unable to thresh, and consequently little corn of any description was offered, and that was affected by the damp. Trade was very dragging in all departments. Prices for English wheat were in buyers' favour. Only the best lots of malting barley were saleable. Other feeding stuffs dull.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day. Wheat firm and held for 1½d to 3d per boll advance on the week. Flour quiet and unchanged. Indian corn steady at a decline of 1½d to 3d per boll. Grinding beans and Canadian peas firm at last Wednesday's prices. Foreign and home oats steady, and the turn against buyers. Barley quiet. Oatmeal steady. Bran and thirds in small request at late rates. —GIBSON AND CLARK.

Glasgow, Wednesday.—Wheat firm, and held for 1½d to 3d per boll advance on the week. Flour quiet and unchanged. Indian corn steady at a decline of 1½d to 3d per boll. Grinding beans and Canadian peas firm at last Wednesday's prices. Foreign and home oats steady, and the turn against buyers. Barley quiet.

Hereford, Wednesday.—Few samples shown, and those that changed hands were at previous or lower prices for all classes of grain. Wholesale prices: Wheat, white, 3s 3d to 3s 5d per bushel; red, 3s 2d to 3s 4d; barley, 2s 9d to 3s 9d; oats, 2s to 3s; beans, 3s 8d to 4s; maize, 2s 8d to 3s; vetches, winter, 4s to 6s; and spring, 3s 6d to 5s.

Leeds, Tuesday.—Port stocks proving lighter than expected, and the world's shipments more moderate, the wheat trade exhibits rather more firmness, and after the dullness of the past few weeks, a more active consumptive demand would seem only natural. On the business doing to-day sellers have the advantage in price. All good qualities of malting barley are in steady request; common sorts move off slowly. Maize rather firmer. Beans and oats steady.—DUNNS AND CO.

Leeds, Friday.—Very slow demand for both English and foreign wheat, and with lower quotations for American Tuesday's prices are barely maintained. Malting barley scarce and the turn dearer. Beans, peas, maize, grinding barley, oats, and flour all firmly held.

Leicester, Saturday.—Good attendance of buyers and dealers, with fair supplies of wheat in variable condition. Trade sluggish at 27s to 31s per 36 stones. Barley steady. Fine oats firmer.

Lincoln, Friday.—Moderate supply of English wheat, with a steady trade at about last week's rates. Reds, 27s to 28s; whites, 28s to 29s; foreign quiet. Large show of barleys; malting parcels from 28s to 35s. Oats, maize, peas, and beans firm.

Liverpool, Friday.—Wheat steady with a fair business at full prices for all wheats, excepting springs, which are ½d lower. Flour is steady with a very small trade for foreign. The Liverpool Millers' Association make no change in the minimum price of bakers. Maize is firmly held for mixed American, and, owing to small offerings, buyers have unwillingly been obliged to pay ½d over yesterday; prices show a gain of ½d to 1d over last market day. European steady, quiet. Plate corn quiet at unchanged prices. Barley for malting is unchanged, the demand still keeping poor. A very moderate trade has been done in feeding, prices favouring buyers. Beans are the turn easier, with a slow consumptive trade. Peas steady at ½d decline for Canadians, but quiet. Oats firm but quiet for English; foreign kinds are also firmly held, but only a quiet trade is passing at about unchanged prices. Oatmeal steady at quotations. Oilcake steady with a fairly good demand at late rates.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—We have a remarkable continuance of wet weather, constant rain falling, so that the attendance was not large at the market to-day. Wheat remains at just about previous value; owners will not part at less money, while millers are not inclined to pay more than last week. Barley, except for very best sorts, is decidedly slow, and to press business a step down has to be taken. Oats are firm, and 3d rise has been made. Maize is not a fast trade, as the price is above the views of feeders. Beans and peas are each as dear as of late, with a small demand for them. There is no change in the cost of tares, rye, hemp, brank, sergo, or millet.

Manchester, Thursday.—A quiet tone has prevailed today, though odd cases of slightly more doing are mentioned. English wheat is unchanged as compared with a week ago; but foreign sorts are ½d to ¾d per cental dearer. Flour keeps slow at late rates. English oats are firm, though quiet. Foreign ¼d per bushel dearer. Peas and beans unchanged. Indian corn is ¼d per cental dearer on the week.

Newark, Wednesday.—There was only a small show of grain at this market. Wheat was in slow demand at about last week's rates, the condition being unsatisfactory. Oats and beans repeated previous rates. Barley, excepting for good sorts, was a very poor trade.

Newcastle-on-Tyne, Saturday.—Wheat ruled quiet at our to-day's market, prices unchanged. Maize firm, and a good demand at last week's quotations. Barley, peas, and beans a steady trade, and prices maintained. Oats slow sale, and in buyers' favour for all classes. No change in the price of flour.—JOSEPH POLLARD AND CO.

Newport, Wednesday. — Wheat rather dearer on the week. Maize firm and dear. Barley quiet; no change in price. Oats and beans, no change. Fines, 23s 6d.

Northampton, Saturday. — Attendance moderate, the supply of farm produce under the average. Wheat and barley were in price similar to last week; business generally was dull and inactive. White wheat, 29s to 30s; red, old, 29s to 30s; red, new, 26s to 28s; barley, 24s to 32s; grinding barley, 20s to 23s; oats, 18s to 23s; old, fine, 25s; beans, 28s to 36s; flour, 22s to 26s

Norwich, Saturday.—The supply of wheat was not heavy at our market to-day, but sufficient for the languid demand; prices are nominally 6d per qr lower on the week. Barley in fair supply, trade being about the same as last week. Dull and damp weather prevails, with mild atmosphere for the season. Wheat, red, 28s to 29s per qr, weight 63lb per bushel imperial. Corn Inspector's return for the week ending December 3, 1900:—Wheat, 1,573, 27s 4d; barley, 14,947-5, 26s 7¾d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat, small supply; fair trade, at previous value. Fine barleys, well supported prices, but inferior sorts slow of sale. Oats, but few offering, and full prices made. Beans steady.—ROBERT HUBBLE.

Oxford, Saturday.—Small market. Wheat and barley quiet trade at last week's prices.

Peterborough, Saturday.—The continued damp weather tells upon condition of wheat, and to effect sales to-day a slight concession in price had to be made. Barley steady, fine samples the turn dearer. Oats firm at late rates.—THOMAS HILL AND SON.

Plymouth, Thursday.—Our Corn Exchange was thinly attended this afternoon, so business was very quiet. Wheat is steadier; but barley, maize, and oats are all at last week's prices.—ORLANDO DAVIS AND CO

Reading, Saturday.—Business to-day ruled very dull, despite a full attendance. Wheat was only in small supply, and, with a dragging trade, last week's figures were barely supported. Other kinds of corn were in about the usual supply, but met with little inquiry, and in these cases recent rates were generally upheld.

Ripon, Thursday.—Malting barley shows a better tone, and more business is being done. The show of wheat is light. A small attendance. Wheat, English, new, 27s to 29s; ditto, old, 31s; ditto, foreign, 30s 6d to 34s 6d; barley, malting, 24s to 29s ditto, grinding, 21s to 23s; oats, old, 25s to 26s; ditto, new, 17s to 19s; maize, round, 24s to 27s; ditto, flat, 23s 6d per qr; beans, old 1s per stone; bran, £5 per ton.

Romford, Wednesday.—Wheat trade slow, and damp samples cheaper. Several samples out of condition. Red wheat, 27s to 29s 6d, and white wheat 27s 6d to 31s 6d per quarter.

St. Neots, Thursday.—Wheat in rather better supply, but the condition of samples left much to be desired, and trade ruled slow on former terms. Malting barley was in moderate request, and most useful qualities found buyers at fully previous rates. Oats and beans firm.—ELGOOD AND SON.

Salisbury, Tuesday.—Notwithstanding there was a good attendance of buyers and a fair supply of grain at the Corn Exchange to-day, trade generally was quiet. Wheat sold slowly at last week's prices. Malting barley a shade cheaper. Oats unchanged. Beans and peas were again the turn dearer. The following were the quotations: Wheat, new 25s to 28s per qr; ditto old, 30s to 33s; best malting barley, 32s to 36s; ditto secondary, 26s to 29s; oats, black, 16s to 20s; ditto white, 18s to 22s; beans, 32s to 36s.

Sheffield, Tuesday.—Moderate attendance. Last week's prices for English and foreign wheat firmly adhered to. Flat maize was a shade dearer on the week. Beans and oats very firm at last week's rates. Quotations:—Wheat, white, 32s to 33s; red, 31s to 32s; new, 30s to 31s per 504lb; oats, old white, 26s; ditto, new white, 17s 6d to 19s; ditto old black, 22s; ditto new black, 16s to 17s per 336lb; peas, grinding, 32s to 34s; ditto blue, 55s to 70s per 504lb; beans, Egyptian, 33s; ditto English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s to 24s; ditto malting, 27s to 35s per 448lb; Indian corn, small old, 29s to 30s; ditto American mixed, 23s to 24s per 480lb.

Spalding, Tuesday.—At the Corn Exchange there were good supplies of corn and a steady demand. Wheat was unchanged in value. Barley firm at late rates. Best oats sold well. Fair trade in beans and peas.

Stockton, Wednesday.—There was a very poor supply of farmers' wheat, which made prices a little over those of last week. The foreign wheat trade keeps steady, with a fair inquiry from millers. Prices show no alteration since last week's market. Oats and maize unchanged. There were very few samples of malting barley.

Sunderland, Saturday.—Supplies of grain are short owing to continuous wet weather, and prices remain unaltered from last week. Arrivals coastwise, barley, 822 qrs; foreign wheat, 2,743 qrs.—E. AND F. RICHARDSON.

Taunton, Saturday.—Small attendance. Wheat a firm trade at last week's prices. Small supply of malting barley, which sold readily at rather better prices. Maize and barley steady. Oats and beans firm.

Wakefield, Friday.—There is no appreciable change in the trade since Tuesday, the consumptive demand being far from active, but all descriptions of hard wheat met a steady sale, full prices being insisted upon, and obtained by sellers. Californian is 3d to 6d dearer on the week. Barley in smaller supply, and meets an improved inquiry at late rates. Flat maize and oats 3d dearer. Beans steady.—DUNNS AND CO.

Wakefield, Friday.—During the week there has been a slightly improved demand for wheat at 3d per quarter on last week's prices. Barley is again in large supply and only the, finest qualities meet attention. No alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LIMITED.

Wisbech, Saturday.—A fair supply of grain; several samples out of condition. Dry wheat sold at late rates; red 27s to 27s 6d, old up to 30s. Oats made full prices, 17s 6d to 20s. Barley, 24s to 28s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—The wet weather caused the attendance to be thin, but a fair business was transacted. English wheat, 11s 6d to 12s per 216lb.; oats (old) 15s to 16s; ditto (new), 11s to 11s 6d; beans (old), 14s 6d to 15s 6d; ditto (new), 12s 6d to 13s 6d per 196lb.; maize, 23s to 24s per 480lb.

Worcester, Saturday.—Small attendance and trade in wheat slow at last week's rates. Very little demand for barleys. Oats and beans steady.

Worksop, Wednesday.—Moderate attendance and small show of grain. Trade extremely slow. Old oats were scarce and met with a ready sale. Old white wheat, 30s to 31s; new ditto, 27s to 28s; old red wheat, 29s to 30s: new, 26s to 27s; best malting barley, 28s to 32s; secondary, 26s to 28s; grinding, 23s to 24s; old white oats, 26s to 27s; new ditto, 19s to 21s; old black oats, 24s to 25s; new ditto, 17s to 19s; flat maize, 24s to 26s; round ditto, 27s to 28s per qr.

York, Saturday.—The supply of wheat continues small and good samples sell readily at last week's prices. Fine samples of malting barley are quite as dear, but inferior neglected. Fine barley, 27s 6d to 29s; good, 26s to 27s 6d; and common sorts, 22s to 25s per quarter of 32 stones. Oats firm and without change. Rye, 7½d to 8d; and old beans, 11d per stone. The official average prices of grain for the week have been:—Wheat, 28s 1d; and barley 27s 3d per quarter.

FOREIGN.

The Antwerp wheat market has presented a fairly good tone. The weather has been dull and rainy in the French country districts, and field work has been almost suspended in consequence in some localities. The young wheats, however, have come up well, and will now be able to withstand effectually the rigours of the winter. The French wheat markets have shown generally little change. At Lyons a slightly upward tendency has been noted, but business has shown no increase of activity at Paris, and prices have not exhibited any improvement. Last week's sales of wheat at Marseilles amounted to 5,800 quintals. Flour for consumption has shown little change in the French capital. The Konigsberg and Dantzic wheat markets have remained at about their former level. The Tunisian wheat trade has shown little speculative activity; purchases are, however, being made from day to day on Marseilles account. Business in wheat has been somewhat restricted in wheat at Odessa, and prices have been barely maintained. Transactions have been proceeding upon a comparatively limited scale at Ibrail and Galatz; wheat has, however, been bought to a certain extent to meet the requirements of consumption. Advices from Buda-Pesth state that autumn sown wheats have made good progress in that quarter. The quantity of wheat now *en route* for Europe is returned at 1,125,000 qrs, as compared with 1,100,000 qrs at the corresponding date of 1899. The total of 1,125,000 qr is made up as follows:—France, 120,000 qr; Belgium, 235,000 qr; Holland, 195,000 qr; Germany and the North, 200,000 qr; and Italy, Spain, etc., 380,000 qr.

Hamburg, Saturday.—Barley rules quiet here, and there is little doing. Importations from the Holstein and Danish Islands are made in fair quantities, and attracting the attention of buyers in consequence of their cheapness, but in the better sorts, such as Saale and Bohemian, few transactions are taking place, and England leaves us without orders. Wheat, quiet but firm, some exportation is still going on to Great Britain of our finest yellow German wheat, 61lb to 62lb per bushel, which must be quoted 27s 6d to 28s per 504lb f.o.b. over here.—FRANCIS M. TH. DUHNE.

LONDON TOP PRICE FLOUR.

OFFICIAL PRICES.

Cereal year commencing 1st September, 1900. s. d.

Sept. 1, 1900 .....(per sack) 30 0

(No official change since last date given).

POULTRY AND PROVISIONS.

Smithfield, saturday.—Moderate supplies met a fair demand. Fowls: Yorkshire, 2s 3d to 2s 9d; Essex, 2s 6d to 3s; Boston, 2s to 2s 6d; Surrey, 2s 9d to 3s 6d; Sussex, 2s 6d to 3s 3d; Irish, 1s 6d to 1s 9d; Welsh, 1s 9d to 2s; turkeys, cocks, 6s to 8s 6d; hens, 4s 6d to 6s; Bordeaux pigeons, 9d to 11d; feathered, 7d to 9d; wild rabbits, 7d to 9d; tame, 10d to 1s 2d each; Australian, 7s 6d to 8s 6d per dozen; pheasants, 4s to 4s 6d; young partridges, 3s to 3s 9d; old, 2s; young grouse, 4s to 5s; old, 3s per brace; hares, 3s to 3s 6d; leverets, 1s 9d to 2s 6d; wild ducks, 1s 6d to 1s 9d; pintail, 1s 6d; teal, 8d to 10d; widgeon, 1s to 1s 2d; snipe, 8d to 1s; woodcock, 2s to 2s 6d; golden plover, 8d to 10d; black, 5d each.

Glasgow, Wednesday.—The Glasgow cheese trade is very quiet. Holders are willing to make concession. Cheddars and Dunlops are priced from 48s to 54s per cwt. The trade is well stocked, and do not feel disposed to operate. In the meantime, cheese must make a little headway or else open up. The dearness in splendid cheese are responsible for the present quietness.

Liverpool, saturday.—Grain.—The demand is good, but with extremely light stocks it should be so. Goods now ready command higher prices. Flour.—Little doing for forward delivery. We quote Canadian, spring wheat, London cut, 25s to 25s 6d, 1s 6d to 2s 6d less for Manitoba cut, 24s to 24s 6d; Minnesota patents, 25s to 25s 6d; Oregon, 24s to 24s 6d; Australian, 24s to 24s 6d; Hungarian, 24s to 24s 6d; Rye flour, 18s to 18s 6d; Buckwheat, 16s to 16s 6d; Indian meal, 13s to 13s 6d; Oatmeal, 18s to 18s 6d; Cornflour, 18s to 18s 6d. Provisions.—Bacon.—Trade is quiet. We quote Irish, Waterford cut, 50s to 52s; Limerick cut, 50s to 52s; Cork cut, 50s to 52s; Dublin cut, 50s to 52s; Wexford cut, 50s to 52s; Belfast cut, 50s to 52s; Sligo cut, 50s to 52s; Derry cut, 50s to 52s; Galway cut, 50s to 52s; Tralee cut, 50s to 52s; Kilkenny cut, 50s to 52s; Clonmel cut, 50s to 52s; Cavan cut, 50s to 52s; Roscommon cut, 50s to 52s; Mayo cut, 50s to 52s; Kerry cut, 50s to 52s; Fermanagh cut, 50s to 52s; Tipperary cut, 50s to 52s; Carlow cut, 50s to 52s; Meath cut, 50s to 52s; Kildare cut, 50s to 52s; Wicklow cut, 50s to 52s; Queen's County cut, 50s to 52s; Westmeath cut, 50s to 52s; Longford cut, 50s to 52s; Leitrim cut, 50s to 52s; Monaghan cut, 50s to 52s; Donegal

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

Sir J. H. Gilbert takes up the place so long occupied by his old friend Sir J. B. Lawes, and in a letter dated from Harpenden, but referring to Rothamsted, gives us his estimate of the year's wheat yield. It comes out at 27⅝ bushels only, or nearly a bushel per acre less than the estimate published by the Minister of Agriculture on the 5th inst. The Government's figures come to 28·53 bushels for Great Britain, 28·39 for England alone. Ireland is not made the subject of any estimate, but if we assign 1,600,000 bushels to the total area whence we have no return (Ireland, the Isle of Man, and the Channel Islands) we shall have a total wheat yield of 53,239,809 bushels. Sir J. H. Gilbert throws light on the source of the deficiency. Unmanured land did worse than at any period for nearly fifty years, and farmyard manure proved unusually ineffective as a stimulus. On the other hand, artificial fertilisers brought on the wheat with unwonted strength and vigour. The moral seems to be that when we have a trying spring money spent on fertilisers to tide over the trial is well invested. Sir J. H. Gilbert puts the wheat crop for the U.K. at 52,449,000 bushels, which is 1,790,809 bushels less than the Government return. He expects an importation of 24,794,388 qrs., which seems to us a very high total. It may be remembered that our own estimate early in September pointed to a yield of 29 bushels per acre and to 23,000,000 qrs. imports. To these figures we adhere.

The rainfall of November having been over the average at 95 per cent. of stations, it follows that the wet weather from the 1st to 8th December has caused some apprehension. The mildness of the season has not yet brought on the autumn sown wheat to any extent deserving the title of "winter pride," and the strong start made in a warm seed bed has been favourable to strong growth, so that the colour is good and the habit of the plant by no means spindly. We may, indeed, affirm that thus far nothing but good has occurred to the growing wheat. While this is so it must be noted that the extreme limit has been reached whereon present conditions can be favourable. The wheat plant wants no more rain for a couple of months, but needs first a fortnight of drying wind, and then a natural winter up to the end of January. Slight frost without snow, or sharp frost after a good snowfall, would be about equally useful.

The markets naturally need winterly conditions in winter, for the usual course of prices and trade is based upon the prevalence of average conditions. The increase of stocks since September is put by "Dornbusch's List" at 888,460 qrs. Our own estimate from week to week shows a net increase on the period of 6,656,000 qrs. Whichever estimate find trade acceptance, there is clear excess of supply over demand for the fourteen weeks, and the result has naturally been to weaken the position of holders.

The last week's supplies of breadstuffs, however, have been rather under the estimated requirements :—

	Qrs.
English wheat	110,000
Foreign wheat	267,000
Foreign flour	115,000
Total	492,000

Stocks which on December 1 were estimated at 3,078,000 qrs. are now put at 3,003,000 qrs.

The quantities of wheat now on passage are as follows :—

	Qrs.
From California	1,025,000
,, America	240,000
,, Australasia	210,000
,, Argentina	210,000
,, Russia	70,000

	Qrs.
Dec. 8, 1900	1,755,000
,, 1899	1,400,000
,, 1898	1,650,000
,, 1897	2,245,000

Average expectations being about two millions, the present total has nothing in it to depress the market.

The supplies of flour on passage are :—

	Sks.
Dec. 8, 1900	350,000
,, 1899	420,000
,, 1898	500,000
,, 1897	510,000

These figures should give courage to a somewhat despondent flour market.

The exportations of foreign barley amount in all to 560,000 qrs. on passage ; the total is thus made up :—

	qrs.
1. Russian	70,000
2. Roumanian	105,000
3. Californian	305,000
4. Turkish	40,000
5. Persian	40,000
Total	560,000

Items 1, 2, and 5 are feeding, 3 and 4 malting, or at least brewery quality.

Of maize only 740,000 qrs. are now on passage as compared with 1,068,000 qrs a year ago. Present anticipations are of 550,000 qrs flat, 85,000 qrs. round, and 105,000 qrs yellow corn. Imports of maize last week were 257,000 qrs. against 533,000 qrs. in the corresponding week of last year. The total arrivals of maize since harvest amount to 3,013,000 qrs., against 4,044,000 qrs. last season. The price at New York is 2s. 3d. per qr. up on the year.

Of barley the imports last week were only 87,000 qrs., or considerably less than an average supply. In the same week of 1899 134,000 qrs. were imported. Yet prices are rather lower than higher on the twelvemonth. This is anomalous, and needs Government inquiry. Of oats the imports were 112,000 qrs., or about 70 per cent. of a full supply. The shipments from America from January 1 to December 8 were 3,333,000 qrs., and from Russia were 8,740,000 qrs. The shipments from Sweden and Finland are very small, but New Zealand has done a steady trade.

Rye shipments last week were 93,000 qrs. of Russian, 1,000 qrs. of Roumanian, and 3,500 qrs. of American. The total shipments since August 1 have been 2,867,000 qrs. of Russian, 163,500 qrs. of Roumanian, and 103,500 qrs. of American.

Linseed shipments were 10,000 qrs. from India, 1,000 qrs. from La Plate, 49,000 qrs. from Russia, and 11,000 qrs. from the U.S.A. There are 80,000 qrs. on passage to the United Kingdom, against 147,000 qrs. a year ago. This great difference has, of course, no little to do with the very high price now asked for linseed on the principal English exchanges.

Of rapeseed 14,000 qrs. are on passage, against 16,000 qrs. a year ago, and market quotations are firmly maintained. Cottonseed is in a rather different position. Spot holders are firm, but with 41,000 tons on passage, against 20,000 tons on December 8, 1899, the situation favours all buyers who can afford to wait till over Christmas.

The Government returns of oilseed imports for November are to hand, and give the following particulars :—

From	Linseed. Qrs.	Rapeseed. Qrs.	Cottonseed. Qrs.
Russia	103,000	10,000	—
America	32,000	—	1,000
India	43,000	4,500	—
Egypt	—	—	42,000
Other countries	32,000	5,500	4,000
Total	210,000	20,000	47,000

Imports of beans and peas for the first quarter of the cereal year—Sept. 1-Nov. 30—are the subject of a special semi-official return, which thus compares with the same period in the two preceding cereal years :—

	Beans. Qrs.	Peas. Qrs.
1900 .. Sept. 1-Nov. 30	146,785	170,784
1899 .. Sept. 1-Nov. 30	110,089	218,600
1898 .. Sept. 1-Nov. 30	163,611	127,575

The trade is both staples may be regarded as steady, both as regards the prices made and the sotal volume of business transacted. Lentils make tittle headway, though the belief of vegetarians in lthem is maintained, and is, we understand, thoroughly well founded. Dari is a staple which steadily gains ground, and it is desirable that we should have from 1901 a monthly Government return of the imports of this article. The sales are now really considerable.

The Government estimate of the home crop of barley has not surprised readers of this journal, which has all along stated its opinion that the crop was small. The official figures for Great Britain now show that the yield was as a matter of fact the smallest since 1893, and we may add that 1892 and 1891 having each bigger crops, 1900 ranks as the second exceptionally bad year of the decade. The yield of oats without the Irish figures is scarcely worth discussing, for the area devoted to oats in the green isle is very considerable, and the crop large enough to modify all calculations. In the absence of Government information we may be grateful to "Beerbohm's List" for a special estimate, which puts this year's yield in Ireland at fifty million bushels. On this basis the total yield of oats for the United Kingdom would be 164,847,537 bushels, against 166,139,840 bushels in 1899, and 172,578,273 bushels in 1898. Of rye the Government give no estimate, but the crop we believe was a good one on the small area devoted to it.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The market to-day, under the influence of mild and sunny weather, was against holders, but the fine day was welcome with a view to the greater event of Smithfield. English wheat was dull at 6d. decline. Some inferior Turkish wheat for feeding purposes was offered at a guinea per 448lbs. Some foreign wheat was in fair request, but prices were barely so good as on Friday. Oregon (good brewing) barley made 26s. 6d., and fine Californian 27s. per quarter. Some serviceable barley from North Africa made 22s. to 22s. 6d. per quarter. Novorossisk (Caucasian) samples fetched 18s. 6d. to 19s. 6d., according to quality. The market for English barley was firm but dull. Maize was 3d. lower. Oats were unchanged. Some beans from Smyrna sold to-day for 29s., and from North Africa for 29s. 6d. For lentils 13s. to 13s. 3d. was made for Egyptian split per cental. Dari was in good retail request.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

The market closed 6d. lower for flat maize and the turn lower for wheat and pulse. For barley and oats firmer prices were made as well as asked, but trade was not brisk.

THE FLOUR TRADE.

MARK LANE, Dec. 10th.

The flour trade was the turn in buyers' favour for London and country makes. There were buyers of town households at 23s. 9d., but where 24s. was demanded bakers, as a rule, declined transactions. Pillsbury's best at 25s. is decidedly cheap, and the same price commands gold medal, Washburn's superlative, and also the very best produce of the best Kansas mills. Second grades of a thoroughly serviceable nature are pressed on sale at 19s. for Iron Duke, 21s. 6d. for Good Hue, 18s. 3d. for Gilt Edge, 20s. 6d. for Palisade, 19s. 3d. for Princess Royal, and 18s. 3d. for Gibraltar. The price of Australian flour was about maintained, but Hungarian was definitely reduced 6d. per sack. French was offered freely at a like decline. Common American feeding flour, such as "Phœnix," is offered at 14s. to 14s. 6d. per sack. In connection with feed we may note that barley meal, country ground, was offered to-day at 6gs. per ton free on rail.

LONDON TERM MARKET.

This market is held twice a day, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—		Dec.	March.	June.
		s. d.	s. d.	s. d.
Dec. 3	11 a.m.	6 4	6 7	6 7
	4 p.m.	6 4	6 7	6 7
Dec. 4	11 a.m.	6 6	6 7	6 7

Dec. 6	11 a.m.	6 5	6 8	6 8
	4 p.m.	6 5	6 8	6 8
Dec. 7	11 a.m.	6 5	6 8	6 8
	4 p.m.	6 5	6 8	6 8
Dec. 8	11 a.m.	6 5	6 8	6 8
To-day	11 a.m.	6 5	6 7	6 7

There is a small demand for maize at 4s. 4d. per cental for December delivery, and 3s. 10d. for February delivery of new crop.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

The deposit required from members of the Term Market has been fixed at £50 *minimum* and 1s. per quarter margin on any purchases above 1,000 quarters.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: The market is in a quiet state, but prices remain exceedingly firm. Offers below current rates are refused.

GRAIN AND FLOUR FACTORS REPORTS.

Trade is slack, and the value of milling offals remains unchanged, and on the whole very little business is done.—RICHARD DOGGETT, Mark Lane.

Wheat supplies moderate, a quiet trade at late prices. Flour unchanged. Maize 3d. per qr. cheaper. Barley and oats unchanged.—COVENTRY, Mark Lane.

Flour.—A dull trade at last week's prices.—T. S. MEDILL, Mark Lane.

There is no change to note in the position of the wheat market since last Monday, but values are steady, although, as usual at this period of the year, the demand is not active. Maize is 3d. easier. Barley unaltered. Oats.—Steady trade at late values.—W. P. WOOD AND CO., Mark Lane.

The approach of the holiday season increases the indisposition for business which has recently prevailed, and there seems now no change of activity till the new century commences. Meantime, there is no quotable change in the value of any article.—JOHN PICARD AND CO., Mark Lane.

Offals.—Consumption of bran small; only a moderate demand. No further change to report in prices. Pollard also in moderate demand.—GREENHILL BROTHERS, Bedford, December 8.

Flour is not quite so depressed this week. Stocks, however, are heavy and prevent any improvement, in spite of the better tone of American markets. Grain.—Indian corn is in better supply on spot, but firm in all positions. Foreign oats and pease are in good demand at full prices. Barley quiet. Canadian oatmeal firm at former rates. Mill stuffs.—Bran and thirds unchanged.—MCKINNON AND MCDONALD, Glasgow, December 8.

Wheat steady with a fair business at full prices for all sorts excepting spring, which is ½d. per cental lower. Flour is steady with a very small trade for foreign. The Liverpool Millers' Association make no change in the minimum price of bakers'. Maize is firmly held for mixed American, and, owing to small offerings, buyers have unwillingly been obliged to pay ½d. over yesterday; prices show a gain of ½d. to 1d. per cental over last market day. European steady, quiet. Plate corn quiet at unchanged prices. Barley for malting is unchanged, the demand still keeping poor. A very moderate trade has been done in feeding, prices favouring buyers. Beans are the turn easier, with a slow consumptive trade. Peas steady at ½d. per cental decline for Canadians, but quiet. Oats firm but quiet for English; foreign kinds are also firmly held, but only a quiet trade is passing at unchanged prices. Oatmeal steady at quotations. Oilcake steady with a fairly good demand at late rates.—ROSS T. SMYTH, Liverpool, December 8.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

Wheat cargoes are fairly steady. Demand is mostly for January and February shipment, and chiefly for the different American descriptions. Maize is a brisk trade for New Year shipment from Atlantic ports, but is slow for cargoes on passage. Barley, oats, and beans are not in much request. Oilseeds come lower.

BUSINESS DONE.

WHEAT.—No. 1 Northern, 31s., January shipment; No. 1 Northern, 30s 9d, February shipment; No. 2 Hard Winter, 20s 9d, January shipment; No. 2 Hard Winter, 28s 9d, February shipment; Californian, 30s, on passage; Walla Walla, 28s 9d, on passage; No. 2 Club Calcutta, 30s 3d, April shipment; Australian, 30s 3d, on passage; Argentine, 28s 3d, February shipment.

MAIZE.—American, 18s 9d, December shipment; Galatz, 21s 9d, December shipment; Argentine, 20s 9d, December shipment.

BARLEY.—Azoff, 18s 6d, May shipment; Persian, 17s, on passage.

OATS.—American Mixed, 14s 3d, on passage; Petersburg, 13s 9d, on passage.

BEANS.—Saida, 29s. December shipment.

RYE.—Roumania, 22s 6d, January shipment.

LINSEED.—Argentine, 47s, January shipment.

COTTONSEED.—Egyptian, £6 10s., January shipment.

FEEDING STUFFS.

London, Monday.—Linseed Cake: Market very quiet, prices unchadged. Cotton cake steady; demand continues good. Linseed firm, and likely to be scarce until the new La Plata arrives about beginning of February.

Pigs	3 8 —	3 10 —	4 4

Milch cows, per head, £1 to £[illegible]

British arrivals include as follows:—Scotland, 217; Eastern Counties, 360; Midland, Home and Western Counties, 1,454; Devon, 120; Ireland, 90.

The supply of beasts compared with Monday last showed an increase, arrivals from Scotland and Norfolk being greater; trade for both prime and second quality was slow, but late rates were fully maintained and in a few instances exceeded for prime Scotch beasts; fat cows and bulls met with limited sales at a decline, the supply being in excess of the demand.

The following are the top quotations per 8lb. (sinking the offal):—

	To-day.	Dec. 11th, 1899.
Scotch	4s 8d to 4s 10d	.. 4s 8d to 5s 2d
Devons	4s 8d to 4s 9d	.. 4s 10d to 5s 0d
Herefords	4s 9d to 4s 10d	.. —
Norfolks	4s 8d to 4s 9d	.. 4s 8d to 4s 10d
Runts	—	.. 4s 0d to 4s 2d
Lincolns	4s 2d to 4s 6d	— 4s 4d to 4s 6d
Irish	—	4s 8d to 4s 10d
Waterfords	4s 2d to 4s 3d	.. —
Fat cows	3s 6d to 3s 10d	.. 3s 10d to 4s 0d

In the number of sheep penned there was an increase of 580; trade for wethers was slightly firmer, whilst ewes owing to a greater number being on offer met with a slower trade even at a decline in value. The supply included 330 Irish, 230 Scotch, and 1,570 from the Eastern Counties.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned:—

	To-day.	Dec. 11th, 1899.
7½ to 8-stone Downs	5s 6d to 5s 8d	.. 5s 8d to 5s 10d
9-stone ditto	5s 4d to 5s 6d	.. 5s 6d to 5s 8d
10-stone half-breds	5s 0d to 5s 2d	.. 5s 2d to 5s 4d
12-stone Lincolns	— to —	.. 4s 10d to 5s 0d
10-stone Irish	4s 10d to 5s 0d	.. 4s 8d to 4s 10d
10-stone Down ewes	3s 10d to 4s 0d	.. 4s 0d to 4s 2d
11-stone halfbred ditto	3s 6d to 3s 8d	.. 3s 8d to 3s 10d

There was a moderate supply of pigs, best small breeds were quoted at 4s 4d per 8lb. Larger sorts were difficult to vend.

London Central, Monday.—Good supplies, trade slow. Beef: Carcases, 3s 8d to 3s 10d; hindquarters, 4s 2d to 4s 6d; roastings, 5s 4d to 5s 8d. Sheep: Ewes, 2s 10d to 3s 2d; wethers, 4s to 4s 2d; hindquarters, ewes, 4s to 4s 4d; wether, 5s 2d to 5s 6d. Pigs: Large, 3s 4d to 3s 8d; small, 3s 8d to 4s.

St. Ives (Hunts), Monday.—Beasts, 400; sheep, 500; pigs, 410; horses, 6. Beef, 7s 6d to 8s; mutton, 7s to 9s 11d; pork, 6s to 7s 3d. Fat and store cattle, and sheep fair trade; fat pigs good demand; stores fair; milch cows, fair show and trade, prices £13 to £23.

FOREIGN CATTLE.

Deptford, Monday.—To-day's supply, compared with Monday last, showed a decrease of 445, and consisted of 20 from the United States and 505 from Canada, the former are not worth quoting, for the latter consisting of Ranch cattle, trade was extremely slow, no really good beasts being on sale, the best made 3s 9d, and occasionally 3s 10d per 8lb, offal given in. Plain ditto were quoted at from 3s 4d to 3s 6d. Sheep, 445, consisting of consignments from Canada, for which there are but little demand. Trade, therefore, was extremely dull at from 3s 10d to 4s per 8lb, offal given in. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 2,791, 4s 3d per 8lbs, to dress about 800lbs. Sheep, 2,634, 3s 8d per 8lbs, to dress from 72lbs.

Liverpool, Monday.—Demand better for all classes of cattle, prices, however, were not quotably higher, except for prime quality. Sheep trade very slow at last week's rates. Beef, 6½d to 4½d per lb; mutton, 8d to 5½d per lb. At market: 1,575 cattle and 5,476 sheep. The Christmas market will be held on Monday next.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 3,623 bales bacon, and from foreign ports 6,878 bales bacon. The demand for bacon was [illegible] last week by the very high prices asked, so much so that the market was decidely easier, and concessions of 2s to 3s were made to effect sales. Irish, 62s, 66s, 68s; Danish, 62s, 66s, 68s; Canadian 62s 66s, 68s. Butter was in better demand, and the market ruled steady for all finest grades with just a tendency to go a little dearer. Danish, 124s 126s; Colonial, 106s, 112s. Lard unchanged steady.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., [illegible] that but little business is just now passing in cloverseed. Meantime, stocks all round are moderate, and quotations generally unchanged. Italian ryegrasses [illegible] attention, but perennials are neglected. The supply of tares and rye is small, but so likewise is the demand. Holders of mustard and rapeseed, in view of the meagre supplies [illegible] prices. Canaryseed, with for the moment a limited sale, is firmly held, whilst the downward course in hempseed has been arrested. Blue peas and haricot beans move off slowly at last week's figures.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

At the Islington market, on Monday, there was a slight decrease in the supply. Trade for best quality opened and continued somewhat firmer, though no alteration in regard to quotations can be noted. Second quality as well as plain beasts met a slower sale, the latter being lower in value, a clearance of these not being made. On Thursday no sales of fat beasts were recorded. On both market days there was a fair, steady sale for butchering cows and bulls, but rough cattle were on the downward track, though they were rather shorter in number. At the foreign animals' wharf (Deptford) markets were held on three days, viz., Monday, Wednesday, and Saturday. The supply on the two former days was very small, that on Wednesday consisting of only 146 head. Trade, though of a slow nature, was firmer in regard to value, a rise of 2d. per 8lbs. being recorded on Monday, this advance being maintained throughout the week. The total number of beasts offered for sale at both markets was 3,497, consisting of 1,830 British and 1,667 foreign, these latter comprising 1,061 from the United States and 606 from Canada. The following were the top rates paid per 8lbs. (sinking the offal): 80 stone polled Aberdeens, 4s. 10d.; 90-stone Herefords, 4s. 9d. to 4s. 10d.; 80-stone Devons, 4s. 9d.; 90-stone Runts, 4s. 8d.; 90-stone Polled Norfolks, 4s. 8d.; 95-stone Shorthorns, 4s. 6d.; 95-stone Waterfords, 4s. 2d. to 4s. 3d.; 90-stone Dublins, 4s. 4d.; 88 to 90-stone States, 4s. 5d. to 4s. 6d.; 85-stone Canadians, 4s. 2d.; ranche ditto, 3s. 8d. to 3s. 10d.; 100-stone fat cows, 3s. 8d. to 3s. 10d.; 100-stone fat bulls, 3s. 4d. to 3s. 6d. The trade for sheep was practically confined to the Islington market, where trade, taking the week as a whole, was of a decidedly slower nature, though on Monday the best wethers and ewes were firm in value, with a steady demand. The total number penned was 6,320, all being British, and showing a decrease of 2,462 as compared with last week. Best pens made per 8lbs. as follows (sinking the offal):—7½ to 8-stone halfbreds, 5s. 2d.; 12-stone ditto, 4s. 10d. to 5s.; 10-stone Irish, 4s. 10d. to 5s.; 10-stone Down ewes, 4s.; 11-stone halfbred ditto, 3s. 8d. Calves numbered only thirty-five, but were difficult to sell; the best were quoted at 5s. 4d. Pigs numbered 440, and met with a slower trade at a decline of fully 2d. per 8lbs. Top value, 8-stone choice quality pigs 4s. 4d. per 8lbs.

Trade in the West.

The Christmas beef trade has opened fairly brisk, and at all the leading country markets good quality steers and heifers are selling at prices a trifle better than they did last year, namely 12s. to 13s. for specially finished animals of the best breeds (or from £26 to £37 apiece), cows of a good stamp making £20 to £30 apiece (or 11s. to 11s. 6d.), whilst the rougher grades of beef can still be had at 10s. to 10s. 6d. Mutton displays considerable buoyancy, some of the best class of wethers making 65s. to 86s. each, and in some few special cases more (or quite 8½d. to 9d. per lb.). Specially prepared lamb for show purposes is making 11d. to 1s. per lb., but there is not an over-abundance on offer. Veal is a very firm trade, best grades making 8½d., and pigs also sell very well indeed, the smaller weights of porkers bringing 10s. per score and over; but the more ordinary run of prices for the bulk is 9s. to 9s. 6d.

Trade in Ireland.

Last Thursday's Dublin market was one of the largest of the year, and one of the most disastrous to sellers. For really good cattle the fall was at least 20s. per head, and for rough sorts quite double that amount, and even at these reduced figures nothing like a clearance could be effected; in fact, not half the rough cattle could be turned into money. Prime ox and heifer beef made from 52s. to 55s. per cwt., [illegible] ditto making a couple of shillings per cwt. more; second class beef, 46s. to 50s.; and inferior 42s. 6d. to 45s. The number of beasts in market was [illegible] on last week. With a large number of sheep the mutton department was worse than ever, and may be written down 2s. per head [illegible]. Very little business was done by shippers, and the few lots that were taken looked very cheap at from 25s. to 30s. each. City butchers took some very choice mountain wethers at 7d. per lb., but fine heavy wethers sold at from 6d. to 6¼d., and good ewes from 5d. to 5¾d. Rough sheep very irregular, and needy sellers had to let them go at ruinously low figures. Very little veal on market, the few really good calves making late rates; rough sorts uncertain in value. The choice milch cow continues to command high prices, but springers making from £19 to £23. The pig market was very dull, and prices down 2s. per cwt. at the opening and fully 3s. per cwt. at the close.

LONDON.

London Central, Wednesday.—Supplies were again of fair extent, but trade continues without any appreciable improvement. Arrivals of beef included 50 tons Scotch, 570 Liverpool sides, 1,100 hindquarters, and 600 forequarters American refrigerated. Quotations:—Beef, Scotch, short sides, 4s 4d to 4s 6d; long, 4s to 4s 2d; American, Deptford-killed, 3s 8d to 3s 11d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, 3s 8d; forequarters, 2s 6d to 2s 8d. Mutton: Scotch, 4s 4d to 4s 8d; English wethers, 4s to 4s 4d; ewes, 3s to 3s 2d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 4d; and Dutch, 3s 8d to 3s 10d per 8lb.

London Central, Friday.—Supplies good, but trade without improvement. Arrivals of beef included 130 tons Scotch, 550 Liverpool sides, 3,500 hindquarters, and 2,000 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 2d to 4s 6d; long, 4s to 4s 4d; English, 4s to 4s 2d; American, Deptford-killed, 3s 8d to 3s 11d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, 3s 6d to 3s 10d; forequarters 2s 8d to 2s 10d; frozen hindquarters, 2s 6d to 2s 8d; forequareters, 2s 4d. Mutton: Scotch, 4s 2d to 4s 6d; English wethers, 3s 10d to 4s 4d; ewes, 2s 10d to 3s 2d; Canterbury, 3s to 3s 4d; Wellington, 2s 10d to 3s; Sydney and River Plate, 2s 6d to 2s 8d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 3s 8d to 4s 4d; Dutch, 3s 6d to 3s 10d; and Irish, 3s to 3s 4d per 8lb.

Islington, Thursday.—Beast entries good; trade without essential change. Sheep supplies moderate, but slow demand for both wethers and ewes, prices, however, remaining at about late level. 7½st to 8st Down wethers, 5s 8d to 5s 10d; 9st, 5s 4d to 5s 6d; 10st half-bred, 5s to 5s 2d; 10st Down ewes, 3s 10d to 4s; 11st half-bred ditto, 3s 8d. Calves, in moderate supply, ruled steady, the best on offer making 5s 6d. A good supply of pigs were rather easier in value. Neat small, 4s 2d to 4s 4d per 8lb, to sink the offal. Total supplies; 180 beasts, 500 sheep, 25 calves, 270 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—The sale of stock at the annual fat stock show was quite as good as had been expected, the best beasts making 12s 6d to 13s per score. Show mutton, however, was not in demand, the animals being too heavy for butchers. In the open market best beef made, 11s to 11s 6d; and secondary ones, 10s to 11s. Small Kent and half-bred mutton fetched 4s 10d to 5s 4d per 8lb; large wethers, 4s 6d to 4s 10d; and barrens, 3s 6d to 4s per 8lb. Roaster pigs made 11s to 11s 6d per score, and larger hogs 9s 6d to 10s 6d. Store trade was slow.

Basingstoke, Wednesday.—At Raynbird and Sons' saleyard there was a good attendance of buyers to meet a supply of 46 fat beasts, 55 calves, 664 fat sheep, 287 pigs, and 57 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £12 10s to £19; fat calves, 80s to £6; small, 20s to 50s; fat wethers, 36s 6d to 54s; fat ewes, 29s to 51s; fat hogs, 75s to 94s; fat porkers, 40s to 58s; small, 28s to 36s; store pigs, 8s 6d to 21s; dairy cows, £8 5s to £18 15s. A continued downpour of rain throughout the day made the transaction of business difficult and somewhat depressed the trade for fat cattle and sheep, but there was a fair amount of business done without material change in prices. Prime quality Devon steers made up to £19; heifers, £18 15s; Shorthorn steers reached £18 10s; heifers, £19 5s; cows, £17 15s; bulls, £17 to £18 15s. A good supply of fat sheep commanded the attention of a number of buyers from local and distant markets, and a clearance mostly made at late rates. Pure Hampshire Down wethers and ewes made 41s, 42s, 52s, 53s, 45s 6d, 47s, 46s, 43s, 43s 6d, 46s, 40s 6d, 40s¾43s; 11 months old ditto, 37s, 38s, 39s, 43s 6d, 50s 6d, 51s 6d, 53s, 46s 6d, 47s 6d, 40s 6d, 54s, 44s 6d, 46s, 47s, 45s, 38s; old ewes, 30s, 32s 6d, 37s 6d, 38s 6d. 36s 6d, 38s, 31s, 37s; rams, 46s, 39s, 55s, 46s 6d, 43s 6d, 36s, 44s. There was a brisk trade throughout for good milch cows and heifers, an easy clearance being effected. Store cattle are difficult to sell at prices remunerative to the vendors. Fat cattle are scarce and dear. Fat hogs met a ready sale at late rates. Porkers were in demand at late high prices. Store pigs continue a firm trade. Ruling values:—Best quality Devon beasts, 7d to 7½d; ditto Shorthorn ditto, 6d to 6½d; bulls, cows, and inferior beasts, 5½d to 6d per lb; best quality sheep, 8½d to 9d; second ditto, 7½d to 8d; old ewes, rams, and inferior, 5½d to 6½d per lb; fat calves, 6½d to 9d per lb; fat hogs, up to 10s; and porkers, up to 12s 6d per score.

Boston, Wednesday.—A short show of store beasts, and a quiet trade prevailed. In-calvers were a good show, and in demand. Best beef made 7s 6d to 7s 9d, and cow beef, 5s 9d to 6s 3d per stone. Grazing steers, £12 10s to £15; useful heifers, £9 to £11 10s; calves, 60s to 65s; in-calvers, £18 to £22; and heifers, £15 10s to £17 10s each. Wether mutton, 7d and 7½d; and ewe mutton, 5½d and 5½d per lb. Strong wether sheep, 47s to 50s; and store lambs, 31s to 42s each.

Brigg, Thursday.—With only a moderate supply of horned stock and limited attendance of buyers, business was of sluggish description. Milch beasts and in-calvers, £12 to £19; two-year-old steers and heifers, £9 to £12; drapes, £8 to £12; calves, 28s to 36s per head. Nothing doing in sheep.

Bristol, Thursday.—Full supply of beef, chiefly middling description. Best qualities made 60s to 62s per cwt; others, 64s. Large number of sheep, which, like the cattle, met a slow sale. Choice light wethers, 7¾d to 8d; ewes, 6d per lb. About 1,000 pigs. Bacon pigs, 9s 6d; porkers 11s per score. Three hundred store cattle from Ireland sold slowly at about late rates.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under..	9s 6d
Under 10 sc 10 lbs	Not exceeding 2½ in.	9s 0d
Under 11 sc 10 lbs ..	Not exceeding 2¾ in.	8s 3d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND Co., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 1,295; sheep, 565; pigs, 417; horses, 10. Beef, 7s to 8s per stone; mutton, 4s to 5s 4d; pork, 6s to 9d. A large show store beasts and a slow market. Fat beasts a full show, prices quite up to last week. Fat sheep, a good number to hand and prices not so good. Stores only a few lots to hand. Fat pigs a large show, trade not so brisk. Stores, a little better trade. Hay, straw, and roots, a fair trade.

Canterbury, Saturday.—There was a good offering of useful beasts, but trade was slow. Irish calves ranged from £5 to £6 5s, and second rate cows and calves from £11 to £16. But few sheep were sold.

Carlisle, Saturday.—The supply of Irish store cattle was similar to last week's, consisting of about 250 heifers and polled bullocks. The attendance was small and trade quiet. Wintering heifers realised £6 10s to £8 10s; stall feeding, £10 10s to £14 10s; polled bullocks, £8 10s to £13 10s. Young pigs a small show, and quoted at 17s 6d each.

Dorchester, Saturday.—The feature was the great sale of Christmas fat stock, which included rare lots of bullocks and some very nice quality mutton. Trade for beef ruled steady the best steers and heifers realising about 12s for picked lots. Mutton trade fairly active at 8d to 8½d for choicest wethers.

Dublin, Thursday.—A congested market and worse trade. Finished sorts scarcely realised last week's prices. Rough and thin classes, which were far in excess of requirements, were considerably lower in values, and a clearance could not be effected, stall-feds coming in more numerously and meeting with fair inquiry. Worse trade for all classes of sheep at lower prices, especially for rough and inferior qualities. Cattle (best), 30s to 32s per cwt; inferior descriptions, 25s to 29s per cwt; stall-feds, 30s to 33s per cwt. Mutton, 5½d to 6¾d per lb.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Good supplies sold readily, with little alteration in prices. Horned bullocks to £18; horned heifers, to £16; polled bullocks, to £19 10s; polled heifers, to £14; Galloway cows, to £13 15s; Ayrshire cows, to £15; calving cows, to £14; Galloway bullocks, to £15 15s; Galloway heifers, to £15.

Glasgow, Wednesday.—Moderate supplies; demand slow; values favour buyers. Top Scotch cattle, 68s: top Irish, 60s per cwt. Top mutton, 8d to 8½d; secondary, 7¾d per lb. Supplies of dead meat shorter, business slow, prices steady, best States beef, 5¾d to 6d; Canadians, 5¾d to 5½d; cows, 4¾d to 5d; weddars, 7d to 7¼d per lb.

Hereford, Wednesday.—There was a relapse in the beef trade to-day, best qualities in a big supply going back ½d per lb., and the primest not making more than 6¼d, some cows being under 5d. Not much difference in regard to mutton, wethers realising about 7d to 7¼d per lb., and ewes 5½d to 6¼d. Few calves, which sold readily. Pig trade brisk, there not being quite so many as last week; porks sold well at 5d to 6d, bacons 4½d to 5¾d. Trade for store stock quiet.

Ipswich, Tuesday.—Messrs. Robt. Bond and Sons report a larger supply of fat beasts; all well-finished animals were in good demand up to £26. The fat sheep pens were well filled, trade was firm, without alterations in value. Suffolk shearlings made up to 64s. Grazing hoggets were in request at good prices. A moderate supply of calves for weaning, for which trade was not quite so sharp. Fat calves sold well up to 85s. Fat swine were short, and in strong request at high prices. This being a special sale of dairy stock, 48 cows, heifers, and bulls were forwarded; those fresh-calved were in good demand, but others changed hands slowly. The highest price realised was £19. A good entry of Shorthorn steers and heifers, which sold well. A choice lot of Cumberland heifers, suitable for breeding, were well competed for up to £10 5s. At the Drill Hall the last sale of horses for the year was held. All the best animals were in request at satisfactory prices. Cart horses up to 35½ guineas. Colts, 30½ guineas. Hackneys, 27½ guineas. Numbers at sales and market:—Beasts 896, calves 29, sheep 805, pigs 1,168, horses 90.

Leeds, Tuesday.—The Christmas market will be held on Tuesday next. There was a large show of cattle to-day, but the quality all round was not first-class. The demand fell off considerably, and the supply was greatly in excess of the demand. The entries were chiefly home district and Irish stock. A small number of Highland cattle were also offered. The best heifers and bullocks generally realised 6¼d per lb, but a few exceptionally choice stall-fed animals made 6¾d per lb. Irish cattle were not in active demand, the best quality making 6d per lb. Secondary and inferior cattle met a slow inquiry, and were a little easier in price, the former making 5¾d to 5¾d, and the latter from 5d per lb. Sheep show a decrease on the previous week. The demand was principally for the choicest small sheep, which about maintained recent quotations. Secondary and inferior sheep were more difficult to dispose of, and dealers to effect sales had to make slight concessions. Nice small shearlings made 8d to 8¼d per lb; heavy sheep, 7d to 7¼d; ewes, etc., 5d to 5¼d. Calves were a very small consignment, and for the best 7¾d to 8d per lb was realised. Dairy cattle were more than an average supply. Business ruled slow, and prices were a little below last week, the best milkers making from £14 10s to £22. Numbers at market—Cattle 685, sheep 2,050, calves 5.

Leicester, Saturday.—Full supplies of stock were in excellent condition, but trade ruled very slow, and prices were easier. Milch cows in good demand, and made £17 to £25 per head. Bullocks, £10 to £15.

Lincoln, Friday.—Trade not very brisk. Best milch beasts, £18 to £21; inferior, £14 to £17; three-year-old stores, £14 to £15; two year old, £10 to £12; young stock, £5 to £8. Drape ewes, 28s to 32s; lamb hogs, 38s to 38s.

Newcastle, Tuesday.—Good trade, quality very fair. Prices steady all round. Numbers:—Cattle, 2,153; sheep, 5,450; calves, 54; pigs, 1,107. Prices (sinking the offal):—Beef, 5s to 8s; pork, 5s to 9s per stone; mutton, 5d to 8d; veal, 5d to 8½d per lb.

Norwich, Saturday.—Store beasts were in pretty good supply here to-day; trade was quiet at about former terms. Fat beasts were freely offered; trade was not very active, and prices were the turn lower, ranging from 7s 3d to 7s 9d per 14lb. Store sheep were in moderate supply; previous prices were maintained in the business done, keeping hoggets making 30s to 42s per head. Fat sheep were not in large supply, but trade was dull at 8s to 8s 6d and 9s per 14lb. Fat pork realised 6s 9d to 7s per 14lb.

Preston, Wednesday.—Fair supplies in all departments, but trade all round was slow. Beef is slightly cheaper, but rates for sheep were unchanged. While calves were dearer. Beef, heifers, and bullocks, 6d to 6¾d; cows and bulls, 5d to 5¾d per lb. Mutton, hoggs and lambs, 7¾d to 8d; tups and ewes 5½d to 6¼d; calves, 7d to 8¼d per lb.

Romford, Wednesday.—Trade slow, owing to wet weather. A fair supply of beasts. Best fat animals made 4s 8d to 4s 10d, and middlings 4s to 4s 4d per stone. Rather short supply of sheep, and trade slow, although old prices held fairly well. Best Down sheep made 5s 4d to 5s 8d, middlings 4s 10s to 5s, and ewes about 4s per stone. Calves in short supply, and trade firm, at 5s 6d to 5s 8d per stone. No store beasts on offer. The pig trade about the same, supply small.

Salford, Tuesday.—The supply of cattle was smaller. There was a good demand for well finished animals, and prices for this grade, though not quotably higher, were in favour of the seller; other kinds were slow of sale at late low rates. There was a large decrease in the number of sheep on offer. Choice light weights were scarce and in good demand, and the tendency of prices was upwards, but trade for others was dull and slow. A smaller supply of calves, and a better trade at higher prices. Quotations:—Cattle, 5d to 6¼d; sheep, 6d to 8¼d; calves, 6d to 8d per lb. At market:—Cattle, 2,665; sheep, 6,750; calves, 130. The Christmas market will be held on Tuesday, December 18.

Sheffield, Tuesday.—Only a small show of milch beasts, and best qualities met with a ready sale. Best lots, £18 to £23; secondary, £13 to £17.

Shrewsbury, Tuesday.—Fairly good trade all round, at slightly lower prices. Small supplies of sheep and calves. Quotations:—Beef, 5¾d to 6¾d; mutton, 6d to 7¾d; and veal, 6d to 8d per lb. Porket pigs, 8s 6d to 9s, and bacon 8s 6d to 8s per 8st. Cows with calves up to £21 10s. Hay up to £3 15s. Number offered:—652 cattle, 49 cows with calves, 577 sheep, 67 calves, 67 fat, 170 porket, and 399 store pigs.

Spalding, Tuesday.—A fair show of fat beasts, and brisk trade at 7s 6d to 7s 9d per stone. Slow trade for store beasts. Good in-calvers sold well, making £20; and calving heifers, £17 to £19. A slow trade for sheep, which were worth 6d and 7d per lb.

Taunton, Saturday.—Small number of sheep on offer. Good supply of cattle. Large attendance. Fairly good trade.

Thame, Tuesday.—There was a fair supply of stock at market, but trade was not very fast, except for the best quality. There was a small attendance of buyers, many holding back, no doubt, for the great Christmas sale, which takes place on Tuesday next, when a large entry is expected, the show classes being well represented and in excess of last year. Mr. Edward Bond's sale comprised 70 fat beasts, 100 fat sheep, 58 fat and weaning calves, and 228 fat and store pigs. Fat bullocks made £14 to £21; fat heifers, £13 to £23; fat tegs, 42s to 50s; fat ewes, 34s to 45s; fat calves, £3 to £3 17s; cow calves, 22s to 65s; bull calves, 15s to 48s; fat pigs, 9s 6d per score; stores made late prices.

Wakefield, Wednesday.—There were rather smaller supplies of stock in every department. The attendance of buyers was not quite so large as last Wednesday, and trade ruled heavy. The show of beef consisted of 1,765 heifers, bullocks, and cows, as against 1,794 at last week's market. The stock was mainly composed of Irish animals, but there were a few good lots of Lincolnshire, north country, and local beasts. Anything prime made 6½d per lb.; good useful beef, 6¼d; inferior, 5d to 6d. There were 3,011 sheep, against 3,112. Choice small and young sheep met with a steady demand at 8¼d to 8½d per lb., and a fair business was done in strong sheep at 7d to 7½d., but heavy and fat ewes and tups were again very difficult to sell, and dealers had again to accept a reduction in order to effect sales at 5½d to 6d per lb. Fat calves were scarce, and changed hands at 6d to 8d per lb.; breeding calves, 20s to 22s each. A large show of good milch cows, but the high prices asked for the best milkers, £22 to £25 each—rather checked sales. Other qualitie of milch cows made £15 to £21 each. A good supply of lean beasts, which moved off slowly at late rates—£11 to £13 each.

Wakefield, Wednesday.—Quiet trade in beef at late rates. Best quality, 6½d per lb; useful lots, 6¼d; and other kinds, 5d to 6d. Steady business in mutton; choice small sheep, 8¼d to 8½d per lb; strong sheep, 7d to 7¼d; and ewes and tups, 5½d to 6d. Numbers penned:—Fat beasts, 1,755; sheep, 3,011.

Wolverhampton, Wednesday.—There was a fair attendance, but business was quiet. Herefords, 6¾1 to 7d per lb.; shorthorns, 6d to 6¾d per lb.; calves, 7¼d per lb.; wether mutton, 7¾d to 8¼d per lb.; ewes, 6d to 6¼d per lb.; bacon pigs, 9s to 9s 3d per score; porkets, 9s 6d to 10s 6d per score; sows, 7s per score.

Worcester, Saturday.—Good supplies of fat cattle and sheep, for which trade was slow at about late rates. Fair demand for pigs. Best beef, 6d to 6½d; inferior, 5d to 5½d; wether mutton, 7d to 8d; ewes, 5d to 6d; and veal, 7d to 8d per lb. Pork pigs, 10s to 10s 6d; bacon, 9s per score. Slow trade for store cattle and sheep.

Worksop, Wednesday.—Market well supplied with stock all round, and very good attendance of buyers. Sheep trade slow at late rates. Beef for best quality trade was good, and for indifferent qualities easier. Beef, best, 7s to 8s; secondary, 6s 6d to 7s per stone. Best wether mutton, 8d to 8¼d; secondary, 5d to 6d per lb.

Deptford, Wednesday.—Only a few beasts were on offer, consisting of shipments from the United States, and met a very dull sale at 4s 2d to 4s 5d per 8lb, to sink the offal. No sheep were to hand.

WOOL.

Bradford, Thursday.—A better and steadier market for wool, although business in total is still very small. Merino top makers are now asking for a further advance, which buyers resolutely refuse. Generally speaking, prices are firmer. The yarn trade is no better as to export, and still very sluggish in the home trade. Piece trade dull.

Canterbury, Saturday.—More business for wool at the recent improvement, and Kent fleeces are quoted from 6d to 6¼d per lb. Lamb wool remains at from 4d to 4½d, while Down fleeces are making 8d to 10d per lb.

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cakes: Arrivals of foreign, although not large, are in excess of requirements, and, with scarcely any demand, values have a downward tendency. Russians are still quoted at last week's prices. Americans are lower and English remain unchanged, with very little inquiry. Cotton cakes: There is a fair business passing in arrived or near at hand parcels of Egyptian at about late rates, while English are unaltered. Decorticated: A steamer parcel of prime cake just arrived sells quietly at £6 17s. 6d. to £7, and meal at £6 15s to £6 17s. 6d. Rape cakes: East India offer unchanged, but Ravison are not obtainable. Maize germ meal: Landed parcels of American continue to find buyers at last week's price, while for January-March delivery there are sellers at £5 3s 9d ex ship. English move off steadily and unchanged. Rice meal: A large steamer parcel of Rangoon just arrived has tended to weaken the market, and there are re-sellers at a drop of 2s. 6d. per ton ex quay.

—PINNOCK BROS., Mark Lane

London, Thursday.—Linseed.—With a moderate demand prices show little alteration upon those ruling last week for Calcutta, but Plate after an advance has again receded. Calcutta to London and near, 57s 6d to 57s 9d; October sold at 58s; November-December, 57s 9d, April-June, 45s. La Plata, December, 50s 6d, December-January, 47s; January-February, 45s 3d. Hull very quiet. Calcutta, April-June, 46s. La Plata, December, 50s 9d; December-January, 47s; January-February, 45s 3d. Azoff, October-November, 54s. To the Continent Bombay December, 59s 6d; December-January, 58s 6d; March-May 49s 3d. Calcutta, April-June, 45s 9d. La Plata, December-January, 47s 9d; January-February, 45s 6d. Linseed cakes, steady. London made, £8 10s to £8 12s 6d. Russian, £7 15s to £8 ex dock. American Westerns at £7 17s 6d. Cotton cakes steady. London made £4 17s 6d to £5; Egyptian, £4 15s to £4 16s 3d. Rapeseed little doing. Brown Calcutta to London November-December, 44s; March-May, 39s 6d To the Continent we quote Yellow Guzerat, November-December, 52s; March-May 46s. Yellow Cawnpore March-May, 43s 3d. Brown Cawnpore November-December, 47s 3d; March-May, 39s 9d. Brown Calcutta, November-December, 44s 6d.; April-June, 40s Cottonseed.—Rather lower in price with a poor demand. Near London, £6 13s 9d; December, £6 10s; December-January, £6 11s 3d; February-March, £6 12s 6d; Hull spot, £6 12s 6d; December-March, £6 10s. Cargoes. December, £6 13s 9d; January, £6 13s 9d; February, £6 13s 9d.—THE PRODUCE BROKERS' COMPANY, LIMITED.

Hull, Tuesday.—Linseed: The arrivals are 25 qrs from Harlingen, 1,009 qrs Novorossisk, 1,889 qrs Odessa, 13,151 qrs Petersburg, 6,002 qrs Riga; total, 22,307 qrs. During the early part of the week the market was flat and uninteresting, but towards the close there is a decidedly firmer feeling. This is even more pronounced on the Continent and on the London market. Calcutta, new crop, is worth fully 40s 9d, and new crop to London, December shipment, is making 57s 6d. Black Sea, a little business done on the spot, at 55s, and same would buy parcels afloat. Petersburg, 54s 9d, whereas for Riga 54s 3d has been paid. River Plate, Dec.-Jan. 47s 9d, Jan.-Feb. 46s to 46s 3d. Cottonseed: The market has continued steady on spot, and business doing at £6 13s 9d, but forward turned very flat during last week, November selling at £6 10s, and as low as £6 8s 9d accepted December, also Dec.-Jan., values, however, subsequently recovering in these positions, to £6 11s 3d. £6 12s 6d paid Feb.-March, but to day there is again a quietness with sellers at 1s 3d under these quotations. Oils: Export for the week ending Nov. 27th, 1900. 2 France, 1 Germany, 85 Holland, 6 Norway, 1 Sweden, 2 Turkey; total, 97 tons. Cotton oil: 24 Belgium, 5 Denmark, 52 France, 163 Germany, 98 Holland, 1 Norway, 13 Sweden; total, 346 tons. The market closes quiet.—Linseed oil: 29s 6d spot, 29s 4½d December, 28s 3d sellers Jan.-Apl. Cotton oil: 19s 6d spot, 19s 6d asked Nov.-Apl. Crude, 18s 4½d sellers, spot, 18s 3d sellers, Nov.-Apl. Rape oil: Black Sea naked, 27s spot. 1st quality, naked, 28s 3d.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 17s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 5s 0d PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 2s. 6d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 10s 0d PER TON. ALL F.O.R. HULL.

MOLASSINE, packed in bags, of 1½cwt. each. Price per cwt. 7s. 6d. Price per ton, £6 15s., on rail at works, Silvertown, Essex.

HAY AND STRAW.

Whitechapel, Saturday.—Fair supplies, and trade ruled steady. Best clover, 85s to 100s; inferior ditto, 80s to 85s; specially picked hay, 92s 6d; good ditto, 80s to 87s 6d; inferior ditto, 50s to 60s; mixture and sainfoin, 70s to 90s; and straw, 25s to 36s per load.

Bristol, Tuesday.—The prices quoted at to-day's market were:—Old clover hay, 75s to 80s per ton; old meadow hay, 70s to 75s; and straw, 45s to 50s.

FOREIGN HAY AND STRAW.

London, Saturday.—Trade is very quiet, but prices remain steady at last week's quotations. We quote Canadian timothy and clover mixture, 85s; Dutch 1st cut clover, 88s 6d; Dutch and French 2nd cut clover, 90s to 92s 6d; good Dutch hay, 75s; inferior Dutch hay, 65s, all per ton, delivered by barge alongside.—FULLER AND PRENTIS, 9 and 10, Great Tower Street, E.C.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Arrivals of greenstuffs were good, but the demand ruled slow. Potato trade quiet. Supplies of fruit continue of good extent, and the demand was again of a good character. Greenstuffs:—Cabbages, 2s 6d; savoys, 2s to 2s 6d; beetroots, 2s 6d per tally; cauliflowers, 1s 6d to 2s per dozen; Brussels sprouts, 9d to 1s per half sieve; spinach, 1s 6d per bushel; carrots, 2s; parsley, 1s 3d; radishes, 4d to 6d per dozen bunches; parsnips, 2s 6d to 3s per bag; horseradish, 1s per bundle; celery, 12s to 15s per dozen rolls; English onions, 5s per cwt; Valencia, 6s 3d to 6s 6d per case. Potatoes:—Maincrops, 100s; Snowdrops, 95s; Up-to-Dates, 80s to 90s; Reading Giants, 70s per ton. German and Belgian Magnums, 3s to 3s 6d per cwt. Fruit:—English grapes, 9d to 2s; Belgian, 6d to 1s per lb; Almeria, 10s to 16s per barrel; English apples, 3s to 7s per bushel; Nova Scotian, 10s to 16s per barrel; Californian pears, 10s to 15s per case; peaches, 3s to 12s per dozen; Denia oranges, 12s to 20s; Murcia, 6s to 8s per case; melons, 1s to 2s; pineapples, 1s to 4s each; lemons, 8s to 18s per case; bananas, 5s to 9s per bunch; chestnuts, 6s to 10s; Grenoble walnuts, 10s to 12s per sack.

HOPS.

Canterbury, Saturday.—Improved demand, and some growths have changed hands during the past few days. Holders are very confident, and for one choice growth £6 10s per cwt has been declined. The best of the yearling and older hops are being rapidly cleared.

Worcester, Saturday.—Trade continues quiet on our market, with scarcely any hops offering by growers; prices are very firm on account of the scarcity. Yearlings still command attention, and when offered at reasonable prices are readily sold. Forty-eight pockets have passed the public scales during the week, making a total of 16,085 weighed up todate.—PIERCY AND CO.

MANURES.

Liverpool, Friday.—Owing to the sodden condition of the land the demand for basic slag is retarded, and as there is likely to be pressure of orders as soon as the land is in a fit condition to apply it no time should be lost in obtaining supplies so as to be in readiness. Prices are unchanged, and a fair amount of sales are transpiring. There is less firmness in the linseed market, and holders of this class of cake are disposed to accept easier prices, as also for American decorticated cottoncake, several parcels of new season's make having arrived in port, the quality, however, is chiefly hand and irregular, and not up to the standard of previous seasons. Present prices are as below, and there is a very slow demand. Nitrate of soda, best quality, i.e., guaranteed 95 per cent., pure, in bags, £8 7s 6d to £8 10s per ton; East India bone meal, in bags, £4 7s 6d to £4 10s per ton; kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton; palm nut cake, prime, in bags, £5 5s to £5 7s 6d per ton; linseed cake, American, thin oblong, prime, in bags, £7 12s 6d to £7 16s 3d per ton; linseed cake, English, prime, in bulk, £8 15s to £9 per ton; linseed cake, foreign, round, prime, soft and oily, in bags, £8 12s 6d to £8 15s per ton; cottonseed cake, N.A., decorticated, fair to prime, in bags, £6 15s to £7 2s 6d per ton; cottonseed cake, English, decorticated prime, soft, in bags, £7 5s to £7 7s 6d per ton; cottonseed cake, English, undecorticated, prime, in bulk, £4 15s to £5 per ton; cottonseed cake crushed, 20 to 25 per cent oil, prime, in bags, £7 5s per ton; maize germ meal, prime, in bags, £5 7s 6d to £5 10s per ton; Indian meal, coarse to fine grinding, prime, in bulk, 11s to 11s 6d per 240lb; linseed, fine boiled feeding, in bags, £3 2s 6d to £3 5s per qr, 416lb; N.A. cloverseed, new red, fair to good, in bags, nominal; D.N.S. brand superphosphate of lime, guaranteed, 25 to 27 sol., in bags, nominal; D.N.S. Brand superphosphate of lime, guaranteed, 30 to 31 sol., in bags, nominal. D.N.S. Brand superphosphate of lime guaranteed, 35 to 37 sol., in bags, nominal. [illegible] quality, guaranteed, 30 to 35 per cent. phos., in bags, £1 11s to £1 12s 6d per ton, basic slag [illegible] guaranteed 35 to 40 per cent. phos., in bags, £1 15s 6d to £1 14s 6d per ton, basic slag, finest quality, guaranteed 42 to 45 per cent. phos., in bags, £1 16s 6d to £1 18s 6d per ton [illegible] depôts.—H. JONES LANCAR AND CO.

Winsford Cheshire, Saturday. [illegible] sold at the [illegible] Company's [illegible] second week of the [illegible] 3s 6d per ton. [illegible] THE SALT UNION, LIMITED.

THE BALTIC.

The standards of cottonseed accepted by the London Committee may be seen at the offices of the Cottonseed Association, Camomile-street Chambers, St. Mary Axe. They are two—the first of Fayoumi and the second of fair average quality new Egyptian.

The wheat cargo sales of the week show some signs of weakness; thus, 29s. is a low price to accept for an arrived cargo of Walla, 28s. 3d. for Argentine, and 27s. 9d. for hard winter American On the other hand, 30s. 9d., which has been paid for Black Sea Ghirka, is a decidedly good price, and distinct firmness is disclosed in 32s. 6d. paid for Duluth, and 32s. for Manitoba. There has been a large forward business done in new No. 1 Northern American for February shipment, and 30s. 6d. has been readily paid. There is expected to be an improved demand in April after winter has worked off the present surplus (656,000 to 888,460 qrs.) of stocks in granary. The maize cargo trade quotes 18s. 9d. for American on passage, but 18s. is accepted for prompt shipment, 17s. 9d. for January shipment. It is likely, therefore, that maize will decline 1s. per qr. as soon as American new crop comes well into evidence on our exchanges.

Barley cargo sales include 17s. for Persian, 18s. 6d. for Odessa, and 24s. 6d. for Californian. These prices do not show any change from previous wholesale values. Other cargo sales of the week comprise white Libau oats at 13s. 9d., white clipped American oats at 15s., South Russian at 14s. per qr., Sesame at 46s. 9d. per qr., and cottonseed at £6 12s. 6d. per ton on passage, £6 10s. for Jan. shipment.

The arrivals of grain and seed laden vessels at ports-of-call for the week were 5 wheat (1 Lyttelton, 2 Portland (O.), 1 San Francisco, 1 Seattle); 1 canaryseed (Larache); total, 6.

The sailings of grain and seed laden vessels from ports-of-call for the week were: — 3 wheat (1 Galway, 1 North Shields, 1 Penzance); 1 peas (Leith); 1 canaryseed (London); total, 5.

Since January 1, 1900, the total arrivals have been:—320 wheat, 14 wheat and barley, 1 wheat and peas, 7 flour, 12 maize, 1 maize and oats, 26 barley, 19 beans, 10 locust beans, 2 peas, 1 linseed, 6 canaryseed, 2 fenugreek seed, 5 valonea; total, 426.

Last year, during the same time, the arrivals were:—272 wheat, 10 flour, 6 maize, 9 barley, 1 barley and beans, 1 rye, barley, and oats, 12 beans, 3 locust beans, 6 linseed, 6 canaryseed, and 7 valonea; total, 333.

"Mark Lane Express" Diary.

Dec.
10 to 14. Smithfield Club Show, at the Royal Agricultural Hall, Islington.
11, 12, and 13. Yorkshire Fat Stock Society's Show, at York.
11, 12, and 13. Royal Dublin Society's Winter Show
11. Meetings of the Councils of the Shire Horse Society, National Sheep Breeders' Association, Shorthorn Society, Smithfield Club, and British Dairy Farmers' Association.
11. Annual Agricultural Dinner, held under the auspices of the Central Associated Chambers of Agriculture and the Farmers' Club, at Holborn Restaurant
12. Meeting of the Council of the Hackney Horse Society.
12. Meeting of the Council of the Royal Agricultural Society.
12. Council and Annual General Meeting of the Central and Associated Chambers of Agriculture.
12. Vale of Aylesbury Fat Stock Show, at Aylesbury.
12. Guildford Agricultural Association's Show, at Guildford Cattle Market.
12 and 13. West of England Fat Stock and Poultry Society's Show.
12 and 13. Chichester Fat Stock Show.
13. Meeting of the Council of the Hunters' Improvement Society.
13. General Meeting of the Royal Agricultural Society.
13. Sale of Young Shorthorn Bulls, at York Cattle Market.
13 and 14. Sale of Hunters and Harness Horses, at Cesar's Horse Repository.
14. Croydon and District Cowkeepers' and Dairymen's Association's Show, at Croydon Cattle Market.
14. Romsey Agricultural Society's Show, at The Abbey, Romsey
14. Meeting of the Council of the Polo Pony Society.
17 and 18. Suffolk Fat Cattle Club's Show, at Ipswich.
18, 19, and 20. Sale of Hunters, Harness Horses, etc., at York Horse Repository.

Farm Labourer's Shocking Accident.—On Friday afternoon William Burgess, a farm labourer, was feeding a thrashing machine at Boxted, Essex, when he accidentally stepped backwards into the drum, and his left leg was completely torn off. He was removed in a cart to Colchester, a distance of nine miles, and while passing through the town he bled freely, and the injured man was [illegible]. The animal was removed from the shafts and a number of men drew the vehicle with the sufferer to the hospital. His condition is critical.

LIVE STOCK.

OUR ILLUSTRATIONS.

The Hereford Steer Lord Roberts is the animal which ran Cicely so close at Birmingham, and which was reserve for the Elkington and Thorley Challenge Cups. It was exhibited by Mr. John Wortley, Frettenham, Norwich, and was bred by Mr. Henry Freeman Russell, Westonbury, Pembroke, R.S.O., his sire being Bountiful 17704, and dam Winsome. It being a little under two years and seven months old, it was shown in the class for Hereford steers over two and under three years old, and it came out on top, also securing the extra prize of £50 offered for the best Hereford shown. Unlike Cicely, Lord Roberts was exhibited at the Norwich Show, where he also just failed to secure the championship, the judges making him reserve to Mr. W. E. Learner's cross-bred heifer Ladysmith. In the opinion of a good many competent judges round the ring the awards should have been reversed. Lord Roberts, however, captured the President's prize of £20 for the best ox or steer in the show, besides first in the class for steers of any pure breed, other than Shorthorn or Red-polled, over two and under three years old. At Norwich his weight was given as 17cwt. 1qr. 19lbs., and at Birmingham 17cwt. 2qrs. 25lbs.

For one of our illustrations in our last issue we gave a portrait of Her Majesty the Queen's Shorthorn heifer Cicely, which was so successful at the Birmingham Show, our photograph, as we then mentioned, being taken at one of the summer shows. During the week we have been able to obtain a photograph of Cicely as she appeared at Birmingham, and we reproduce it in our present number, so that our readers who did not visit the Birmingham exhibition may see the great alteration which has taken place in the animal. It will be remembered that she won in addition to the first prize in her class the Elkington, Thorley, and Messrs. Webb and Sons' challenge cups, all valued at 100gs., the President silver cup, value £25, and the special prize of £50 for the best Shorthorn. She will be shown at the Smithfield club's exhibition at Islington this week, and we should not be surprised if she repeated her Birmingham successes.

The pen of Middle White pigs is that exhibited at the Birmingham Show by Mr. Nathaniel Benjafield, Shorts Green Farm, Motcombe, Shaftesbury, Dorset, and which won first prize in the class for a pen of two Middle White or Small White pigs over nine and under twelve months old, and also the Silver Challenge cup, value twenty guineas, for the best pen of pigs in the show. They were bred by Mr. Benjafield, and were eleven months and four weeks old when shown.

H.M. the Queen's Devon steer by Dauntless, dam Humility, in addition to winning first prize in his class at the Birmingham Fat Stock Show, also won the challenge cup for the best animal not exceeding two years old, and also the reserve number for the £20 special for the best Devon. This steer was 1yr. 11mos. 2wks. old, and scaled 11cwt. 2qrs. 4lbs.

The Aberdeen-Angus heifer "Aquilegia" was bred and exhibited at Birmingham by the Earl of Strathmore and Kinghorn, for whom she won first prize in her class, and the special prize of £50 for the best Scot in the show. Aquilegia is 2yrs. 10mos. 3wks. 4dys. old, and scaled 13cwt. 2qrs. 3lbs. Aquilegia is sired by Boaz of Ballindalloch, dam Apricot Blossom.

The West Highland heifer Bhuide-Crombh is the property of the Earl of Durham, and won a first prize at the Birmingham Show last week. She is 3yrs. 9mos. old, and weighed 12cwt. 0qr. 18lbs. on that occasion.

STOCK AND SHOW NOTES

By Herdsman.

The results of some important experiments in the feeding of horses, designed to find out the exact amount of food a horse requires in doing various kinds of work, are summarised in the "Land Magazine." The experiments were carried out by M. E. Lavalard, managing director of the Paris Omnibus Company, and they extended over a considerable period. A heavy dray horse, he says, weighing 1,540lbs., should eat 19lbs. 13½ozs. of oats and 11lbs. ¼oz. of hay daily. The figures are the result of the calculation that 2lbs. 14oz. of oats and 1lb. 10oz. of hay should be given, roughly, for every 220lbs. of live weight. That is the standard allowance M. Lavalard gives the Paris 'bus horses and military horses under his care.

The Market Harborough Horse Show for 1901 has been fixed for September 19th.

On the concluding day (December 13th) of the show of the Yorkshire Society for the Christmas Exhibition of Fat Stock, at York, Messrs. John Thornton and Co. will, as usual, hold a sale of pure-bred Shorthorn bulls, in the covered Cattle Market, York. The catalogue contains eighteen animals, fourteen of which will be exhibited at the show mentioned. The sale will commence at one o'clock, and catalogues can be had of the auctioneers, or of Mr. F. Arey, secretary, 3, New Street, York.

The Hereford bull calf Lucifer, the property of Mr. A. R. Firkins, Paunton Court, which recently took first prize at Lord Tredegar's Show at Newport, has been sold at a long figure to Mr. T. Evans, Burdens Hill, Wenvoe, Cardiff, for use in his herd, which of late has been undergoing great improvement. Lucifer was sired by the prize taking bull Lurdan 20175, by Albion 15027, who as a sire is proving himself a good show stock getter. Lucifer's dam Lucy, Vol. 23, p. 541, is by County Councillor, 13724, by Maidstone 8875, both bred by Mr. H. W. Taylor, Showle Court, whilst the granddam Lily, Vol. 18, p. 558, is by Great Duke 8691, bred by Mr. Ben Rogers. Lucifer's dam is a noted good breeder, being the dam of the two bulls, Lucifer 18463, by Sir Horace 12676, and Lucky 19562, by Solomon 18113, sold to the Earl of Lisburne.

Professor W. O. Williams has been unanimously appointed Principal of the New Veterinary College, Edinburgh, the position having become vacant through the death of his father a short time since.

I have been informed that Mr. George Long has just lost the Shorthorn-Guernsey cross-bred cow Nancy, one of the most remarkable cows that ever figured in a public milking test. Nancy twice won the highest honours of the London Dairy Show, and was again entered for competition at this year's show, but, unfortunately for the owner, she contracted a severe attack of milk fever, and fell a victim to that dread disease. Nancy was in her ninth year, and for several seasons she carried all before her at the various milking trials at which she competed. She was got by a Guernsey bull out of a Shorthorn cow, and some idea of her great ability as a milker may be gathered from the fact, that during the 10½ months prior to her death she had produced at the rate of over 1,500 gallons of milk per annum. On the day before her death she gave 66lbs. of milk, or about 25 quarts.

On Thursday, the 29th ult., Messrs. Alfred Mansell and Co., live stock exporters, Shrewsbury, shipped from Liverpool per the White Star Line on account of Mr. H. R. Gardner, of Tasmania, a high-class Shropshire shearling ram purchased at Mr. Andrew Mansell's annual sale at 80gs., sired by Fortification 9498, dam by the renowned Montford Dreamer, and then tracing to those successful sires Bonny Beau 3886. The Patrician 1768, and The Gentleman 1765. This ram was accompanied by two ewes specially selected as being superior specimens in every particular of the best type of Shropshire, one being sired by Ulster Rose 9734, and the other by Dream Star 8977, both of which were served by Montford Kaiser, bred by Mr. T. S. Minton, of Montford.

Mr. J. Wortley's Hereford Steer, Reserve for Champion and Best Hereford at Birmingham, also Reserve for Champion at Norwich.

To-morrow (Tuesday) will witness the opening of the Royal Dublin Society's winter show at Ball's Bridge. From a programme sent to me I see that the showyard will be open at nine o'clock on each day of the three days, closing on the first two at six o'clock and on the last day at four o'clock. The whole of the judging will take place on Tuesday, on which day the charge for admission will be two shillings, the fee on other days being one shilling. The entries have come in well, and there is every promise of a successful show.

I hear that H.M. the Queen will send twenty-five fat bullocks and 130 fat sheep from the Royal farms at Windsor to the Slough Christmas cattle sale.

A meeting was held last week to consider the advisability of establishing a Shire Horse Society for Ludlow and district. After some discussion it was decided to form a committee to consider and report.

Gartons Limited, in order to cope with the increasing demands of business, have taken larger and more central offices and warehouses in Thynne Street, near to the L. and N. W. Rly., Bank Quay Station, Warrington. Their premises at Friars Green will still be retained as an auxiliary, but all business will be transacted at Thynne Street.

Transactions in Store Stock.

[From the Irish Department of Agriculture and Technical Instruction.]

The fair at Ballina, co. Mayo, on Monday was a small one. The demand experienced was bad, and not much business was done except in springers, which were very dear. Prices: Calves, 2nd class, £4 10s. to £5 10s.; 3rd class, £3 10s. to £4; yearlings, 2nd class, £6 10s. to £7 15s.; 3rd class, £4 to £5 10s.; two-year-olds, 2nd class, £8 10s. to £9 12s. 6d.; 3rd class, £6 10s. to £8 10s.; springers, 2nd class, £13 to £15 10s.; 3rd class, £8 10s. to £11.

At Thurles, co. Tipperary, on Tuesday, there was a rather small fair, composed of first and second class cattle, for which there was only moderate demand. The supply of springers was small, and they met a good demand. For lambs the demand was fair, but some lots remained unsold. Prices:—Calves, first class, £5 5s. to £5 10s.; second class, £4 to £5. Yearlings, first class, £9 to £9 15s.; second class, £6 10s. to £8 7s. 6d. Two-year-olds, first class, £11 10s. to £13; second class, £9 to £11. Springers, first class, £15 to £17; second class, £11 10s. to £14 10s. Lambs, first class, £1 6s. 6d. to £1 12s.; second class, £1 2s. 6d. to £1 5s. Young pigs, eight to ten weeks old, sold at from 18s. to 20s. each.

Mallow Fair (co. Cork), held on Tuesday, was a small one, composed chiefly of second and third class cattle, which sold as follows:—Calves, first class, £4 12s. 6d. to £5 5s.; second class, £3 17s. 6d. to £4 5s.; third class, £3 2s. 6d. to £3 10s. Yearlings, first class, £7 15s. to £8 5s.; second class, £6 5s. to £7 5s.; third class, £4 15s. to £5 12s. 6d. Two-year-olds, second class, £8 to £9 15s.; third class, £6 10s. to £7 15s. Springers, second class, £11 10s. to £14 10s.; third class, £10 to £10 10s. There was an average supply of sheep. A fair demand prevailed for lambs, but hoggets did not sell so well. Prices:—Lambs, first class, £1 6s. to £1 8s. 6d.; second class, £1 2s. 6d. to £1 5s.; over twelve and under twenty-four months old, first class, £1 1s. 8d. to £2 3s.; second class, £1 12s. 6d. to £1 16s.

There was a small fair at Roscommon on Wednesday, at which a very bad demand prevailed. Store sheep and lambs were almost unsaleable. Prices:—Calves, first class, £2 10s. to £5 5s.; second class, £1 16s. 8d. to £4 15s.; yearlings, first class, £9 to £10; second class, £6 to £8; two-year-olds, first class, £13 5s. to £13 10s.; second class, £8 10s. to £11 12s. 6d.; three-year-olds, second class, £11 to £13 10s.; springers, first class, £18 10s. to £20 10s.; second class, £13 6s. 8d. to £17; lambs, first class, £1 8s. to £1 12s.; second class, £1 to £1 6s.; over twelve and under twenty-four months old, first class, £2 to £2 4s.; second class, £1 12s. to £1 15s.

The fair at Bandon, co. Cork, on Wednesday was a small one, composed of second and third class cattle, for which there was good demand. Prices:—Calves, second class, £3 17s. 6d. to £4 10s.; third class, £3 to £3 10s.; yearlings, second class, £6 to £7 10s.; third class, £4 11s. 3d. to £5 12s. 6d.; two-year-olds, second class, £8 10s. to £10 10s.; third class, £6 5s. to £7 12s. 6d.; springers, second class, £12 to £14; third class, £9 to £10 15s.

Failing to Report Sheep Scab. Heavy Fine.—John Cottam, an old farmer, of Wellhouse, Scotforth, was fined £16 and costs at Lancaster Castle on the 1st inst. for allowing sheep scab to exist without reporting it to the authorities. The Bench characterised the case as one of the worst they ever had before them.

ALL farm live stock should be given "MOLASSINE." It is an excellent food and condiment combined. See advertisement on back page of this issue.—[ADVT.]

HORSES.

Horse Sale at Glasgow.

On Tuesday Mr. J. Vine conducted a sale of horses within the Horse Bazaar, opposite Buchanan Street Station, Port Dundas Road, Glasgow. There were 100 animals catalogued, consisting principally of carriage and harness horses. Carriage horses secured the best demand, and realised good prices. Cobs and ponies were in request, and sold relatively dear. Odd lots met a poor selling trade. The ages of the animals ranged from five to nine years, some being aged. Best carriage horses realised up to 45gs.; secondary, 10gs. to 26gs.; and inferior, down to 6gs.; best draught horses, 40gs.; secondary, 12gs. to 18gs.; inferior, 6gs. to 10gs.; vanners, to 30gs. and down to £5; best cobs, 23gs.; secondary and inferior, £4 to 12gs.; ponies, £4 to 18gs.; lorry animals, 10gs. to 36gs.

Contagious Diseases of Animals.

NOTE.—The figures for the current Year are approximate only.

Fined £50 for Selling Adulterated Butter.—Howarth Kay Anderton, trading as Anderton and Greenwood, grocer, of Ramsbottom, was fined £50 and costs, at Bury the other day, for selling adulterated butter, and delivering margarine in paper not properly labelled. The defendant contended that the article sold was pure butter, and produced a warranty, but the Bench were not satisfied as to the identification of the butter. The defendant was fined £20 a few weeks previously for selling adulterated butter.

Watery Milk: Weak Cows no Excuse.—Two dairymen, named Henry Brooker, of 2, Manchester Road, Cubitt Town, and Albert Jarrold, of Burman Street, Canning Town, were fined at the Thames Police Court on the 1st inst. for selling milk adulterated with water. Brooker, who had been twice previously convicted, pleaded "guilty under great provocation, due to the weakness of the cows." He was fined £18 and £2 2s. costs. Jarrold was fined £10 and £2 2s. costs.

SHOWS.

Leeds.

The Leeds Smithfield Club held its forty-first annual exhibition on Tuesday and two following days, and perhaps on no former occasion has such a magnificent display of fat cattle and sheep been brought together under the auspices of the Society. Unfortunately, the Board of Agriculture would not allow any pigs to be shown on account of swine fever, so that the entries were not so large as last year, when a record was reached; still the number was most satisfactory. Of cattle there were seventy, a decrease of one as compared with 1899, and of sheep thirty-one pens, or the large increase of seventeen pens; whilst the minor departments were of average size. The show took place, as in previous years, in a temporary wooden structure erected in the drill ground of the Engineer Volunteers in Camp Road. The necessity for a permanent building, in which not only cattle, but horticultural and other exhibitions might take place, as well as entertainments and public meetings, has long been urged upon the Corporation by the members of the club and its sympathisers, and in their Bill which was passed through Parliament more than a year ago powers were obtained to erect a building, to be called the Smithfield Hall, on a portion of the North Street Recreation Ground. But nothing has yet been done to carry out the project, though, from the remarks made at the opening ceremony at the show on Tuesday, steps may be expected to be taken in that direction during the year.

The show of cattle was undoubtedly one of the best which the club has ever held. This may be attributed to the fact that the exhibition takes place earlier than the London and York shows, so that animals which might otherwise have been shown at these exhibitions could be entered at Leeds. Shorthorns were not conspicuous for numbers, but in quality they were extremely creditable. In the ox class, Mr. A. B. Cross, of Willoughton, Lincoln, won easily with an animal which will look well in the shop, the second prize falling to a younger bullock shown by Messrs. R. and J. Davison, of Welham, Malton. A Newark exhibitor, Mr. C. H. Stafford, sent a heifer of good substance and quality, which beat the exhibit of Mr. W. B. Sleightholme, of Kirton Lindsey. Mr. Cross won the piece of plate, value 10gs., presented by the Leeds Licensed Victuallers for the best animal in the two Shorthorn classes. The crossbreds were well represented, and in a very meritorious class of bullocks Lord Durham had an invincible claimant for the highest honours. The animal goes to York, and its age gives it an advantage in Leeds over the second prize-taker, belonging to Mr. W. Le Neve, of Norwich. The heifer class was distinguished by the presence of the reserve number for the championship at Norwich, and half-sister of the champion at that show. Owned by Mr. Le Neve, she made a beautiful picture in her stall. She defeated her one class opponent, hailing from Castle Howard, and carried off the Leeds Tradesmen's Plate. A fault in her shoulders, however, barred her way to the championship.

The Scotch breeds formed four splendid classes, and even at Leeds there has never been anything to compare to them, and it was remarked that there had very seldom been such a show of Scots in any part of the country. Some of them, no doubt, will find their way to London or York this week. In the class for polled Scotch oxen under four years the exhibitors were Her Majesty the Queen, who showed an ox from Abergeldie Mains, Ballater, N.B.; Mr Peter Dunn, and Mr. Robert Stubbs. Mr. Dunn's ox is what is known as a "grand handler," and was preferred to the others, Mr. Stubbs's exhibit standing second, and the Queen's animal receiving high commendation. The polled Scotch cows or heifers only numbered two. A fine-backed one, belonging to Mr. E. Bruce, Tochineal, Cullen, N.B., was the winner, and the Queen's exhibit was second. Three good highland oxen were shown. Two, the property of Mr. W. Nimmo, Castle Eden, were placed first and second; and the Earl of Harewood's beast was highly commended. The Highland cows and heifers formed an excellent class. The Earl of Harewood's exhibit received the chief honour, and Mr. W. Nimmo's beast was second. One belonging to the Harrogate Corporation was very highly commended, and heifers owned by the Earl of Harewood and Mr. H. W. Worsley Taylor received high commendation. The Royal Agricultural Society offered a prize of silver plate for the best beast among the Scots, and it was awarded to Mr. Peter Dunn's polled ox.

A number of useful beasts were exhibited in the tenant farmers' classes, but neither in number nor in quality did they reach the high standard which has been observed at previous shows. Only two oxen were exhibited in the class under four years old, and in the next two classes, for oxen under three and under two years old respectively, there were but three entries in each. The champion was found in the class for cows or heifers under four years old, and of any breed. The entries, which only numbered two, included a beautiful type of a crossbred between an Aberdeen-Angus and a Shorthorn. It is owned by Mr. Peter Dunn, and to it was awarded the special prize, of the value of £10, given by the ex-Lord Mayor, Alderman Gordon, for the best animal in the

showground. It also received the William Fawcett Challenge Cup, valued at £25, as the best beast in the tenant farmers' classes. This prize, which was gained by Mr. Dunn last year, has to be won three times by the same exhibitor before it becomes his absolute property. The second award in the class went to Messrs. Davison's beast, and to it was also given a special prize offered by Mr. J. R. Bower for the second best beast in the tenant farmers' classes. The crossbred bullocks or heifers most suitable for butchers are described as of the right sort. The Countess of Carlisle's pen of two crossbreds received the first honour and the Leeds Tradesmen's Plate, valued at 5gs., offered for the best pair in the Scotch or Welsh class. The Leeds City Corporation Prize, given for the best pair of Irish crossbred bullocks or heifers, was secured by Mr. Matthew Thomlinson. The milch cows were good classes. The Wheat Sheaf Cup, valued at 5gs., for the best fat cow for slaughtering (Scotch excluded), was gained by Mr. Hackney.

Mr. N. Benjafield's Middle White Pigs.
(Challenge Cup Winners at the Birmingham Show.)

Seven classes were provided for sheep, which, as already stated, were far more numerous than in past years. The quality, too, was, generally speaking, very good, particularly in regard to the young sheep, and the judges had no little difficulty in placing their awards. In the class for three crossbred wethers or gimmers of any age there were eleven entries so uniformly excellent that the whole of them were highly commended. The first and second prizes and two special awards were given to Mr. Peter Dunn, of Sigglethorne, Hull, and a special also went to Mr. G. H. Plummer, of Thirsk. Mr. Dunn was again successful in the class for three South or other Down wethers or gimmers, his two entries securing the first and second cards. Among the hogs of any breed, another capital class, the exhibits of Messrs. R. and J. Davison, of Malton, which were of remarkably good quality, secured a first, a second, and a special prize.

The awards in the cattle and sheep classes were as follows:—

Prize List.

CATTLE.

SHORTHORNS.

Ox, under four years old: 1, and Licensed Victuallers' Plate, A. B. Cross, Willoughton, Lincoln; 2, R. and J. Davison, Welham, Malton.

Cow, any age, or heifer, under four years old: 1, C. H. Stafford, Fledborough House, near Newark; 2, W. B. Stightholme, Kirton Lindsey.

CROSS-BRED OR IRISH.

Ox, under four years old: 1, Earl of Durham, Fence Houses; 2, W. Le Neve, Tunstead Hall, Norwich.

Cow, any age, or heifer, under four years old: 1, Tradesmen's Plate, Reserve for Championship, W. Le Neve, Norwich; 2, Countess of Carlisle.

SCOTS.

Polled Scotch ox, under four years old: 1 and special, P. Dunn, Pasture House, Sigglesthorne, Hull; 2 and special, R. Stubbs, Baldersby, S.O.

Polled Scotch cow, any age, or heifer, under four years old: 1, E. Bruce, Tochineal, Cullen, N.B.; 2, Her Majesty Queen Victoria, Abergeldie Mains, Ballater, N.B.

Highland ox: 1 and 2, W. Nimmo, Castle Eden.

Highland cow or heifer: 1, Earl of Durham; 2 and special, Harrogate Corporation Farm, Harrogate.

TENANT FARMERS' CLASSES.

Ox, any breed, under four years old: 1, C. E. Duckering, The Cliff, Kirton Lindsey; 2, W. Wood and Son, Foxholes, Methley.

Ox, any breed, under three years old: 1, E. Bruce, Tochineal, Cullen, N.B.; 2, J. Chapman, Leyburn.

Ox, any breed, under two years old: 1, F. Caswell, Dunsby, Spalding; 2, M. Lancaster and Co., Tadcaster; 3, C. J. Bruce, Bogmuchals Lodge, Portsoy, N.B.

Cow, any age, or heifer, under four years old, any breed: 1, championship, and challenge cup, P. Dunn, Pasture House, Sigglesthorne, Hull; 2 and special, R. and J. Davison, Welham.

Heifer, any breed, under two years old: 1, M. Lancaster and Co., Tadcaster; 2, R. Briggs, Osgodby Hall, Selby.

Pair of two Scotch or Welsh crossbred bullocks or heifers, most suitable for butchers: 1 and Tradesmen's Plate, Countess of Carlisle, Castle Howard, York; 2, Harrogate Corporation Farm; 3, A. J. Dorman, Grey Towers, Nunthorpe, R.S.O.

Pair of two Irish crossbred bullocks or heifers, most suitable for butchers: 1, M. Thomlinson, Easedyke, Tadcaster.

MILCH COWS.

Fat cow for slaughtering, Scotch excluded: 1 and special, S. W. Hackney, Leeds; 2, G. Escreet, Cookridge, Leeds.

Cow for dairy purposes: 1, 2, and five specials, S. W. Hackney, Leeds; special, G. Escreet.

SHEEP.

LEICESTER OR LONG WOOL.

Pen of three wethers or gimmers, under two years old: 1, F. Coats and Son, Malton; 2, Lord Henry Bentinck, M.P., Kirkby Lonsdale.

Pen of home mountain sheep, any age: 1 and 2, Leeds Industrial Co-operative Society, Farnley.

Pen of lonks: 2, R. Machin, York.

Pen of Cheviots: 1 and 2, R. Preston, Lazenby, Cumberland.

OTHER BREEDS.

Pen of three South or other Down wethers or gimmers, any age: 1 and 2, P. Dunn.

Pen of three cross-bred wethers or gimmers, any age, most suitable for butchers: 1, 2, and special, P. Dunn.

Pen of hoggs, any breed: 1, 2, and tradesmen's plate, R. and J. Davison.

Edinburgh.

The Scottish National Fat Stock Club's fourth annual show was held in the Waverley Market, Edinburgh, on Wednesday, and the club may now be said to have successfully passed the trials and difficulties of youth, and to have entered on a career of assured prosperity. Not only have the numbers of stock maintained the high level of previous years, but there has been a gradual weeding out of the inferior, which has resulted in an improved standard in quality. From an English point of view, it may be regrettable that the resuscitation of the Scottish Fat Stock Club has had the effect of interfering with the success of the Birmingham Christmas Show, where Scottish breeders were wont to figure with so much prominence. But north-country stock-breeders are the best judges of their own interests, and the experience of the last four years has led them to think that they can have a better intermediate exhibition in Edinburgh on their way south to the great Smithfield Show at Bingley Hall. This is borne out by the conspicuous success that attended the present show of the club, which embraced such a complete representation of the chief stock-breeders of the country. The Queen was among the exhibitors, but Her Majesty was not able in this instance with her Aberdeen-Angus bullock to achieve the success which attended her at Birmingham. Including cups and champion prizes, the value of the premiums offered was about £1,345, which is the largest sum the club has yet given, and there was a good response by exhibitors. The entries of cattle numbered 157, or 14 more than last year; there were 96 pens of sheep, being a decrease of 20; pigs had 11 entries, the same as last year; but roots increased from 177 entries to 330. Grain and potatoes were added to the farm produce section this year, and 37 exhibits were entered in this section. The working dairy is always a popular feature of agricultural exhibitions, and the butter-making competitions having been restored to the programme this year, there was the large and very satisfactory entry of 47 competitors.

Shorthorns made a much better appearance than they did last year, the three classes being very well filled. In the two-year-old steer class, which numbered half a dozen, Lord Rosebery came to the front with Royal Standard, a roan, bred by Mr. Finlay Munro, Fearn, and which has never been shown before. Mr. Ross was a good second with a steer bred by himself. Mr. Ross also secured the third ticket. The old steer class had only three entries, and Mr. Fletcher, of Letham Grange, Arbroath, was awarded the first ticket for a very fine three-year-old roan, sired by Lord Donovan. He could stand a little improvement behind the shoulder, but his enormous weight (18cwt. 50lbs.) and great wealth of flesh carried him fairly over the heifer for the Breed Cup. Lord Rosebery's second prize steer was the red-and-white three-year-old Talisman, bred by Mr. Gordon of Newton, and which has not been shown before. The heifer class contained only six entries, and Messrs. Grant, Auchnacree, were first with a three-year-old roan, which was reserve for the Breed Cup.

The Aberdeen-Angus section, although not strong in numbers, was of outstanding merit, and it achieved the distinction of carrying off all the open championships. A class of three young steers were presented to the judges, and they had little difficulty in selecting Mr. George Bruce's Cock of the North, a black two-year-old, which was afterwards awarded the Breed Cup, the special prize as the best steer in the show, and finally the championship of the cattle section, the reserve being Lord Rosebery's Aberdeen-Angus heifer. Mr. Robertson was the second prize taker in this class, he showing a two-year-old bullock bred by Mr. Grant, Finlarig. In the old steer class Lord Rosebery came to the front with the stylish three-year-old Black Diamond, bred in Banffshire, and first at this show and at the London Smithfield last year. Mr. George Bruce was second with a straight and well-topped steer, and Her Majesty the Queen only got the third ticket for an exhibit bred at Abergeldie Mains. The heifer class was small, numbering only four. Lord Rosebery had a clear first with Abbess III. of Kippendavie, a three-year-old bred by the late Colonel Stirling, and which has won several prizes at summer shows this year. Mr. William Charles was second with an animal of nice quality, bred in Banffshire.

The Galloways made an exceptionally good display. The class for young steers had eight entries, and the judges were so satisfied with the quality of the exhibits that a ticket was given to almost every animal in the class. The first prize went to Sir John Swinburne for a bullock sired by Druid, the bull which was champion at the Highland Society's Show at Edinburgh last year. He is a steer of excellent Galloway character, and of great scale, weighing 12cwt. 59lbs. Sir Robert Jardine was second, fourth, and fifth with three very meritorious animals, all bred at Castlemilk, whilst the Duke of Buccleuch was third with a symmetrical animal of his own breeding. There was only one entry in the old steer class, and that was made by the Earl of Antrim, Glenarm Castle. This is an animal that could hold his own in good competition, and he was awarded the reserve ticket for the Breed Cup. Although bred in Ireland, he was fed on his lordship's farm in Galloway, and took first honours at Castle Douglas and Dumfries shows this year. The heifer class numbered four, and it was headed by Sir John Swinburne's Scottish Queen III., a three-year-old. She is perhaps one of the best fat heifers that has ever represented the breed at a show, and there was no gainsaying her claim to the Breed Cup. The Crichton Royal Institution, Dumfries, were second.

The display of Highland cattle was one of the distinguishing features of the show. In the younger steer class there were six entries, and the first prize was awarded to the Earl of Moray for a dun bullock of nice shapes and character, and he afterwards carried off the Breed Cup. Sir William Ogilvy-Dalgleish was second with another dun bullock, bred at Bochastle, and the same herd provided the third prize animal in a stylish yellow bullock of similar breeding. The aged steers brought out a splendid display, upwards of a dozen magnificent animals entering the ring. The judges spent a long time before they could select a short leet of five, and even after that they experienced considerable difficulty in placing them in the order of merit. The first ticket was ultimately given to Lieut.-Col. Home-Drummond for a very fine three-and-a-half-year-old dun bullock, which had the top weight of the breed and was awarded the reserve ticket for the Breed Cup. The Earl of Moray was second in the class with a four-year-old red steer bred by Lord Malcolm of Poltalloch. Lieut.-Col. Home-Drummond received tickets for other three bullocks in the class, all showing good feeding properties. The heifer class was small, there being only four entries, and the first prize was taken by the Countess Dowager of Seafield with a fairly good heifer of her own breeding.

Cross-bred cattle were, in point of numbers, the strongest in the show, and all the classes were well filled. In the young steer class, which had fifteen entries, Mr. Ross, Meikle Tarrel, was first with a Shorthorn-Angus cross of his own breeding, and weighing 14cwt. 88lbs., the heaviest weight in the class. Mr. Turner, Cairnton of Boyndie, was second and third with a pair of very good crosses between the black Poll and the Shorthorn. A strong class of old steers was headed by Lord Rosebery with a red and white Shorthorn cross, bred in Aberdeenshire, and weighing 17cwt. 21lbs. Mr. Fletcher, of Rosehaugh, was second with a blue-grey of his own breeding, but not so massive as the first prize taker; and Captain Stirling, of Keir, was third with the heaviest animal of the three, weighing 17cwt. 81lbs.

The Dalmeny herd again came to the front in the young heifer class, Lord Rosebery being first with a well-finished heifer, shown for the first time, and which was a good bit ahead of the second and third prize takers, which came from Meikle Tarrel, and were both bred by the exhibitor. In a small class of three three-year-old heifers Mr. Fletcher, of Rosehaugh was first with a cross of his own breeding, by an Angus sire out of a Hereford dam, which well deserved her place as the runner-up for the breed cup, which in this section was awarded to Mr. John Ross's black heifer of his own breeding, the champion at Inverness on the 1st inst.

The adjudication of the champion prizes attracted a large and interested crowd round the ring, and the work of the judges was followed with the closest attention. The decisions were for the most part anticipated, and the awards giving the male championship to Mr. George Bruce's Aberdeen-Angus steer, the female championship to Lord Rosebery's Aberdeen-Angus heifer, and the championship of the show to Mr. Bruce's splendid bullock, were received with general approval.

Sheep made a most attractive department of the show, the quality of the stock being highly meritorious. The strongest section was that for Cheviots, in which Mr. John M'Dowall, Girdstingwood, Kirkcudbright, was a most successful exhibitor. Mr. M'Dowall on this occasion fully maintains the record which he established in the previous exhibitions of the club, carrying off three breed cups, and securing the championship in the sheep section. He laid the foundation of his success in the Blackfaced classes, where the quality is excellent—the ewes, perhaps, being the weakest of the three groups. For wedder lambs of the Blackfaced breed, Mr. Howieson, Rannagulzion, carried off the three prizes with particularly nice pens, the first of which was well to the front when the judges came to consider the matter of the breed championship, and was then placed reserve. The lambs which obtained the premier award scaled 412lbs.; while the second prize pen, also bred by the exhibitor, weighed 398lb. In this class a commended ticket was given to Mr. M'Dowall for a very promising pen. In the wedder class the competition for the leading place was keen, owing to the high quality of the stock shown. The competition lay between Mr. M'Dowall and Mr. Miller, Nydie Mains, and the judges' decision went in favour of the Girdstingwood sheep—wedders of capital frame, well finished, and of much quality, though 10lbs. lighter than those put forward by Mr. Miller. Mr. M'Dowall's success in this class paved the way for a greater victory, because his pen of wedders were given the "blue ribbon," as the best Blackfaced sheep in the yard. In the ewe class, Mr. Howison secured the leading place with a pen of his own breeding, Mr. M'Dowall being second with three sheep bred at Inverquharity. Of the Cheviot breed there was an excellent representation, some of the animals penned being of outstanding merit. In these classes, again, Mr. M'Dowall was the prominent figure. He was first for wedder lambs, with a pen weighing 491lbs., Mr. Jamieson, Muttonhole, being second with a lot scaling a little more than two stones less. Wedders above twelve months were a strong class, and included three splendid specimens of Girdstingwood bred sheep, which were not only put at the head of their class, but were awarded the Breed Cup for the best pen of Cheviots shown. The ewe class was topped by a pen shown by Mr. Jamieson, Muttonhole, and bred there, which were placed reserve for the Breed Cup. Excellent quality, too, was found in the half-bred classes. For lambs, Mr. M'Dowall gained the leading prizes with two out of the four lots penned. Mr. M'Dowall was also an exhibitor of wedders above twelve months, in which class he carried off the red ticket. To this pen was given the Breed Cup. Sir Graham Montgomery was second in the class, with a pen of somewhat less substance than the first. Three pens of ewes were shown—the class being headed by three sheep exhibited and bred by Mr. Elliot, Raecleugh Head, Duns, which were reserve for the breed prize. Mr. Crosbie, Blegbie, was second in the class, with a nice lot of his own breeding. Of cross-breds there were four well-filled classes. Mr. W. Allen Woddropp, Garvald House, Dolphinton, secured the principal place in the class for lambs—Leicester tup and Blackfaced ewe cross; while in the hogg class Mr. Mitchell, Fliskmillan, achieved a like success. The Suffolk Sheep Society's special prize for the best pen of lambs got by a pure-bred Suffolk tup was gained by Mr. Everett, Edington Mains, while a special prize given for the best lambs got by an Oxford Down tup was carried off by Mr. Thom, Pitlochie, Fife. In the class for cross hoggs, Mr. William Ford, Fentonbarns, was very successful, securing first and second tickets. His first prize pen—crosses between a Suffolk ram and half-bred ewes—are of his own breeding, sheep of immense substance, scaling 862lbs. To this pen was given the cup for the best lot of crosses shown. When the championship of the sheep section came to be considered, Mr. Ford's cross-bred sheep and Mr. M'Dowall's first prize Cheviot wedders came into keen competition. The judges failed to agree, and the matter was left in the hands of Mr. James Swan, the referee for champion prizes, who gave his decision in favour of Mr. M'Dowall. Along with the championship went the Parliament House Challenge Cup for the best pen of sheep in the yard. Mr. M'Dowall was the winner of the cup last year, so that, according to the conditions, it now becomes his property.

As in former years, Lord Rosebery was a successful exhibitor of pigs, in which section the quality was high, though the entries were not numerous. His Lordship showed two grand specimens of the White breed, which, first in their class, were also given the champion cup for the breed. The pigs, which were bred at Dalmeny, are by Bottesford Rover II., out of Dalmeny Lady Orston III. A pen of the White breed, also from Dalmeny, were reserve for the championship.

At no previous show of the Club has there been such a magnificent display of roots. There was a large entry in the various sections, and the judges, in consequence of the great excellence of the specimens on exhibition, were engaged for some considerable time in the work of adjudication.

Judges.

SHORTHORN CATTLE, CROSS-BREEDS, AND THE PRESIDENT'S PRIZE: Messrs J. Crum Kirkton, Banchory, Inverness; Alex. Beddie, Adzel, Strichen, and Chas. Wilson, Castle Street, Edinburgh.

ABERDEEN-ANGUS, GALLOWAY, AND HIGHLAND: Messrs George Crum, Morlich, Glenkindie, Aberdeenshire; James Biggar, Nethertown of Grange, Dalbeattie; and John Stewart, 337, Dumbarton Road, Glasgow.

EXTRA CLASS AND DAIRY COWS: Messrs. David Wright, Springfield House, Halifax; Wm. Harrison, Skibeden, Skipton; and John M'Kay, Dundee.

BLACKFACED SHEEP, CHEVIOTS, AND HALF-BREDS: Messrs. James Moffat, Gateside, Sanquhar; J. R. C. Smith, Mowbrough, Yetholm, Kelso; and Robert Williamson, Tinwald Downs, Dumfries.

CROSSES AND EXTRA CLASS: Messrs. William Davidson, Cornhill; William S. Dods, High Street, Berwick-on-Tweed; and Thomas Wedderspoon, St. Leonard's Bank, Perth.

PIGS: Messrs. James Hallas, Higher Walton, Warrington; and W. Campbell, Perth Road, Dundee.

Champion Prizes and Breed Cups,

CATTLE.

Champion cup for the exhibitor of the best steer: Mr. G. Bruce, Tochineal, Cullen (Cock of the North); r, Lord Rosebery, Dalmeny Park, Edinburgh.

Champion cup for the best cow or heifer: Lord Rosebery.

Northern challenge cup of 10) guineas for the best animal in the cattle department: Mr. G. Bruce (Cock of the North); r, Lord Rosebery.

Thorley challenge cup to the breeder of the best animal in the cattle classes: Mr. Hunter, Dipple, Fochabers.

Messrs. Webb and Sons' challenge cup for the best animal in the cattle classes, bred by exhibitor: Mr J. Ross, Meikle Tarrel.

Ardross challenge cup for the best ox or heifer under two years old: Mr. G. Bruce.

Cup for the best animal in the shorthorn classes: Mr. Fitzroy C. Fletcher, Letham Grange, Arbroath; r, Messrs. Grant, Auchnacree.

Cup for the best animal in the Aberdeen-Angus classes: Mr. G. Bruce (Cock of the North); r, Lord Rosebery.

Cup for the best animal in the Galloway classes: Sir John Swinburne, Capheaton, Northumberland (Scottish Queen III.); r, Earl of Antrim, Glenarm.

Cup for the best animal in the Highland classes: Earl of Moray, Doune; r, Lieut.-Colonel Home-Drummond, Blair Drummond.

Cup for the best animal in the cross-bred classes: Mr. John Ross, Meikel Tarrel, Fearn; r, Mr. Fletcher, Rosehaugh, Douglas.

SHEEP.

Champion cup for the best sheep in the show: Mr J. M'Dowall, Kirkcudbright (Cheviot wedders); r, Mr. W. Ford, Fentonbarns (cross-bred hoggs).

Parliament House challenge cup for the best pen of sheep in the show: Mr. J. M'Dowall; r, Mr. W. Ford.

Cup for the best blackfaced sheep: Mr. J. M'Dowall; r, Mr. Howieson, Rannagulzion.

Cup for the best Cheviots: Mr. J. M'Dowall; r, Mr. Jamieson, Muttenhole.

Cup for the best half-breds: Mr. J. M'Dowall; r, Mr. Elliot, Raecleugh Head, Duns.

Cup for the best cross-breds: Mr. W. Ford, Fentonbarns, Dern Park.

Suffolk sheep: Special prize for the best pen of lambs got by a pure-bred Suffolk tup: Mr. Everett, Edington Mains.

Special prize for the best lambs got by an Oxford Down tup: Mr. Thom, Pitlochie, Fife.

Silver cup for best pen of pigs: Lord Rosebery; r, ditto.

CATTLE.

SHORTHORNS.

Shorthorn steers, not exceeding two years old: 1, Lord Rosebery; 2 and 3, John Ross; vhc, George Inglis, Newmore, Invergordon; hc, Robert Turner, Cairnton of Boyndie, Portsoy.

Shorthorn steers, above two years and not exceeding three years old: 1, Fitzroy C. Fletcher; 2, Earl of Rosebery; vhc, F. W. Christie, Dairsie Mains, Cupar.

ABERDEEN ANGUS.

Aberdeen Angus steers, not exceeding two years old: 1, George Bruce, Tochineal, Cullen; 2, James Robertson, Barmuckity, Elgin; hc, James Shields, Dolphingstone, Tranent.

Aberdeen Angus steers, above two years and not exceeding three years old: 1, Earl of Rosebery; 2, George Bruce; 3, Her Majesty the Queen, Aberg; hc, Major and Hon. A. Forbes Trefusis, Fetteresso House; hc, D. C. Bruce, Byres Farm, Parkhouse.

Aberdeen Angus heifers, not exceeding two years old: 1, Earl of Rosebery; 2, William Charles, Gammons, Rothienorman; vhc, George Waldie, Pitpointie, Arbroath.

GALLOWAYS.

Galloway steers, not exceeding two years old: 1, Sir John Swinburne, Capheaton, Newcastle-upon-Tyne; 2, Sir Robert Jardine of Castlemilk, Lockerbie; 3, Duke of Buccleuch, Drumlanrig Castle, Thornhill; hc and c, James Shields, Dolphingstone, Tranent.

Galloway steers, above two years and not exceeding three years old: 1, Earl of Antrim, Glenarm Castle.

Galloway heifers, not exceeding three years old: 1, Sir John Swinburne; 2 and 3, Chrichton Royal Institution, Chrichton Farm, Dumfries; c, M'Cormack and Mathieson, Mindork, Kirkcowan.

HIGHLAND.

Highland steers, not exceeding three years old: 1, Earl of Moray, Doune Lodge; 2 and 3, Sir William Ogilvy Dalgleish, Errol Park; vhc, Donald Graham, C.I.E., Airthrey Castle, Bridge-of-Allan.

Highland steers, above three years old: 1, 3, and c, Lieut.-Colonel H. E. S. Home Drummond of Blair Drummond; 2, Earl of Moray; vhc, Sir William Ogilvy-Dalgleish; hc and c, Sir John Gilmour.

Highland heifers, not exceeding four years old: 1, Countess Dowager of Seafield, Castle Grant, Grantown-on-Spey; 2, Earl of Southesk, Kinnaird Castle, Brechin; 3, Donald Graham.

CROSS-BREDS.

Cross-bred steers, not exceeding two years old: 1, John Ross, Meikle Tarrel; 2 and 3, Robert Turner, Cairnton of Boyndie, Portsoy; vhc, J. Douglas Fletcher, of Rosehaugh; hc, Finlay Munro, Rockfield, Fearn; c, James Robertson, Barmuckity, Elgin.

THE EARL OF DURHAM'S HIGHLAND HEIFER "BRUIDA-CROMEH," FIRST PRIZE AT THE BIRMINGHAM FAT STOCK SHOW.

Cross-bred steers, above two years and not exceeding three years old: 1, Earl of Rosebery; 2, J. Douglas Fletcher; 3, Captain Archibald Stevenson, Keir; vhc, James Duncan, Cupar Grange, Cupar-Angus; hc, Fitzroy C. Fletcher, Letham Grange, Arbroath.

Cross-bred heifers, not exceeding two years old: 1 and c, Earl of Rosebery; 2 and 3, John Ross; vhc, Messrs Rigg, Bros, John Gilmour.

Cross-bred heifers, above two years and not exceeding three years old: 1, J. Douglas Fletcher; 2, James M'William, Stoneytown, Keith; vhc, Marquis of Londonderry.

THE PRESIDENT'S PRIZES.

Open only to cattle exhibited by tenants.

Steers, not bred by exhibitor, not exceeding three years old: 1, William Watt, Middlefield, Cupar; 2 and c, James Shields, Dolphingstone; 3, William Charles, Gammons, Rothienorman; vhc, F. W. Christie, Dairsie Mains; hc, James Paul, Walton, Linlithgow.

Heifers not bred by exhibitor, not exceeding two years old: 1 and vhc, John Ross; 2, William Charles.

EXTRA CLASS.

Two cattle, bred and reared by the exhibitor, not exceeding 24cwt. the pair: 1, James Shields, Dolphingstone; 2 and hc, John Ross.

DAIRY COWS.

Fat cow: 1, Alexander Whitelaw, Stockbridge, Edinburgh;

2, Sir George Macpherson Grant, Ballindalloch; 3, John R. Stenhouse, Southgyle, Corstorphine.

Shorthorn or cross cow: 1, Alexander Whitelaw; 2 and hc, John Mather, Quarryholes, Leith; 2, John Lockhart, Colinton Mains; vhc, John Ross, Abbeyhill, Edinburgh.

Ayrshire cow, or other small breed of cow: 1, Thomas M'Pherson, Gorgie Cottage; 2, Thomas M. Skirving, Niddrie Mains, Edinburgh; 3, J. and W. Meiklem, Begg, Kirkcaldy.

Ayrshire cow (brewers' and distillers' prizes): 1, Thomas M'Pherson; 2, John Lockhart; 3, Robert Hamilton, Addiston Mains, Ratho.

SHEEP.

BLACKFACED.

Three Blackfaced wedder lambs, under twelve months old: 1, 2, and 3, James Howlson, Rannagulzion, Blairgowrie; c, John M'Dowall, Girstingwood, Kirkcudbright.

Three Blackfaced wedders, above twelve months and under twenty-four months old: 1, John M'Dowall; 2 and 3, James Miller, Nydia Mains, St. Andrews; vhc, Sir John Gilmour, Bart., Montrave.

Three Blackfaced ewes, above three years old: 1, James Howison; 2, John M'Dowall; 3, Sir John Gilmour; vhc, Gavin Jack, Swanston, Colinton.

Heaviest lambs: 1 and 2, John Howison; 3, James Bone, Robstone, Girvan.

CHEVIOTS.

Three Cheviot wedder lambs, under twelve months old: 1 and vhc, John M'Dowall; 2 and 3, James M'D. Jamieson, Muttonhole, Ford, Dalkeith.

Three Cheviot wedders, above twelve months and under twenty-four months old: 1, 2, and special, John M'Dowall; 3, Alexander Guild, Aberlady Mains, Aberlady; vhc, H. W. Hone, Luffness Mains, Aberlady.

Three Cheviot ewes, above three years old: 1 and hc, James M'D. Jamieson; 2, John M'Dowall.

HALF-BREDS.

Three half-bred wedder lambs, under twelve months old: 1 and 2, John M'Dowall; vhc, David Allison, Duddingston, South Queensferry.

Three half-bred wedders, above twelve months and under twenty-four months old: 1 and vhc, John M'Dowall; 2, Sir G. Graham Montgomery, Bart., Stobo Castle.

Three half-bred ewes, above three years old: 1, William Elliot, Raeclengh Head, Duns; 2, Aleander Crosbie, Bleghie, Upper Keith; vhc, The Earl of Minto.

CROSS-BRED.

Three cross lambs (Leicester tup and Blackfaced ewe), under twelve months old: 1 and hc, William Allan Woddrop, Garvald House, Dolphinton; 2, 3, and vhc, Trustees of the late Colonel Cheape, Wellfield, Gateside.

Three cross hoggs (Leicester tup and Blackfaced ewe), under twenty-four months old: 1, 2, and 3, John Mitchell, Fliskmillan, Newburgh; vhc, F. W. Christie, Dairsie Mains, Cupar-Fife.

Three cross lambs, not eligible to compete in any other class, under twelve months old: 1, special, and hc, R. D. Thom, Pitlochie, Gateside, Fife; 3, Alexander Anderson, Berryhill, Dundee; vhc and special, F. H. Everett, Edington Mains, Chirnside.

Three cross hoggs, not eligible to compete in any other class, under twenty-four months old: 1 and 2, William Ford, Fentonbarns, Drem; 3 and vhc, The Earl of Minto; hc, F. W. Christie; c, Thomas M. Skirving, Niddrie Mains.

EXTRA CLASS.

Three wedders, under twenty-four months old, of any breed not eligible to compete in any other class: 1 and 2, William Ford.

PIGS.

WHITE.

Two pigs of the White breed, not exceeding nine months old: 1, The Earl of Rosebery; 2, A. Sinclair Lawrie, 23, Gordon Street, Leith.

Two pigs of the White breed, above nine months old and not exceeding twelve months old: 1, The Earl of Rosebery; 2, John Lockhart, Colinton Mains; vhc, A. Enever Todd, Stoneybank, Musselburgh.

BLACK OR BERKSHIRE.

Two pigs of the Black or Berkshire breed, not exceeding nine months old: 1 and vhc, James Shields, Dolphingstone, Tranent.

Two pigs of the Black or Berkshire breed, above nine months and not exceeding twelve months old: 1, The Earl of Stair, K.T., Oxenfoord Castle; 2, Thomas A. Torrance, Kippilaw, Dalkeith.

ANY DISTINCT OR CROSS-BREED.

Two pigs of any distinct or cross-breed, not qualified to compete in any other class, not exceeding twelve months old: Thomas A. Torrance.

Taunton.

The Christmas show of fat stock, malting barley, and wheat was held at Taunton on the 1st inst., but, unfortunately, the entries of stock were much fewer than in previous years, although the quality, according to the judges, reached a higher standard than ever before. This was the first time for some years that the show had been held on a Saturday, the market day of the town, it having previously taken place on a Friday, but it was decided to revert to the original practice this year. In the afternoon the annual dinner was held at the London Hotel, under the presidency of the Mayor (Councillor W. A. Wrenn), when the prizes were distributed according to the list given below. The judges were:—Cattle, Mr. E. Kidner (Cannington) and Mr. T. Ferris (Tiverton); sheep, Mr. R. Bucknell (Holcombe Rogus) and Mr T. S. Corpe (Yeovil); barley and wheat, Mr. E. Risdon, Minehead.

Prize List.

Silver cup for the best ox or steer in the show, any breed: Mr. W. Kidner, Kingston.

Silver cup for the best fat heifer of any breed: Mr. E. H. Buncombe, Wellington.

CATTLE.

Pair of fat oxen or steers: 1, Mr. John Kidner, Nynehead; 2, Mr. William Kidner, Kingston.

Pair of fat heifers, under four years old: 1, silver cup, Mr. E. H. Buncombe, Wellington; 2, Mr. E. Bryant, Bishop's Lydeard; r, Mr. T. C. Slade, Hatch.

Four fat oxen or steers, or four heifers, under four years old: 1, Mr. John Kidner.

SHEEP.

Pen of five fat Dorset horn wethers: 1, Jasper Culverwell, North Petherton; 2, John Hayman, Milverton Court.

Pen of five fat Down or cross-bred wethers: 1 and 2, John Hayman.

Pen of fine Devon longwool wethers: 1, C. Norman, Thurloxton; 2, A. C. Skinner, Bishop's Lydeard; r, A. C. Skinner.

Pen of five fat Exmoor wethers: 1 and 2, J. H. Frith and Son, Taunton.

Pair of fat lambs under three months old: 1, J. Kidner.

CHAMPION AND SPECIAL PRIZES.

(For Cattle and Sheep grazed within a radius of 20 miles of Taunton Market Cross.)

Fat ox or steer: 1, silver cup, William Kidner; 2, John Kidner; r, C. W. Tavender, Lyngford.

Fat heifer, under four years old: 1, silver cup, E. H. Buncombe; r, Edwin Bryant.

Pen of five fat wethers, of any breed other than Exmoors: 1, John Hayman.

MALTING BARLEY AND WHEAT.

(Grown within a radius of eight miles of the Taunton Market Cross.)

Four bushels of wheat, any variety, exhibited by the bona-fide grower: 1, T. Berry, Bradford; 2, W. Greenway, Halse; c, W. Miles, West Monkton.

Four bushels of wheat, any variety, exhibited by the bona-fide grower: 1, W. Greenway; 2, F. Yeandle, West Buckland; c, J. Teazewell, Haydon Taunton.

(Open to the County of Somerset)

Four bushels of Carter's Prize Prolific or Goldthorpe barley: 1, silver cup, T. Rawle, Porlock; c, W. Risdon, Stogumber.

Birmingham.

The splendid display of fat stock at Bingley Hall, Birmingham, attracted great numbers of spectators on each of the five days, and on some days the attendance was above the average, although the aggregate fell short of the last three or four years; but more visitors paid for admission, and fewer entered by subscribers' ticket than last year, so that the sum taken at the doors is above that of 1899. The aggregate attendance numbered 46,443, whereas last year it was 46,682, showing a decrease of 239, but as compared with 1898 an increase of 1,693. The total amount of the receipts for the week was £1,441 17s., or £58 11s. higher than last year, and £142 7s. in excess of the amount paid for admission in 1898. As usual, the popular day was the last one (Thursday), and the weather being favourable, there was a large influx of excursionists. During the day 11,965 passed the turnstiles, an increase of 213 as compared with the last day twelve months ago, when the total was 11,752 and 35 more than two years ago, the total on that occasion being 11,610. The number for the day was also much larger than in the years 1896 and 1897. Of the 11,965, the number admitted by subscribers' tickets was 2,327, 4,128 paid one shilling each, and 5,510 paid sixpence each. The day's receipts amounted to £344 3s., an increase of £15 13s. over last year, and £27 1s. more than in 1898.

The following are the returns:—

A gratifying announcement was made to the Council of the Society on Thursday, this being the offer of a £50 challenge cup by Mr. J. J. Cridlan, Maisemore Park, Gloucestershire, for the best Aberdeen-Angus in the show. The cup was accepted with thanks, and it will be entered for competition next year, but the conditions attaching to it are the same as those governing the other trophies, namely, that it must be won by the same exhibitor three years before it becomes his property. It may also be mentioned that several other cups, ranging in value up to 100gs., were offered for competition in the cattle department, but the donors wished to impose certain conditions which the Council could not accept, and the offers were consequently declined. Every prize offered, it should be remembered, is for open competition in all sections of the show, and the Council feel that they would be unable to depart from that important rule even to secure the advantage of a greater number of valuable trophies.

Lewes.

Lewes Christmas Fat Stock Show was held in the Market Ground on Monday, and both the Society and exhibitors may be congratulated on the useful collection of fat stock which was brought together. In the aggregate the entries were ten more than last year. Beasts numbered fifty-seven, as compared with fifty-eight in 1899; sheep, sixty-five, as against forty-five; and pigs, sixteen, as against eight. With the exception of one or two classes there was keen competition for the premiums and special prizes, the exhibits generally reaching a high standard of quality. There was a fine show of Sussex, Devon, Polled Angus, and Welsh runts, and the butchers were evidently satisfied with the animals, the excellent condition of the prize-winners being most marked. Count Munster, of Maresfield Park, exhibited specimens of the Sussex breed with much success. The silver cup for the best beast was secured by Mr. E. E. Masters, of Hassocks, who also had the good fortune to win the trophy presented by the Mayor of Lewes for the best three steers. The pens of Southdown sheep and lambs were, of course, worthy of commendation, the prizes in this division being shared by the Duke of Devonshire, Viscount Gage, and Count Münster. As will be seen from the figures given above, the number of pigs was double that of last year, and it may be said that the animals were nicely fatted, Mrs. Hepburn, of Chailey, being the principal winner in this department of the show. During the greater part of the day the weather was favourable, and the show was largely attended by agriculturists and the general public. Mr. R. J. Thornton, the well-known auctioneer, conducted a sale of prime fat stock, including the show exhibits, and comprising 146 beasts, 266 sheep, thirty-five lambs, twelve calves, and thirty hogs. There was a large company round the sale ring. The judges were Mr. Chas. Homewood (Brighton), Mr. Joseph Gorringe (Eastbourne), and Mr. Robert Kenward (Piltdown).

Prize List.

Ox or steer, any age: 1, Count Munster, Maresfield Park; 2, Mr. A. Scrase, Budgess Hill.

Heifer, under four years: 1, Mr. W. T. Wallis, Southerham.

Two steers, of any age, belonging to a tenant-farmer: 1, Mr. J. Stacey, Lewes; 2, Mr. W. Elphick, Langley Farm, Eastbourne.

Two heifers, any age, belonging to a tenant-farmer: 1, Mr. W. Elphick; 2, Mr. F. J. Gorringe, Laughton.

Silver cup, value £4, offered by the Mayor (Councillor G. Holman), to the owner of the best three steers, of any age or breed: Mr. E. E. Masters; Mr. J. Porter, Ringmer.

Silver cup, value £5, for the best fat beast of any breed, fatted in the County of Sussex: Mr. E. E. Masters, Hassocks.

Three cows or heifers, any age or breed: 1, Mr. E. E. Masters; 2, Mr. Louis Huth, Possingworth, Waldron.

Prize of £2 2s. for the best pair of Welsh runts in the show: Mr. J. Kenward, Hamsey.

Pen of five Southdown wethers, under two years: 1, Duke of Devonshire; 2, Mr. W. T. Wallis.

Pen of five Southdown ewes: Viscount Gage.

Pen of ten Southdown wether lambs, under one year: 1, Duke of Devonshire; 2, Count Munster.

Prize of £2, given by the proprietors of the "Sussex Agricultural Express," to the owner of the best pen of two fat pigs, under twelve months: Mrs. Hepburn, Chailey.

Two fat pigs, under sixx months: 1, Mr W. Hook, Lindfield.

Inverness.

The thirty-third annual exhibition of fat stock held under the auspices of the Northern Counties Fat Show Club was held at Inverness-shire on the 1st inst, and proved very successful. From the chief herds in the North representative animals were forward, and many of them were of great merit. Although in point of numbers the show was not up to that of previous years, the outstanding quality atoned for numerical disparity. Some of the finest bred animals in the North contested for the prizes. The principal winner was Mr. John Ross, Meikle Tarrel, who has made a name for himself in the agricultural world as a breeder of fat stock. To the Tarrel stock the chief prizes were awarded. With an excellent cross heifer Mr. Ross won the championship, the President's Challenge Cup. She was of a low-standing type, weighing 13cwt. 14lbs., and was remarkably well covered, with great depth of rib and level lines. Besides carrying away the championship she secured the Rosehaugh Cup for the best cross animal, the Dochfour Cup, Thorley's prize, and Novar's Cup. The heifer, although small, was well worthy her honours, and was without doubt the best in the show. The Rosehaugh stock were a good second. Equally well brought out was the ox from Rosehaugh which secured reserve for the championship. He was wanting in symmetry, although powerfully built, and weighed 17cwt.

For Shorthorn ox under two years the Tarrel representatives easily won first and second place, while for heifers the first prize went to a nicely-formed heifer belonging to Mr. Finlay Munro, of Rockfield. An excellent polled animal from Rockfield was awarded the Dalmore Cup for the best polled animal. For polled heifers the one from Rockfield, which was of Ballindalloch strain, got the leading place. The prize for the ox was awarded to one from the Rosehaugh herd. There were very few Highlanders, but those forward had all the outstanding characteristics of the shaggy breed—fine antlers and beautiful head, with excellent coats. A heifer from Castle Grant secured the Wyvis Cup for the best Highland ox or heifer. It was followed by a striking representative from the Cawdor Castle herd.

Crosses were the feature of the show, and in this section was found the champion animal. For oxen under two years a big animal from Rosehaugh was first. A Tarrel heifer led in its class. For pairs of oxen, any breed, two from Rockfield were fine animals, and led the way in their class; and for cows, any age, the same herd took the chief prize. For two heifers, Tarrel got premier honours with an excellent ox, of big proportions. Mr. Fletcher, of Rosehaugh, took premier honours in the three-year-old class. The ox was reserve for the championship. For heifers of the same age, the Rosehaugh herd claimed the leading honour. In the tenant farmers, the chief prizes were easily carried away by Tarrel.

The show of sheep was much below that of last year, but some excellent animals were shown by Mr. Moore, Ormlie, Thurso, and Mr. Macfarlane, Tomich, Invergordon. The challenge cup presented by Dr. Macgregor and the Ainlie Challenge Cup were carried away by the Thurso sheep. Those from Tomich had

many honours, carrying away the Inverness Town Council's cup, Thorley's prize, and Sir Robert B. Finlay's cup. The prizes for pigs went to animals shown by John Cran, Kirkton, and the Inverness District Asylum.

Chippenham.

The Chippenham Agricultural Association's annual show was held in the Market Yard, Chippenham, on the 29th and 30th ult., when the number of entries was the largest on record, whilst there was a marked improvement in quality, the show being altogether an excellent one. The bull, cow, and offspring class, in which there was practically no competition last year, was this year a feature of the show. Premier honours were taken by Lord Tredegar. The fat stock classes were well represented, and in the milch cow class a local exhibitor was placed first. The heifer classes, with the exception of that for animals under twelve months, were weak. In the latter class there was a complete surprise, Mr. Drake, a local exhibitor, defeating such well-known breeders as Mr. Deane Willis, Lord Tredegar, and Mr. S. Hill. The judges reversed the decision at Tredegar, and placed Mr. A. Hiscock first in the class for bull calves. Mr. G. F. King, who was awarded first in the class for bulls above one and under two years, took with the same bull the champion prize for the best male animal for breeding purposes, Mr. A. Hiscock being reserve. Formerly, the four classes for sheep were divided between Hampshire and cross-bred wethers and ewes, but this year these have been reduced to two classes and a class for five Hampshire ewes for breeding purposes. The alteration did not increase the competition in this department, there being only seven entries in the three classes. The horse classes were so numerically strong that there was no room for them in the showyard, and the judging was carried out in the Market Place. In the class for cart gelding or filly nearly all the exhibits were noticed by the judges. The pig classes were well filled, the exhibits being principally of the Berkshire breed. There were special prizes for the butter-making competition confined to the scholars at present attending the Itinerary County School. The butter and cheese exhibits were staged in the Town Hall, and great interest was taken in them by visitors. The judges were:—Stock, Mr. W. R. Peacey, Stroud, and Mr. W. D. Little, Middleton Stoney, Bicester; butter, Mr. F. Drake, Sutton Benger; cheese, Mr. G. Butcher, Bath.

The principal awards were as follows:—

Prize List.

CATTLE.

Bull, cow, and offspring: 1, Lord Tredegar, Tredegar Park, Newport, Mon.; bull, Request; cow, Snowdrop 8th; offspring, Snowstorm; 2, John Little, Paxcroft Farm, Trowbridge; bull, Vain Lord; cow, Moss Rose 2nd, offspring; r, H. J. Pocock, Heddington, Calne; hc, Sir W. H. Wills, Bart., Blagdon; bull, Blagdon Medallion; cow, Charity 4th; offspring, Blagdon Medallion 2nd.

Fat steer, under three years old: 1, J. Thorley, Ringdale, Faringdon; 2, W. D. Sanders, Bridgwater; 3, E. P. Alexander; r and hc, R. and J. Hull, Sutton Benger; c, C. J. Hibbard, Stanton Manor; N. Benjafield, Motcombe.

Fat heifer, under three years old: 1, E. P. Alexander; 2, J. D. Allen; r, R. and J. Hull.

Milch cow: 1, Fred Cole (Dodford); 2, A. Hiscock, jun., Motcombe (Manor Beauty); 3, H. J. Pocock (Spot); r, G. F. King (Silverlocks); c, A. Hiscock; J. Deane Willis.

In-calf heifer: 1, A. Hiscock; 2, John Barnes, Langley Burrell; 3, G. F. King.

Heifer: 1 and c, Sidney Hill, Langford; 2, John Little.

Heifer calf, above six and under twelve months: 1, Francis Drake; 2, J. Deane Willis; 3, Sidney Hill; r, Sidney Hill; hc, Lord Tredegar; J. Thorley; c, J. D. Allen.

Bull calf: 1, A. Hiscock; 2, J. Deane Willis; 3, G. F. King; r, Earl of Suffolk.

Bull, above one and under two years old: 1 and c, G. F. King; 2, R. W. Lyne; 3, J. D. Willis; r, G. F. King; hc, Joseph Stratton; c, Lord Tredegar.

SHEEP.

Hampshire lambs: 1, H. Bridgman, Downend; 2, Jeffrey Matthews, Winterbourne; r, E. Parrott, Warminster.

Cross-bred lambs: 1, J. Matthews; 2, H. Bridgman.

Hampshire ewes: 1, J. Matthews; 2, E. Burbidge, South Wraxhall.

HORSES.

Cart gelding or filly: 1, E. B. Ewing, Calne; 2, S. Davis; 3, G. F. King; r, G. Cowing, Calne; hc, G. T. Anstee, Stanton.

Cart gelding or filly foaled in 1899: 1, Sir W. H. Wills, Bart.; 2, James Humphries, Wootton Bassett; 3, H. Gough, Grittleton.

Cart mare and foal: 1 and champion, G. T. Anstee; 2, G. T. Anstee; 3, G. Cowring; r, G. Cowring; hc, Charles Lodge.

PIGS.

Boar: 1, E. Burbidge; 2, J. A. Fricker; r, N. Benjafield.

Breeding sow: 1, E. Burbidge; 2, N. Benjafield; r, J. A. Fricker.

Bacon pigs: 1 and 2, Chippenham Dairy Company; r, G. W. Kingston; hc, E. Burbidge.

CHEESE AND BUTTER.

Wiltshire-made cheese: 1, C. F. Biggs, Marston; 2, John Drew, Seend; r, W. J. Hobbs, Keevil.

Two Cheddar cheese: 1, W. W. Keel, Stanton Drew; 2, H. Watts, Stourton; r, F. C. Candy, Cattistock; c, L. M. Green, Frome.

Three pounds of butter: 1, C. Hayes, Frome; 2, J. G. Williams, Winford; 3, Misses E. and K. Anstee, Malmesbury; r, George Appleby, Chew Magna; hc, G. W. Kington, Grittleton; c, Chippenham Dairy Company.

Three pounds of butter, in 1lb. rolls or pats: 1, Misses E. and K. Anstee; 2, George Appleby; 3, C. Hayes; r, J. G. Williams; c, Chippenham Dairy Company.

Cured butter: 1, C. Hayes; 2, H. White, Littleton Drew; r, Chippenham Dairy Company.

Fancy butter: 1, Chippenham Dairy Company; 2, M. Giddings, Erchfont; 3, Miss N. Bush, Lavert n; r, Miss Edith Fry, Chippenham.

Butter-making competition: 1, Miss Ada Miles, Stanley Dairy, Chippenham; 2, Miss Edith Long, Kellaway, Tytherton; 3, Miss Florence Ayres, Hullavington.

THE EARL OF STRATHMORE'S ABERDEEN ANGUS HEIFER "AQUILEGIA," WINNER OF THE £50 PRIZE FOR THE BEST SCOT AT THE BIRMINGHAM FAT STOCK SHOW. V368

Annual Meeting.

The annual meeting of the Association was held on the second day of the show, Sir John Dickson-Poynder, M.P., presiding, in the absence of Sir Audley Neeld.

Sir John said they all deeply regretted the death of Sir A. W. Neeld, who had been president of that Association for many years. The Neeld family had been the mainspring of that Association ever since it started in 1836, and the head of the family had always occupied the position of president. In the ordinary course of events, Sir Audley Neeld, who had succeeded to the Grittleton estates, had been elected president of the Association, and no doubt he would be re-elected at that meeting. Sir Audley was absent from that meeting for two reasons. First, he had very recently to mourn the loss of another brother, Mr. Elliott Neeld, and, secondly, he had gone to meet the Composite Regiment of Household Cavalry, which had just returned from South Africa, and which he commanded in the campaign there until he was stricken down with enteric fever. The object of their meeting that afternoon was to distribute the premiums and certificates for long and faithful service, and he would not be able to remain to the conclusion of the meeting, as he had to occupy the chair at a meeting of the committee of the Great Northern Hospital, London, in which he took a great interest. He had heard on the best authorities that the show was superior both in point of numbers and quality to any of its predecessors, and he was glad to know that the good work done by the County Itinerary Butter School had borne good fruit, as was demonstrated by the high standard of excellence of the exhibits.

The premiums and certificates were then presented by Lady Poynder.

On the motion of the Mayor, seconded by Mr. F. Gobbey, Sir Audley Neeld was unanimously re-elected president.

The chairman intimated to the labourers that they were at liberty to visit the showyard, after which they would be provided with dinner at the Talbot Hotel by Mrs. Helme, and they would all hope that in a short time Colonel Helme would arrive safe and sound from South Africa.

The meeting concluded with a vote of thanks to Sir John and Lady Poynder. It was intimated that Lady Poynder would provide the labourers' dinner next year.

The champion prize for butter-making was awarded to William Collingbourne, of Lyneham.

Whitchurch Dairy Show.

The twelfth annual exhibition of cheese, butter, etc., held by the Whitchurch (Salop) Dairy Farmers' Association, took place on November 26th and 27th in the Market Hall, and proved a great success. The number of entries of cheese alone exceeded 350, and the quality of all the exhibits was of a very high standard. A few changes were made in the prize schedule; the long-keeping cheese class was struck out and an extra local class substituted, making four local classes in all. The withdrawal of the long-keeping class was occasioned by the general belief that the encouragement of that make of cheese benefited neither the producer nor the consumer. The total pitch of cheese on Tuesday was smaller than last year, but the quality fully maintained the reputation of the show, the texture being perfect and the colour remarkably good. One of the judges remarked that the Whitchurch cheesemakers were improving every year, and the cheese pitched on Tuesday would bear favourable comparison with that pitched at any other of the great shows. The butter was very good, especially in Classes 10 and 11. There was room for improvement in Class 9, but the butter in the cottagers' class was of high merit. The judges were:—Cheese, Messrs. Weaver, Clemence, Oubridge, Shaw, Fish, and Wilson; butter, Mr. Lightfoot; ornamental butter and farm produce, Mrs. Topham (The Twemlows) and Mrs. Lee (The Crimps).

Prize List.

CHEESE.

Twelve cheese, irrespective of weight, make, or colour, made, owned, and exhibited by any farmer resident within the specified radius of the association's district, whose occupation exceeds 150 acres: 1 and champion, S. Dutton, Burleydam; 2, R. Bourne, Bickerton; 3, R. Owen, Hanmer; 4, W. Dutton, Nantwich; 5, J. Richards, Llynclys, Oswestry; 6, D. Ellis, Ellesmere; 7, I. A. Brown, Tarporley; r, T. Mottershead, Wem; vhc, J. Jackson, Handley; R. W. Cartwright, Whitchurch; T. Wilson, Alkington; hc, R. Cooper, Tarporley; J. Williamson, Chorley; J. R. Jones, Ellesmere; c, E. Garner, Ash; R. Dutton, Old Marton; T. Walker, Bickley.

Eight cheese, irrespective of weight, make, or colour, made, owned, and exhibited by any farmer resident within the radius of the association's district, whose occupation exceeds 80 but does not exceed 150 acres: 1, S. Johnson, Gadlas; 2, C. Price, Whitchurch; 3, H. Cooper, Bickley; 4, R. Davies, Edge; 5, F. Jeffries, Penley; 6, J. T. Jones, Worthenbury; r, J. A. Jackson, Tattenhall; vhc, Messrs. Hughes Bros., Willington Cross; J. Evans, Tybroughton; H. Rutter, Handley; hc, P. Mottershead, Cuddington; P. Cartwright, Coton; Mrs. M. J. Mullock, Cuddington; G. Goodwin, Audlem; J. Allwood, Terrick; W. H. Hobson, Malpas; c, Mrs. Walley, Frankton; R. Allen, Knolton.

Four cheese, irrespective of weight, make, or colour, owned and exhibited by any farmer resident within the association's district, whose occupation does not exceed 80 acres: 1, J. Perry, Norbury; 2, J. Rigby, Ebnal; 3, S. Bonell, Audlem; r, R. Evans, Edgeley; vhc, S. Faulkner, Wrenbury Frith; J. Boughey, Hurleston; hc, W. Broomhall, Penley; Mrs. Lovekin, Bunbury; J. Hulme, Whixall; c, S. Evans, Tattenhall.

Twelve white cheese of any make, not less than [illegible] each, made, owned, and exhibited by any farmer resident within the association's radius: 1, G. Walley, Cholmondeley; 2, W. H. Edwards, Ellesmere; 3, J. Simister, Corra; 4, T. Mottershead, Wem; 5, J. Bate, Worthenbury; 6, H. S. Walley, Malpas; 7, H. Rutter, Handley; r, E. Langley, Tarporley; vhc, Miss Nunneley, Bolesm; T. Wicker, Moss; T. Wilson, Alkington Hall, Whitchurch; hc, W. Lee, Tattenhall; J. Lee, Ellesmere; F. Jeffries, Penley; J. Rigby, Ebnal; c, J. Jackson; J. Hulme; Wm. Evans, Tattenhall.

Four white cheese of any make, not less than [illegible] each, made, owned, and exhibited by any farmer resident within the United Kingdom, first prize £2, second £1, third £1, fourth £3; fifth, £2; sixth, £1 [illegible]; r, [illegible]; hc, H. [illegible] Hall, Huxley; J. J. [illegible] Kennerley, Ellesmere; 3, Mrs. Peacock, Huxley Hall, Chester; 4, F. [illegible], Penley, Ellesmere; 5, Messrs. Hughes Bros., 6, J. Simister, Corra, Whitchurch; 7, W. H. Edwards, Trench Farm, Ellesmere; r, J. Mullock, Bradley Farm, Whitchurch; vhc, Mrs. Darlington, Poole Old Hall, Nantwich; J. Blake, Calveley Hall, Handley; W. Evans, Gateheath Farm, Tattenhall; J. Jones, New Farm, Dodleston; Miss Nunneley, Bolesm, Whitchurch; J. W. [illegible] J. Nunneley, Bolesm Hall, Nantwich; J. Bate, Sons, Whitchurch; H. Rutter, Aldersey Farm, Chester; E. Langley, Ridley Brook, Tarporley; G. C. [illegible], Kennerley, Whitchurch; W. H. Astles, Dorfold, Whitchurch; J. Jackson; J. A. Jackson; T. Mottershead, Wain House, Wem; W. Ikin, Moat House, Wem; T. Charlesworth, Baddington, Nantwich.

Four coloured cheese, of any make, not less than [illegible]

each, made, owned, and exhibited by any farmer resident within the United Kingdom: 1, R. Davies; 2, R. Dutton; 3, H. S. Walley; 4, P. Dutton; 5, W. Dutton; 6, Mrs. Mary Denson, Hargrave; 7, T. Clare, Old Marton, Ellesmere; r, R. Mullock, Guy Lane, Waverton; vhc, R. Cooper; R. Booth, Crewe; H. Tomlinson, Cholmondeley, Malpas; W. Hallbrooke, Winsford; T. R. Jones, Gwalia, Ellesmere; hc, J. Richards, Llynclys, Oswestry; J. Hussey, Willaston, Calverhall, Whitchurch; L. Jackson, Malpas; Mrs. Walley; T. Charlesworth, Baddington, Nantwich; J. Hough, Shocklach; J. Jones; B. Dutton, Baddiley, Nantwich; W. Moore, Checkley, Nantwich; N. Dale, Brassey Green, Tarporley; J. Hulme; c, D. Ellis, Ellesmere; T. Mottershead; E. Garner, Ash, Whitchurch; J. Mullock; H. Rutter; S. Johnson, Gadlas, Ellesmere; G. Walley; G. E. Drinkwater, Norbury, Whitchurch.

For farmers who have never won a first or second prize in any show: £25, given by Captain R. W. Ethelston, the Bollings, Malpas, for the best four cheese, irrespective of weight, make, or colour, made, owned, and exhibited by any farmer within the association radius, whose occupation exceeds 120 acres: 1, C. Price, Onslow; 2, W. H. Edwards, Ellesmere; 3, G. C. Hockenhull, Kiln Green, Whitchurch; 4, J. W. Steele, Handley, Chester; 5, J. Bate, Worthenbury, Wrexham; 6, Thomas Nunnerley, Bradley Green; r, Henry Cooper, Malpas; vhc, George Batho, Prees, Whitchurch; J. Mullock; Thomas Topham, Twemlows, Whitchurch; Henry Cornes, Malpas Hall; hc, J. Nunnerley; John Burrows, Wolverley, Wem; ; Jabez Evans, Tybroughton; R. Weaver, Farndon, Chester; Joseph Adams, Sandford, Prees; Thomas Walker, Bickley, Malpas; William Cottrell, Whitchurch; c, John Fitton, Whitchurch; J. R. Vernon, Whitchurch; Charles Fatherson, Malpas.

For farmers who have never won a first or second prize at any show. The best four cheese, irrespective of weight, make, or colour, owned and exhibited by any farmer within the association radius, whose occupation does not exceed 120 acres: 1, Mrs. M. J. Mullock, Cuddington, Malpas; 2, Messrs. Hughes Bros., Willington Cross; 3, Mrs. A. Beckett, Willington; 4, Mrs. Johnson, Wood Farm, Wirswall; 5, Robert D. Parry, Chorley; 6, George Goodwin, Audlem; r, John Taylor, Lees Farm, Malpas; vhc, J. Hulme; hc, William Griffiths, Horseman's Green; c, Henry Parry, Cuddington, Malpas.

A champion prize of a silver cup, value £5 5s., for the best lot of cheese in classes 1, 2, 3, 4, 7, and 8: Mr. S. Dutton, Burleydam.

BUTTER.

Six half-pounds of fresh butter, salted for market, exhibited by makers resident within the association radius, whose occupation exceeds 50 acres: 1, J. Williams, Nantwich; 2, W. Jeffries, Newport; 3, Mrs. Allwood, Terrick, Whitchurch; 4, W. Fox, Wem; 5, Mrs. Edwards, Whitchurch; r, Mrs. Evan Langley, Tarporley; hc, Mrs. Heywood Lonsdale, Whitchurch.

Six half-pounds of fresh butter, salted for market, exhibited by makers within the association radius, whose occupation does not exceed 50 acres: 1, Mrs. T. Jackson, Worleston; 2, G. Robinson, Baddiley; 3, Mrs. George Harding, Spurstow; 4, Mrs. M. Ashley, Tiverton Heath, Tarporley; r, Mrs. Huntbach, Bronington; vhc, Mrs. Walters, Coton, Whitchurch; hc, Thomas Henshall, Swanley; Mrs. E. France, Bunbury; c, Mrs. M. Burrows, Ravensmoor, Nantwich; Mrs. J. Stokes, Tilston Heath.

Two pounds butter, made up and exhibited by an agricultural labourer not keeping more than two cows, and residing in the association radius: 1, Mrs. Sumner, Norbury; 2, Mrs. Barnes, Alpraham, Tarporley; 3, T. Henshall, Swanley; 4, Mrs. J. S. Stokes; r, Miss H. West, Spurstow; vhc, J. Welch, Poole, Worleston; Mrs. Williams, Whixall Moss; hc, Mrs. Huntbach, Bronington, Whitchurch; Mrs. M. E. Ikin, Stanley Green; Mrs. Griffies, Norbury, Whitchurch.

Best exhibit of butter, made up in the most ornamental style for the table, without limit as to the number of pieces: 1, Miss Kate Lakin, Marbury, Whitchurch; 2, Miss Wardle, Old Fens Hall; 3, Mrs. France, Bunbury.

Redhill.

A persistent and heavy downpour of rain on Wednesday considerably affected the attendance at the Christmas Exhibition held under the auspices of the Redhill Agricultural Society, and the circumstance is one the more to be regretted because the show was a record one in more than one respect. The entries, if not more numerous, were certainly as large as in previous years, while the quality of the exhibits has never been excelled, but in many instances has not been equalled at this show. Cattle were a grand lot, sheep and pigs were worthy of more than passing comment, and the display of dead poultry and butter was a credit distinct, while the live poultry was alike more numerous and of better quality than in any preceding year. The display of roots, corn, and hay was one of which the Society may well be proud, and, taken collectively, the exhibits left very little, if anything, to be desired. In the cattle classes the Earl of Derby with a magnificent heifer, which secured the premier award at the Tonbridge Show, carried everything before it, winning the President's prize of £10 10s., given to the owner of the best beast in the show, a cup value £5 5s., given by Mrs. Montefiore, to the owner of the best Sussex beast in the show, and a piece of plate, value £3 3s. presented by Messrs. Thorley and Co. to the owner of the best beast fed on Thorley's cake. The prize of £5 5s., given by the tradesmen of Redhill to the owner of the best beast in the classes for the best fat steer or heifer under two years, was carried off by Mrs. E. Hills, of Redleaf, Penshurst, with a splendid heifer, while Mr. A. Scrase, of Burgess Hill, secured the prize of £5 5s. given by the Surrey Stag Hunt, to the owner of the best beast exhibited by a tenant farmer, and a prize of £5 5s. given by the president to the owner of the best butcher's Sussex beast, to be judged by a butcher. In the sheep classes, the principal prize winners were Mrs. Montefiore, Mr. H. Partridge, and Mr. W. Clifton, while in the classes for pigs Mr. H. Cosmo Bonsor met with most success.

Australian Wines.—The imports of Australian wines into the United Kingdom for the eleven months ending November 30th were 774,793 gallons, as against 688,408 gallons in the corresponding period last year, an increase of 86,385 gallons.

Smithfield.

ISLINGTON, MONDAY MORNING.—The one hundred and second show of the Smithfield Club opened this morning at Islington, under the presidency of Mr. Leopold de Rothschild. The prizes offered for competition amount in value to £3,893 15s., or about the same as last year's total. They include the Queen's Challenge Cup, value £150, for the best beast in the cattle classes bred by the exhibitor; the Prince of Wales's Challenge Cup, value £100, for the best pen of three sheep or lambs; the Duke of York's Challenge Cup, value £50, for the best pen of two pigs; the Royal Agricultural Hall Company's Champion Plate, value 100gs., for the exhibitor of the best beast in the cattle classes; the Smithfield Club's silver cups, for the best steer or ox, the best heifer, and the best steer or heifer not over two years; the Club's Champion Plate for sheep and pigs; and the breed cups for cattle, sheep, and pigs. The prizes in value are divided as follows:—Cattle, £1,985 10s.; sheep £1,215 15s.; pigs, £459 10s.; carcases, £140; feeders of first prize animals, £93. Apart from the Challenge Cups, which may not be won outright in any single year, the exhibitor of the champion bullock may carry off £235; the winner of the sheep championship, £110; and the possessor of the best pen of pigs, £55.

The number of entries is smaller than it was last year, the total being 574, as against 664. Details are:—

	1900	1899	1898	1897	1896
Cattle	259	311	327	361	334
Pens of Sheep	153	173	198	199	220
Pens of Pigs	114	119	122	82	102
Carcase Competition (Cattle	15	15	37	24	28
Carcase Competition (Sheep	33	46	46	34	33
Totals	574	664	730	703	712

The judges are:—

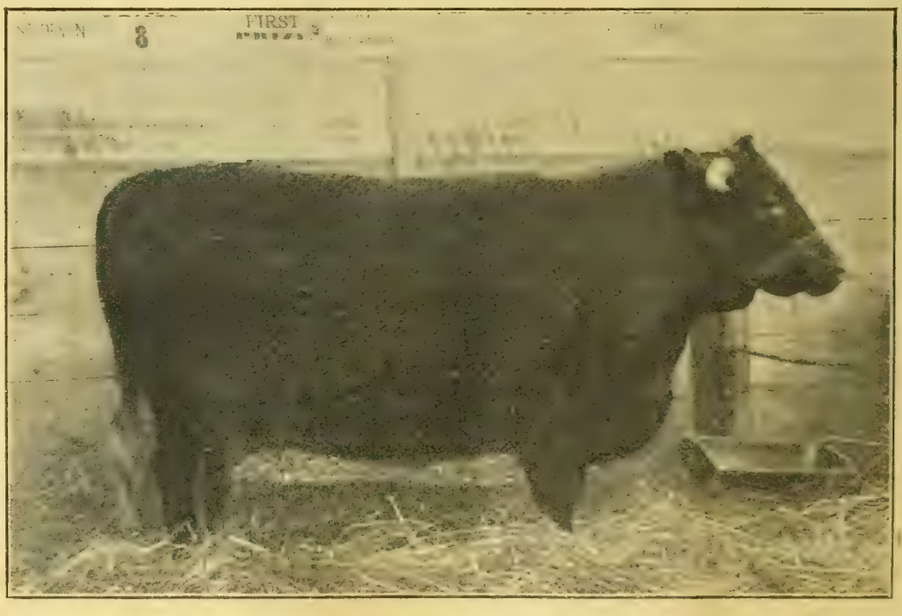
CATTLE.—Devons, Samuel Kidner, Bickley, Somerset; Herefords, J. H. Yeomans, Hereford; Shorthorns, W. Wright, Horncastle; Sussex, Alfred Heasman, Littlehampton; Red-Polled, Herbert Blofield, Quidderham, Attleborough; Aberdeen-Angus, Samuel Davidson, Inverness; Galloways, R. Shennan, Balig, Kirkcudbright; Welsh, John Jones, Dinarth Hall, Colwyn Bay; Highland, J. M'Gillivray, Ballachroan, Kingussie; crossbred, James M'William, Stoneytown, Keith; small cattle, H. D. Betteridge, Littlebury, Essex; champion prizes, Francis Evans, Bredwardine, Hereford.

SHEEP.—Leicesters and Border Leicesters, J. Twentyman, Wigton; Cotswolds, W. T. Garne, Aldsworth, Northleach; Lincolns, Joseph Brocklebank, Carlton, Newark; Kentish, F. de B. Collard, Minster Abbey, Ramsgate; Devons, etc., E. R. Berry-Torr, Bideford, Devon; Cheviots, George Douglas, Hindhope, Jedburgh; Mountain, Andrew Sprout, Baldoon, Bladnoch; Southdowns, W. Toop, Westergate, Chichester; Hampshires, James Flower, Chilmark, Salisbury; Suffolks, F. S. Lewin, Holbrook, Ipswich; Shropshires, J. Bowen-Jones, Beckbury, Shrewsbury; Oxford Downs, A. F. M. Druce, Oxford; Dorset, etc., W. Elworthy, Alton Pancras, Dorchester; crossbred, George Stimson, London; Longwool championship, R. Fisher, Leconfield; Shortwool championship, F. N. Bocock, Cropleygrove, Newmarket; Challenge Cup, Peter Dunn, Sigglesthorpe, Hull.

PIGS.—Whites, J. Barron, Borrowash, Derby; Blacks and Berkshires, J. W. Kimber, Fyfield, Abingdon; Tamworths, W. H. Mitchell, Elmdene, Kenilworth; crossbred, James Burbridge, Reading; champion prizes, Captain Herron, Worsley, Manchester.

CARCASE COMPETITION.—W. Reid, London; John Wortley, Frettenham, Norfolk; F. Redman, London.

The Royal Agricultural Hall Company give a prize of 100gs. for the best beast in the show, while Her Majesty the Queen offers a challenge cup for the best beast bred by the exhibitor, and then there are special prizes of £50 each for the best male and female in the cattle classes. The Prince of Wales offers a challenge cup of 100gs. for the best pen of sheep, bred by the exhibitor, and there are two champion plates for the best pen of Long-woolled and Short-woolled sheep. The Duke of York offers a challenge cup of £50 for the best pen of pigs bred by the exhibitor. The Queen, the Prince of Wales, and the Duke of York are themselves exhibitors in these different sections, and one of the most interesting features of the judging in the cattle classes to-day will be the reappearance of the Queen's Shorthorn heifer which carried all before her at Birmingham. Having won £405 at Bingley Hall, Cicely, as this heifer is called, can secure a further sum of £255 in specie to-day, in addition to the Queen's challenge cup of £150, and should she again be successful this cup will revert to the Queen, who now holds it with the Hereford steer which carried all before it a twelvemonth ago. The Queen, it may be added, has had a very large measure of success in these competitions for the championship, as she has already won it five times within the last seventeen years, and in addition to that she has five times taken the £50 special prize for the best steer or ox, four times that for the best heifer or cow, six times the breed cup for the best Shorthorn, five times that for the best Hereford, and four times that for the best Devon.



H.M. THE QUEEN'S DEVON STEER, WINNER OF THE CHALLENGE CUP FOR THE BEST ANIMAL UNDER TWO YEARS OLD AT THE BIRMINGHAM SHOW.

THE DAIRY.

The Use of Cream Separators in Dairies.

On Monday Sheriff Fyfe issued his decision in Glasgow Sheriff Court in a prosecution at the instance of the Corporation against a Glasgow dairyman, under the Food and Drugs Act. The defender was charged with selling as skim milk milk deficient in fat or cream to the extent of 72 per cent., a mechanical operator having been employed to remove the fat.

The case was regarded as a test one, and analytical authorities from Glasgow, Edinburgh, Dundee, and Somerset House gave evidence as witnesses. His Lordship states, however, that a very large portion of what had been laid before him, although no doubt valuable in its proper place, which seemed to him to be a committee room at Westminster, was, as regards this particular prosecution, purely academic and mostly irrelevant, as it was not his province to amend the law, but to administer it as it stands. The milk in question was admittedly milk from which the fat had been removed by mechanical means till only 28 per cent. of fat remained in it.

The prosecution was directed against the use of machines, which, by centrifugal force applied to the whole milk, separated it into cream and skim milk; or rather its object was to compel the dairymen of Glasgow to adopt in their business a new commercial term, and to call milk from which the fat had been removed by hand "skimmed milk," whilst milk from which the fat had been removed by mechanical means should be called "separated milk."

If the charge had been that this skim milk, upon being analysed, was found to contain a percentage of added water, he should have had no difficulty in holding that in the sense of the Food and Drugs Act skim milk and water was not skim milk. There was no such allegation. The prosecution admitted that skim milk was milk from which to some extent the fat

had been removed, and the whole question was one of degree. The prosecutor drew the line arbitrarily at 1 per cent, and his case was that unless at least 1 per cent. of fat was left in the milk it was not of the nature, substance, and quality of the article demanded by a purchaser who asked for skim milk.

The respondent refused to accept either this 1 per cent. standard or any other standard, and he boldly claimed the right to remove, if he could, the entire fat from the milk, and still to sell it as skim milk. Very great stress was laid by the prosecutor upon the danger to infant life if less than his standard was left in the milk. He (the Sheriff) was in full sympathy with all efforts to protect the health of infants, but the skilled testimony made it very clear that the proportion of fat which could possibly be in all the 1 per cent. skim milk an infant could consume was very far short of the proportion of fat requisite for the child, and as regards any child fed on skim milk alone, it made no appreciable difference to that child whether the milk in the bottle contained 1 per cent. of fat or more.

The experts all agreed that a child brought up on the bottle must get milk containing at least the now generally recognised minimum of 3 per cent. He did not think the prosecutor could assume that any parent or guardian expected that an infant would thrive upon even hand-skimmed milk as a substitute for nature's provision. Even if it had been proved that the prosecutor's argument upon this sentimental aspect of the question was based upon the prevalence of such ignorance on the part of parents or guardians, he did not think that would have helped his present case, for the Food and Drugs Act did not profess to regulate diet or to prescribe the proper food for infants.

As the machine skimmer did not alter the nature, substance, or quality of the milk, it did not appear to him to be struck at by the Acts at all, and certainly not by the sections founded on in the prosecution. He thought it was proved that even hand-skimmed milk might contain less than 1 per cent. of fat, whilst machine-skimmed milk might contain more, and the difficulty of fixing a standard was so obvious that it was not surprising that the Legislature and the Somerset House authorities had so far refrained from drawing any hard and fast line.

Another consideration which could not be overlooked was that the evidence did not warrant the assumption upon which the prosecution was based, that machine-separated milk was inferior to hand-skimmed milk as an article of food. On the contrary, there was a large body of evidence to the effect that the increased degree in which the fat was removed by the machine was compensated by freshness and cleanliness of machine-skimmed milk. If it were necessary to decide the point, he confessed he leaned very strongly to the view that the use of the machine was likely to bring skim-milk to the consumer more quickly, and with less chance of bacteria or other deleterious elements in it; and it was at least an arguable view of the matter that it was in the interest of the public health that the use of mechanical means for separating milk from cream should be fostered rather than discouraged.

The only question he had to decide was whether the skim-milk was deficient in fat. A deficiency inferred a standard on which it was based, and the prosecutor in this instance had staked his case upon a 1 per cent. standard. But the evidence led discarded that, and made plain the fact that there was no recognised standard at all for the fat in skim-milk, and that the article of commerce known as skim-milk equally answered that description whether the fat in it was 2 per cent., or 1 per cent., or nothing. It was, of course, always desirable that a purchaser should be left in no uncertainty as to what he was getting, and if the legislature came to think that the public was prejudiced by the use of these machines, the legislature would no doubt interfere. That they had not so far done so, although these machines had been in use for many years, rather seemed to suggest that the Government advisers did not share the apprehensions of the Glasgow Local Authority. The section alleged to be contravened was section 6 of the Act of 1875, and he was not of opinion that the alleged contravention was proved. He therefore dismissed the complaint.

Bath and West and Southern Counties Society.

The fourth draft (72 large cheeses and 32 loaf cheeses, weighing over 59cwt.) of this year's cheese made during the month of July and the early part of August, at the cheese school carried on by the Bath and West and Southern Counties Society for the Somerset County Council, at Vale Farm, Batcombe, Evercreech, has just been sold to Messrs. Hill Bros., of Evercreech, at 66s. per cwt. of 112lbs. 7,227 gallons of milk made 7,177lbs. of green cheese, which when sold weighed 6,630lbs., showing a shrinkage of about 7½ per cent. The skrinkage on the loaf cheese was about double that of the Cheddars. Since the opening of the school on April 1st last 56 students attended it. The school closed for the season on October 31st.

THIS PHOTOGRAPH OF H.M. THE QUEEN'S CHAMPION SHORTHORN HEIFER "CICELY" WAS TAKEN AT BIRMINGHAM, AND MAY BE COMPARED WITH ADVANTAGE WITH THE PICTURE IN OUR LAST ISSUE TAKEN AT ONE OF THE SUMMER SHOWS.

Macclesfield Cheese Fair.

The monthly cheese fair at Macclesfield was held on Monday. There was a pitch of 104 cheese of average quality, coming from the farms of Messrs. P. Chappel, Buglawton; Joseph Nixon, Higher Greesley; Joseph Barisford, Dolland's Farm, near Macclesfield; Thomas Mitchell, Civit Hills, Wincle; and Thomas Steele, Higher Sutton. The total weight was 32cwt. There was a fair attendance of buyers, and all but two lots were sold. Prices ruled from 50s. to 60s.

Anthrax in Lancashire.—An outbreak of anthrax has occurred at Lytham Hall Farm, Lytham, on the estate of Mr. John Talbot Clifton. A supposed case reported to the Board of Agriculture has been certified upon investigation to be anthrax. Two of the affected animals have died. Close upon 100 cattle were housed in the farm buildings where the outbreak occurred, and these are now put under observation.

At Wellington (Salop) County Court on Friday, Mr. T. Skewes-Cox, M.P., Richmond, Surrey, was sued by Mr. R. J. Mann, a gentleman farmer, of Wellington, for the cost of sending a horse to Richmond. Defendant negotiated with the plaintiff for a grey carriage horse, which could not be despatched at once on account of lameness, but was sent later, being then considered sound. Mrs. Skewes-Cox attended the court, and said that the horse, on arrival at Richmond for trial, was lame, and could not be harnessed. On that account the responsibility for the carriage of the animal was disclaimed. A verdict was given for the defendant.

LETTERS TO THE EDITOR.

The Board of Agriculture.

SIR,—The exclusion from the Cabinet of the only M.P. who represents a thoroughly rural constituency is a great blow to the agricultural interest. We farmers should have gladly welcomed Mr. Chaplin back to the Board of Agriculture, and we do hope for ever grateful that as President of the Local Government Board he passed the Agricultural Rating Act, which has been of greater pecuniary benefit to the tenant farmer than any other legislative enactment. But instead of having the Lincolnshire squire, we are favoured with a Protectionist of great ability and wide experience in various Government offices, but who honestly confesses that he knows nothing of agriculture and its belongings. Mr. Hanbury tells us that he will do his best to educate the rising generation so that they may better understand the rudiments of agriculture, but I do not believe that it is at all requisite for the President of the Board to have any sympathy with or practical knowledge of the industry over which he is called upon to preside.

I have great faith that Mr. Hanbury, as a sound, clever, business man, will readily acquire all the knowledge requisite for his new position. We had in Mr. Long one who was endowed with all the capability and experience for making a thoroughly satisfactory agricultural President, and yet no Minister has attended less to the suggestions of farmers' clubs and chambers of agriculture. Instead of preventing the colouring of margarine to represent butter, he has legalised that fraud; instead of giving us a complete and consolidated Agricultural Holdings Act, he has left us with a miserable skeleton which complicates and weakens previous legislation; he so muddled the outbreak of "foot-and-mouth" in East Anglia as to make sundry Tory farmers vote Radical; and although he harkened to the voice of the breeders of cattle and excluded Canadian store stock to the terrible loss of the graziers, he treated Canada as a foreign nation, and not as one of the brightest jewels of the British Crown. Well, Mr. Long is gone to the Local Government Board, and no man is better fitted for that post, and we may expect him—now that he has for his Parliamentary secretary our good and tried friend Mr. Grant Lawson—to deal judiciously with the assessment of land to local burdens, and pass a permanent, just, and satisfactory agricultural rating Act.

What the Government have lost the English farmers have gained, as Mr. Chaplin is now free to resume the leadership of the agricultural party in the House of Commons. It was self-evident that although we had a few able and devoted friends in the last Parliament there was a singular lack of unity among them, not much go, and very little dash, and that most of them considered their party first and agriculture afterwards. The farmers want a leader, and I trust they will find him in Mr. Chaplin.

The immediate question before the country is pure beer. It is satisfactory that Sir Cuthbert Quilter will introduce his Bill at the earliest opportunity, but we must not wait until that becomes law. There are sundry matters which the Excise can do, and which the public will demand to be done at once. They should carry out the only unanimous recommendation of the Beer Materials Committee and make all brewers return the quantity of hops and hop substitutes they use, as well as the malt, malt substitutes, and sugar. But the new year's returns should also specify the *percentage of substitutes each brewer* uses. We don't want to pry into his business and ask how many barrels of beer he brews, but it is of national importance that the public should know the proportion of substitutes each brewer's beer contains. The Excise know all this now, and a few extra clerks could give these particulars from the current year's returns. And it might be asked on behalf of the barley-growers that the present Excise regulations which gave the down scale to sugar and malt substitutes should rather turn the balance in favour of malt. It is wonderful what the Excise can do when they please. This year, for the first time, they have given us the *actual quantity* of beer brewed. Previously it was what the Excise estimated ought to be brewed from the materials used. We find that nearly 3,000,000 barrels of beer more are made than the Excise estimated. Or, in other words, the poor man's beer has been kindly diluted with 3,000,000 barrels of water.—Your faithful servant,

CLARE SEWELL READ

December 3rd.

Poisoned Beer and a Sick Agriculture

SIR,—The serious adulteration of beer by which so many persons in our northern towns have been poisoned must bring home to the nation the absolute necessity of a Pure Beer Bill.

A journey through our country districts does not show us a sick people, as our peasantry are imbibing the essential beer in our large towns, but it shows us a sick agriculture through its most thousands of acres of almost worthless pastures. The old furrows still show out; but, alas, no ploughman goes whistling there to plough. England can grow the best barley in the world. The finest and the most wholesome of beers are brewed from malt and hops only.

A Pure Beer Bill would not only bring health to

the toiling workers in our towns, but also impart renewed life to British agriculture. For then many a hill, many a valley, now lying desolate, would once more laugh and sing with its golden crop of grain. GEO. BAYLIS.

Wyfield Manor, Newbury, December 3rd, 1900.

Drain Pipes and Rats: An Inquiry.

Sir,—A few years ago, through an advertisement that appeared in the MARK LANE EXPRESS, I purchased from a manufacturer certain iron pipes with a valve in them. Each pipe was to place at the end of a field drain, and the valve was to prevent the ingress of rats, etc., into the drain. I shall be pleased if you can furnish me with addresses of manufacturers of such pipes.—Yours truly,

J. C.

[*.* Will manufacturers of these pipes send their addresses, so that we may forward them to our correspondent? Why are not such useful things still advertised?—ED. *M.L.E.*]

Central Chamber Legislation.

Sir,—It is necessary for all interested in agriculture to look closely at the questions raised last week by Mr. F. Horne. He has been present at the Central Chamber meetings sufficiently often to know the working of the Chamber, so I need say only to his charges it is a pity he brings them forward in such a manner. Every attendant at the meetings has a right to his opinions, but he ought not to place them permanently on record so that they merely indicate the peevish dissatisfaction which leads to undoing.

Everyone fully acquainted with the facts is well aware that the Parliamentary Committee had a difficult task, and all the men I know agree they did as well as the circumstances permitted.

An organisation of tenant farmers could find plenty to do, but it would be very undesirable for it to work independently of the Central Chamber. The greatest need of all just now is combination and concerted action. Further separation or splitting up is to be deplored.

Mr. Horne's proposal of a fixed limit to the use of substitutes for malt is so far impracticable that it is not likely to be secured. Various proposals have been before the Chamber for years, and after ample discussion they stand approved. It will be infinitely wiser to secure them at the earliest practicable date by right pressure in the proper quarters than to suddenly abandon the demands persisted in for years and flying off at a tangent, leave our legislators of the opinion that it is useless to try to please us. Much can be gained by right representation, at the Chamber, of common-sense and practicable schemes, long before any pure beer Bill can reach or pass the second reading. Why cannot Mr. Horne and all his powerful friends in his great county do all they can to aid and abet all the efforts put forth by those thoroughly acquainted with the case, rather than seem to strive to revert to practices proved to be baneful or to invent new ideas which could not stand the test of practical working?

The present moment is singularly opportune for lasting good to be readily gained, but the first essential is banding together, with clear views of what is needed. United demand will then lead to the end all have so long wished. My views and purposes are so well known that I need not take up space here to repeat them, and my sole purpose in writing is to urge the need just now for concerted and uniform action from every Chamber and Farmers' Club throughout the country. Yours faithfully,

11, Queen Victoria Street, E.C., H. STOPES.
December 7th, 1900.

Alleged Arson: Damage, £3,000.—At Dover on Friday two travelling farm labourers, named Colyer and Wood, were charged with setting fire to farm buildings at Guston Court. They had been employed in threshing, and slept in a loft on Wednesday night, the fire breaking out early on Thursday morning. Colyer threatened to set fire to the buildings, when paid off on Wednesday, because no more work could be found for him. The damage amounts to £3,000. The prisoners were remanded.

Worcestershire Farmers and the Truck Act.—At the meeting of the Worcestershire Standing Joint Committee held on the 1st inst. the Chief Constable reported that he had failed to find any case of an infringement in the county of the Truck Act which could be properly brought into court with any prospect of a conviction being obtained. Mr. James Best said there were scores and scores of infringements of the Act in the county. The Chief Constable said he did not know where they were, and asked Mr Best to point them out. Mr. Best thought it was not the duty of a member of the committee to dictate to the Chief Constable what his duty was. The Chief Constable said there were no such cases, and he defied anyone to bring one forward. Mr. E. V. V. Wheeler said there was hardly a farmer in his district who did not infringe the Act. The matter was then allowed to drop.

BARLEY AND MALT.

By Hordeum.

Poisoned Beer.

The inquiries into the cause of the deaths of those poor people who have recently been said to die through taking arsenic are being deferred. In this matter there ought not to be undue delay, and still more there should be no condoning or any attempt to hush up the matter.

Though it stands now, and is likely to for weeks, *sub-judice*, it does not follow that all fair criticism or observation upon the cases are barred. The chief regret must be that the Press did not earlier give such publicity to the facts, when the evil would have been traced to its source much more promptly. Lives could have been saved and much suffering averted.

We shall no doubt witness great efforts put forth to exonerate beer and brewers, and there will be much mud-flinging at other trades and traders. It may, after all, be found difficult to clearly prove that the beer drank really caused any of the deaths, however poor the quality may have been, and however much arsenic it may have contained. It is, however, not necessary to discuss any of these points.

The Broad Principles

have occupied attention for years, and the present curious circumstances render fuller discussion imperatively necessary.

Fortunately, no attempt has been made, and it cannot now avail anything if attempted, to disprove the fact that in much beer a very heavy proportion of chemically-treated sugar is used. It is also fully admitted that the acid employed by many did really contain arsenic.

There is no need to wait the result of the inquiry before considering the position thus established and determining on the best course to pursue to prevent any further recurrence of so undesirable a state of affairs that our beer or some large part of it is really and truly

Dosed with Deleterious Matter.

It has taken many years to establish the fact, notwithstanding that it has been perfectly well known to many people. It is a fact, and it is now recognised that such is the case.

All the time, skill, attention, and energy that have hitherto been devoted to bringing home the fact to the minds and consciences of the people can now be devoted to the still harder task of averting the evil in the future, and making it impossible.

Naturally most minds revert to the necessity of promptly passing the Pure Beer Bill, and such a measure will have to go through. It is now brought within the range of practical politics, but care must be taken to make it practical. All its suggestions must be practicable and able to safeguard the public health and purse.

As hitherto drafted the Pure Beer Bill was inefficient, and must inevitably prove ineffective. Already many brewers are issuing

Flaming Placards

declaring that the beer they brew is absolutely pure, or contains no arsenic or other deleterious matter.

Such assertions are made not only by men who use low-grade sugars and glucose, but even by those who invert cane sugar for themselves by the use of sulphuric acid.

The only certain way to ensure purity as understood by the sole use of malt and hops is to make it pay to use them, and this can be done with the maximum of ease and certainty by charging a lighter duty upon genuine beer, and a heavier one upon beerine. It is also most desirable and important to charge a duty on hop substitutes, and even if there be no duty on hops, nevertheless to insist upon a record of the quantity used being made in the entry papers used by all brewers.

Full Returns Must Show

all the ingredients used by each and every brewer together with the quantity of beer actually charged with duty with no reservation of name.

Until this is done there will be no true protection, and even then the public will only be able to protect itself to a limited degree in those localities where the tied trade system prevents proper and healthful competition amongst brewers.

Much objection to the best system will be made by all the brewers who now gain most by existing practices, and it will be pointed out as an injustice or as a practical difficulty that is insuperable to charge one brewing with one rate of duty and another with some other rate. In this objection we shall find the officers of Excise aiding and abetting the brewers.

But in reality the difficulty is insignificant compared to what is done every day to safeguard the revenue derived from spirits, and it is high time the officials at Somerset House realised that proper appreciation of the splendid services they already render makes the public look to them with the more confidence to secure the best results from their enlightened and able co-operation with the demand for protection from known evils.

Prentice Bros'. Barley Competition.

The annual competition for malting barley, started so many years ago by Messrs. Prentice Bros., Limited, was held at the offices of the Chemical Works, Stowmarket, on Thursday morning. A finer lot of samples it would be difficult to collect, and we doubt if any district within the United Kingdom could produce the like. East Anglian soils are proverbially the best for the growth of the premier malting barleys, and with selected seed and fertilisers equal to those manufactured by Messrs. Prentice, our agriculturists will be able, under any conditions, not only to hold their own with the large Burton buyers, but maintain the leading position they have held so long. This competition at Stowmarket is for the best samples of barley grown with the aid of Prentice's Special Barley Fertiliser, and is only open to growers in the Eastern Counties. Messrs. Prentice have annual competitions in other districts of the kingdom. The particulars of these we hope to give our readers early in the new year, after the judging has been held. These competitions are of exceptional interest, and undoubtedly assist in stimulating amongst farmers a strong endeavour to produce the very best corn their soils are capable of yielding.

The judging was in the hands of Mr. Herbert Manby, of Framlingham; Mr. H. E. Cross, of Aylsham; and Mr. W. W. Pallett, of North Walsham, three of the best-known barley buyers on Norfolk and Suffolk markets. A very large number of samples had to be examined, and after a keen contest, the results were declared as follows:—1st prize, £20, Mr. George K. Milbank, Writtle, Chelmsford; 2nd prize, £15, Mr. Mark Richards, Warboys; 3rd prize, £10, Mr. Walter Pepper, Covehithe Wrentham.

After the judging, Mr. Hy. Prentice, managing director, conducted a large party of farmers round the chemical works, where the various methods of manufacture were explained. Heaps of pyrites from Spain, thousands of tons of all kinds of phosphates from South America, North America, Belgium, France, and every phosphate-producing country under the sun; coprolites in immense quantities from the Cambridgeshire beds, boilers, grinding machinery, acid pumps, huge chambers and vats containing hundreds of tons of pure acid, distintegrators, long lines of burners, the fires of which are never put out, all combined with the whirl of machinery and the busy hum of over 120 men at their duties.

Mr. Prentice afterwards entertained his friends at luncheon, and did the honours of chairman. The toast of "Success to Agriculture," proposed by Mr. George F. Ormes, was responded to by Mr. Walter Noble, of Creeting. "The Judges," "Prosperity to Prentice Bros., Limited," "The Trade of Stowmarket," and "The Press" were toasts all warmly acknowledged.

We are informed that Messrs. Prentice are exhibiting the winning samples at their stand at the Smithfield Show this week, and at every market in East Anglia during January and February.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

20,965.—L. Humburger and H. Hallmann, both of London, for an invention for "An improved food for horses, cattle, and like animals."

21,128.—G. Daws, of Birmingham, for an invention for 'Improvements in feeding bags or feeding tins for horses and other draught animals."

21,169.—J. B. Paton, and J. R. Ralston, of Dunterlie, Barrhead, for an invention for "Improvements in and relating to flower pots and seed boxes, and appliances for use in separating seeds sown therein."

21,193.—O. Heinrichs, of Liverpool, for an invention for "New or improved churn."

21,246.—R. H. Fowler and T. Benstead, of London, for an invention for "Improvements in ploughs."

20,261.—J. Briggs and J. H. Dickinson, both of Halifax, for an invention for "Improvements in apparatus for cleaning horses and cattle."

21,277.—J. Larkin, of West Kirby, Cheshire, for an invention for "Improvements in potato diggers."

Patents Sealed.

15,869.—J. E. Edwards, of Windoor, Canada, for an invention for "Improvements relating to cream separating."

15,905.—F. M. Higgs, of Kyabram, Victoria, for an invention for "Improvements relating to cultivators."

16,058.—F. Keller and A. Kiel, both of Lampertheim, near Worms, Germany, for an invention for "Improvements relating to ploughs, agricultural."

Royal Colonial Institute.—A meeting will be held at the Whitehall Rooms, Hotel Metropole, Whitehall Place, S.W., on Tuesday, December 11th, at 8 p.m., when a paper on "The Progress of the Colony of Victoria" will be read by the Right Hon. Lord Brassey, K.C.B. The Right Hon. Earl Carrington, G.C.M.G., will preside.

Home Notes.

The Borough.

It appears as if the trade has now settled down to the condition of dull monotony which usually prevails during December. All probable requirements for the holiday consumption having been provided for, brewers are avoiding further engagements at the close of the year, and we must wait for the opening of the new century for the revival of business which will almost certainly then be experienced. In the meantime, holders of hops are biding their time, and are wisely avoiding any appearance of pressure, so that, while we can hardly expect to see any advance in values till we have left Christmas behind, we need not fear any reduction of values, which are, up to the present, very steadily and firmly maintained at the figures recently current. It is not unusual for buyers to try to take advantage of these slack periods, and I have heard of bids being recently put forward at slight reductions, but in each case they have been refused, and it is gratifying to note how excellently, throughout this season, planters have protected themselves. I trust the lesson will be remembered for future guidance.

Imports and Exports

for November give the following results:—

Imports.	1900 cwts.		1899 cwts.
U.S. America	27,774	....	7,239
Other Countries	17,838	....	13,385
Total	45,612		23,624

The increase over last year thus evident so early in the season demonstrates the reality of the shortage in the English crop, and discounts to some extent the statements of consumers as to their independence of new supplies.

The total imports for the first three months of the hop year were from

Imports.	1900 cwts.		1900 cwts.
U.S. America	25 626	....	13,498
Other Countries	30,684	....	36,287
Total	66,310		49,785

With regard to exports, there is but slight variation, the total for November last being 2,746 cwt., as compared with 2,561 cwt. in the corresponding month of last year. For the first three months of one year ending November 30th we exported 6,533 cwt., and 6,426 cwt. in the same months of 1899.

The Demand for Pure Beer

is being rapidly accentuated by the alarming spread of the epidemic of peripheral neuritis, traceable to arsenical poisoning arising from the consumption of certain beers. Brewers are aroused to a sense of their responsibility, and it is admitted by one of the trade organs that there is "every indication of the scare giving a new impetus to the pure beer propaganda." This is as it should be, and I believe it only needs a slight stir of the public feeling to create a pronounced and universal expression of opinion on the subject. Already Mr. Wilson, M.P. for Mid-Norfolk, has introduced the subject to the House of Commons, Sir Cuthbert Quilter is moving in the matter, and he is being cordially supported by Colonel Brookfield, Mr. Laurence Hardy, Captain Boscawen, and many other agricultural representatives.

Meetings of rural councils and farmers' clubs, etc., have been held in various parts of the country, at which resolutions in favour of an exact definition of the purity of beer have been passed, and the hop-growers at Canterbury, Ashford, Rye, Tunbridge Wells, Wadhurst, Worcester, and Hereford have emphatically pressed their views upon their members and the Government.

Meeting of Hop Growers on Wednesday Next.

On Wednesday next, at 12.30, a meeting of planters will be held at the Hop Exchange, under the auspices of the N.A.E.H.G., when Colonel Brookfield will preside. It is expected that there will be a large attendance, as growers feel strongly that the present critical situation should be utilised for the purpose of emphasising the claims of our people to protection from such risks as have been so painfully prominent lately.

(*For Hop Market Reports, see pages* 755, 757.)

Darlington Chamber.

A meeting of the Darlington Chamber of Agriculture was held on Monday, Mr. C. E. Hunter in the chair, and there was a good attendance.—The secretary (Mr. R. C. Pearce) announced that the annual dinner of the Chamber would be held on the 4th of January, and he had received promises to attend from the Marquises of Londonderry and Zetland, and Lord Barnard, and others.

The Secretary said that the question of an experimental farm for Durham had come before the County Council, but nothing was done. He had received a letter from the Stockton Chamber containing a resolution favouring a joint conference to be held at Darlington before the forthcoming County Council election.

In answer to Lord Barnard, Mr. Shepherd said it was desirable to have more representation of the agricultural interest on the County Council.

Lord Barnard concurred, but said it was a difficult matter in a county where there was such a great mining interest.

On the question of swine fever restrictions, Mr. Trees urged that there were already sufficient steps taken to inspect pigs in Darlington, and piggeries were all duly disinfected and carefully looked after. Mr. Clayhills said that matters were different in the country from the town, and he favoured the restrictions. Mr. Shepherd said that since the restrictions had been in force there were no pigs at all exhibited in Darlington market. The Chairman said that Mr. Swenden had stated some years ago at this Chamber that restrictions would have very little result, and so it had proved. After some further discussion it was decided not to take any action in the matter.

The renewal of the Agricultural Rating Act was considered, and Lord Barnard and the Chairman thought it would be better to wait and not make any recommendation until the report of the Commission on Local Taxation had been issued. A resolution advocating the renewal of the relief pending the report of the Royal Commission was passed.

The subject of pure beer was adjourned till next meeting.

Pickering Hiring Fair.—There was a large attendance of servants at this fair, held on Monday, and a good number secured places. Farm foremen were hired at £22 to £26, ploughmen £16 to £20, strong lads up to £15, and boys just going out £5 to £7. Females secured up to £21 for farm house work, generals from £13 to £16, and young girls £6 to £10 per annum.

THE WEATHER.

MONDAY (December 3rd).—There was an appreciable reduction in the dulness and gloom over the east and south of England, but the rest of the British Isles had been brought within the influence of an apparently extensive cyclonic system which had struck the western coasts in the early hours, and was travelling slowly northwards. The conditions, therefore, were still very unsettled, a misty gloom in places, and rain was prevalent throughout the western and northern districts. Winds from between south-west and south-east were experienced on all our coasts, increasing to a strong breeze or moderate or fresh gale at some of the more exposed situations in the west and south-west, remaining light in other localities. Mildness was general, few night temperatures being below forty degrees, and some of the afternoon maxima in the south were above fifty degrees.

TUESDAY (December 4th).—A storm system passed quickly across our islands during Monday night, occasioning heavy rain in many places, with a considerable increase of wind. During the day the disturbance had its centre over the North Sea, but the wind was still strong from the west and south-west on our coasts, and rain again fell in the west. A brisk fall of temperature had occurred in Scotland, where in the early morning the thermometer indicated several degrees of frost. In England and Ireland the weather was much warmer than on the preceding day, and in many places the thermometer exceeded fifty degrees. The day was fine and very mild in London, and the shade temperature rose to fifty-six degrees, which is ten degrees above the average.

WEDNESDAY (December 5th).—Rainy weather prevailed in most parts of our islands, and there was a thick mist or gloom in many places. The winds were chiefly south-westerly, and a moderate gale was blowing at the entrance to the English Channel. The weather was again cold in Scotland, and in places several degrees of frost occurred in the early morning; but in other parts of the kingdom the temperatures were high for the season, exceeding fifty degrees in the south of England. Rain fell in London throughout the day, and there was also a thick mist, although the thermometer rose to fifty-two degrees.

THURSDAY (December 6th).—The weather was again unsettled, and rain fell in many parts of the country. The cyclonic disturbances which passed across our islands during Wednesday night occasioned heavy rain in most districts, and strong westerly winds or gales were experienced on our west and south coasts. A brisk rise of temperature had occurred in Scotland, and the thermometer during the day was generally high for the season. A fresh gale was experienced in London during Wednesday night, and the thermometer in the screen registered fifty-seven degrees, which is ten degrees higher than the average day reading at the commencement of December, and twenty degrees higher than the average night reading.

FRIDAY (December 7th).—A mild westerly wind was blowing over our islands, and, although the temperature had fallen somewhat since the preceding day, it was still high for the time of year, except in Scotland, where the weather was cold. In the south and west of our islands the thermometer at midday registered fifty degrees and above. Heavy rain had fallen over the southern portion of the kingdom, and rain was again experienced at several places during the day. The morning was fine in London, but rain occurred during the afternoon, and the air throughout was decidedly mild, the thermometer registering fifty-two degrees.

SATURDAY AND SUNDAY (December 8th and 9th).—The weather continued very mild and damp over our islands during the two days, and rain fell over nearly the whole country, although the amounts measured were for the most part small. The nights were very warm, the lowest readings being in many places several degrees above the average day temperatures, and in the South of England the thermometer did not fall below fifty degrees, while in parts the day readings were as high as any previously recorded in December. Both on Saturday and Sunday strong westerly winds were experienced on our west coasts, and in parts of the English Channel. No appreciable amount of rain fell in London, although the air was thoroughly charged with moisture. During Saturday night the temperature in the metropolis rose to fifty-four degrees, which is about twenty degrees above the average.

The Cheshire Milk Trade.—At a meeting of Cheshire milk producers, held at Northwich on Friday night, under the presidency of Mr. M'Intyre, of Great Budworth, Mr. Sadler, of Nantwich, the secretary of the Association, delivered an address on some aspects of the milk trade, especially with reference to price, variations in quality, and adulteration. It was stated that Manchester and Liverpool milk dealers were by no means enamoured of the Association, contending that it made milk dearer in cities, to the advantage of producers, but the organisation was, nevertheless, making excellent progress.

All official reports and notices of the National Association of British Hop Growers will be printed in the MARK LANE EXPRESS, *which will also contain all current information likely to be of interest and benefit to the members of the society.*

TO HOP GROWERS.—Users of WIRE WORK should buy the Best English Galvanised Steel Hop Strand, made by Rylands Bros. Ltd., Warrington, Lancs. For prices, &c., apply to their London office, 88, Leadenhall-street, E.C.; or their Sole Agent for Kent and Sussex, Mr. Edward Ball, 8, Newstead-road, Lee, S.E.—[ADVT.]

Chrysanthemum Show at the Royal Aquarium.

What was described as "the last chrysanthemum show of the century" took place at the Royal Aquarium this week under the auspices of the National Chrysanthemum Society. The last few weeks have not been favourable to chrysanthemum growing, but the cultivators rose superior to their surroundings, and the display was remarkable alike in colour and size of the blooms. When the December display was instituted a few years ago it was hoped that it might lead to the introduction of genuine late-flowering varieties, but in this respect the results have not been equal to anticipations. It has, however, served to show how varieties flowering at the ordinary period can be successfully retarded or preserved. Some of the finest examples of the uncurved type ever seen in a December show were exhibited. There was also shown, under the name of "G. J. Warren," one of the largest Japanese flowers probably seen anywhere, it measuring 10in. by 8½in. It is pale yellow, and a few years ago it "sported" from a flower known as "Madame Carnot." It is interesting, and at once an illustration of how high culture is developing size, symmetry, and fulness in this, one of the loveliest gifts of nature. The beauty of this flower, too, is the long period which, by gentle culture and coaxing, it may be induced to shed the charm of its perfections to gladden the heart. In June and July the earlier specimens are coaxed to put forth their blooms, and man has in a hundred years so far exercised his persuasive skill as to induce the gentle plants to continue to smile upon him through the winter well into February. In addition to the usual prize list four gold medals were awarded for groups to Mr. H. J. Jones, Lewisham; Mr. Norman Davis, Framfield; Lady Pigott, Slough; and Messrs. Cannell and Son, Swanley; and a small gold medal to Mr. R. C. Pulling, of Woodford.

The prize winners for bunches, large and small, included Miss Smith-Dorrien, Mr. A. F. Hills, Mr. R. C. Notcutt, Mrs. Barclay (two), Mrs. Nicols, Miss Cole, Mr. D. B. Crane, and Mr. J. Courtenay. The decorative section for vases, baskets, and tables was as attractive as usual. Messrs. Cibran's varied collection of single-flowered varieties was awarded a silver-gilt medal. There were several handsome groups of miscellaneous flowers and plants which added largely to the attractions of the show. Lady Pigott's group included orchids, lilies, crotons, palms, bamboos, and poinsettias, harmoniously arranged, and gained a gold medal. Sir Edwin Saunders, President of the Society, obtained the first prize for a similar collection, and Lady Tate was a good second.

Among the visitors to the show were two French enthusiasts—M. Philippe Rivoiré and M. Andre Charmet. The splendid display of blooms so impressed them—flowers of such high quality not being known in France, and the mode of staging quite different, that they awarded, in the name of the French society, a gold medal to Mr. Vallis for cut blooms, and a large silver-gilt medal to Mr. Norman Davis for an artistic group of potted plants.

For his services in horticulture he has been appointed Chevalier of the Order of the Mérite Agricole, and also Chevalier of the Order of the Crown of Italy. As he is only thirty-two years of age, he has undoubtedly a distinguished career before him.

M. Rivoiré is a member of several important horti-

cultural [illegible], and is one of the [illegible] at the English [illegible].

M. André Charmet, who accompanied M. Rivoiré as a member of the French [illegible] Department, also a Lyons nurseryman, the successor to a well-known member of the trade, M. Hoste. M. Charmet is a member of the leading English and French chrysanthemum societies, and always grows and exhibits of great repute.

Annual Banquet

The National Chrysanthemum Society's annual banquet took place in the Royal Vauxhall [illegible] of the Holborn Restaurant on the 29th ult. Mr. T. W. Sanders, F.R.H.S., presided; and he was supported by Mr. Bourne, F. Lascelles, [illegible] Army Medical Corps; Mr. J. W. Wilkinson, Mr. Richard Dean, General Secretary National Chrysanthemum Society; Mr. W. H. [illegible], of Watford; Mr. W. H. Cutbush, Barnet; Mr. H. J. Jones, Lewisham; Mr. T. Bevan, Finchley; Mr. Norman Davis, Framfield; Mr. J. C. Pipe, Ipswich; Mr. S. J. Davies, Mark Lane Express; Mr. A. [illegible], Isothermic Cleaner Company; Mr. Simpson, Mr. Taylor, Press Committee; Mr. J. H. Witty, Nunhead; Mr. Brian Wynne, Royal Gardeners' Orphan Fund; Mr. Kendall, Carshalton, and others. In all there was a representative gathering of those more particularly interested in the cultivation of the Queen of autumn, and additionally there were present several gentlemen engaged in the sister occupation of agriculture. A long toast list was gone through, as was also a capital musical programme. The challenge plate and medals were handed to the winners during the evening, and the meeting concluded with an expressive vote of thanks to the chairman and to the committee responsible for its inception.

A GROCER

AND

DR TIBBLES' Vi-Cocoa

"Greatly Surprised at the Demand for Vi-Cocoa."

Mr. W. RIGBY, Grocer, 70, Gloucester Street, Salford:—

"For the last few weeks I have been greatly surprised at the demand for Dr. Tibbles' Vi-Cocoa over all others, so I thought I would try it for myself. I am not an advocate for any new preparations, but I was surprised at its pleasant and unique flavour, and now I shall sell it with confidence, and recommend it in preference to all others, having tried it myself. I shall use no other but Vi-Cocoa.

"I have also a brother in the same trade as myself, and as he is growing very fast, and has to work long hours behind the counter, he finds Dr. Tibbles' Vi-Cocoa very sustaining, and it keeps him up wonderfully.

"You have my full consent to publish this if it is of any service to you."

"UNDOUBTED PURITY AND STRENGTH."—*Medical Magazine.*
"IN THE FRONT RANK OF REALLY VALUABLE FOODS."—*Lancet.*

DR TIBBLES' Vi-Cocoa

FAVOURED BY THE HOMES AND HOSPITALS OF GREAT BRITAIN.

"MARK LANE EXPRESS,"

STAND No. 103,

Will occupy its regular position in the MAIN Gallery, at the corner of Berner's Hall.

Christmas Parcel Traffic.—The Great Northern Railway Company have made special and complete arrangements for the collection, quick transit, and prompt delivery of Christmas parcels traffic to and from all towns on their system. Through vans will be attached to many of the express trains, and special parcel trains will also be run to meet the additional demands made upon the company at this period of the year. The reduced rates which are now in operation for the conveyance of parcels traffic are in no case higher than the rates by Parcels Post, while in some cases they are lower than the latter. The "minimum" weights formerly charged on packages of perishables at "owners' risk" rates have been abolished, and these parcels are now charged at about actual weight. Special frequent collections of parcels will be made from receiving offices in London by the company's vans, and the traffic will be despatched from King's Cross by first trains after receipt. Full particulars as to charges, which will in no case exceed those in force by any other route, can be obtained on application at any Great Northern station or receiving office.

ALFA-LAVAL CREAM SEPARATORS.

OVER 400 . . . . FIRST PRIZES.

"The Alfa-Laval again showed its superiority, and carried off both First Prizes and Special Silver Medal."—Official Report, Royal Agricultural Society's Show, Maidstone, 1899.

OVER 200,000 MACHINES SOLD

Sales greatly exceed those of all other makes combined.

Every **ALFA-LAVAL** is put to a thorough and practical test in our own dairy before being sent out, and is **GUARANTEED** to perfectly separate the quantity of milk stated.

Saves time and labour, and produces **10 TO 20 PER CENT. MORE BUTTER** than any other competing method of skimming known.

Unrivalled as a purifier of whole-milk intended for direct consumption.

DUDDING, HENRY, Riby Grove, Gt. Grimsby, Lincolnshire, has always for inspection and sale a large flock of pure LINCOLN LONGWOOL SHEEP, including many prize-winners, having taken the leading prizes for many years at the Royal and other shows for both rams and ewes including champion medals at both the Paris Exhibitions, Vienna, Amsterdam, Canada, Australia, New Zealand, and all the leading prizes at Chicago; also the first for the best collection of Lincoln fleeces of wool at the Royal Windsor Show, which proves the character of this flock, which is most famous for their great size and 125 years' good breeding. Rams from this flock made the highest average on record last year. Riby Grove is seven miles from Great Grimsby, and three from Stallingboro' Station. Telegrams, "Dudding, Keelby."

HAMPSHIRE DOWN.

FLOWER, JAMES, Chilmark, Salisbury. Undoubtedly the leading flock of the day; in show yard records at all the largest shows, including the Challenge Cup at the Salisbury Great Prize Sheep Fair six years in succession; also highest average for same period for 100 ram lambs at annual sale, at Britford Fair, August 12. The Flock is one of the oldest existing, combining fine quality, strength, constitution, and true character. "Fossil," sire of the highest-priced Hampshire Down Ram ever sold, was bred at Chilmark, and in service there last two seasons.

COLES, CARY, late C. and T., Manor House, Winterbourne Stoke, Salisbury.—Registered HAMPSHIRE DOWNS, prize-winners at the Royal, Bath and West, Royal Counties, and other shows. Sheep of all ages for sale; selections from 1,000.

SHROPSHIRE.

COOPER, WILLIAM, AND NEPHEWS, "Cooper's Dip" Works, Berkhamsted, England. Breeders and Exporters of pure Shropshire Sheep. First and Third Prize for Ewes, Royal Show, 1898. Five hundred breeding Ewes. The largest export flock of Shropshires in England. The sires used present season include 310 Guinea Champion "Royal Record," Two First, One Second, and One Third Royal Show Prize winners.

LIVE STOCK AGENTS.

INVERNESS, WEST HIGHLANDS.—JAMES ARNOTT, Scotch Live Stock Agent, Ellandonan, Inverness, established 1870, selects and supplies on commission all classes of SCOTCH STOCK. He attends all the leading markets to purchase Stock at lowest rates. References can be given if desired to customers who have been annually supplied. All orders are personally attended to. List of classes and approximate prices sent on application. Reference required; terms cash. Telegrams: "Arnott, Inverness." J.A. is now booking orders. N.B.—Polled Angus or West Highland Heifers and Black-faced Gimmers, Ewes, Wedders, and Lambs for crossing or feeding, in truck loads, at moderate prices. Fat Stock of all classes also purchased.

LARGEST Live Stock Agency in England.—E. GOODWIN PREECE, Portland House, Shrewsbury, will be glad to receive orders for RAMS, EWES and WETHERS, of various breeds, of which he buys annually large numbers on commission. SHROPSHIRES, CLUNS, and KERRIES, a SPECIALITY. HAMPSHIRES, OXFORDS, SOUTHDOWNS, LINCOLNS, LEICESTERS, and COTSWOLDS. Also CATTLE of various classes for GRAZING or DAIRY. References to practical farmers all over England, who have been regularly supplied for many years. All personally bought. Prices on application

PUBLICATIONS.

THE JOURNAL OF THE BOARD OF AGRICULTURE, issued by the authority of Her Majesty's Board of Agriculture, and printed and published by Laughton and Co., 1, Essex Street, Strand. Published each quarter day. Price 1s. each; annual subscription, 4s. post free. The publication contains information as to the position of agriculture at home and abroad, Crop Reports in Foreign Countries, and latest particulars obtained from Foreign and Colonial Reports, Diplomatic and Consular Dispatches, and other sources of information accessible to the Department; together with Notes on Dairying, Fruit Farming, Poultry Rearing, and other rural industries. Short descriptions of Noxious Insects and Fungi, with appropriate remedies; statements of the Quantities and Values of Agricultural Produce Imported and Exported; and records of the Current Prices of Grain, Meat, Dairy Products, Fruit and Vegetables, are given in each number. The official and highly valuable information contained therein commands for the Journal an unique position and circulation throughout the world amongst those interested in Agriculture and its allied branches. The Statistical matter being of such service for frequent reference renders the Journal in constant demand by Members of Both Houses of Parliament, Landowners, and others interested in the welfare and progress of Agriculture.—LAUGHTON and CO., 1, Essex Street, Strand, London.

There is no Newspaper published in the Queen Town of Kent which has ONE SEVENTH of the Circulation of the "KENT MESSENGER."

"I hereby certify that the circulation of this Newspaper has increased during the past year by **over 50,000 Copies.**"
—N. SIBLEY, Accountant, Tunbridge Wells, Dec. 1st, 1896.

Maincrop, **BRITISH LION** (Heaviest Cropper).
EAST ANGLIA (Cropper and Quality combined).
UP-TO-DATE,
GENERAL ROBERTS
LANGWORTHY (Best Quality).

Specially grown for Seed by Scarlett, Inveresk.

Only what have proved the best cropping, quality, disease resisting, and paying varieties offered.

British Lion and East Anglia, wherever grown from reliable selected stocks, have this season produced much greater tonnage of marketable potatoes than any other maincrop variety grown under similar conditions. Sample stone of each sent railed on receipt of 7s. 6d.

Write SCARLETT, Market Street, Edinburgh, for Prices, &c.

SILCOCK'S CALF REARING. CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 *per cwt., carriage paid. 5 cwt. lots,* 12/-.

R. SILCOCK & SONS,
Poulton-le-Fylde, Lancs.

The Patent "HANDY" GRINDSTONE

Registered.

INVALUABLE TO
Farmers, Gardeners, Joiners, Butchers, Amateurs, etc.

AWARDED FOUR SILVER MEDALS BY LEADING AGRICULTURAL SOCIETIES

Attention is directed to this exceedingly useful and effective little Grindstone. It is the only Grindstone fitted with a seat and double treadles, by which arrangement the weight of the operator when seated keeps the machine as steady as a rock, and the double treadles balance the body and prevent the hands from wobbling during the process of grinding. Another special feature is its portability. It is splendid value.

YORKSHIRE GRIT STONE

(made in two sizes)	16 in. by 2½ in.	19 in. by 3in.
Without Water Trough, and without Brass Tap to Can	21/-	27 6 each.
Fitted complete with Water Trough and Water Can with Brass Tap (as illustrated), also Patent Slide Tool Rest and Safety Seat	25/-	30/- "

Carriage and packing 1s. each extra.

Mark Lane Express Agricultural Journal.

The Only English Journal devoted exclusively to Agriculture.

MONDAY, DECEMBER 17, 1900.

Correspondents are requested to address all communications for the Editorial Department to THE EDITOR, "Mark Lane Express," 1, Essex Street, Strand, London, W.C.

Advertisements, Subscriptions, and business communications should be addressed to THE PUBLISHER, "MARK LANE EXPRESS," 1, Essex Street, Strand, London, W.C.

The receipts on account of revenue from the 1st of April, 1900, when there was a balance of £3,517,047, to the 8th of December, were £72,036,868, as against £69,774,819 in the corresponding period of the preceding financial year, which commenced with a balance of £8,919,173. The net expenditure was £122,437,812, as against £77,075,255 to the corresponding date in the previous year. The Treasury balances on December 8th, 1900, amounted to £3,747,695, and at the corresponding date of 1899 to £2,939,457.

THE AGRICULTURAL WEEK.

As usual, the Smithfield week proved an important one in respect to agricultural incidents, the delivery of speeches, and at least one departure affecting the future of the shows of the Royal Agricultural Society. The Agricultural Hall carnival was favoured with fine weather for the first three days, during which all its most important business had been transacted except the disposal of the carcase competition beef, which, as in former years, took place on the fourth day. The champion Hereford beast of Mr. Wortley came in for his share of admiration, especially as Lord Roberts beat the Queen's heifer Cicely, which conquered him at Birmingham. The good fortune of this beast is worthy of brief reference. Last year, as a yearling, he was placed second at Birmingham to the Queen's steer, which had to come second to him in the Agricultural Hall last week. At Norwich this year he was placed reserve for the championship next to Mr. Learmer's symmetrical small crossbred heifer Ladysmith. The Queen's Cicely was not at Norwich, but the trio of redoubtable winners met in Bingley Hall with the result above stated, the Royal heifer being preferred, with Lord Roberts again reserve and Ladysmith conquered. Last week the three met again, with the result well known. Lord Roberts was exalted to the honour as best beast, but the Queen retained her 100 guinea cup for Cicely, as it was for the best beast in the show bred by the exhibitor, and Mr. H. E. Russell was the breeder of Lord Roberts, of which Mr. Wortley purchased him. Then, next the winning of the cup offered by the Prince of Wales for the best pen of sheep by Lord Ellesmere's wonderful pen of Suffolk wethers, were the leading incidents of the last Smithfield Show to be held in the century.

We can only deal in the briefest manner with what took place on Tuesday and Wednesday at the agricultural dinner of the Farmers' Club and Central Chamber, and at the Royal Agricultural Society's Council meeting on the following day. The fact that Mr. Chaplin and Mr. Hanbury, the new Minister of Agriculture, had both accepted invitations to be present led to great expectations of what these important personages would say, particularly as the former had in the previous week made it clearly evident that he had not retired from the Cabinet by his own free will. In the issue, the inference to be drawn from his speech is that the agricultural community are likely to gain considerably in Parliamentary debates affecting their interests by his being out of office. On "little diverse questions" in the old days when a free man, he formed a very good leader for the country party in Parliament, and he may do so again. The speech of the new Minister of Agriculture gave all the more interest as he made no pretensions to make out the state of agriculture better than it is. Mr. Long,

it will be remembered, two years since laid himself open to much criticism by endeavouring to do this. Mr. Hanbury admitted that there are several things in the present condition of agriculture, and especially affecting the well-being of farmers, to be deplored. The depletion of population from the rural districts was one of them, and Mr. Hanbury truly pointed out that the farmers had not only lost their men, but their sheep, there being a decrease of over two millions on what there were a short time since. Of course droughts and bad turnip crops always cause this, and we may possibly have our full flock numbers again after awhile; but not so the labourers, it is to be feared. The Minister also alluded to the adulteration of beer question, which may be termed the burning one of the period. He admitted that it was of national as well as agricultural importance, and that under the present law beer could be made of anything so that there was 2 per cent. of spirit in it.

An important decision arrived at at the Council meeting of the Royal was that there shall be jumping classes at the Cardiff Show next June. The question raised a lengthy strong debate, some of the members feeling the deepest repugnance against allowing such a thing as jumping at a Royal Show, but it was pointed out that the finances of the Society require to be recuperated, and that nothing is calculated to do this more than offering the attraction which invariably causes the populace to pay gate money. The motion was carried by twenty-two votes to thirteen. Another question which excited warm discussion was the admission of the Lincolnshire Red Shorthorns into the show list, as a separate breed of cattle. Their admission had been decided on before, but Sir Jacob Wilson saw his way to raise the question anew. He objected strongly to having two breeds of Shorthorns in one showyard, but broader views prevailed, and the Lincolnshire Reds will have their footing as a distinct breed.

SAMPLES.

By a Man of Mark Lane.

On Monday Mr. Hanbury, introduced by Sir W. Walrond and Sir W. Coddington, took the oath and his seat for Preston, on his re-election after having been appointed President of the Board of Agriculture.

I see that Colonel Webb, of the great seed firm, who represents the Kingswinford Division of Staffordshire, made his first speech in the House of Commons on Thursday night. He spoke of the pain and regret with which he had heard the speech of the hon. member for Battersea (Mr. Burns), who had complained of distinction being made between Yeomanry and Volunteers on one side, and privates of the regular Army on the other. As a Volunteer officer, Colonel Webb felt he could not allow it to pass without a protest. He had had two sons out at the front—one had just returned home wounded—and from what they had told him he was in a position to contradict much of what the hon. member opposite had said. The same treatment was shown to the poor as to the rich.

The retirement of Mr. Charles Whitehead, F.L.S., F.Z.S., from the position of Technical Adviser to the Board of Agriculture, has (I am officially informed) led to a reconsideration of the means by which the Board obtain technical advice on questions relating to agricultural botany and economic zoology, and it has now been arranged that the scientific and expert assistance required by the Board in connection with these subjects will be furnished respectively by the Royal Botanic Gardens, Kew, and by the Natural History Departments, South Kensington.

The last Manitoba Government crop bulletin for the year shows that the total yield of cereals in the province during that time amounted to 25,000,000 bushels. The wheat yield is estimated at 13,000,000 bushels. The quality of all cereals is poor.

The Central Statistical Bureau at St. Petersburg estimates the winter and spring crops in sixty-four departments of European Russia for this year as follows: Wheat, 658,800,000 poods; rye, 1,401,700,000 poods; oats, 721,600,000 poods; barley, 309,500,000 poods; buckwheat, 54,500,000 poods; millet, 105,100,000 poods; maize, 53,300,000 poods; spelt, 15,300,000 poods; peas, 43,600,000 poods; potatoes, 1,565,000,000 poods.

The District Officers' reports on the rice crop prospects on the 31st October in the fourteen chief rice-producing districts of Lower Burma are to the following effect:—The estimated area under paddy in the fourteen principal districts is now reported to be 6,225,664 acres, or 4,480 acres more than the area given last month. The differences in the district figures are small. Owing to prolonged breaks in the rains the crop in Akyab has suffered, and is estimated at about 14 annas. Floods have destroyed a small area in Prome. Elsewhere the prospects are good.

The action of the marine insurance companies in altering their flour policies without consulting or advising Mark Lane on the subject is as foolish as it is discourteous. It is rather surprising that the great centralised trades do not effect their own insurance, thereby saving the expenses of the middleman, as well as securing equitable and understanding treatment.

A curious accident recently occurred at Mark Lane. A buyer said he would take up to a certain quantity of a staple at a certain price per ton. Seven tons, which was within the quantity specified, were sent him, but the railway who delivered gave the quantity as six, and six were paid for by the buyer. It has now been held by a minor Court that the buyer and not the railway must pay for the extra ton. But surely the railway should pay for the litigation?

The smoking concert at the Corn Exchange Tavern on Tuesday last was well attended, and the musical character of the entertainment reflected very considerable credit on Messrs. Hurst and Co. The Smithfield week is a great occasion for this type of gathering, but unfortunately it comes at a time of year when the weather is often at its worst. The past week has been an agreeable exception in this respect.

The barricades have vanished from Mark Lane, but both Mincing Lane and Tower Street are now in possession of the invading forces. Those approaching Mark Lane from the west will do well to insist on their cabman proceeding by way of Fenchurch Street, which for the present at all events is free from obstruction. The works on the new "Baltic" are proceeding apace. There is an excellent foundation.

AGRICULTURAL POLITICS.

By a Lobbyist.

One excellent thing Mr. Hanbury has done this week—a thing that is applauded by men of every section. This excellent thing is the acknowledgment that there are duties appertaining to the Board of Agriculture which do not properly belong to it, and that there are duties appertaining to other Departments that do not properly belong to them, but which affect agriculture. It was time this was said; and if the character of Mr. Hanbury's future administration is indicated by this incident he will do well. The fact that the Local Government Board is looking after matters that belong to agriculture, and the fact that the Board of Agriculture undertakes duties that certainly do not belong to it, but belong to the Inland Revenue, has grown to the limits of a scandal. Will Mr. Hanbury reorganise the Board? Well, he is strong enough.

New, let us be fair to Mr. Walter Long. I know personally that he protested against this, and protested against it with virility. I know that some of the duties which he was called upon to perform he performed with absolute reluctance. I know further that in at least one instance he sought to secure the discharge of the duties by another Department. Unfortunately, Mr. Long did not carry his duty into the realm of action. He hesitated at that. Mr. Hanbury is the man who will not hesitate. Dissatisfied with his position, he will be only too glad to take advantage of an occasion to protest. I shall be glad if he does. He will have placed agriculture under the gravest of obligations if he makes the Board of Agriculture a real Board of Agriculture and not a Board of General Works.

Mr. Chaplin has at once shown who is the real leader of the agricultural party. He has in a few weeks revealed that he can attract attention as no man has hitherto attracted it in the agricultural world. I am bound to say that there are politicians—I have Mr. Grant Lawson in my mind at the moment—of possibly equal ability; but I must admit that there is no man who in the same degree dominates the agricultural mind. I notice this week in the House of Commons that the mere fact that Mr. Chaplin had advocated—can I say advocated?—pure beer gave it at once a significance of the first importance. It has become in a moment a matter of first Parliamentary note.

I pray that Sir Cuthbert Quilter will not think I am in any way reflecting upon his advocacy of this question. I am not. He has brought to it a vigour of mind and a wholeheartedness of purpose that have been the chief instruments in bringing this question within the pale of Parliamentary thought. The personal popularity of Sir Cuthbert is another factor in the matter. Sir Cuthbert is not only a man who gives good dinners—the feasts of Lucullus were pale to them—and who buys good pictures, but he has the grace of delightful courtesy and of old-world manners. He brings to you a Grandisonian chivalry that is without price, and he has a hospitality that is more than generous. Of course, these do not make for Parliamentary strength, but they are to be reckoned with.

Of course, it is the fact that the pure beer question is likely to be the first agricultural question of the next session. Therefore it is of moment to know the men who are likely to be prominent in the agitation. Mr. Fred Wilson has already shown that he intends to play a useful part in the agitation. As a fact, he has done so. I like Mr. Fred Wilson. He is one of the men who achieves a good purpose with a smile. He has a merry quip and crank, and he fashions his shafts with a joke. He will be a power in the matter, and his strength will be revealed in a series of apt-pointed jokes and epigrams. He is a man who is strong because of his manner, and his manner is excellent.

The point is this: Chambers of Agriculture—who believe in the genesis of beer being malt and hops—must at once strengthen the hands of these two men. It will be a first question in the next session. Shall breweries be apothecaries' shops, or shall they constitute an annexe to the English farm? This is the point. Mr. Chaplin perceives it. So does Mr. Hanbury, and Mr. Chaplin will force him to action. Gladstone once said, "Since nectar went out of fashion the gods had conferred no greater gift upon humanity than Burton beer." Burton beer is made of malt and hops. English farmers note.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

21369.—R. Bryers and J. A. G. Williams, of Lord Street, Liverpool, for an invention for "Improvements in potato diggers, raisers, and riddlers."

21751.—A. Shuttleworth and R. Gamble, of Lincoln's Inn Fields, London, for an invention for "Improvements in threshing machines."

21795.—N. Maver, of Colman Street, London, for an invention for "An improved poultry food."

Patents Sealed.

16101.—C. H. M. Bland, of Welford, near Rugby, Northamptonshire, for an invention for "Improvements relating to poultry houses."

16454.—E. Massey, of Holmes Chapel, Cheshire, for an invention for "Potatoes, digging and sorting."

16442.—T. Coldwell, of Newburgh, New York, U.S.A., for an invention for "Improvements relating to lawn mowers."

16570.—The Plano Manufacturing Company, of Chicago, Illinois, U.S.A., for an invention for "Shealing or binding apparatus."

16588.—E. O. Robinson, of Stockton Road, and J. R. Fothergill, of Bathgate Terrace, both of West Hartlepool, Durham, for an invention for "Grading or sorting eggs."

16678.—G. and J. S. Souter, both of Elgin, North Britain, for an invention for "New or improved food for animals."

BARLEY AND MALT.

By Hordeum.

The Central Chamber and Beer.

It is curious to note the remarkable faculty the Council and country delegates have of missing opportunities. At no other deliberative assembly has the many-sided beer question been considered so fairly and fully. For years the one great lack has been proof of positive harm to health to clinch all the other reasons so persistently brought forward year after year showing why, in the interests of agriculture, the consumers of beer, and for weighty National needs, the nefarious practices of some brewers should be stopped.

Recent occurrences have made it manifest that the time for prompt, decisive, and unanimous action has arrived, and any reasonable being might have expected the Council prepared to meet the occasion with definite and practical action which would command the approval of the vast majority of those concerned. What really happened was something the Business Committee will have occasion to feel heartily ashamed of unless the committee appointed does its duty promptly and efficiently.

The Time for Action

has come, and jocose buffoonery must be laid on the shelf. Men acquainted with the facts have contended that far too much beer has become so adulterated or sophisticated that its food value was seriously impaired, its cost was altogether out of proportion to its value, and its influences were positively baneful. The official returns tell their own story in confirmation of the first contention. These returns also strongly confirm the second, and the unhappy occurrences in Lancashire and the Midlands have given startling proof of the last.

Farmers have persistently advocated sundry small reforms which would do away with much of the disadvantage they have so long and so justly complained of. With admirable patience they have passed resolutions at the Chamber which have had the effect of quietly securing some of the points that, skilfully utilised, told heavily to their advantage.

What is even more useful is the capability of the steps taken

To Secure More

We have the actual quantities of other materials than barley-malt declared separately, and also divided from each other. We can consequently say exactly how much sophistication goes on so far as the use of materials is concerned. Still more useful is the knowledge we have of the actual use of the materials by the various classes of men licensed to brew.

Not so very long ago the virtuous great men puffed themselves up with pride, asserting it was wrong to accuse them of using anything but malt in their glorious brews, but the returns issued from Somerset House have a strange faculty of showing up shams. In no single instance can it be shown that the little brewers are the offenders in the sense of using excessive quantities of malt substitutes. Small men who brew their own beer and sell it over the counter, or, still more, those who brew, and their immediate neighbours fetch it for themselves in their own jugs, reflect popular taste much more sensitively than the ground-down tenants of tied houses or the managers of licences owned in great numbers by a big brewer. Look from this standpoint at the action of the three classes of

Manchester Brewers.

Forty-nine common brewers use 2,000,000 bushels of malt, 56,000 cwt. of rice, maize, grits, etc.; 113,000 cwt. of sugar. Four victuallers who sell on the premises use 6,000 bushels of malt, *no raw grain, rice, etc.*, and only 130 cwt. of sugar. The off licence beer sellers use 1,425 bushels of malt and nothing else, whilst even the private brewers, although they number forty, used last year 25lbs. of sugar to 2,515 bushels of malt.

This is a simple illustration of the value of these particulars. But for the fact that it is known they are available, we should be regaled with stories from Manchester transcending the last snake story. But the Central Chamber should promptly secure the demand, as with one voice, from every associated Chamber and club. We want further particulars, showing individually the quantities of materials used by

Each and Every Brewer,

and giving further the quantities of hops and hop substitutes used, together with the actual number of barrels of beer brewed.

All these particulars, with the exception of hop use, are duly scheduled at Somerset House, and there is no reasonable excuse capable of being brought forward against their proper publication. The time has come when in the public interest they must be given. The State has signally failed to safeguard the public health, and for that reason such facts may fittingly be made available.

Still more necessary in every way is it to have a strong representation of the absolute need to assess the duty differently. In the past there has been undue favour given to substitutes. It is the actual materials used which pay duty, and it is now time the scale be turned to favour the user of honest materials. Barley-malt brewers ought to be allowed to get such advantage as they may from paying 6s. per barrel, whilst users of glucose and other things should pay 8s., and so diminish to a more equitable point their undue gains. Every British farmer can see for himself if this is fair, and say so.

POISONED BEER.

Questions in Parliament.

No Examinations Made.

In the House of Commons, on Monday, Mr. F. Wilson asked the Secretary to the Treasury whether, seeing that it was stated in the report of the Committee on Beer Materials, 1899, that the Treasury was empowered to prohibit the use in the manufacture of beer of any substance or liquor of a noxious or detrimental nature, he would state upon how many occasions within the last five years had the Treasury exercised such power, and how many specimens of cheap sulphuric acid such as was apparently used in the manufacture of sugar for brewing purposes had been examined during the current year.

Mr. A. Chamberlain, in reply, said: The power referred to was conferred on the Treasury by Section 5 of the Customs and Inland Revenue Act, 1888, but the duty of providing proper securities for the wholesomeness of beer, like other articles of food, is placed by law on the local authorities, subject, if necessary, to the Local Government Board or Board of Agriculture. The Treasury, therefore, has not exercised this power. Sulphuric acid would only come under the cognisance of the Government Laboratory in the event of samples being submitted for analysis under a magistrate's order, and no instances of such submission have occurred. It ought not to exist in any sugar found in a brewery.

Official Analysts and the Brewers.

Colonel Kenyon-Slaney asked the Secretary for the Home Department, in the House of Commons on Monday night, whether the Official Analysts to the Department, Drs. Stevenson and Luff, who were members of the Expert Committee appointed by the Manchester Brewers' Association, were acting on behalf of the Department, or were being remunerated by the Brewers' Association; and if the latter was the case, whether, in view of the great public interests involved, he would consider the advisability of causing a report to be made by some expert analysts entirely unconnected with the trades concerned.

The Home Secretary: Drs. Stevenson and Luff are not acting on behalf of the Home Department. I think that the suggestion in the last paragraph of the question is scarcely within my jurisdiction, but I have consulted my right hon. friend the President of the Local Government Board, and understand that that Department have the whole matter under their active consideration.

No Power to Stop Sale of Poisonous Beer.

Mr. Warner asked the President of the Board of Trade if he intended to take some further action to stop the sale of poisonous beer, as fresh cases of poisoning were still being reported.

Mr. W. Long, who repied, said: The Local Government Board have no power to stop the sale of any particular beer, but I may state that there is reason for believing that the cases of illness which are now coming under observation for the first time are in the main those of persons who received the poison some time since.

Mr. Weir: Is there any power to stop the sale of poisonous whisky?

An Hon. Member: Do not drink it. (Laughter.)

Official Action.

Mr. Chaplin, who was received with loud cheers, asked the President of the Local Government Board if he could state what steps had been taken to ascertain the facts with regard to the alleged poisoning by beer, into which an inquiry had been instituted by the Local Government Board; if he had yet received any information as to the number of persons who had been affected and the number of deaths which were alleged to have been caused by it; and, if not, whether he would make public the information as to the number of persons who had been affected and the number of deaths which were alleged to have been caused by it; and, if not, whether he would make public the information obtained by the Local Government Board as early as might be after he received it?

Mr. W. Long: As this matter has excited considerable public interest, perhaps I may be allowed to state somewhat fully the course which has been adopted with respect to it. As regards the steps which have been taken by the Local Government Board, I would repeat what was stated by my right hon. friend the First Lord of the Treasury on Tuesday last, viz., that, from the first outbreak of the epidemic, the Board have had the matter under consideration. Dr. Buchanan, one of the most experienced of their medical inspectors, is investigating the circumstances connected with the recent epidemic, and has been in communication with the Local Government Board on the subject, including the action taken by those interested in the manufacture and retailing of beer, and with the local authorities, for detecting the presence of other substances which could possibly cause the [illegible] sugar. Moreover, an expert committee, consisting of Sir Lauder Brunton and Dr. Stevenson and Luff (the analysts to the Home Office), Mr. Cosmo Johnson, Dr. Buchanan, and the gentleman the member for the Lonsdale Division (Mr. Moulton), have made a careful investigation, on behalf of the Manchester Brewers' General Association. The brewers and manufacturers have given them every possible access to their premises, and facilities in every way they desired in order to investigate. The Board's Inspector has been in communication with members of the Committee, and cordial co-operation and assistance have been rendered both to the Committee and the Inspector by the Medical Officer of Health for Manchester and Salford. The House may rest assured that everything practicable is being done to ascertain the facts. I am informed that the Association has pledged itself to recall or destroy all beer in the brewing of which the implicated substances have been used, and that instructions to this effect have been sent to all the brewers of the Association. The obtaining of information as to the number of persons who have been affected and the number of deaths alleged to have been caused forms part of Dr. Buchanan's inquiry, which is not yet complete. His report will be made public as early as practicable after its receipt. I may add that the Board have issued a circular to local authorities recommending them to cause samples to be analysed both of beer and of articles of food in which chemically manufactured sugars may enter.

Prosecutions Begun.

At Manchester on Thursday, on the application of the solicitor to the Manchester Corporation, the city stipendiary granted summonses, under the Food and Drugs Act, against twelve beer retailers for selling beer not of the nature, substance, and quality of the article demanded, and to the prejudice of the purchaser. An application against a number of brewers was deferred owing to some informality.

More Beer Destroyed.

Four hundred barrels of beer, representing a loss of £800, were destroyed at Ulverston on Monday night. The beer was the property of Hartley and Co., Ulverston Old Brewery, who stated that when they found that the materials were at fault they decided to destroy it. Luckily, only a small portion had left the brewery.

The Dead and Sick.

Two or three more deaths are reported this week as the result of drinking impure beer, and there have been many additional cases of illness, though to a lesser extent than previously.

Letter from Sir Cuthbert Quilter.

SIR,—As there will be no opportunity of raising this question in Parliament for some time, will you allow me, on behalf of my fellow members and others interested in the Pure Beer Movement, to offer a few observations upon the present aspect of affairs from our point of view?

We have now had an opportunity of questioning members of the Government, whose departments are in some way or other supposed to have jurisdiction, and from the answers received it would appear that the duty of conducting an enquiry into the circumstances connected with the recent epidemic has devolved upon the Local Government Board. Here I may say that we are so far fortunate in having at the head of that department a man of undoubted courage, and one who may be relied upon, once he is satisfied of his facts, to do his duty unflinchingly.

We cannot help thinking, however, that it would have been more reassuring to the public mind if a strong expert committee, such as the Manchester Brewers' Association organised, had been immediately appointed by Her Majesty's Government, in which case they would no doubt have retained the services of the Official Analysts to the Home Office, both of whom are new members of the Brewers' Committee. In France such an epidemic as this would be at once investigated by the Council of Hygiene, or in Germany by the Imperial Board of Health.

In this country, wherever the interest of the [illegible] drinker crops up, it is difficult to find under which thimble the pea really is; but to us it is very clear where the actual responsibility lies. When the advocates for a deduction of beer duties threw their Bill in 1896 the Chancellor of the Exchequer promised to appoint a Committee, which was subsequently [illegible] to report "what legislation is required to prevent the use of deleterious substances in the manufacture of beer." The majority

of this Committee (a Departmental, not a Parliamentary Committee) reported that "the Treasury are empowered to prohibit the use, in the manufactur eof beer, of any substance or liquor of a noxious or detrimental nature. It is the duty of the chemists employed in the Government Laboratory to keep a vigilant watch in this respect over all beer brewed and sold, and they have ample opportunities for so doing."

Yesterday we were told by the Secretary to the Treasurer that the power alluded to was conferred upon the Treasury by the Inland Revenue Act, but that "the duty of providing proper securities for the wholesomeness of beer, like other articles of food, is placed by law on the local authorities, subject, if necessary, to the Local Government Board or Board of Agriculture," an dthat therefore "the Treasury had not exercised this power."

A pretty puzzle this! Between the Treasury, the Inland Revenue chemists, the local authorities, the Local Government Board, and the Board of Agriculture, where is the beer drinker?

Although the Inland Revenue authorities know what firms use substitutes, they have resolutely declined to give that information to Parliament and the public. On this point the majority of the Committee expressed their opinion that it would be "an inquisitorial interference with business of a rather invidious kind"; but as their report was practically a justification of the use of these substitutes, it is difficult to see how it would be "invidious" to state who used them.

No, sir. The Inland Revenue officials consider it their duty to see that as much liquor as possible pays duty, and the brewers who do not confine themselves to malt and hops say that the public like the substitutes, although they have not sufficient confidence in their compounds to call them by any other name than "beer."

It is quite likely that the policy pursued by the Inland Revenue may yet have the opposite result to that anticipated. The present scare has already brought about a considerable diminution in the consumption of beer, to the consequent detriment of the Revenue. We believe that the more people are satisfied as to the purity of beer the more generally they will drink it, and the more will the Revenue be augmented.

Therefore, to our minds, everything points to the desirability of an early enactment defining "beer" and extending to it the same principle that Parliament has already sanctioned with respect to other important articles of diet.

If these objects are to be secured it will be necessary, unless the Government are wise enough to take the matter into their own hands, to have a powerful organisation in order to focus the great volume of public feeling which exists throughout the country, and of which ample evidence is afforded by th stream of resolutions of public bodies as well as private correspondents, which pours in upon me every day.

No one who has read the Minority Report of the Committee above referred to can say that this calamity has come upon the Government and the people without warning. We only hope that the sickness and death amongst our fellow-countrymen in the North, sad as it is, will have the result of bringing about a much-needed reform, but this can never be effected until the masses of the people realise and impress unmistakably upon the Government how vitally their interests are concerned with the purity of the national beverage.—I am, Sir, your obedient servant, CUTHBERT QUILTER.

House of Commons, S.W., December 14th.

Glucose in Cider.—Letter from Mr. Thomas Duckham.

Sir,—I feel the best thanks of the country are due to you for the manner in which you have brought the beer poisoning question to the front, and hope you will add the few lines I enclose to this acknowledgment of your valued services. During the debate on the Food and Drugs Amendment Bill in 1899 there was a somewhat unusual display of united feeling in favour of agriculture on both sides of the House of Commons against the fraudulent clause for colouring margarine to imitate butter. To guard against a threatened defeat, the Minister of Agriculture (Mr. Long) effected a compromise by promising the appointment of a Departmental Committee.

The promised committee was appointed, and met on the 14th of November, 1899, with Sir Herbert Maxwell chairman. A lengthened inquiry has taken place, and some startling evidence has been given before them.

Several of the most eminent scientists of the day, analytical chemists, medical officers of health, and others have given evidence. A general consensus of opinion appears to prevail against the use of boracic acid in milk and silvcilic acid in jam. So far as I have seen or heard, there has not been any inquiry on the beer question, excepting Lager. Cider has been mentioned more than once, but not fully gone into. The disclosures at Manchester will now render a more searching inquiry requisite; also respecting cider, the much-esteemed beverage of this country. Pure cider is ordered by the faculty, and it is very benefical with some patients, but not such as I have been told has not a particle of apple juice in it. Where such filthy stuff comes from I am at a loss to know, but that it does come the high position of my informant I feel to be a sufficient guarantee for its correctness.

The hint given in the *Lancet*, as contained in the MARK LANE EXPRESS, is very significant—"that mischief may yet arise in fresh places." I have reason to believe that glucose is used in the manufacture of cider.—Yours very truly,

T. DUCKHAM.

Holmer, Hereford, December 14th.

National Agricultural Union.

Dissolution and Reconstitution.

A proposal for the reconstruction of this organisation was discussed and adopted at the annual meeting of the members, held at Anderton's Hotel, in London, on Tuesday, under the chairmanship of Mr. Yerburgh, M.P., the President. Earl Temple, Sir J. Rankin, M.P., and Sir W. J. Stewart, M.P., were among those present.

The Chairman said, while the union had done excellent work in a time of agricultural depression, he thought it had lost influence owing to the idea that it was committed to the policy of Protection. It must be clear to every thinking person that Protection was absolutely dead so long as there was no demand for it from the working classes. He considered the union's policy of interference in Parliamentary elections might advantageously be abandoned, and that it should put forward a definite and practical programme in the form of co-operation, which had been adopted with very successful results by the farmers of France, Germany, and Denmark, and might, therefore, be assumed to be applicable to a variety of conditions. In these days combination might be said to be the secret of success, and not only would co-operation benefit farmers who had large holdings, but it was absolutely essential to the prosperity of small farmers. The principle should not be restricted to creameries, such as had been introduced with excellent results by Mr. Horace Plunkett in Ireland, but should be applied to the purchase of manures, feeding stuffs, seeds, and machinery, and to obtaining long credit at reasonable rates. Combination was necessary also if a reduction of the excessive railway charges for the transport of agricultural produce was to be secured. Foreign butter, margarine, cheese, bacon, and eggs, to the value of more than thirty million sterling had been imported into this country during the year, and it would be to the interest not only of agriculturists, but of the country generally, that this enormous demand should be met by home supplies. Negotiations were proceeding with a view to the amalgamation of the Union with the British Agricultural Organisation Society.

The annual report of the Central Council, which was adopted on the motion of Sir Mark Stewart, seconded by Sir J. Rankin, recorded the indefinite postponement of the proposed Imperial Agricultural Congress owing to the prolongation of the war in South Africa, and the refusal of some important agricultural bodies to assist in the suggested undertaking. The Council congratulated the members on the passage of the Agricultural Holdings Act of last session, by which several grievances complained of by tenants had been removed. With reference to the scheme of reconstruction, the Council reported as follows:—We would retain the principle of the "Three-fold Cord" and work for the real union of all who live by the land, but we are convinced that our efforts will be far more effective if they deal with the direct, practical, and immediate necessities of the members than if confined to endeavours having for their object alterations in the present laws. We propose, then, that the Union should become the centre of all agricultural co-operative effort, the educator and organiser of the movement though not in itself a trading body and by focussing, as it were, the various organisations already at work, and those to be formed in the future, to create a combination to whose hands the interests of agriculture may be safely entrusted. Besides devoting its energies to the formation of local societies for co-operation in cheap and improved production, sale of produce, purchase of requisites and mutual credit, the central body will be able to assist such societies or the members of affiliated societies and members generally or individually in all such questions as overcharges in taxation, railway rates and improved transit, market facilities, analyses of food and manures, insurance, labour supply, etc. This is necessarily only a brief outline of the new work contemplated, but, in the opinion of your Council, it places before the Union the means of securing a great future for itself and permanent benefit to British agriculture.

The Council proposed, therefore, that the N.A.U. should be dissolved, and reconstituted as the National Agricultural Organisation Society, and that a committee should be formed to consider upon what conditions amalgamation could be arranged with the British Agricultural Organisation Society.

Sir Mark J. Stewart, M.P., proposed the adoption of the report. He said in many ways co-operation had been a great success, and he heartily supported it.

Sir James Rankin, M.P., seconded the resolution, which was unanimously carried.

On the motion of the Chairman, it was decided that a special meeting should be held on the 15th of January to consider the question of amalgamation

Farmers' Club.

The annual meeting of the Farmers' Club was held on Monday evening, under the presidency of Mr. J. R. Eve. A paper was read by Professor Axe on "Swine Fever, and the Methods adopted by the Board of Agriculture for its Suppression," and at the conclusion of it the following resolution, moved by Mr. Clare Sewell Read, seconded by Mr. St. John Ackers, was adopted:—"The Farmers' Club hopes that the Board of Agriculture will persevere in the slaughter not only of all pigs suffering from swine fever, but also of all pigs that have been in contact with them; and they would respectfully urge the Board of Agriculture to employ more veterinary surgeons in the administration of the Order."

The Secretary (Mr. S. B. L. Druce) read the following letter from Mr. T. N. Elliott, the Secretary of the Board of Agriculture, dated December 8th: "I am very much obliged to you for sending me a proof of Professor Axe's paper, and I wish I could have arranged to be present at the discussion upon it. I am under the impression that the paper must have been written some time ago, because the Professor quotes no figures more recent than those of 1899, although statistics of the course of all diseases are published weekly, and we have the experience of practically another twelve months to guide our conclusions. It happens that 1900 has been our best year on record so far as swine fever is concerned. Only 1,801 outbreaks of the disease had been confirmed up to the 1st inst., and if during the remaining four weeks of the year the figures are neither better nor worse than in 1899, we shall have a total of 1,917 outbreaks. This means, of course, that we shall have not only recovered from the slight retrogression of 1898 and 1899, but have reached a point 238 outbreaks better than in 1897, our previous best. Simultaneously with this reduction of the number of outbreaks there will also be a substantial reduction of cost; and as all the cost of our work as regards this disease, over and above that portion of the Parliamentary grant of £50,000 which is assigned to Great Britain is paid out of the Local Taxation Account, the matter is not without substantial interest for agriculturists. Thus in the year 1895-96, our most expensive year, our net payments in respect of swine fever amounted to £188,987, of which £165,000 was drawn from the Local Taxation Account; whilst in the year 1899-1900 those payments amounted to £71,539, of which £38,000 was drawn from the Local Taxation Account. Comparing 1895 with 1900, we shall probably be able to point to a reduction in the number of outbreaks from 6,305 to 1,917, whilst an additional amount of perhaps as much as £150,000 will be set free for the relief of local rates. There is no question here of the 'blighting shadow of the Chancellor of the Exchequer,' for our receipts from the Parliamentary grant were only £25,000 in 1895 and £36,000 in 1899-1900."

A discussion was carried on amongst members of the Club. Mr. Clement Stephenson, veterinary surgeon, expressed the opinion that reports of sickness were not made with sufficient promptness. All diseased centres should be closed up, the sick pigs killed and burned, and the healthy ones killed and sold.

A vote of thanks was passed to Professor Axe for his paper, and the meeting closed.

British Dairy Farmers'.

A meeting of the Council of this Association was held at 12, Hanover Square, London, W., on the 11th inst., Mr. Geo. Barham in the chair. The Finance and General Purposes Committee brought up a report upon the Society's accounts, and upon their recommendation cheques amounting to £346 1s. 2d. were passed for payment. They also recommended that for the ensuing year two delegates should be appointed to the meetings of the Central Chamber of Agriculture, and the Council selected Mr. George Barham and Professor Long as such delegates. A report was received from the Show Committee referring to a number of suggestions arising out of the recent Dairy Show, and the proposals of the Committee were agreed to.

The Editing Committee reported their arrangements for the next issue of the Society's Journal.

The Council then proceeded to appoint the following standing committees for 1901: Finance and General Purposes, Show, Conference, Cattle Diseases and Epidemic, Education and Journal, and Poultry and Pigeon.

The next meeting of the Council was fixed to be held on February 6th, 1901

The small supply of stock at Midleton Fair (Co. Cork, held on Monday, met a fair demand. Prices: Calves, second class, £4 to £5; third class, £3 to £3 12s. 6d. Yearlings, first class, £8 to £9; second class, £6 to £7; third class, £4 to £5 10s. Two-year-olds, first class, £10 10s. to £11 15s.; second class, £8 10s. to £9 10s.; third class, £5 to £7 16s. 8d. Springers, second class, £12 10s. to £14. Lambs, first class, £1 6s. to £1 7s. 6d.; second class, £1 2s. to £1 5s. Hoggets, first class, £1 19s. to £2 4s.; second class, £1 16s.

Proceedings of the Central and Associated Chambers of Agriculture.

Council Meeting.

A meeting of the Council of the Central and Associated Chambers of Agriculture was held on Wednesday, December 12th, 1900, at the rooms of the Society of Arts.

There were present: The Right Hon. James Lowther, M.P. in the Chair, and the following members:—

Representing the Central Chamber.—Mr. B. St. John Ackers, Mr. W. H. Barfoot-Saunt, Mr. J. F. Beddall, Mr. F. A. Channing, M.P., Mr. W. J. Clark, Mr. W. W. Glenny, Mr. A. F. Jeffreys, M.P., Mr. W. Lipscomb, Mr. Henry Marriage, Mr. R. Jasper More, M.P., Mr. Clare Sewell Read, Mr. James Round, M.P., Mr. H. Stopes, Mr. E. Strachey, M.P., and Mr. Ernest H. Godfrey (Secretary).

Representing Associated Chambers.—Mr. Henry Campion and Mr. H. Trustram Eve (Bedfordshire), Mr. Fred. Coate (Blandford Farmers' Club), Professor James Long (British Dairy Farmers' Association), Mr. J. Whitehouse Griffin and Mr. W. Weston (Bucks), Mr. C. P. Tebbutt (Cambridgeshire), Mr. W. W. Berry and Mr. J. F. Honeyball (Canterbury Farmers' Club), Mr. C. B. Davies (Cheshire), Mr. J. Beecroft (Chester Farmers' Club), Mr. C. Middleton (Cleveland), Colonel W. W. Maude (Craven Agricultural Society), Mr. James Watt (Cumberland and Westmorland), the Right Hon. Jomes Lowther, M.P., and Colonel W. H. Wilson-Todd, M.P. (Darlington), Mr. E. Norton Mullins (Gillingham Farmers' Club), Mr. W. Priday (Gloucestershire), Mr. A. Stanley Wilson, M.P. (Holderness Agricultural Club), Mr. John Biggs (Howdenshire Agricultural Club), Mr. Jacob Wakefield (Kendal Farmers' Club), Mr. W. Beeson (Leicestershire), Mr. W. G. Lobjoit and Mr. W. Poupart (Market Gardeners' Nurseryman, and Farmers' Association), Mr. H. Standfield (Milborne Farmers' Club), Mr. Charles D. Phillips and Mr. Henry Williams (Monmouthshire), Mr. T. A. Dickson (Northamptonshire), Mr. Ulric C. Stanley (North Cotswold Farmers' Association), Mr. T. S. Mason (Ripon Agricultural Association), Mr. J. Bowen-Jones (Shropshire), Mr. C. Weddall (Snaith and District), Mr. John Kendrick (Staffordshire), Mr. J. T. Wilson (Stockton-on-Tees), Mr. Herman Biddell (East Suffolk), Mr. S. Kidner (Taunton Farmers' Club), Mr. J. W. Ryland (Warwickshire), Mr. R. S. Balden (West Riding), Mr. G. Wardle (Whitchurch Dairy Farmers' Association), Mr. Cary Coles and Mr. C. Harris Stratton (South Wilts) Mr. J. Spicer (Winfrith Farmers' Club), Mr. T. Davies (Wirral Farmers' Club), and Mr. John Newton (Yorks Union of Agricultural Clubs).

Members of the Central Chamber: Sir Mark J. McT. Stewart, Bart., M.P., Mr. H. B. M. Buchanan, Mr. J. K. D. Wingfield-Digby, M.P., Mr. G. E. Francis, Mr. Endre György, Mr. G. Herbert Morrell, M.P., Mr. Rouse Orlebar, Mr. R. Henry Rew, and Mr. H. M. Upcher

There were also present: Mr. Herbert E. Boyce (of the Local Government Board), Mr. G. E. Brown, Mr. J. Cossins, Mr. E. W. Drew, Mr. G. M. Gale, Mr. H. R. Jesty, Mr. W. A. Johnson, Mr. J. N. Joyce, Mr. R. Garnett, Mr. J. Lee, Mr. A. E. Mansell, Mr. T. Nunnerley, Mr. C. E. Paddison, Mr. H. Spicer, and Mr. John White.

On the motion of Mr. Ackers, the Right Hon. James Lowther, M.P., was called to the Chair, in the unavoidable absence of Mr. Victor Cavendish, M.P. (Chairman for 1900).

The minutes of the last meeting, held on November 6th, 1900, were read and confirmed.

Election of New Members.

Mr. Jeffreys, M.P., said he had great pleasure in announcing that the Right Hon. R. W. Hanbury, M.P., the new Minister for Agriculture, had consented to join the Central Chamber as a member, and he desired to formally propose his election.

Mr. Channing, M.P., seconded the motion, which was carried unanimously.

The following were also elected members of the Central Chamber:—

Coggan, William, Clarendon House, Norwood Road, S.E.
Cridlan, J. J., 14, Bishop's Road, Bayswater, W.
Denbigh, The Earl of, Newnham Paddox, Lutterworth.
Grant, Corrie, M.P., 11, King's Bench Walk, Temple, E.C.
Molesworth, Sir Lewis, Bart., M.P., Trewarthenick, Grampound, Cornwall.
Montagu, George, M.P., 69, Eaton Place, S.W.
Mount, W. A., M.P., Wasing Place, near Reading.

Finance.

On the motion of Mr. Bowen-Jones (Treasurer) cheques were drawn to the amount of £90 9s. 7d. Mr. Bowen-Jones added that the balance at the Bankers' amounted to £210 13s. 1d., and that a sum of £4 was in hand, making a total of £214 13s. 1d.

Communications.

The receipt of the following communications was reported:—

(1) Prime Minister, the First Lord of the Treasury, the Chancellor of the Exchequer, the President of the Local Government Board, the President of the Board of Agriculture, and other Cabinet Ministers, acknowledging receipt of the "Statement of Legislation required in the Agricultural Interest."

(2) Prime Minister, the First Lord of the Treasury, and the President of the Board of Agriculture, acknowledging receipt of the Report of the Cattle Diseases Committee.

(3) The Marquis de Vogüé, President of the Société des Agriculteurs de France, the Organising Committee of the Paris International Agricultural Congress, and M. Philippe de Vilmorin, acknowledging the receipt of the resolution of thanks passed by the Council at their last meeting.

(4) Beds, Berks, and Oxon, Bucks, Cheshire, Cleveland, Darlington, Gloucestershire, East Kent, Lincolnshire, Monmouthshire, Norfolk, Northamptonshire, Snaith and District, Somersetshire, Staffordshire, Stockton-on-Tees, East Suffolk, Warwickshire, West Riding, Wharfedale, and Worcestershire Chambers; Chester, Gillingham, Hurstmonceux, and Milborne Farmers' Clubs; Craven Agricultural Society; and North Cotswold Farmers' Association: Resolutions in favour of the renewal of the Agricultural Rates Act of 1896.

(5) Cheshire, Cleveland, Lincolnshire, Monmouthshire, Somersetshire, and Wharfedale Chambers; Chester Farmers' Club; and Craven Agricultural Society: Resolutions on Tuberculosis and the working of the "Model Milk Clauses."

(6) Beds, Berks, and Oxon, Cheshire, Lincolnshire, Monmouthshire, Staffordshire, Warwickshire, and Worcestershire Chambers; Chester and Liverpool and District Farmers' Clubs; and Craven Agricultural Society: Resolutions on the Registration of Pig Dealers and the Inspection and Disinfection of their Premises.

(7) Resolutions from the Bucks, East Kent, Norfolk, Staffordshire, Shropshire, Warwickshire, and West Riding Chambers; Chester, Market Weighton and District, and Tunbridge Wells Farmers' Clubs; Holderness and Selby Agricultural Clubs (Pure Beer); Lincolnshire Chamber and Tunbridge Wells Farmers' Club (Legislation required in the Agricultural Interest); Gloucestershire, Monmouthshire, and Worcestershire Chambers (Combination of Agricultural Implement Makers); Northamptonshire Chamber (Sparks from Railway Engines); Stockton-on-Tees Chamber (Shortage of Weights in Produce carried by Railway Companies); East Suffolk Chamber (Sale of Barley); West Riding Chamber (Uniform Weight for Sale of Cattle).

The resolution of the Stockton-on-Tees Chamber with reference to complaints of shortage of weights on delivery of goods carried by the railway companies was read by desire of Mr. Wilson, who requested that the subject might be taken into consideration by the Business Committee.

Resignation of Mr. T. Carrington Smith.

The Secretary reported the receipt of a letter from Mr. T. Carrington Smith, announcing his resignation as a member of the Business and other Committees of the Central Chamber in consequence of ill-health, and read the following report from the Business Committee: "The Business Committee have accepted the resignation of Mr. Carrington Smith with great regret, and they recommend that he be asked to accept the Honorary Membership of the Central Chamber."

The Chairman said that the Business Committee, and no doubt all the members of the Council, deeply regretted the retirement of Mr. Carrington Smith. That gentleman had been one of their most valued members for a great many years. He felt sure that the slight compliment which the Council now had it in its power to confer on Mr. Carrington Smith by making him an Honorary Member would be cordially given. (Cheers.)

Mr. Clare Sewell Read seconded the proposal, and the report of the Business Committee was adopted unanimously.

Future Business.

The report of the Business Committee, settling the order of business at the next meeting under Bye-law 11, was as follows:—

That at the next meeting to be held on Tuesday, February 5th, 1901, subject to the discussion of any matters of urgency then before Parliament, the questions for consideration shall be:—

1. Legislation to Prevent the Adulteration of Beer
2. Damage to Crops by Sparks from Railway Engines.
3. The Report of the Royal Commission on Local Taxation (if issued).

Report of the Parliamentary Committee.

The following report of the Parliamentary Committee was presented;—

Pure Beer

1.—The recent fatalities in the North of England attributed to the consumption of beer containing arsenic have sadly emphasised the necessity for the enactment of a measure to provide adequate protection against the use of deleterious substances by brewers.

2. Your Committee suggest that the Government should be asked to receive a deputation from the Central and Associated Chambers of Agriculture and other agricultural bodies in the week of the February Council meeting, for the purpose of urging the Government to introduce legislation during the next Session of Parliament dealing with the question upon the lines advocated by the Council, and indicated in the Minority Report of the Departmental Committee on Beer Materials.

Damage to Crops by Sparks from Railway Egines.

3.—Your Committee regret with regret that the Compensation for Damage to Crops Bill, introduced by their Chairman last Session, with the object of placing railway engines on an equal footing with road locomotives as regards their liability for damage from fires caused by sparks, failed to secure a second reading on account of the opposition of railway directors.

4.—On May 8th last the First Lord of the Treasury stated that the President of the Board of Agriculture had "no detailed information as to the damage done by sparks from railway engines." An invitation was therefore issued to those who had suffered damage from this cause to furnish details of their losses. Such details have now been received by the Secretary from a large number of owners and occupiers of land adjoining railways, and have been duly forwarded for the information of the President of the Board of Agriculture.

5. The serious and widespread character of the injuries inflicted upon agriculturists by these constantly occurring fires is shown by the fact that these cases of wholly distinct have reached the Secretary, relate to upwards of seventy-five separate fires caused by sparks from railway engines in eleven different counties, viz., Cheshire, Devonshire, Hampshire, Herefordshire, Kent, Lancashire, Lincolnshire, Nottinghamshire, Staffordshire, Surrey, and Yorkshire, nearly all the chief railways in the Kingdom being the defendants. In only a few cases was compensation paid, the railway companies usually refusing to pay compensation on the ground that they are not legally liable.

6.—Your Committee propose to arrange for the reintroduction of a Bill next Session, and to press their claims for the consideration of the Parliamentary authorities, when the interests of other demands.

A. F. Jeffreys, Chairman.

December 11th, 1900.

Mr. Jeffreys, M.P., in moving that the report be received and adopted, said that the last meeting of the Parliamentary Committee was a full one, and they had the advantage of the presence of Sir Cuthbert Quilter and Sir Blundell Maple when the questions of pure beer and of damage caused by sparks from railway engines were considered. With regard to the first part of the report—that relating to pure beer—he would venture to ask the Council seriously to take the subject into consideration, because there was not the slightest doubt that this was a very good opportunity of trying to get some reform in the way that beer was made, or at any rate in the direction of requiring a declaration of the ingredients which were put into it. If they struck whilst the iron was hot they might possibly pass some Bill next year which would ensure greater purity of beer, and at the same time provide that the ingredients of the national beverage were barley-malt and hops, as they ought to be.

With regard to the damage of crops by sparks from railway engines, he introduced a small Bill last session, but it was unfortunately blocked by the railway directors. Both sides of the House of Commons accepted it, but at the critical point—12 o'clock at night—there was always a railway director in attendance who invariably blocked the Bill because he thought it might do some damage to the railway companies. They proposed to introduce a Bill again, but they were not fixed in their determination as to its being exactly the same Bill. They would have consultations as to that, but they were determined to introduce a Bill if the Government refused to introduce one, which he hoped would not be the case. It would be seen from paragraph 4 of the report that it was hoped that the Government might be induced to deal with this question in a manner that would be satisfactory to all parties. He ought to state that Sir Blundell Maple had a case of his own. In a very public-spirited way he determined to try the question. The Parliamentary Committee had had the advantage of the attendance of Sir Blundell Maple's Solicitor to explain the case. The proceedings which Sir Blundell Maple took were against the Midland Railway Company, and ultimately the amount which he claimed against the company was paid into court. In that particular case there were two witnesses who fortunately saw the sparks coming from the railway engine, and they were able by the time-table to trace the train, and by means of interrogatories in the High Court of Justice they were able to investigate whether the engine of that train had a proper spark arrester or not. Of course, it was not likely that that could happen in many cases, for the crops were often burnt by sparks from engines at night-time when no one was watching, and it would be a very difficult thing to trace the engine of a fast train. Although Sir Blundell Maple was successful in his particular case, it would be seldom that a farmer would be able to bring forward the necessary evidence to identify the engine which damaged his crops; and the Parliamentary Committee were unanimous in thinking that a Bill on the subject ought to be introduced.

Mr. Bowen-Jones (Shropshire) seconded the motion for the adoption of the report. He said that he thought that the present time was an opportune one for forming a representative Committee of the Chamber to further investigate the questions relating to beer, including the method of its manufacture. They ought to go on the proposed deputation with some unanimous declaration of the policy which the Chamber advocated with regard to pure beer. There was a considerable difference of opinion amongst agriculturists in connection with the matter, and he wanted to thresh the question out, if possible, by means of a committee and get it into line, so to speak, so that the opinions of the members should be, as far as possible, unanimous in their declarations as to what they wanted. He would propose that a representative Committee be appointed by the Chamber to inquire into the beer question, and, to ascertain what legislative changes it is practicable to urge that will most benefit the agricultural interest. The Committee might ascertain if possible the causes of the poisoning which had taken place in consequence of the consumption of adulterated beer, and they might also go into the question of the percentages of malt-substitutes that might be used if they were allowed at all, and, if they were allowed, what they should be. They might also consider whether the ingredients should be declared by the brewers, whether they should be published, and whether the brewers should have to make known the names of the brewers whose beer they sold. These were all questions incidental to an enquiry.

Mr. Channing, M.P., supported the motion for the adoption of the report. He should like to say in doing so that he cordially agreed with what had fallen from Mr. Bowen-Jones. He thought that the proposal was eminently practical, and would help them far in the direction they wanted. They wanted to make the line of attack upon this question sufficiently precise. It seemed to him that they had got hold of a very big question, similar to the adulteration of butter with margarine, only that in the present case the adultera-

tion was made by means of ingredients which were injurious to health, and obviously introduced in order to artificially cheapen the production, and thereby to enhance the profits of those persons who made beer. He thought that they had an enormous case with regard to the question of securing the purity of beer on some reasonable lines. Those lines, as Mr. Bowen-Jones had said, certainly required to be carefully laid down in a businesslike spirit, and with a regard to all the interests and questions concerned. They had, however, a very good case, and he was delighted that the Parliamentary Committee had put the subject in the forefront for the next meeting, that to be held in February. He hoped that every member of the Council in the meantime would use his influence with regard to securing Parliamentary action.

Mr. CLARE SEWELL READ pointed out that the report mentioned a large number of fires caused by railway sparks, but there were a great many fires which had no record whatever in the report.

Mr. JASPER MORE, M.P. (Shropshire), said that he was sorry that he had inadvertently forgotten to attend the Parliamentary Committee. If he had been there he should have pressed upon their attention a question which he had brought before the Chamber on several occasions, that of a uniform weight for the sale of grain. He did not think that they ought to let the question drop when they had taken so much trouble with it. In his part of England great importance was attached to the question. He was happy to see that in this Parliament the agricultural interest was strengthened by the presence of Colonel Webb, who was well known to be one of the the leading agriculturists in the Mildands. He had kindly offered to co-operate with him (Mr. Jasper More) in pushing this question forward. There were a number of members at present in the House of Commons who were prepared to ballot for the introduction of the metric system. He did not know whether that question was thoroughly understood by agriculturists. He appealed to those agriculturists who wished that a uniform weight should be adopted, and that that should be the cwt., not to let the matter drop, but to join in supporting a Bill in the coming session.

The motion for the adoption of the report of the Parliamentary Committee was carried unanimously.

The Adulteration of Beer.

Mr. BOWEN-JONES (Shropshire) then moved: "That a representative Committee be appointed by this Chamber to enquire into the beer question, and to ascertain what legislative changes it is practicable to urge that will most benefit the agricultural interest."

Mr. STOPES seconded the motion. The subject was one upon which they were all feeling very strongly indeed, and one which they might look at from various standpoints.

Mr. PRIDAY (Gloucestershire), rising to order, asked whether by discussing the pure beer question now they would not be anticipating the discussion set down for the February meeting. The whole question was to be raised then.

The CHAIRMAN said that no doubt it was possible that the discussion might take a wide range, but it was the practice, he believed, to allow motions of this kind to be made with the general consent of the Council. He did not think that he could say that Mr. Stopes was out of order.

Mr. STOPES said that he would speak briefly. He ventured to urge that they should consider what steps could best be taken between the present time and February. It would be most undesirable to allow to subside without taking action the existing strong popular feeling which was the necessary outcome of the very large amount of suffering and death that had been inflicted throughout the north and other districts by the addition to beer of matters which ought not under any circumstances to have been put into it. He was absolutely sure that the machinery to which they had trusted with such confidence was not adequate to protect the public health, and although they were assembled there as what was supposed to be a selfish body of farmers looking after their own interests, he thought that they might claim that they did feel an interest in the victims who had suffered through the adulteration of beer, and an interest in the consumers of beer in all cases and under all circumstances. He had taken the opportunity of addressing a letter to the Business Committee urging the extreme desirability of framing some proposal which could be sent down to the various Chambers and Clubs to be discussed in order that there might be at least some unanimity of expression of opinion as to what it was desirable to do in the question of beer legislation. Personally he had very little faith in the influence of Acts of Parliament, especially when they were intended to interfere with the process of a manufacture which was in the hands of so skilful and powerful a corporation as the brewers of this country, and therefore he thought that there were other practicable schemes to which they as practical men could turn their attention which would be equally effective, if not more so. They might bring the pressure of this Chamber on the conscience of Her Majesty's Inland Revenue. If proper steps were taken by individual Members of the House of Commons apart from legislation they could secure a very great deal of what they desired. The public would like to have pure beer, and it was the fact that a large number of brewers agreed with the public and brewed pure beer. A very large number of brewers still used nothing whatever but malt and hops. Beer, as correctly defined, was the product of barley and hops solely, and he thought that they should insist in all discussions throughout the country that that definition should be closely observed. Agriculturists were solid and absolute in their view, and both as farmers and consumers they wished it to be understood that when they asked for a glass of beer they wanted the genuine outcome of brewing from barley-malt and hops. He had ventured to frame a resolution which he would like to submit, because it would be of inestimable value to those who were concerned in this matter if the various Chambers agreed upon it. His proposed resolution was as follows:—

That this Chamber urges upon the Government the necessity of passing a Bill for securing purity of beer at the earliest practicable date, and that the duty upon all beer brewed by any user of substitutes for malt and hops irrespectively of the amount of such substitutes be not less than one-third more than the duty charged upon pure beer, and further that the Commissioners of Her Majesty's Revenue direct forthwith that entries shall be made by all brewers of the quantity of hops and of hop substitutes now used by them, and that in the returns relating to Brewers' Licences the name of each and every brewer for sale be given together with the materials used of every class and the quantity of beer produced by him.

These points were exceedingly important, because if brewers had to make entries of the actual materials they used, and if they had to show the amount of beer they produced made from those materials, the public would then have practical facts to check them, and that would inevitably stop further dilution. If they had to make full entries of their names that would be a most complete, practical, and effective check upon the number and the increased use of, not improper materials, but of materials which might be deemed proper, but which nevertheless came into direct competition with the barley grown in this country. The one strong thing which would be urged by the brewers in this country in their defence would be that they were not the users of improper materials. They would make any amount of announcements that the beer brewed by them would be found to be absolutely free from deleterious matter. There would be a great deal of that kind of statement, and, in addition to that, the public would hear that the injurious ingredients were not in the beer, but in jam and other things to which glucose had been added. That was a thing which agriculturists would have to guard against. Another important and practical point was that they would be told that if brewers were restricted from the use of sugar they would be driven to use foreign barley. He had been elected for twenty years, year by year, as Chairman of the most skilled body of expert maltsters and brewers and barley-growers in the country, and that body had taken every means and opportunity in its power to get together the best barley from all countries in the world, as well as from Great Britain, and it had only been shown once that foreign barley was as good as British. They had proved conclusively that British barley was capable of making good malt, and that it was the best barley. He would say boldly that if brewers brought forward such a statement as he had referred to it should at once be dismissed.

Mr. JEFFREYS, M.P., asked whether Mr. Bowen-Jones would add to his motion the words "And to arrange for a deputation to the Government on the subject."

Mr. BOWEN-JONES accepted the addition.

Mr. MULLINS (Gillingham Farmers' Club) suggested that Mr. Bowen-Jones should introduce into his motion, after the words "In the interests of the agricultural community," a reference to the interests of the consumer. He thought that such addition would make the resolution carry more weight.

Mr. BOWEN-JONES said that he should be quite willing, but he wanted to get the agricultural point definitely stated.

The words "and the public at large" were then added after the words "agricultural community," and the resolution was adopted unanimously, as follows:—

That a representative Committee be appointed to inquire into the Beer Question, and to ascertain what legislative changes it is practicable to suggest for the greatest benefit of the Agricultural Community and the public at large, and to arrange for a deputation to the Government.

On the motion of Mr. JEFFREYS, M.P., seconded by Mr. STRACHEY, M.P., the Committee was constituted of Sir Cuthbert Quilter, M.P., Mr. J. Bowen-Jones, Mr. T. Latham, Mr. A. E. Mansell, Mr. Clare Sewell Read, and Mr. H. Stopes, with power to add to their number.

Considerable discussion ensued upon a proposal by Mr. Jasper More, M.P., that the proposed deputation should wait upon the Government during the present week. Eventually a further resolution was carried, and the motion of Mr. JASPER MORE, M.P., seconded by Mr. STANLEY (North Cotswold Farmers' Association), to the effect that all despatch should be used in arranging for the deputation.

Dairy Products Committee.

The following report of the Dairy Products Committee was presented:—

1.—Your Committee greatly regret to have to report the resignation through ill-health, of their Chairman, Mr. T. Carrington Smith, who as a Member of the Committee since its original appointment, and as Chairman since 1897, has rendered important services in connection with the efforts of the Chamber to procure legislation against the fraudulent adulteration of Dairy Products.

LOCAL AUTHORITIES AND TUBERCULOSIS.

2.—Your Committee are strongly of opinion that the question of Tuberculosis and the Milk Supply should not continue to be dealt with in the Private Bills of Municipal and other Urban Authorities, but should be the subject of general legislation introduced by the Government and made applicable to the whole country.

LEGAL STANDARDS FOR MILK AND BUTTER.

3.—Your Committee note that in certain cases the decisions of Magistrates in prosecutions for the adulteration of butter have been postponed, apparently under the impression that the Board of Agriculture are about to fix a Butter Standard under Section 4 of the Sale of Food and Drugs Act of 1899. They would point out, however, that the reference to the Board of Agriculture Departmental Committee on Milk Standards (whose Report, it is expected, will be issued shortly) comprises only Milk (including Condensed Milk) and Cream, and that therefore the question of a Butter Standard will not be affected by the Report.

4.—Your Committee consider, however, that the fixing of a legal Standard for Butter is one of urgency, and they are of opinion that the Board of Agriculture should be asked to undertake any necessary inquiry preliminary to the fixing of a Butter Standard under the Sale of Food and Drugs Act of 1899 immediately after the present Departmental Committee on Milk Standards have completed their labours.

By Order of the Committee,
ERNEST H. GODFREY,
Secretary.

December 11th, 1900.

Sir MARK STEWART, M.P., moved that the report be received and adopted. He said that he was sure that the Chamber would regret exceedingly Mr. Carrington Smith's resignation. He had been a most attentive and devoted member, not only in that room, but also in committee work, and especially in connection with the Dairy Products Committee. Unhappily, through ill-health, Mr. Carrington Smith had had to resign. They trusted that repose and rest might restore him to health and strength. The first paragraph of the report to which he had to direct attention was that relating to local authorities and tuberculosis. Friction had been occasioned by different municipalities dealing in different ways with the question of tuberculosis and the milk supply. A very good precedent which he had submitted to the Board of Agriculture in reference to legislation in such matters was the General Public Health Act, which had been passed for Scotland. Under that Act Scotland had one uniform standard in dealing with the question, so that municipal authorities could not act separately on different systems. The Scotch Act had only been in operation for about three years, but so far as it had gone it was deemed to be a very satisfactory experiment. He thought that it was quite possible for something of the sort to be attempted in England, and he believed that a general Act would be found to be of very great advantage. With regard to local standards of milk and butter there seemed to be a common mistake in the minds of some persons that the reference to the Departmental Committee which was appointed last session, and which, as he understood, would shortly report, included butter. That was not the case. The reference to the Committee included only milk and cream. He thought that it was very important that butter should be included, and that if necessary a deputation should wait on the President of the Board of Agriculture to insist upon its being done. In the meantime he had put the question down for to-morrow, and he had no doubt that Mr. Hanbury would give an answer which might possibly be satisfactory to the Chamber without their going further. The purchaser of butter ought to be able to know at once what extraneous matters he was buying when he was supposed to be buying pure butter.

Mr. JEFFREYS, M.P., seconded the motion. He said that he did not want to add anything except a remark with regard to the model milk clauses, upon which there had been much difference of opinion. He quite agreed with the paragraph in the report, but at the same time he might say that all the municipal Bills which had been introduced to deal with the question had adopted the model clauses to which the Committee agreed last session. He saw in the room Mr. Boyce, an officer of the Local Government Board, and he had no doubt that if any member had any question to ask Mr. Boyce he would make any necessary explanation.

The CHAIRMAN pointed out that the subject was on the agenda for the Annual Meeting.

Professor LONG, British Dairy Farmers' Association, wished to add his testimony to what had been said with regard to the loss which had been sustained by the withdrawal of Mr. Carrington Smith. Mr. Smith had sat on the Committee for fifteen years. He was a man of the good old sort, and was loved by them all. He (Professor Long) desired to direct attention to a case which had recently occurred, and which would show the great importance of urging the question of a butter standard upon the Board of Agriculture. Some time ago a sample of butter was taken at Bolton, and upon analysis was found to contain 20 per cent. of water, 8 per cent. of salt, and from 1 to 2 per cent. of some other material which he believed was casein. The retailer was summoned and in court he produced the dealer's warranty. It would be seen presently that the warranty question enabled a fraudulent dealer to drive a coach and horses bang through the Act of Parliament. The Act of Parliament was known to be a very moderate Act, and in many parts it was prac-

tically impotent. In the case to which he had referred the dealer was let off and the prosecutors then went to the wholesale dealers who gave the warranty. This firm was prosecuted in Manchester, and were defended by their solicitor. They pleaded that they had a warranty; but they said, "Before we go into that question we want to tell you, as magistrates, that you cannot identify the warranty as applying to this particular butter. We have got the warranty for the butter, but we do not know where the butter came from. We produce the warranty from the Irish merchant from whom we got the butter." In this case the wholesale dealers were also let off. Thus two different dealers were allowed to sell butter adulterated with 30 per cent. of adulteration, and they escaped. Was it to be supposed that a Manchester firm or an astute retailer at Bolton would be able to sell a sample of butter containing 20 per cent. of water and 8 per cent. of salt without knowing of the adulteration? As experts they must have known that they were dealing with adulterated butter. The Chamber would see at once that there ought to be a standard fixed by some authority. He would ask the Chamber very sincerely to urge on the Department of Agriculture the great necessity of not only fixing a standard, but of going into the whole question so far as regarded the standard. They had been working under an abortive Act or an Act which in part was abortive and of no value whatever.

Mr. MIDDLETON (Cleveland) said that the model clauses were unsatisfactory. There was one objectionable feature, and that was that one local authority had the power of going into the area of another. He thought that that should not be. It was very undesirable that agriculturists should lead people to the belief that they were satisfied with the model clauses.

The motion was then carried unanimously, and it was arranged that a copy of the report should be sent to Ministers, as usual.

The Annual Report.

The annual report of the Council was prepared and was adopted for presentation to the general meeting.

The Council then adjourned until Tuesday, February 5th, 1901, at 11 a.m.

Annual General Meeting.

On the motion of Mr. LOWTHER, M.P. (Darlington), Mr. JEFFREYS, M.P., was called to the chair.

Mr JEFFREYS, in opening the proceedings, explained that both their Chairman for the year (Mr. Victor Cavendish, M.P.) and their Vice-Chairman for the year (Mr. Grant Lawson, M.P.) had received the honour of appointment as Ministers of the Crown, and were consequently unable to preside over their deliberations.

The minutes of the last annual general meeting, held on December 6th, 1899, were read and confirmed.

Statement of Accounts.

Mr. BOWEN-JONES (Treasurer) presented the report of the auditor (Mr. S. B. L. Druce) on the accounts of the Central Chamber for the financial year ended November 30th, 1900. It would be seen from the auditor's report, which was printed at the end of the annual report of the Council, that the balance at the bankers' at the end of the year was £187 18s. 11d. The balance of assets over liabilities stood at £736 12s. 6d., as compared with £672 3s. 8d. at the end of 1899. He proposed that a vote of thanks be given to Mr. Druce for his services as auditor for the last year, and that he be reappointed for the ensuing year.

Mr. WHITEHOUSE GRIFFIN seconded the motion, which was carried unanimously.

Election of Eight Members of Council.

On the motion of the CHAIRMAN, seconded by Mr. PHILLIPS (Monmouthshire), the following eight members of the Council, who retired by rotation under Law 15, were re-elected:—

ACKERS, B. St. John.
BEDDALL, J. F.
CHANNING, F. A., M.P.
MARRIAGE, Henry.
MORE, R. Jasper, M.P.
PEASE, A. E., M.P.
STOPES, H.
WHARTON, The Right Hon. J. L., M.P.

Alterations in the Laws of Association.

Mr. ACKERS moved:—

That the alterations in the Laws of Association as recommended by the Business Committee, and adopted by the Council on November 6th, 1900, be now formally approved; and that the following addition be made to Law No. 37: "The 'Council' shall have power to fill up any vacancy caused by the death, resignation, or incapacity to act of any such officer."

He said that no one had applied for a copy of the rules, as it was proposed to alter them, and therefore he took it that the members were all satisfied with the careful way in which the Business Committee had gone into the question of alteration. It would be seen from the rules that the object of the Association was in no way interfered with by the change. The vast majority of the alterations were simply verbal ones to make perfectly clear what each rule and each division of a rule meant. The alterations had taken a very considerable time. Two members of the Business Committee went into the question very fully. Both those gentlemen were now present. The alterations which they drafted were submitted to the general body of the Business Committee, and the Business Committee examined into the matter very carefully. The result was now before the Chamber. Some of the alterations had been noted by the Secretary in a Memorandum; but there were other alterations which were not noted in that Memorandum. He (Mr. Ackers) would answer any question which any member might wish to put or give any explanation which might be desired with reference to the alterations. The only point to which he should like to especially draw attention would be found on page 9 of the Laws of Association in Rule 34, which dealt with the question of the voting powers of Associated Chambers who sent more than one annual deputy. That was a very difficult matter to be dealt with, as would be seen when he mentioned that for something like twenty years proxy forms had been carried by secretary after secretary from the office of the Chamber to the meeting-room, and that in no case had any form been used. Therefore he did not think that the matter was worth much discussion. However, the Business Committee recommended that where two deputies were sent they could only give one vote each. Where one deputy was sent that deputy was to be allowed to vote according to the whole voting power of his Chamber. That, he believed, was the only contentious point which he had to mention.

Mr. MIDDLETON seconded, and the resolution was adopted.

Annual Report of the Council.

The CHAIRMAN having formally moved the adoption of the report,

Mr. CLARE SEWELL READ suggested that in future the names of honorary members should stand in a prominent place in the list of subscribers.

The CHAIRMAN stated that Mr. Read's suggestion would receive the consideration of the Business Committee.

Colonel MAUDE (Craven Agricultural Society) said that if he was in order he should like to draw the attention of the Council to two subjects which were dealt with in paragraph 40, namely, the Boundary Fences Bill and the Law of Trespass. These were two subjects which concerned agriculturists in the North very considerably in the neighbourhood of the large manufacturing centres of Yorkshire and Lancashire. The two subjects which he had mentioned were dealt with in the report in a small paragraph of five lines. They were dealt with year after year, but nothing further was done with regard to them. He wished to ask whether anything could be done to induce the Parliamentary Committee to get the subjects taken a step further. The Boundary Fences Committee had met from time to time, and a Bill had been drafted by Mr. Morrison, and there, he believed, the matter rested. He had understood from some members of the Parliamentary Committee that Mr. Morrison's Bill did not give satisfaction to all the agricultural members of Parliament. If that was so would it not be better for the Boundary Fences Committee to meet again and reconsider the Bill and then get the Parliamentary Committee to make some effort to pass a Bill through the House of Commons? With regard to the law of trespass it was a subject which concerned them very much indeed in the neighbourhood of the large manufacturing towns in the North. Farmers suffered a great deal, and they were not able, as a rule, to make their voices heard. The grievance was greater and more real than many agriculturists in the South of England might imagine. He should like, if possible, to have some assurance from the Parliamentary Committee that the question would be dealt with.

Mr. WILLIAMS (Monmouthshire) said that he was a member of the Boundary Fences Committee, and he did not know of any subject of more importance among the smaller questions which they had to deal with than legislation with regard to boundary fences.

The CHAIRMAN said that no doubt the Parliamentary Committee would be willing to consider again the question of boundary fences, but the question was only a burning question in the grass counties. The farmer who had arable land would not care to be forced to put up a fence round his arable land, and it might be a great hardship to him to have to fence his field against his neighbour's cattle, because it happened to be an outside field. Under the present law, neighbours had to restrict their own cattle to their own fields. Mr. Morrison did draft a Bill, as Colonel Maude had said; but it was no good for private members to draft Bills unless they were fortunate enough to get a place in the ballot.

Sir MARK STEWART, M.P., ( ), said that the cases of grievance were, he took it, few and far between. He had had a great deal of experience of the question of boundary fences in connection with his own property, and he could only say that if there was any legislative enactment on the subject, the burden would be enormous on the respective landlords. The farmers made no real complaint. As a rule, very few sheep strayed on to strange farms. If this matter were dealt with by Parliament, and an Act was passed on the subject, there would be a tremendous outcry against it. No doubt it would be primarily on the part of the landlords. Generally speaking, the matter was fairly adjusted between the landlords.

Mr. LIPSCOMB said that Mr. Morrison had kindly allowed the Committee which was formed by this Chamber to have an interview with him on the subject when he withdrew the Bill. He (Mr. Lipscomb) was surprised to hear that the matter should be considered as one of very little importance in any part of the country, even in the North. Unfortunately, however, they had lost Mr. Morrison, who was the promoter of the Boundary Fences Bill, as being no longer a member of the House of Commons; and therefore he thought it most opportune that a gentleman coming from the same district as Mr. Morrison should draw attention to the subject.

Mr. WESTON (Bucks) said that agriculturists were not all agreed on the boundary fences question, but they were nearly all agreed on the subject of the law of trespass. He thought that the latter was quite as important as, or even more important than, boundary fences. They were all agreed that agriculturists should have the practice of their land.

Mr. JASPER MORE, M.P., congratulated those present the Chairman upon the task which he had undertaken in putting upon him. The last thing which was told to him Mr. More) in his constituency was that a number of gentlemen had determined never to vote either for a Liberal or Conservative again until the question of boundary fences had been settled. If the strain was put upon the shoulders of Mr. Jeffreys, he hoped that he would prove equal to bearing it as he had been on former occasions.

The CHAIRMAN said that they all regretted very much to lose the services of Mr. Morrison, who carried the Boundary Fences Bill at his own expense. He could assure the Chamber that this subject would be taken up by the Parliamentary Committee if he remained a member of it. There were two Bills which they wished to bring forward soon, and a ballot would be taken upon this question also.

Mr. MARRIAGE (Essex) said that he thought the gentlemen from East Anglia would agree that a Bill defining boundary fences was very much required.

Mr. FRANCIS asked permission to call attention to a subject which he had often brought before the Chamber. He had given notice that he wished to bring it forward, and he thought that he was entitled to a few minutes. He had given notice that he should call the attention of the General Meeting to the evils resulting from open pools. (Laughter.)

The CHAIRMAN said that until they had decided upon the motion before the meeting they could not deal with any other question unless it was included in the report.

The motion for the adoption of the report was then carried.

Agricultural Rates Act, 1896.

The CHAIRMAN said that the resolutions before the Business Committee on the previous evening were very numerous, and very unanimous with regard to the renewal of the Agricultural Rates Act.

The Agricultural Rates Act.

Mr. LIPSCOMB moved:—

That this Meeting is of opinion that, pending the much revision of the whole system of Local Taxation, which is urgently required in view of the altered position of land and personal property, it is most desirable that the Agricultural Rates Act of 1896 should be renewed as a minimum of what is justly due to the occupiers of land.

He said that they had discussed this question so often that they might take it for granted that it had the approval of everybody except those people who had made so much money by agriculture that they did not require relief. To the resolution as drawn by the Business Committee, and as it stood on the agenda, he had added the words "as a minimum" because, unless they raised their voices to show that they were unwilling to accept anything less than what was given in the Agricultural Rates Act, it might be that they would not get all that they had had hitherto. He thought that it was almost conceded that agriculturists had only received a minimum of what they were justly entitled to.

Mr. TURNER (Cambridgeshire), in seconding the resolution, thought that, on the whole, the Chamber had hardly given sufficient acknowledgment to Mr. Balfour and the Government for the important relief which was given to agriculturists in the Agricultural Rates Act. He remembered going with a deputation to Mr. Balfour, when Mr. Balfour had told them that agriculturists should certainly have some real relief given to them by the Government. The relief which was given did not go so far as they wished, for some of them thought that they ought to have a remission of three-fourths of the rates. He had always said that the land of the farmer was stock-in-trade, and was not a proper subject of taxation. But pending any [illegible] which might be made by the Royal Commission, they had the strongest right to ask that they should have a continuance of the relief which had been granted. He hoped and trusted that no Government would be mad enough to attempt to take away the relief which they now had.

Mr. KENRICK (Staffordshire) said that the Council met on Saturday last, and gave him very strong instructions as to what he could do to push this matter forward. All the members of the Council stated that the relief had been very acceptable to them personally. It had been said by a great many people that the landlords would receive the whole of the

benefit, but as far as the members of his Chamber were concerned there was no instance known in which the landlord had reaped any benefit from the Act. His Chamber agreed that the farm buildings ought to be included with the land, but as far as the houses were concerned the opinions of the members differed. The majority were of opinion that the houses ought to be rated as before, but they all held that it was a great injustice to include farm buildings with the houses. The farm buildings were of no use without the land, and the land was of no use without the buildings. In conclusion, Mr. Kendrick expressed his pleasure at the very many public and private manifestations of sympathy with the late Chairman of their Chamber, Mr. Carrington Smith.

Mr. CLARE SEWELL READ said that he quite agreed with Mr. Tebbutt in his statement that this Chamber, and agriculturists generally, had not been forward enough in expressing their thanks to the Government for the great measure of relief from local taxation which had been given to them. This was by far the greatest and the best boon that agriculture had received, and they ought to remember, too, that their good old friend, Mr. Chaplin, was at the Local Government Board when the Agricultural Rates Act was passed and was the Minister which passed that measure. He wished particularly to emphasise what had fallen from the last speaker. They would be told again and again that the Act was a dole to the landlords; but it had not been so hitherto, and he thought that tenant farmers were sufficiently strong and independent to see that they themselves reaped the benefit. If they had had the money hitherto in their pockets they would keep it there. He believed that there had been hardly a single instance in which the landlord had benefited by the remission of the rates unless he happened to be unfortunate enough to be farming his own land. He did not believe that the landlords of the country had taken any advantage whatever of the remission which the Government had intended for the benefit of the tenant farmer. (Cheers.)

Mr. WESTON (Bucks) agreed that the Act was a minimum of what they ought to accept. No doubt it had been a great boon to a large number of agriculturists, but agriculturists had never gone far enough. In the olden times the rates on land in most of the parishes were from 2s. to 2s. 6d. in the pound. That would represent the whole of the parish rates, including highway rate, poor rate, county rate and sewer or sanitary rate. Now there were such multitudes of local bodies and Councils the rates had risen to about 4s. in the pound, so that the Agricultural Rates Act only brought the rates which agriculturists had to pay to about the same as they were in former times. There was no doubt that there were certain burdens on the parishes which ought to be national, such, for instance, as education and the maintenance of the poor. There was a great deal to be said on those points, but he would not enter into them. Land was most unjustly taxed. There was no other industry which was taxed by local rates for an increased output; but if a man took a farm at 7s. 6d. an acre on lease and by his industry increased the output to 100 or 200 per cent. he was immediately assessed to local taxation upon his increased output. Agriculture was the only industry which was treated in that way, except railway undertakings. Railways were taxed not only upon the value of the rails which they laid down and the value of the land, but upon the increment which they earned. What they really wanted was a new valuation Bill and a re-adjustment of local taxation. He heartily supported the resolution.

Mr. NEWTON (Yorkshire Union of Agricultural Clubs) said that it was stated the other day at an agricultural meeting that it was the tenant of the high-rated land that would get the benefit of the Agricultural Rates Act, and not the tenant of the poor, low-rated land. No doubt that was correct; but he very much doubted whether any other plan could have been adopted that would not be open to more objection than the one which had been embodied in the Act. He should not be surprised if the recommendations of the Royal Commission, when the Commission reported, were also open to objections.

Mr. MULLINS (Gillingham Farmers' Club) suggested that the words "on a permanent basis" should be inserted in the resolution after the word "renewed."

Mr. BARFOOT-SAUNT, referring to the words "as a minimum," in Mr. Lipscomb's resolution, said that he did not think that it was advisable on the part of the Chamber to make any proposal as to what should be done until the Report of the Royal Commission had been received. The Commission consisted of experts on the subject of taxation. It would be advisable to wait to see what the Government would do with the Report. The Government would not take any notice of what the Chamber said till they received the Report of the Commission.

Mr. POUPART (Market Gardeners, Nurserymen, and Farmers' Association) said that he appeared at the Chamber to-day for the first time, and he came as the representative of his Association, which had recently become associated with the Chamber. That body had sought to be associated with the Chamber partly on account of the working of the Agricultural Rates Act. It was intended by Mr. Chaplin that market gardeners who grew their produce under glass should have the benefit of the Agricultural Rates Act; but it had been decided by the High Court, the Court of Appeal, and the House of Lords that they were not entitled to their remission. The only member of the Court of Appeal who was in favour of the remission being granted to market gardeners who made use of glasshouses was Lord Justice Vaughan Williams, and he very strongly laid down his opinion that the buildings of a farmer ought not to be rated. He said: "What is the good of a farm without the buildings in which the farmer does his work?" He (Mr. Poupart) said that it was wrong that, according to the decision of the House of Lords, glass buildings should be excluded from the benefit of the Act. He objected to the Agricultural Rates Act being called a measure of relief. It was simply a measure of justice, and nothing else. Land had always been a commodity which the Government had turned to for the purpose of taxation. The poor rate was originally paid by the tithes, and the relief of the poor was laid upon the clergy.

The CHAIRMAN said that the question was whether the Agricultural Rates Act should be renewed, as it would come to an end next year. Agriculturists did not wish to be left in the lurch by the expiry of the Act.

Mr. KIDNER (Taunton) supported the resolution as it stood upon the agenda-paper. They were simply asking for a renewal of the Act. He thought that it was utterly useless for them to ask for any alteration in the way of reform pending the Local Rating Bill, which they expected to be brought in. He would ask Mr. Lipscomb to withdraw the additional words.

Mr. ACKERS hoped that Mr. Lipscomb would not do so. Mr. Clare Sewell Read had admirably pointed out that it had been asserted that the Rates Act was a sop to the landlords, whereas everybody who had had any experience in the matter knew that the tenant farmers had benefited by the Act, and that fact was all that Mr. Lipscomb's addition wished to emphasise. It nowhere suggested anything different; it only stated what they knew to be the fact, and it took away to a certain extent the argument against the renewal of the Act. The argument was brought forward on more than one platform during the General Election that the Act was a sop to the landlords.

Mr. WILLIAMS (Monmouthshire) came from a county where, in the exigencies of political controversies, the assertion was made that the Act was a sop for the benefit of the landowners, and perhaps more strongly than in most counties. A good deal of land had changed hands in his county in consequence of commercial prosperity, but he did not know a single instance where the landlord had absorbed the relief given by the Act. But, supposing it was otherwise, they in that Chamber represented all the interests of agriculture. He looked back to the day when Sir Massey Lopes carried a resolution in the House of Commons, in 1872, to the effect that the local taxation then existing required alteration. Sir Massey Lopes used strong words, and emphasised them strongly. It used to be said that as long as real property escaped legacy and succession duty, it was right that it should bear the local taxation of the country. But that retort to the arguments of agriculturists had been removed, and, therefore, even if it was true that the owners of the soil had absorbed the relief afforded by the Agricultural Rates Act, it would be only just, having regard to what had been put upon them. He heartily supported the resolution, and he rejoiced to see the words "pending a thorough revision of the whole system of local taxation."

The CHAIRMAN said that probably members of the Chamber had heard the other day that somebody wrote to Mr. Balfour, the leader of the House, saying that on account of the greater prosperity of agriculture—("Oh! Oh!" and laughter)—he thought that the time had come for the Act to be dropped. It was important that the resolution should be passed and sent to the First Lord of the Treasury and the other Ministers. He might tell Mr. Kendrick, with regard to buildings, that it was within the memory of the Chamber that he proposed in the House of Commons an amendment in the direction indicated, but the House of Commons would not adopt it.

The resolution was then carried unanimously.

On the further motion of Mr. LIPSCOMB, it was resolved that a copy of the resolution be sent to Ministers as usual.

Local Authorities and Tuberculosis.

The next question upon the agenda-paper was "Tuberculosis and the Working of the Model Milk Clauses in the Private Bills of Local Authorities."

Mr. KIDNER (Taunton) said that Mr. Middleton (Cleveland), being obliged to leave, had asked him to take charge of the resolution on this subject. He therefore moved:—

That this meeting, while approving the Appeal Clauses included in the Milk Clauses of the Municipal Acts of last Session, considers that pending the hearing of such appeal much loss and inconvenience may be unnecessarily caused to dairy farmers, and it considers that any precautions necessary in the interests of public health should be prescribed by the Central Authority and applicable to the whole country. It also deprecates any Corporation having power to act outside its own area in the district of any other local authority, except on the order of two Justices sitting in Petty Sessions and having jurisdiction in each district, and certifying that such local authority, although requested by the Corporation to deal with the matter has neglected or declined to do so.

One object of the proposal was that there should be one distinct and satisfactory set of rules throughout the country, and the next point—the most important one—was that local authorities should be allowed, so far as possible, and so far as they could do it satisfactorily, to carry out their work without being interfered with by other local authorities. It was an objectionable thing that urban authorities should have power to go into another district and interfere with work which was being well carried on. It would be quite enough that the urban authority should have power to interfere, when it had been distinctly seen, and had been proved before two justices, that the second authority were not doing their work properly. In such a case there might be some justice in the interference in the interest of public health, but in any other case the interference was unwarrantable and ought not to be allowed.

Mr. WILSON (Stockton-on-Tees) seconded the motion. He agreed with the action which was taken a year ago in dealing with this subject. It was a very small thing that permission should be obtained from two magistrates before outside authorities should have jurisdiction in a district in the manner proposed.

The CHAIRMAN said that before putting the resolution he would ask Mr. Boyce, of the Local Government Board, who was present, to shortly explain what had been done. As a matter of fact, he believed that the chief thing in the resolution was that the permission to inspect in another district should be granted by two magistrates. In the Model Clauses the Order had to be granted by one justice residing in the locality. The power was not often put into operation. It agreed with what was containd in the Public Health (London) Act, 1891.

The SECRETARY, at the request of Col. Maude, read the resolution passed on December 10th, 1900, by the Council of the Craven Agricultural Society, who strongly disapproved of the powers contained in the "Model Milk Clauses" of the Acts of 1900, promoted by the County Boroughs of Bradford, Halifax, Sheffield, and Manchester, in so far as such clauses provide for the inspection of milk cows, cowhouses and dairies, and for taking samples of milk, and for the suspension of the milk supply outside their own boundaries, and submitted that where these clauses are sought by other County Boroughs it should be a condition precedent to the granting of such powers (a) that the County Borough applying for the same has effectively dealt with all cowsheds and milkshops in its own area and enforced the Cowsheds Order, as amended in 1899 there. (b) That the outside authorities to be affected have neglected to perform their duties in the same matters, especially after notice from the County Borough affected, or County Council.

The CHAIRMAN thought that they ought to consider the importation of foreign milk. It was a curious thing that English producers should have their milk inspected, and that there should be no inspection of foreign milk. Milk came in from France without any inspection whatever. That was a point which he wanted to urge both upon the Local Government Board and upon the Board of Agriculture. He was led to believe that the importation of foreign milk was increasing, and that the milk was distributed as English milk. This was not only a fraud, but a dangerous fraud.

Mr. BOYCE said that, with reference to the inspection of foreign milk, all he could say was that he would report to his Chief at the Local Government Board. He might refer to one point in the report of the Dairy Products Committee. Of course, the question of whether there should be public legislation or not was not one for him, but he thought that they might claim that the effect of the Model Clauses, which had been adopted in various cases, could not possibly be so detrimental to any interests as the clauses which were proposed by the local authorities, originally, in Leeds, Manchester, and elsewhere. He should like that to be clearly understood, because he was quite certain that there was only one idea in the mind of the then President, Mr. Chaplin, and he believed also in the mind of Mr. Long. Nothing was further from their intention than to prejudice the milk dealers. The objections to the Model Clauses, he believed, were, first, that a local authority was empowered to go outside its own district, and, secondly, that it was only needful to apply to one magistrate instead of two. He did not know whether the gentlemen who were present had seen the Memorandum which bore his signature, and which was presented to the Police and Sanitary Committee when they had the case in favour of the Leeds Clause before them on the Bradford Bill last year. The matter was adjourned on the Bradford Bill, and he submitted a Memorandum, showing the effect of the Model Clauses as proposed and inserted in 1899, and of the Leeds Clause as altered in 1899. That Memorandum set

out the proposals and the effect of the Model Clauses. It also set out the objections to the Leeds Clause, and it also showed that the question could not be dealt with, as was supposed, by any local authority without special legislation. Mr. Kidner had mentioned the question of the power of an authority to go outside its own district only being exercised in default. His Memorandum dealt with the whole of that point. No authority had the power to take samples of milk in order to detect disease without special permission. The only power which was at all similar was the power which the local authority had of making regulations under the Dairies and Milkshops Order, which enabled them to inspect the cattle of the dealers who supplied milk to their district, and prescribe precautions for the purveyors of milk, and so on. Therefore, in the exercise of the exceptional powers of the Model Clauses, there was no interference with the outside authority. There existed a difficulty in saying that a local authority had not done its duty. He would take the form of the Leeds Clause. In the first place, the Leeds Clause required that two justices should make the Order. There might be many cases in which a man in charge of a dairy might be uncertain as to whether there was tuberculosis or not, and in a case of that sort he could protect himself by notifying to a local inspector and getting inspection made. Then either the suspicion of the person in charge would be confirmed or it would be declared that the cattle were all right. That had been considered an important point. The Leeds Bill, by requiring an Order from two justices in petty sessions gave publicity. Supposing that it turned out that the cattle were all right, it would be surely very unfortunate that the communications made before the magistrates and the Leeds Corporation officials should be made public. That might damage the dealer unnecessarily. It seemed to him that it was desirable that there should be an inspection first, so that the authorities might avoid taking proceedings which might turn out to be unjustifiable; but without inspection it could not be found out whether there was anything wrong or not. There was a power in the Dairy and Milkshops Order of 1899 for all local authorities to make regulations for the inspection of dairies, but there was no power to compel the local authorities to do so, and if they did not make regulations no officer was competent to inspect. That was a case in which a local authority had power, but not necessarily had a duty imposed upon it. Difficulties would arise if the inspector of one district had, in the first place, to go to a petty sessional court in another district. That might lead to delay, and it might be absolutely necessary in the case of a dairyman who wanted to protect himself by being assured that there was no disease in his cattle. With regard to the point which the Chairman mentioned, that, in requiring only one justice, they followed the Public Health (London) Act, 1891, he would like to remind the meeting that at the present moment the whole country was subject to the Infectious Diseases Prevention Act, 1890, under which the medical officer of any corporation would have power to go all over the country and inspect and suspend a milk supply if he found it to be a source of infection. That Act did not include tuberculosis.

Mr. BEACROFT (Chester Farmers' Club) asked whether he rightly understood Mr. Boyce that if a farmer looked after his own interest, and watched his own stock, and feared that there was something wrong, he could apply to a local authority, and get them to send down to inspect the stock and give him a clean bill of health if there was no disease.

Mr. BOYCE replied that if a farmer thought any cow in the dairy was infected by anything which came within the definition of tuberculosis, he might, for his own protection, notify the fact, say to the medical officer of Bradford, for instance, if he sent his milk to that town; and then the Bradford authorities would, for their own protection, communicate with the farmer and inspect his cows.

Mr. BEACROFT asked whether the farmer would be all right if a man, in order to protect himself, applied to the authorities of Bradford, and they sent to inspect his place, and gave him a clean bill of health.

Mr. BOYCE said that the farmer would be all right as far as Bradford was concerned.

Mr. BEACROFT said that farmers wanted to be free from a disagreeable feeling that proceedings could be taken without their having a chance.

Mr. BOYCE said that that would be impossible. The authorities would have to prove the disease before any proceedings could arise. Could they prove it without inspection?

Mr. BEACROFT said that there might be a chance of the milk being contaminated after it left the farmer.

Mr. BOYCE: Assume that you sent your milk to Bradford, and a sample was taken of your milk at the railway station or elsewhere, and they found tuberculosis. They would communicate with you. You would then have to satisfy them that, as far as you are concerned, you are not in fault. They would come to you, but before they came you would have not only to take a sample, but to prove that there was tuberculous disease. Then, if they proved it, they could give you notice. They might find that the sample they took was tuberculous, and they might come to you two or three days afterwards and find your cows all right. They could not very well take proceedings against you, could they? They could not give you notice without saying that you were in fault.

Colonel MAUDE (Craven Agricultural Society) said that farmers yielded to no one in taking every step to insure the purity of milk, the pure delivery of it, and the pure production of it. The only thing which they objected to in the clauses was the method devised by the Local Government Board. He had had a conference with Mr. Boyce on the subject previously, and he felt that Mr. Boyce did not understand the difficulty which the farmers had. He (Colonel Maude) represented districts in Yorkshire which were surrounded by large county boroughs, and the result was that if the model milk clauses were carried out as they stood at present those districts would be subject to the invasion of an army of alien inspectors, who would come at any time they liked and impose their regulations on the farmers of the district, who were situated in rural district councils instead of in boroughs. The feeling on this subject was so strong in his district that the rural district councils throughout the West Riding had formed an association to fight the different corporations as they produced their Bills in Parliament. The first corporation they fought was Leeds. They fought it through the Commons, and in the Lords they got a satisfactory amendment introduced. It was that instead of the corporation getting an *ex parte* order from a magistrate, who might be a county magistrate living in a borough, and having no connection with farmers whatever, to go and make an inspection by a veterinary officer and condemn cattle and condemn milk, it was required that the order should be got in petty sessions from two magistrates of the district in which the sample had to be taken. That was an arrangement of which they could approve. The other amended clause provided that they could not go into the district without some cause being shown, such as that the District Council had neglected or refused to do their duty. They held that the Rural District Councils, as a rule, were well equipped with medical officers, sanitary officers, and surveyors, with as good qualifications, as the large boroughs were, and they did not see any reason why if they did their duty, they should be subject to the invasion of an army of officers from another district. In the district which he represented they would be subject to the inspectors of five different authorities, coming at different times, any day of the week, or any hour of the day, and making representations and condemning the cattle, and practically ruining the farmer in doing so. He might also say that in many cases town authorities had no conception of the requirements of country life. As to the air spaces that were required in the milk clauses, there was no fixed limit yet made. Nine hundred feet had been given in one case, and one authority had asked for eighteen hundred cubic feet of air space. Many of the dairies in his district were situated a thousand feet above the sea level. The requirement which he had mentioned illustrated how little country life was understood by the town authorities. The object which they sought was that outside authorities should not have power to interfere in any district unless it was shown that that district had neglected to perform their duty. If they had the Leeds clauses he thought they would be satisfactory. He believed that they were in every respect as good as the Bradford clauses.

Mr. KIDNER (Taunton Farmers' Club) said that the last speaker had stated very fully the objection to the outside urban authorities interfering in a district other than their own. It seemed to him that if they allowed one local authority to interfere unduly with another, the interference would be vexatious to the individual and demoralising to the whole system of local authority.

The CHAIRMAN wished to ask Mr. Boyce how often the clause in the Public Health (London) Act, 1891, had been put into force. London consumed a great quantity of milk from various parts of the country. How often had the powers of inspection been exercised under the order of a magistrate? He really thought that the whole thing was rather a bugbear. The farmers had been afraid of the inspection, but he would point out that the inspection could only be made after the order of a magistrate and on the application of the Corporation of the town where the milk was sold. A former Bill which he was instrumental in stopping in the House before the local authorities seemed to take any interest in the matter spoke of clinical tuberculosis. That might be anything. That was altered to tuberculosis of the udder. There was not the slightest doubt in his mind that the milk from a cow which showed tuberculosis of the udder ought not to be consumed.

Mr. BOYCE replied that he did not know how often the Act empowering London to send down an inspector had been put into operation, as the Local Government Board had nothing to do with the enforcement of the Act. The London Act had been in force since 1891, and the Disease Prevention Act since 1896. There had never been any complaint of the Acts as far as he knew. He wished to point out that the whole thing turned on the question of the duty of the outside authority. The outside authority had no duty in this particular matter at all; but they had powers. That was the whole point, and it was a misapprehension of the matter which had given rise to so much difficulty.

The CHAIRMAN said he supposed that he had better put the resolution, but he did not think that it would do much good. He was rather afraid that it contradicted something which they had passed already. What was suggested by the Business Committee as the motion was one of the paragraphs in the Report of the Dairy Products Committee, which was to the effect that general legislation should be introduced by the Government, and made applicable to the whole country. It seemed to him that it would be better to propose that paragraph than to pass the resolution which had been moved. The paragraph could do no harm, and it would strengthen the hands of the Committee, and be better than the long motion which was before the meeting, and which was rather contradictory of something already passed.

Colonel MAUDE asked what effect would be given to the resolution.

The CHAIRMAN said that the Report would be sent to the Local Government Board and to the Board of Agriculture, and therefore those bodies would have two propositions before them, the resolution contained in the Report of the Dairy Products Committee, and the resolution now before the meeting. He would suggest that the second resolution of the Dairy Products Committee's report should be passed. He thought that it would be much more sensible.

Mr. BEECROFT (Chester Farmers' Club) then moved and Colonel MAUDE (Craven Agricultural Society) seconded the Resolution contained in paragraph 2 of the Report of the Dairy Products Committee as an amendment to the motion before the Meeting.

Mr. ACKERS said that that was the opinion of the Business Committee last night, but they must not forget that they are now the General Meeting of the Chamber, and not the Council, and therefore that the Business Committee had no power to frame a resolution for the Meeting.

Mr. WILSON (Stockton-on-Tees) said that Mr. Middleton had left the matter entirely in his hands. They had had the matter thoroughly discussed and he would therefore ask leave to withdraw the original resolution in favour of the amendment, in deference to the advice of their Chairman.

The amendment was then put as the substantive motion, and carried unanimously, as follows:—

> That this Meeting is strongly of opinion that the question of Tuberculosis and the Milk Supply should not continue to be dealt with in the Private Bills of Municipal and other Urban Authorities, but should be the subject of general legislation introduced by the Government and made applicable to the whole country.

On the motion of Mr. BOWEN-JONES (Shropshire), it was resolved that a copy of the resolution should be communicated to Ministers as usual; and on the motion of the CHAIRMAN, seconded by Mr. WILSON (Stockton-on-Tees), a cordial vote of thanks was passed to Mr. Boyce for his attendance, and for the explanations he had given.

The CHAIRMAN, in reply to a question by a member as to foreign inspection, said that Mr. Hanbury assured him in the House of Commons on the previous day that the question of the inspection of foreign milk was engaging the attention of the Board of Agriculture. He (the Chairman) had also mentioned the matter to Mr. Boyce, and he hoped that something would be done before long.

Swine Fever.

Mr. C. B. DAVIES (Cheshire) introduced the Question of the Registration of Pig Dealers, and the Inspection and Disinfection of their Premises." He moved:—

> That this meeting is strongly in favour of the Registration of Pig Dealers and the Inspection and Disinfection of their Premises.

He thought that the Board of Agriculture had not quite succeeded in stamping out swine fever. Cases occurred time after time, and there appeared to be some source of contagion upon which they had not been able to place their hands at the present, or some risk of infection which they had not guarded. Their vigorous methods had been successful with regard to other diseases in the schedule, but they had failed up to now with swine fever. He believed that that was the opinion of the Board themselves. This matter had been very seriously brought under consideration in Cheshire. All the Cheshire markets had been closed against the sale of pigs during the last six months, and were only re-opened last week, Mr. Hanbury having withdrawn the restrictions. He believed that Cheshire would take a kindly view of Mr. Hanbury in the future. The breeding of pigs was a very important item in dairy farming, and a difficulty of disposing of the pigs caused a very serious loss to Cheshire farmers. He believed that one very important cause of the continual outbreaks lay in the present lack of power of the Board of Agriculture to inspect the premises of pig dealers and order cleansing and disinfection. Many pigs passed through the premises of a dealer every year, and some supervision ought to be exercised over the premises. One lot passing through might leave germs of disease behind them, and thus healthy pigs might become affected. The Cheshire County Council had ample evidence that many of the outbreaks occurred among pigs that had passed through the

hands of dealers, and therefore he thought that he was justified in supposing that the premises of pig dealers should be under the same regulations as other places.

Mr. KENDRICK (Staffordshire), in seconding the motion, thought that it was a step in the right direction, but his opinion was that it did not go far enough. He should certainly include farmers as well as pig dealers. He was one of those who believed any farmer could breed swine fever, particularly where there was a lot of young pigs. Pig dealers distributed pigs up and down the country, and in that way distributed disease.

Mr. CLARE SEWELL READ hoped that it would not go forth that the meeting endorsed what had just fallen from the last speaker; that is to say, that fever could be engendered and produced by filth, unless there was the virus present. He did not believe it at all.

Mr. BALDEN (West Riding) said that this matter was discussed at the West Riding Chamber on Friday, but the members had great difficulty in deciding who would be a pig dealer, and where the line ought to be drawn between a pig dealer and a farmer.

Mr. WARDLE (Whitchurch Dairy Farmers' Association) supported the motion. In his opinion all farmers ought to have their piggeries whitewashed at least twice a year, in the same way as cowsheds when the milk was sent to the towns. If this was carried out, no doubt there would be less swine fever. Some farmers were practically small pig dealers. Where the line was to be drawn he failed to see.

Mr. T. DAVIES (Wirral Farmers' Club) said that some time ago it was stated that swine fever could only be taken by contagion. Inspection and whitewashing seemed to him to be quite unnecessary.

Mr. BOWEN-JONES said that if germs of the fever were left in a pigsty, the contagion would be engendered. Therefore it was necessary to disinfect.

Mr. J. W. RYLAND (Warwickshire) asked whether the mover intended to include in the word "premises," the carts which were used for carrying pigs about.

Mr. C. B. DAVIES replied that there was at present a law enabling local authorities to order the cleansing of pig dealers' carts.

The CHAIRMAN: And of farmers' carts as well.

Mr. BEECROFT (Chester Farmers' Club) asked the mover to go a little further. In his experience farmers, as well as pig dealers, were likely to spread the disease. He did not think that pig dealers should be saddled with inspection more than the farmers. Some farmers dealt very largely in pigs. Something ought to be done also with regard to butchers. He would asked the mover whether he would alter his motion to the following: "That this meeting is strongly in favour of the registration of farmers, butchers, and others who deal in pigs, and the disinfection of their premises."

Mr. MULLINS (Gillingham Farmers' Club) did not believe that the adoption of the resolution would tend much to the eradication of swine fever. In Dorsetshire they had got rid of swine fever altogether by simply having orders obliging the owner of store pigs to have them in his possession for 28 days before he could sell them again. That had cut the ground from under the feet of pig dealers. The reason that swine fever had not been abolished like pleuro-pneumonia and foot and mouth disease was that the measures adopted for swine fever had not been uniform throughout the country, and that they had been applied too spasmodically. Dorset had been rendered clean for years from swine fever by the 28 days' Movement Order. His club had unanimously passed the following resolution: "That in the opinion of this club, the only method to eradicate swine fever is that every owner of pigs should be compelled to have them in his possession for not less than 28 days before disposing of them, and that in the event of an outbreak, all pigs on the premises should be compulsorily slaughtered and compensation paid." That Order acted as a registration of the movements of swine, so that if an outbreak occurred, it was easy to follow up the origin and ascertain where the outbreak occurred. He did not think that the resolution before the meeting would have much effect. They would be met with the objection, "Where are you going to draw the line?" Some men who sold pigs would not care to be called pig dealers because they simply bought a few pigs and sold them again. He hoped that the Board of Agriculture would take up the question, and adopt the Dorset method if they could see their way to do so.

Mr. LIPSCOMB said that the last speaker would kill off all the pig dealers themselves. He thought that there was a mode of defining a pig dealer. A man who did not keep his pigs for 28 days should require registration as a pig dealer. That would not hit the farmers. A great difficulty was caused in his district by the enormous number of cottages situated near the railways, and having old styes made of railway sleepers. He would defy any man to disinfect styes of that kind. There would be an enormous difficulty in making everybody who kept pigs disinfect, unless the poorer class of people were deprived of that kind of habitation for their pigs which at present they used.

Mr. WILLIAMS (Monmouthshire) said that, although under the Dorsetshire Order a man was prevented from moving pigs which he had purchased before the expiration of 28 days, yet he would be free to remove pigs which had been in contact with the pigs recently brought in.

The CHAIRMAN pointed out that the resolution was in very general terms. He thought that the Board of Agriculture could define what a pig dealer was. He saw no reason against passing the resolution, because it pointed to inspection and disinfection for the purpose of stamping out swine fever.

Mr. WILSON (Stockton-on-Tees) said that farmers sometimes went into a market and bought pigs and sold them the same day, but they were not pig dealers. They did not always keep the pigs for 28 days after purchasing them. The resolution would interfere with freedom of trade. The question was whether it was worth while to adopt this measure of inspection and disinfection when they found from the returns that the disease was diminishing. The reduction in the number of cases was going on satisfactorily. He thought that they had better let the matter go by the board until they got stronger representations from the different Chambers. It seemed to him at present that very few resolutions had been sent from the Chambers on this matter.

Mr. COATE (Blandford Farmers' Club) said that he quite agreed with every word that Mr. Mullins had said. The Council of Dorset had been very strict with regard to swine fever, and had stamped it out by the twenty-eight days' Movement Order. He believed that if other counties did the same as Dorset they would hear the last of swine fever.

Mr. MULLINS, in answer to the point mentioned by Mr. Williams, said that, of course, when a Dorset dealer brought fresh pigs into his premises, he had bought them from an owner who had already had to keep them for twenty-eight days.

A show of hands was then taken, and the resolution was carried by eleven votes against four, and was ordered to be communicated to the usual Ministers.

Votes of Thanks to the Chairman and Vice-Chairman for 1900.

The CHAIRMAN (Mr. Jeffreys, M.P.) said that, in the ordinary course of events, Mr. Grant-Lawson, the Vice-Chairman, would succeed to the Chairmanship for next year, but as he had taken office under the Crown, he had intimated his inability to do so. He (Mr. Jeffreys) wished to propose a vote of thanks to Mr. Victor Cavendish, the Chairman for the year, and also to Mr. Grant-Lawson, the Vice-Chairman, for their services. Both Mr. Victor Cavendish and Mr. Grant-Lawson had been very regular in their attendance. He would couple with the vote of thanks the sincere congratulations of the Chamber upon their appointment to offices under the Crown.

Mr. LIPSCOMB seconded the motion, and it was carried unanimously.

The proceedings then terminated.

THE DAIRY.

The Importation of French Milk.

In the House of Commons, on Tuesday, Mr. Hanbury, in reply to a question by Mr. Jeffreys, said it was the case that a certain quantity of French milk was being imported into this country. Whether any offence against either the Merchandise Marks Acts or the Sale of Food and Drugs Acts had been committed he was not as yet able to say, as the trade had recently assumed a new form. The Board of Agriculture was making inquiries into the representations they had received on the subject in co-operation with the Board of Customs. Though there was no power to prohibit importations, he could assure his hon friend that, as regarded imported milk found to be adulterated, or sold under a false description, he was doing everything in his power to secure a strict compliance with the requirements of the law.

Tuberculous Beef at the Central Market.—David Smith, a small farmer, of Swarkestone, near Derby, was at Guildhall, on Tuesday, fined £20, and ordered to pay four gineas costs, with the alternative of two months' imprisonment, for having sent four pieces of tuberculous beef, which was intended for sale as human food, to the Central Meat Market. Sir Horatio Davies said that the citizens of London must be protected from being poisoned by such stuff as the defendant had sent to market.

Selling Poisoned Grain. — At the Cambridge Borough Police Court on the 8th inst., John Alsop, of Lakenheath, pleaded guilty to selling poisoned grain in the Cambridge Corn Exchange. The defendant being suspected. Detective Marsh procured a man to make a purchase of 1s. worth of grain, which on being analysed was found to contain strychnine in the proportion of seven grains to the pound. Defendant pleaded that he was patronised by leading gentlemen and magistrates, who used the grain for destroying vermin. The magistrate's clerk stated that the defendant had been previously convicted of the same offence on eight occasions. He was now fined £5 5s. and £3 1s. costs, in default one month's imprisonment.

Transactions in Store Stock.

[From the Irish Department of Agriculture and Technical Instruction.]

The supply of cattle at Galway Fair, held on Monday, was small, but quite sufficient for the demand, which was dull throughout. Some conditioned pollies got well placed, also calves and springers, but all others were difficult to sell, and prices showed a drooping tendency compared with recent fairs. There was a fair supply of sheep, but the demand was exceptionally dull, and a great many lots remained unsold. Quotations:—Calves, second class, £4 to £5 5s.; third class, £2 17s. 6d. to £3 15s. Yearlings, second class, £6 10s. to £7; third class, £4 2s. 6d. to £5. Two-year-olds, second class, £7 10s. to £9 15s.; third class, £5 15s. to £7. Three-year-olds, second class, £10 5s. to £13; third class, £7 10s. to £9. Springers, second class, £12 10s. to £14; third class, £8 15s. to £13. Lambs, second class, £1 to £1 5s.; third class, 15s. 6d. to 18s. Over 12 and under 24 months old, second class, £1 10s. to £1 12s. 6d.; third class, £1 5s. to £1 7s. 6d. Two years old and over, first class, £2 5s. to £2 7s. 6d.; second class, £1 14s. 6d. to £1 16s.

Balla Fair (Co. Mayo) took place on Wednesday. There was a small supply of stock, which met a slow demand, and prices showed a downward tendency. Prices:—Calves, second class, £3 10s. to £4 10s. Yearlings, second class, £6 10s. to £7 15s.; third class, £4 10s. to £6. Two-year-olds, second class, £8 to £10 15s.; third class, £5 10s. to £7. Three-year-olds, third class, £8 to £9 6s 8d. Springers, second class, £13 to £15; third class, £8 10s. to £10 10s.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending Dec. 8th, 1900:—

| | | |

FARM PROSPECTS.

Durham.

Excessive rain has much delayed all farm work, which is now a good deal in arrears. Some portion of the potato crop is still in the ground, and only a limited quantity of turnips have yet been stored. The unfavourable weather has also prevented wheat-sowing to some extent; the usual autumn acreage has not been planted. Where early sown the plant looks well, but in late districts it has suffered. The weather and disappointing prices have led farmers to delay threshing, and so far they have marketed but little grain.—R. (December 13th).

Gloucestershire.

I should think the land in this neighbourhood never was in better heart than it is at the present time. Wheat is looking well. Roots are good. Work is fairly well on. Pastures are looking healthy. Stock of all kinds have done well. The drawback is prices, and no wonder, seeing we have to meet in the market the untaxed surplus produce of the whole world. Why tax the home producer and let everybody else into the market free? Englishmen do not want favour, but they do want fair play, and certainly ought to have it.—J. D. (December 13th).

We have experienced a rather stormy period of late, but the land is still firm and healthy; the pools are mostly filled again. The wheat sown this autumn is looking grand, but it is a very unprofitable crop at the present price, and it points to a lot more land going down to grass. A lot of thrashing has been done in this district, and the yield varies very much from, say, six to twelve sacks per acre. The very rough weather early in August brith'd a lot of corn out. The pastures afforded a fair bite for the stock well up into November, and the older animals have done well, especially where allowed a good supply of the old hay, which is in most cases very plentiful. In some cases, however, there has been a

Great Loss with Calves.

of the present year dying off by the dozen, simply for the want of a fair start. Calves really want two pounds of cake a day till they are a year old. Husk has also been prevalent this year more than usual. Milk is scarce, and there is a lot of enquiry for milch cows at good prices. Butter is selling well, but the supply of cheese exceeds the demand. Fruit has been plentiful, and has yielded a lot of cider. The labour question, combined with ever increasing rates and taxes, seem to be the bugbear of the British agriculturists. I trust our legislators will be able to devise a plan to put the

Maintenance of the Highways.

more upon the users, and also allow the farmer to convert his barley to whatever use he likes, the same as his apples, without being on a footing with brewers for sale. With a great Conservative and Unionist Government surely these reforms could be easily carried *nem. con.*—J. W. (December 14th.)

Middlesex.

In the Harrow district we have had an unusually mild month, which seems that it will continue up to or beyond Christmas. The rains have filled the ponds, and I see nothing to prevent an excellent coming season, not only for the pastures, but the arable. It seems that we are to have mild winters for a series of years long yet to come, whilst the polar attraction is westward, which will continue yet for some years, so that it will be for our children, now being born, to experience the severe winters of which our grandfathers used to speak, and which will return when the polar attraction is in the extreme east. Taking a review of the meat trade for the closing nineteenth century, I am bound to confess that my ideas differ from many, inasmuch that I think meat was never so dear as of late, if quality and all things are considered. It was an old saying in years gone by that to make sheep pay the grower should have two fleeces and two years' manure in the fold; then we had the grand old Hampshire, Oxford Down, and other mutton. Now we have practically no mutton, for how can we expect mutton, or, rather, good meat, from the produce of ram lambs that have now finished with the ewes, and themselves not yet twelve months old? We get no scrags, no backs, no loins, and call this mutton; but can it compare with that from the sheep that had yielded two fleeces and been folded for two years. Look again at the lamentable falling off in our beef. Practically this Christmas we have no beef, and are depending on the United States and Australia for the very suet for our Christmas puddings, yet our markets are quoted at prices satisfactory to sellers and up-to-date averages. The butchers really buy and kill store beast and call it beef, and say their customers will it so; and if one watches the young men at the City luncheon bars there seems some truth in it.—F. K. (December 14th).

North Lancashire.

Since we last reported to you on the prospects in this district there has, we regret to say, been no change, for the rain which we had reason to complain of has remained constant in its attentions. Since the middle of September we have had but one week's continuous fine weather, and if the theory taught from the Rothamsted experiments has any foundation, we very much fear next year's crops will suffer from this continued wet. Fortunately, this district is not a great wheat-grower, or we should have much more reason to complain, as sowing would have been next to impossible.

The weather has been mild and favourable to the stock feeders, saving their stacks from possible severe weather later. The Christmas sales of fat cattle have been very slow, and prices considerably worse than last year. If there is not some very appreciable reduction in the price of lean stock as compared with fat, then there is going to be no margin for the feeder.—R. S. (December 14th).

Foreign Prospects.

FRANCE.—With slight exception, farmers appear to be satisfied with wheat crop conditions.

GERMANY.—There have been a few frosty days and nights, otherwise weather was mild and favourable to autumn-sown cereals. The output of the Prussian wheat crop, officially announced this week, exceeded expectation, and had some effect upon trade opinion, the market keeping dull, synchronising, as it did, with weaker American advices. The open season checking consumption of bread-stuffs and supplies of potatoes being abundant, demand for wheat and rye is reduced to moderate dimensions.

HUNGARY.—Crop reports are said to be satisfactory—weather rainy and mild. Budapest market has not been particularly active; nevertheless, value has not lost appreciably during the week.

RUSSIA. Weather mainly normal, and in mid-winter it stands to reason that nothing can be said about the autumn crops, in most districts well covered with snow.

UNITED STATES. The *Cincinnati Price Current* says that there is little that is new concerning the wheat crop which generally compares favourably with or better than a year ago. The weather is favourable for the curing and marketing of maize. The grain movement is holding well the previous average.—*Dornbusch.*

Thame Christmas Show and Sale was held on Tuesday, and with fine weather attracted a very large company. The entries throughout, both for the show and sale, exceeded those of any previous year. The show animals numbered thirty-five, and were a grand, level lot. Mr. H. T. Castle, of Thame, was, as usual, well to the front, and was awarded the first and a champion prize for a beautiful cross-bred bullock, which realised £46 10s., the highest price in the fair. Mr. Castle also secured the second prize for a heavy Welsh bullock, the third prize going to Mr. Henry Fuller, of Shabbington. The cow class was very good indeed, Mr. R. Roadnight, (Chearsley) being awarded the blue ribbon, the second prize going to Mr. T. George (Pollicott), and the third to Mr. W. Way (Albury). The class for heifers was well represented, and included some really grand animals. Mr. James Kirby, of Oakley, was awarded first and third prizes, the second going to Mr. W. Ridgway, of Ashendon. There was a capital entry of sheep, comprising twenty-four pens of wethers, ewes, and tegs, Mr. H. Castle taking first and second prizes for wethers, the first prize for tegs being given to Messrs W. and T. Morris, of Great Marlow, and the second to Mr. Melton Harris, Haseley. Mr. H. Reynolds, of Notley, secured the prize for ewes, and Mr. T. Kench, of Cuddington, the second prize. The first for calves was awarded to Mr. Henry Freeman, of Brimpton, the second prize going to Mr. Joseph Franklin, of Scotsgrove. Mr. E. Treadwell, of Standhill, carried off first prize for pigs with a choice quality pen, Mr. T. R. Seaton, of Aylesbury, being awarded the second prize. Mr. Edward Bond had a very busy day, and in selling the beasts occupied the stool for just under five hours. There was a good selling trade throughout, the best quality beasts meeting with a good demand. Mr. H. T. Castle's first and second prize oxen made £16 10s. and £15 respectively, and Mr. H. Fuller secured £38 10s. for his third prize ox. Mr. J. Kirby obtained for his first prize heifer £30 10s., and for his third prize heifer £23, his commended ox realising £32 10s. Mr. H. Way's third prize heifer sold at £26 15s. £36 was given for Mr. R. Roadnight's first prize cow. Mr. H. Castle's first and second prize wethers made 57s. 6d. to 66s.; Mr. Morris's first prize tegs, 56s. to 60s.; Mr. Kench's second prize ewes, 52s. 6d. to 55s.; Mr. G. Treadwell's first prize pigs realised £5 12s. 6d. to £6 5s.; and Mr. Seaton's second awards £3 6s. to £3 12s.

THE WEATHER.

MONDAY (December 10th).—[illegible] of temperature during Sunday night and [illegible] first in the open air [illegible] The barometer fell [illegible] [illegible] [illegible]

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: There has been a quiet trade during the past week. Barley: Grinding unchanged, a fair demand for malting at late rates. Wheat was 6d per qr cheaper. Oats firm. Maize in buyers favour. Flour about 3d per sack lower on the week.—NIXON, GOWER AND CO.

Mark Lane, Wednesday.—The attendance of buyers was small from opening to close, and variations in prices devoid of significance. Fine white, 30s 6d; and fine red, 30s; good, 29s 6d. 63lb delivered up. Foreign descriptions unchanged. The flour market continues in the same uninteresting condition, but prices remain in sellers' favour. London Millers' Association have made no alteration. Town households, 25s; and white, 28s per sack. Top price, town made, 30s nett. Hungarian up to 29s. American first patents quoted at 25s to 26s; second ditto, 23s to 24s; first bakers, 20s to 21s; and second ditto, 18s to 19s per sack. Australian patent roller, 21s 6d to 22s ex store, 280lb. Grinding in fair supply, and maintained. Malting unaltered, although the demand has subsided. English choice up to 39s. Californian brewing of fine qualities, 27s; and good to fine Oregon, 26s 6d to 27s. Danubian, 20s to 22s. Oats again in sellers' favour, suitable qualities more especially. Maize upheld all round. Mixed American, old, 20s 9d; and new, 20s 6d ex ship, and 21s 6d landed.

Mark Lane, Saturday.—This week's market finished with a very subdued tone, being under influence of the near approach to Christmas, and the thin attendance led to only a small volume of business at a general steady range. English wheat unaltered. The flour market was also kept in harmony with wheat. The London Millers' Association made no alteration at this afternoon's meeting. Milling unaltered, useful kinds being in most request during the week. Oats firm, white clipped being distinctly against buyers. Flat maize tended in buyers' favour, but old remained firm.

COUNTRY.

Aylesbury, Saturday.—Exchange thinly attended, small quantities of grain on offer. The wheat trade was dull, at last Saturday's rates. All other articles unchanged in values.

Banbury, Thursday.—Wheat, white (old), 27s to 29s 6d per qr; wheat, red new, 27s to 28s 6d per qr; beans (new), 28s to 30s per qr; oats (new), 16s to 18s per qr; oats (old), black 21s to 22s per qr. Prices for wheat exactly as last week. Other grains also about the same.

Barnsley, Wednesday.—A quiet market, demand only moderate, and values unaltered. Wheat sold at from 10s to 10s 6d per load; malting barley of various quality, 23s to 28s per qr. Oats no change.

Boston, Wednesday.—The smallest show of the season, and a small attendance, buyers being indifferent. Wheat, 26s to 27s; malting barley, 23s to 28s; grinding barley, 22s; oats, 17s to 19s; maize, 23s.

Braintree, Wednesday.—Wheats, the majority of which were in poor condition, made from 28s to 29s 6d per quarter. Barley firm, and a good supply, best qualities making 35s, and seconds from 24s to 28s.

Bristol, Thursday.—Trade continues quiet. Wheat: English was only in moderate supply at to-day's market, condition in some instances being unsatisfactory, and, in consequence, prices were unchanged; foreign very firm at fully late rates. Grinding barley 3d lower. Maize and oats without change. Flour very dull and difficult to move, prices nominally unaltered.—GRACE BROTHERS.

Cambridge, Saturday.—During the week the wheat trade has remained very dull, and condition is still poor. Farmers bring small supplies to market. At this market to-day there was a small supply in poor condition. Trade was dull, without any alteration in prices. Wheat: Red, 27s to 29s; and white, up to 29s per 504lb. Oats were firm and beans steady. There was a quiet trade for barley at the full prices of last week.

Canterbury, Saturday.—Wheat was out of condition, and cheaper. Barley, slow sale. Oats maintain values. Ruling prices:—White wheat, 29s to 31s 6d; red ditto, 27s to 30s; malting barley, 25s to 35s; grinding ditto, 21s to 24s; white oats, 18s to 21s; ditto black, 15s to 20s; peas, 30s to 33s; tick beans, 32s to 33s; mazagans, 27s to 29s; flat maize, 24s to 24s; round ditto, 27s to 28s per qr; winter tares, 6s to 6s 6d per bushel.

Carlisle, Saturday.—Fair supply of oats in market to-day, slow sale at late rates. New, 17s to 18s 6d; old, 23s 6d to 26s per 336lbs.—THOMAS ROBINSON.

Chester, Saturday.—There was only a small trade passing in English grain. Millers were reluctant to try wheat, and former values were barely maintained. Indian corn advanced 3d per sack. Quotations:—Wheat, white and red, 4s to 4s 1d per 75lb; grinding barley, 3s to 3s 3d per 64lb; beans, 4s 1d to 5s 6d per 80lb; oats, new, 2s 3d to 2s 6d; old, 3s 6d to 3s 9d per 46lb; Indian corn, 11s to 11s 3d per 240lb.

Colchester, Saturday.—Wheat—Small supply, prices unchanged. Barley—Very little offering, for medium and better qualities rather better prices obtainable. Beans and oats favouring sellers.—FRANCIS AND CO.

Dorchester, Saturday.—Good attendance, but owing to the continued damp weather farmers are still unable to thresh, and very little corn of any description was forthcoming. English wheat met a quiet trade at last week's prices; foreign, 6d qr cheaper. Very little malting barley offering, and much of this was out of condition. Dull trade; easier prices for feeding stuffs.

Glasgow, Wednesday.—To-day there was a small attendance at our Corn Exchange. Wheat and flour remain extremely quiet at unchanged price. Indian corn steady at a decline of 1½d per boll on the week. Canadian peas 3d per boll dearer owing to scarcity on spot. Grinding beans dull and unchanged. Home oats steady; foreign the turn against buyers. Barley quiet. Oatmeal steady. Bran and thirds quiet, and unaltered.—GIBSON AND CLARK.

Hereford, Wednesday.—Small attendance; average business transacted. English wheat 1d lower, barleys dull, oats steady, maize slightly in buyers favour. Quotations:—Wheat, white, 3s 3d to 3s 4d, red, 3s to 3s 3d; barley, 2s 9d to 3s 9d; oats, 2s 8d to 3s; beans, 3s 8d to 4s; maize, 2s 8d to 3s; vetches, winter, 4s to 6s; and spring, 3s 6d to 5s per bushel.

Leeds, Tuesday.—There is no increase of animation in the trade; still, values keep remarkably steady, and with moderate shipments and decreasing stocks a more confident feeling has sprung up. Last week's rates are well maintained for all kinds of wheat, hard descriptions meeting most demand. Best Yorkshire barley in fair request, common sorts a drug. Maize 6d, beans and oats 3d dearer.—DUNNS AND CO.

Leeds, Friday.—Both English and foreign wheat in slow demand, and prices a shade lower than on Tuesday, following the fall in value of American wheat. Best barley firm, common kinds the turn easier. No change in beans, peas, oats, maize, or flour.

Leicester, Saturday.—Very fair attendance, with moderate supply of home-grown wheat. Trade more active for fine dry samples; inferior flat. Prices 27s to 31s per 36 stones. Barley in fair request. Fine oats firm.

Lincoln, Friday.—Fair supply of English wheat, trade rather brisk for the best samples at full money. Reds, 27s to 28s; whites, 28s to 29s; foreign wheat firm. Large show of barleys; trade steady for malting parcels at firm rates. Oats slow, but firm. Other grain firm.

Liverpool, Friday.—Wheat steady with a moderate business at Tuesday's prices. Flour is steadily held with a better inquiry, holders asking extreme prices for foreign brands. The Liverpool Millers' Association make no change in the minimum price of bakers. Maize continues in fair demand, at prices ½d over last Tuesday, European practically exhausted. Plate has a steady trade, but price slightly favour buyers, owing to recent few arrivals. Barley very quiet for malting, prices nominally unchanged. Friday firm with a fair trade passing, but without alteration in value. Beans are slow, and receive only a small attention from consumers. Peas quiet at late rates. Oats firm, with a fair business for English; foreign sorts are also in better request, and previous prices are well maintained. Oatmeal steady, but quiet. Oilcake steady, with a fairly good demand at late rates.—SEGAR AND TUNNICLIFFE.

Louth, Wednesday.—Good attendance of farmers. Trade for wheat was dull, there being a very small show, and prices realised from 26s to 27s 6d per qr. Oats were firm. Beans, of which there was a small supply, were slow, and sold at barely late rates. Peas a quiet trade.

Maidstone, Thursday.—Considering the very wet weather, the attendance at the market was quite as numerous could be expected. The wheat trade was slow, and where sales pressed a slight decline, but generally speaking the farmers and other owners are disposed to hold on rather than to concede to the millers. Barley is a dull business, for except for finest qualities the demand is very slack. Oats are 3d per qr dearer, and beans and peas rather tend to higher prices than of late. Maize has not varied since our last report. There is not any alteration in the cost of rye, tares, hemp, brank, lergo, or millet.

Manchester, Thursday.—A quiet tone has prevailed in wheat, both English and foreign, during the past week; no change in prices in former, but latter ½d per cental lower. Flour remains as slow of sale at previous rates. Oats are quiet without new features. Peas, beans, and barley are unaltered. Indian corn has gained 1d per cental on the week, and is firm thereat.

Market Dayton, Wednesday.—Quotations:—Wheat—white new, 12s to 12s 6d per 225lb; red, new, 12s to 12s 6d per 225lb; oats—white, old, 18s to 20s per 200lb; white, new, 9s 6d to 10s 6d per 200lb; barley—malting, 13s to 14s per 210lb; Indian corn, 11s 6d to 11s 9d per 240lb; beans—new, 13s to 14s per 240lb; old, 20s to 21s per 240lb; peas—white, 17s to 18s per 240lb.

Newcastle-on-Tyne, Saturday.—The demand for wheat at to-day's market was certainly limited, and buyers had much their own way. Flour slow. Malting barley closed more steady, finest samples creating more attention. Oats leaning to buyers more than sellers. Beans and peas unchanged. Maize keeps firm.

Newcastle-on-Tyne, Saturday.—A slow demand for wheat here to-day, prices favouring buyers. Maize firm at late rates. Barley, a good demand for fine qualities, poor sorts, however, were neglected. Beans and peas steady at late rates. Oats a fair demand at last week's prices. Flour unchanged.—JOSEPH POLLARD AND CO.

Northampton, Saturday.—The exchange had about the usual attendance. Supply and demand and price of grain similar to last week. White wheat, 29s to 30s; red, old, 29s to 30s; red, new, 26s to 28s; malting barley, 26s to 32s; grinding barley, 20s to 24s; oats, 19s to 22s; old, fine, 25s; beans, 28s to 32s; old, 34s to 36s; flour, 20s to 25s.

Norwich, Saturday.—Wheat in better supply to-day, but owing to poor condition very few samples made last week's prices, and may be reckoned about 6d to 1s per qr cheaper on the week. Barley in good supply, but mostly of inferior quality. The weather has been somewhat finer this week, there having been less rain and the days brighter. Wheat, red, 27s 6d to 28s 6d per qr, weight 63lbs per bushel imperial. Corn Inspector's return for the week ending 10th December, 1900:—Wheat, 2,465, 27s 2¾d; barley, 14,978-3, 25s 11½d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat moderate supply, and a fair trade passing at previous values. Barley: Best samples sought after, and such commanded full rates, while inferior sorts were neglected. Oats: But few offering, and prices well supported. The same may be said of beans.—ROBERT HUBBLE.

Oxford, Saturday.—Not much wheat offering; dull trade at about last week's prices. More inquiry for barley, both medium and best qualities.

Peterborough, Saturday.—There has been a small supply of wheat to-day, and a slow trade with prices about the same as last week. Less barley offering, which made quite as much money. Oats firm and unchanged in value.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was an average attendance at our market to-day, but business was very quiet. All stuffs at last week's prices.—ORLANDO DAVIS AND CO

Reading, Saturday.—We had an excellent attendance to-day, but business ruled very slow, and where sales took place the previous week's rates generally held good, wheat selling at 26s to 30s per qr.

Ripon, Thursday.—There was no quotable change in prices. Barley shows a brighter tone, with a better inquiry. A small attendance. Wheat, English, new, 27s to 29s; ditto, old, 31s; ditto, foreign, 30s 6d to 34s 6d; barley, malting, 24s to 29s, ditto, grinding, 21s to 23s; oats, old, 25s to 26s; ditto, new, 17s to 19s; maize, round, 24s to 27s; ditto, flat, 23s 6d per qr; beans, old 1s per stone; bran, £5 per ton.

Romford, Wednesday.—There was only a small trade, at barely last week's prices. The attendance was small. Red wheat made 27s to 29s, and white wheat 28s to 31s per quarter.

Sheffield, Tuesday.—There was a small attendance and a very limited supply of wheat, for which former prices obtained. Beans and Indian corn 6d per qr dearer, and oats showed a similar advance on the week. Quotations:—Wheat, white, 32s to 33s; red, 31s to 32s; new, 30s to 31s per 504lb; oats, old white, 26s; ditto, new white, 17s 6d to 19s; ditto old black, 22s; ditto new black, 16s to 17s per 336lb; peas, grinding, 32s to 34s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 33s; ditto English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s to 24s; ditto malting, 27s to 35s per 448lb; Indian corn, small old, 29s to 30s; ditto American mixed, 23s to 24s per 480lb.

Spalding, Tuesday.—Wheat met with a slow trade at about 26s 6d per qr. Oats, 17s to 18s per qr. Barley was a slow trade at former prices. Beans and peas unchanged. Small market all round.

Stockton, Wednesday.—There were very few samples of English wheat showing, which made 28s to 29s per qr. In foreign wheats the trade keeps steady, and prices show no change, though there is a rather better inquiry from millers. Maize scarce, and 3d to 6d per qr dearer. Oats unchanged. Practically no malting barley shown.

Sunderland, Saturday. Rather more grain offering from farmers. Wheat quiet at late rates. Barley dull. Oats unchanged. Arrivals coastwise: Barley 8 qrs.; oats, 593 qrs. Foreign—Barley, 1,438 qrs.—E. AND T. RICHARDSON.

Taunton, Saturday.—Small attendance and limited supply. Wheat at rather better prices. Malting barley scarce and rather dearer. Oats and beans firm, and other feeding stuffs steady.

Wakefield, Friday.—We quote English and foreign wheats steady at late rates, and but a small business passing on to-day's market. The enquiry for barley is confined to the better sorts. No alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LIMITED.

Wakefield, Friday.—We have very little change to report in the wheat trade, which remains of a quiet but steady character; the business in cargoes is more animated, operators looking for some improvement after the holidays. Best qualities of barley in better request at late prices. Maize, beans and oats unchanged.—DUNNS AND CO.

Winchester, Saturday.—English wheat in exceedingly short supply on our market to-day, which met a steady trade at last week's prices. Barley in fair request, best descriptions worth more money. Oats firm at late rates. Maize shade easier. Flour, 24s to 25s.—FEAR, CLOEBROOK AND CO., LD.

Wolverhampton, Wednesday.—A fair attendance and moderate trade, but the wheat department was quiet. English wheat, 11s 6d to 12s per 216lb; oats (old), 15s to 16s per 216lb; oats (new), 11s to 11s 6d; beans (old), 14s 6d to 15s 6d; beans (new), 12s 6d to 13s 6d per 196lb.; maize (old), 23s to 24s; maize (new), 22s to 23s per 480lb.

Worcester, Saturday.—English wheat in moderate supply, and trade ruled quiet at about last week's rates. Oats and beans steady, at previous prices. Barley dull and unaltered. Maize rather easier.

Worksop, Wednesday.—Fair attendance, with small show of grain, and a firmer tendency. Old white wheat, 30s to 31s; new ditto, 27s to 28s; old red wheat, 29s to 30s: new ditto, 26s to 27s; best malting barley, 28s to 32s; secondary, 26s to 28s; grinding, 23s to 24s; old white oats, 25s to 27s; new ditto, 19s to 21s; old black oats, 24s to 25s; new ditto, 17s to 19s; flat maize, 24s to 26s; round ditto, 27s to 28s per qr.

York, Saturday.—Wheat is in short supply; good samples sell at last week's prices. Malting barley inclined to be rather firmer, owing to the beer scare. Fine, 28s to 30s; good, 26s to 28s; common 24s to 26s per quarter of 32 stones. Oats firm; white Tartary, 16s to 17s; black, 17s to 18s; short, 18s to 19s per quarter of 24 stones. Rye, 7½d to 8d per stone; beans, 9d to 10d per stone. The average prices of corn, according to the official weekly return, are as follows:—Wheat, 26s 5d; barley 24s 2d; oats, 17s per quarter.

FOREIGN.

The general tone of the Antwerp wheat market has been satisfactory, there having been a good demand for disposable wheat, while prices have been pretty well maintained. The intelligence received from the French country districts as to the growing crops continue satisfactory. Business in wheat has been on a restricted scale in the French country districts, but prices have been well supported. Wheat has shown little variation upon the Paris market. Flour for consumption has also brought former rates in the French capital. The wheat trade has been rather dull at Marseilles. Wheat has been somewhat weaker at Konigsberg, but at Dantzic disposable parcels have remained without change. The Russian Provincial markets have been inactive; the demand has not improved, and the quantities of grain brought forward has been comparatively limited. Wheat has shown a somewhat firmer tone in the South-West of Russia, but transactions have at the same time presented little activity. In the Russian Baltic ports the tone of business has been rather weaker, but prices have remained without appreciable change. Odessa advices state that, after a period of warm rainy weather in South Russia, the thermometer has fallen below zero; a spell of frost is not likely, however, to prove unfavourable to the winter-sown wheats. There has been no great amount of business passing in Tunisian wheat. The aggregate quantity of wheat now en route for Europe is returned 945,000qr, as compared with 1,080,000qr at the corresponding date of 1899. The total of 949,000qr is made up as follows:—France, 90,000qr; Belgium, 165 000qr; Holland, 175,000qr; Germany and the North, 190,000qr; and Italy, Spain, etc., 310,000qr.

Hamburg, Saturday.—Weather mild and rainy. Market quiet. The result of this year's harvest, according to official Prussian reports, exceeds anticipations and explains the extensive exportation of wheat and the decreasing demand for foreign feeding stuff. The imports during the week amounted to 11,611 tons wheat, 4,850 tons rye, 13,060 tons barley, 19,282 tons maize. Wheat little inquired after. Fine red Holstein, Mecklenburg, and Saale is held at 27s to 28s, common sorts at 25s 6d to 26s 3d per 504lb, f.o.b. Hard Winter 2 and River Plate is offering at 28s 6d to 29s 3d per 480lb c.i.f. Hamburg. Rye quiet, but not lower. 9 15-20 South Russian is held at 22s 3d to 22s 6d per 480lb c.i.f. Hamburg. Fine Saale barley is offering at 35s to 37s, medium quality at 31s to 33s 6d, Bohemian at 34s to 37s. Danish Holstein and Mecklenburg at 24s 6d to 27s per 448lb. Russian feeding barley is selling slowly at 17s 3d to 17s 6d per 400lb c.i.f. Hamburg. Prompt mixed maize and January-March shipments are offering at 18s 6d to 18s 9d; River Plate near at hand at 19s 3d to 19s 6d per 480lb c.i.f. Hamburg.—JOHN TATLOCK.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Supplies larger, and the demand was of an improved character. Quotations:—Fowls: Yorkshire, 2s 6d to 3s; Essex, 2s 6d to 3s 5d; Welsh, 1s 9d to 2s 3d; Surrey, 2s 9d to 3s 9d; Sussex, 3s to 3s 6d; Boston, 2s 3d to 2s 6d; Irish, 1s 8d to 2s; turkeys, cocks, 8s 6d to 15s; hens, 5s to 6s; country ducks, 3s 6d to 4s; geese, 5s to 7s 6d; Bordeau; pigeons, 10d to 1s; feathered, 9d to 11d; wild rabbits, 9d; tame, 1s 2d to 1s 4d each; Australian, 6s 6d to 7s 6d per dozen; pheasants, 4s 6d to 5s; young partridges, 3s 6d to 4s; old, 2s; young grouse, 4s to 4s 6d; old, 3s 6d per brace; hares, 3s 6d to 3s 9d; leverets, 2s to 2s 6d; wild ducks, 1s 6d; pintail, 1s 6d; widgeon, 1s; teal, 8d to 10d; woodcock, 2s 6d to 3s; golden plover, 8d to 1s; black, 5d to 6d each; Penn's buntings, 7½d to 9d; larks, 6d to 7d per do.

Glasgow, Wednesday. Arrivals of cattle in the Glasgow market were liberal for the season of the year. The market was well stocked. There was a fair demand for best quality, being rather neglected. Prices were practically unchanged. Oldbridges and Dunlops 50s to 60s per cwt. Cornfed were in moderate request at steady prices.

Liverpool, Saturday.—Bacon: The market has ruled steady with small stocks, but with larger arrivals than at hand and increasing shipments buyers are more cautious and the demand has been somewhat less active. We quote to-day, choice Cumberland cut 26lb to 28lb, 45s to 45s 6d; Scotch cut 26lb to 30lb, 45s 6d to 46s; 34lb to 38lb, 45 6d to 46s; long middles, light, 56lb to 64lb, 40s to 41s; clear bellies, 14lb to 16lb, 41s to 42s; Irish 20lb 38s to 38s 6d; staffordshire cut clean one 20lb to 24lb, and Birmingham cut, 33lb to 38lb, 42s to 42s 6d; Wiltshire cut, 56lb to 64lb, 40lb to 44lb, and Yorkshire cut, 14lb to 15lb, 42s to 43s; short backs, singed Wiltshire, Canadian 15lb to 20lb, 43s to 44s; American, 14lb to 20lb, 44s to 45s; short cut backs 15lb to 16lb, 42s 6d to 43s 6d; 16lb to 20lb, 44s 6d to 45s 6d; fat backs, 30lb to 40lb, 39s 6d to 41s 6d; long clear middles, 28lb to 34lb, 41s to 42s; 40lb to 45lb, 46s 6d to 47s; short clear middles, 45lb to 54lb (none here); short middles, 16lb to 18lb, 45s 6d to 46s; 18lb to 20lb, 44s to 45s; New York cut, 14lb to 16lb, 43s to 43s 6d; 16lb to 20lb, 43s to 43s 6d; shoulders, square cut, 12lb to 14lb, 34s to 35s; 14lb to 16lb, 33s to 33s 6d; New York cut, 14lb to 16lb, 33s to 33s 6d. Hams are in limited demand at somewhat easier prices. We quote choice long cut, 8lb to 12lb, 45s to 51s; 14lb to 16lb, 44s to 50s; short cut and A.C., 10lb to 12lb, 44s to 48s; 12lb to 14lb, 45s to 0s; 14lb to 16lb, 42s to 43s per cwt. Lard is firmly held, but business passing is of small dimensions. We quote pails and kegs, 32s to 0s; prime Western (in tierces), 33s 6d to 33s 9d per cwt. Best cumbland cure. We quote extra India mess 65s 6d to 70s; Plate and Parcel mess, 60s to 63s per 304lb. Pork is quiet and easier to buy. We quote finest prime mess, 66s to 70s per 200lb. Cheese: The market has been dull and inactive trading, and the prices show a declining tendency. We quote finest Canadian, September October, coloured, 53s to 53s 6d; white, 52s to 52s 6d; finest States, coloured, 52s to 53s; white, 51s to 52s; summer cheese, ripe flavoured, selling slowly from 48s to 49s, but lower qualities offering from 29s to 36s are neglected. Butter—The enquiry is chiefly for fresh fresh quality, which is in limited supply; lower grades are difficult to move. We quote Irish fresh made Canadian creamery, finest, 105s to 106s; second quality, 83s to 92s; finest States (none); finest ladles and imitation creamery, 72s to 80s; fine to Danish, 112s to 124s; Australian and New Zealand, 104s to 112s; Irish creamery (none); Cork firsts, 104s; seconds, 94s; thirds, 86s per cwt.—HODGSON BROTHERS.

GRAIN AND FLOUR FACTORS' REPORTS.

A quiet trade at last week's prices.—T. S. MEDILL, Mark Lane.

We have moderate arrivals of wheat, but large of flour; market is firm, and there is no change in prices. Maize, barley, and oats are unchanged in value.—COVENTRY, Mark Lane.

As usual at this season, the business passing in farm seeds is on the smallest possible scale, and this state of things will continue till the close of the century at all events. Meantime the prices of all articles are firmly maintained. The weather is unfavourable for threshing clover seeds, the supplies of which continue very limited.—JOHN PICARD AND CO., Mark Lane.

Business continues to be done on a small scale, and the value of milling offals is somewhat uncertain. The quantities made are small on account of the depressed condition of the demand for flour, and everyone is hoping the New Year may bring a better and more profitable time.—RICHARD DOGGETT, Mark Lane.

There has only been a limited enquiry for wheat to-day, and very little business has been transacted. Values are unaltered since last Monday. Maize is 3d. lower on the week. Barley unchanged. Oats steady and without alteration.—W. P. WOOD AND CO., Mark Lane.

Flour: Prices are nominally unchanged, but there is not much business doing to test prices. Grain: Indian corn is now plentiful, and 3d. per 280lb. lower; foreign oats firm; Canadian purse, 3d. per boll dearer; barley quiet; Canadian oatmeal firm at former rates. Mill Stuffs: Bran and thirds unchanged.—MCKINNON AND MCDONALD Glagow, December 15.

Offals.—No change to report in prices of bran or pollard. There is, however, a little more inquiry.—GREENHILL BROS., Belfast, December 15.

Wheat steady, with a moderate business at Tuesday's prices. Flour is steadily held with a better inquiry, holders asking extreme prices for foreign brands. The Liverpool Millers' Association make no change in the minimum price of bakers. Maize continues in fair demand at prices 3d. per cental over last Tuesday, European parcels exhausted. Plate has a steady trade, but prices slightly favour buyers owing to recent few arrivals. Barley very quiet for malting, prices nominally unchanged. Friday firm, with a fair trade passing, but without alteration in value. Beans are slow, and receive only a small attention from consumers. Peas quiet at late rates. Oats firm, with a fair business for English. Foreign sorts are also in better request, and previous prices are well maintained. Oatmeal steady, but quiet. Oilcake steady, with a fairly good demand at late rates.—ROSS T. SMYTH, Liverpool, December 15.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The temperature remains high for the time of year, and the air is laden with moisture, even in districts where the actual rainfall of the week has been slight. The land and growing crops would now be all the better for a rest from the stimulus which warmth and moisture combine to supply. In the United States and Canada winter has set in in earnest, and we may possibly find that the same influences are on their way here. The Argentine wheat crop is better in the temperate districts than in the hot north, and it is therefore considered likely that the best supplies will not be forthcoming before March, or even April. The very moist spring, followed by fierce heat, favoured not only weeds to a great extent, but also a rank growth in the wheat plant itself. The average sample of Argentine wheat for 1901 is not, therefore, expected to allow the same fair average quality as that of 1900. Chile is not likely to have any exportable samples.

The maize crop in the Republic of Uruguay is officially firm at 347,500 qrs. The absence of returns from this State makes this particle of news a matter of interest. Perhaps we may hope in 1901 for wheat returns also. With a magnificent seaboard the Uruguayans might do a very important direct trade with Europe and the United Kingdom.

Mark Lane has been well attended throughout the week, and on Friday the gathering struck us as being fully as large as on an ordinary Monday. There is no doubt that Friday is growing in importance as a market day, but the Smithfield visitors are more numerous on Friday than Monday owing to the first day at Islington being a five-shilling day. Prices have not been helped by the attendance, as there was generally more pressure to sell than to buy. Bakers report a very poor demand for bread, and the weather certainly affects sales. Maize is a comparatively small trade by reason of the expectation of town prices, with the new American crop shipments. Oats have sold rather well; the Government have been a large buyer of both American and Russian 320lbs. kinds. The American visible supply is cabled as follows:—

	Wheat. Bushels.		Maize. Bushels.
Dec. 15, 1900	61,494,000	....	8,792,000
„ 1899	56,292,000	....	11,244,000

While there is a greater store in merchants' hands of wheat, the speculative trade in maize has undergone a very noticeable diminution. Large prospective supplies of Indian corn have probably shut out from the minds of most merchants the idea of profit on holding.

The sales of breadstuffs since harvest are thus estimated:—

	Qrs.
English wheat	1,722,358
Foreign wheat	4,893,633
Foreign flour	2,130,634
Total	8,746,625

In the same period of last cereal year the total was 8,373,378 qrs.

Stocks of wheat in formers' hands on Dec. 15 are thus calculated:—

	Qrs.
1900	4,277,000
1899	4,755,000
1898	5,260,000
1897	3,760,000

The average price in Paris is now 35s. 4d., against 31s. a year ago; and in Antwerp is 29s. 6d., against 26s. 9d. a year ago. The rise on the year in New York is from 25s. 6d. to 27s., or 1s. 6d. per qr.

The imports of the week have not been excessive, the actual totals being 273,000 qrs. of wheat, 140,000 sacks of flour, 234,000 qrs. of maize, 110,000 qrs. of barley, and 95,000 qrs. of oats. The statistics of the trade in breadstuffs are as follows:

	Qrs.
Foreign wheat	273,000
Foreign flour	117,000
English wheat	123,000
Total	513,000

Stocks which stood at 3,003,000 qrs. on Dec. 8th were put on the 15th inst. at 2,949,000 qrs.

Wheat supplies on passage are thus returned:—

	Qrs.
Californian	1,005,000
American	255,000
Argentine	225,000
Russian	70,000
Other Countries	200,000
Total Dec. 15, 1900	1,755,000
1899	1,100,000
1888	1,810,000

The quantity of maize on passage thus compares with a year ago:

	1900. Qrs.		1899. Qrs.
Flat	610,000	....	520,000
Round	140,000	....	90,000
Yellow	100,000	....	410,000
Total	850,000	....	1,020,000

The expectations from Argentina will be seen to have suffered so great a reduction that the slight increase in both flat and round is a good deal more than merely counterbalanced.

The quality of barley on passage to-day thus compares with this date last year:—

	1900. Qrs.		1899. Qrs.
Malting	400,000	.....	517,000
Grinding	140,000	.....	60,000
Total	540,000	.....	577,000

The quantity of beans on passage is only 9,000 qrs. against 10,000 qrs. a year ago, 14,000 qrs. in 1898, 11,000 qrs. in 1897, and 31,000 qrs. in 1896.

A printer's error last week gave the increase on the granary stocks at 6,560,000 qrs. The correct figures should of course be 656,000 grs. Although this mistake of an extra cipher is the simplest possible, and where many figures are used almost unavoidable as a casual thing, it is, unfortunately, far more misleading than a grotesque error which may be trusted to correct itself.

Shipments of wheat of late have been quite moderate, those of the first fortnight of December being 1,185,000 qrs. for all countries. There is a good deal of difficulty in deciding what is an average expectation, but probably 800,000 qrs. a week is usual before the winter closing of ports by ice, and 600,000 qrs. during the period when certain ports are shut off.

Of maize the shipments have been large for the time of year, the figures 1-15 December being 1,667,000 qrs. The new crop of the United States is not yet fit for shipping, and these large exports are clearances of old grain to make room for the new supply. If the latter is firmly held, maize may keep up in price pretty well, but the present indications are all the other way. Recent shipments of barley and flour have been moderate, but of oats they have been fairly large.

An interesting return of the sales and crops, imports and exports of the last seven years tends to show that the total breadstuffs' wants of the United Kingdom for the period were 207,000,000 qrs. This indicates a want of about 574 bushels per every hundred inhabitants. Sir J. H. Gilbert's estimate of 600 bushels being required is, on this showing, 26 points in 600 too high. The difference is not great in itself, but with the very large figures which our population entails it soon becomes important.

The consumption of maize is a matter with which we have had to deal almost single-handed, neither the Government nor the agricultural societies taking any part in a discussion which is of the utmost consequence to the corn trade, and is debated in the course of a twelvemonth not once but many times on the markets. The imports this year up to date amount to 11,655,000 qrs., and if we assign 500,000 quarters to the remainder of December we shall have 12,155,000 qrs. as the deliveries. The stocks on Jan. 1, 1900, were 833,000 qrs., and we shall be able about three weeks hence to tell if they have increased on the year. Common anticipation is that they will not be so found, and that a consumption of 12,000,000 qrs. per annum will be clearly disclosed.

THE BALTIC.

It is a pity that the markets cannot agree as to their holidays. This exchage will be shut on 24th and 26th December, but open on New Year's Day, while the New York Produce Exchange will be shut on 24th December and 1st January, but open on 26th December.

Wheat has been quiet, both for future shipment and on passage. Sales include Californian, at 30s. 3d., on passage; Walla, 28s. 6d., arrived; Australian, 30s. 3d., January shipment, and 31s., arrived; New Zealand, 29s. 6d. just shipped; Argentine, 29s. 3d., on passage, and 30s., arrived; Azoff, 29s., on passage, and No. 1 Northern, 31s., February shipment

Maize has been quiet, but a rather large business for January and February shipment has been put through with a minimum of friction. The American new crop is offered at 18s. 9d. for January and 18s. 6d. for February shipment, and buyers accept these terms. Anything of which delivery can be promised before 15th January is quoted a full sovereign, and anything which can be delivered before Christmas is worth 20s. 9d. per qr.

Barley has been cheaper forward; sales include Novorossisk on passage at 18s. 6d. and Californian at 26s. 6d. per qr. Other sales of the week comprise black Libau oats at 14s. 6d.; Saida beans at 28s. 9d.; Canadian white peas at 28s. 3d., and Roumanian Rye at 22s. 9d., all per qr.

The arrivals of grain and seed laden vessels at ports-of-call for the week were 5 wheat (1 Bahia Bianca, 1 Port Germein, 2 Portland (O.), 1 San Francisco)|; 1 barley (San Francisco); total, 6.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The market to-day was well-attended, as there are always a number of retail transactions to be put through before Christmas. Prices were not higher for any staple, as a rule, but there was less depression from the 10th. English wheat made 29s. to 32s. for most samples. The higher price commanded 64lbs. white. Foreign sorts were a trifle lower on the average, but in improved request at the slight concession. We quote Duluth, 33s. to 34s.; New Zealand, 28s. to 30s. per qr. Maize was 22s. for American, which could be delivered in a couple of days, 21s. for the same quality with guaranteed delivery before Christmas, and 20s. 6d. where delivery could not be so guaranteed. To this extent have mere current facilities, or the absence of them, come to influence the price on spot. Barley was a less sluggish trade, both brewing and feeding kinds moving off with more ease from the 10th. Oats were steady at full rates for English and American. Beans were neglected. Peas were in fair request. The demand for millet, dari, and small pulse was very fair. Buckwheat was steady at currencies. Linseed sold fairly well at 52s. to 54s. for Russian. For free Guzerat yellow rapeseed up to 53s. was made. Cottonseed was held for £6 16s., with buyers at £6 13s. per ton.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

THE MARKET CLOSED WITH PRICES AS PREVIOUSLY GIVEN. FRIDAY, THE 21st, WILL BE A BUSY DAY, AS THE EXCHANGE WILL THEN CLOSE UNTIL THE 28th.

THE FLOUR TRADE.

MARK LANE, Dec. 17th.

The market to-day was very dull for all London makes, and town households were somewhat cheaper to buy. Country flour is in liberal offer, and as this arrives at the railway stations and escapes the riverside strike trouble it has a full retail inquiry. Thus with demand and supply equally free prices are maintained, but not advanced. Hungarian flour was 6d. lower with a slow sale. American on spot was 3d. lower for most sorts. The finest north-western flour is offered for prompt shipment at 26s. (Star), 24s. 9d. (Pillsbury), and 24s. 6d. (Morrisons). These prices do not help spot trade. Good second grades come at 19s. for Iron Duke, 21s. for good Hue, and 19s. 9d. for Palisade. The price of Crosby's fine Kansas is 23s. per sack. Of minor staples paste flour makes 20s. per sack, coarse middlings about 103s. per ton, Brose meal 28s. per sack, white maize germ meal 110s. per ton, and rye meal 17s. per sack.

LONDON TERM MARKET.

This market is held twice a day, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—		Dec.	March.	June.
		s. d.	s. d.	s. d.
Dec. 10	11 a.m.	6 5 .. 6	7 .. 6	7
	4 p.m.	6 5 .. 6	7 .. 6	7
Dec. 11	11 a.m.	6 5 .. 6	7 .. 6	7

Dec. 15	11 a.m.	6 4 .. 6	7 .. 6	7
To-day	11 a.m.	6 4 .. 6	7 .. 6	7

Maize for December delivery made 4s. 3d. per cental, 3s. 11d. for February delivery of American new crop.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 3,256 bales bacon, and from foreign ports 8,145 bales bacon. The bacon market continued to give way, and was officially reduced on Irish and Danish, some 2s. to 6s, Canadian, 2s to 3s. Selling rates were quite 6s to 8s lower than the previous week, and demand slow. Irish, 52s, 62s, to 66s; Danish, 52s, 60s, up to 65s; Canadian, 52s, 56s, 57s. Butter in poor demand, except for very finest goods, which were in fair demand. Danish, 122s, 124s, up to 125s; Colonial, 108s, 110s, up to 112s; French, 116s, 120s. Lard, unchanged, demand quiet, American, 39s, 40s; Irish, 56s, 64s.

CATTLE.

Sheep	3 4	—	5 0		6 0
Pigs	2 8	..	4 0	..	4 8

Milch cows, per head, £15 to £25

British arrivals include as follows:—Scotland, 1,110; Eastern Counties, 335; Midland Home and Western Counties, 1,[illegible]; Devon, 180; Ireland, 137.

The all-important market of the year, so far as the cattle trade is concerned, was that held at the Islington Cattle Market to-day, and is commonly known as "The Great Market," being a day for which the best breeders and graziers reserve their choicest stock, these being chiefly represented by the Polled Aberdeen breed with a few Devons.

Though the weather was very favourable, trade was a very disappointing one for senders of stock, rates having to be reduced 4d. per 8lb. to effect sales. Even at this reduction a clearance cannot possibly be made unless a reaction sets in after our report left, which does not seem at all probable.

Taking the show as a whole in regard to quality it fell below the usual average of a Christmas market, there being too large a proportion of ordinary beasts.

The slowness of the trade is chiefly attributable to the market being held so close to Christmas Day, but in the nature of things this could not be helped, as it always falls on the Monday following the Agricultural Show, in consequence of which there was less demand, a good many butchers not caring to wait so long, therefore making their purchases at the various country auctions. We append a few remarks with respect to the different breeds.

POLLED SCOTCH.

These numbered 280 less penned last year, and were an exceptionally grand lot, in fact somewhat beating last year's display. They chiefly comprise consignments from the following well-known Scotch graziers: J. Beddie, J. Birnie, Peterhead, J. Fowlie, W. Harper, J. Lyon, G. Wood, A. Wyness, and A. Aitken, the last five being of Aberdeen, R. Guthrie, Turiff, A. Young, A. Bruce, Littlejohn, Alex. Strachan, C. Farquharson, Craddock and Son, W. Wallace, McCombie, C. W. Young, J. Cooker, and others, the following being the principal salesmen: Messrs. Hicks and Son (424) Eve and Son (180), W. Reed (160), Slater, Cook, and G. Hill (85), T. Dixon and Son (75), C. C. Wood (60) Bound and Sim (56), W. Wilson (50).

DEVONS.

These numbered 180, and, with but few exceptions, were not so good as those shown last year. It should be noted, however, that Mr. T. Law had a few extra choice ones.

IRISH.

These consisted of 27 from Waterford and 110 from Dublin, several of the latter being consigned by Mr. T. Oliver to Messrs. Hicks and Son, many of which had been exhibited in the Dublin Show, and were of exceptional good quality.

NORFOLKS.

Of these there was a fair average supply, and though not so good as last year some very good specimens were shown by Messrs. Stimson and Son, A. Allday, E. Neeve, E. Chapman, W. Law, F. Syder, and C. G. Wood.

HEREFORDS.

In short supply, and barely up to Christmas standard.

RUNTS.

These may be written as a fair lot, really best quality being very scarce.

Following are the top quotations per 8lb. (sinking the offal):

	To-day.		Dec. 11th, 1899
Scotch	4s 9d to 4s 10d	..	5s 0d to 5s 2d
Devons	4s 8d to 4s 10d	..	—
Herefords	4s 6d to 4s 8d	..	4s 4d to 4s 6d
Norfolks	4s 8d to 4s 10d	..	4s 8d to 4s 10d
Runts	4s 6d to 4s 8d	..	4s 8d to 4s 10d
Lincolns	4s 2d to 4s 6d	..	4s 2d to 4s 4d
Irish	—	..	4s 8d to 4s 10d
Dublins	4s 8d to 4s 10d	..	—
Fat cows	3s 8d to 3s 10d		4s 0d to 4s 2d

The following table shows the number of beasts offered for sale on each Great Market Day since the year 1841, with the highest and lowest quotations per 8lb. (sinking the offal):—

Year.	Beasts.	s. d.	s. d.	Year.	Beasts.	s. d.	s. d.
1841 ..	4,510 ..	3 8 to 5 0		1871 ..	6 3 0 ..	3 10 to 6 2	
1842 ..	4,511 ..	3 4 to 4 8		1872 ..	7,560 ..	4 6 to 6 0	
1843 ..	4,510 ..	3 4 to 4 4		1873 ..	6 170 ..	4 8 to 6 8	
1844 ..	5,713 ..	4 0 to 4 6		1874 ..	6,570 ..	4 6 to 6 10	
1845 ..	5,326 ..	3 6 to 4 8		1875 ..	7,680 ..	4 6 to 6 3	
1846 ..	4,570 ..	4 0 to 5 8		1876 ..	7,020 ..	4 6 to 6 4

1870 ..	6,425 ..	3 6 to 6 2					

In the Sheep market there was an increase of [illegible] as against last year's display; the supply including 2,870 from the Eastern Counties, 380 Irish, and 120 Scotch. As usual it consisted principally of Downs and half-breds, some very choice sheep being shown in the pens of Stallybrass and Son, R. Eve and Son (from R. Mansting and H. Jackson), Lintott and Son, who also had some Cotswolds, lambs from the Duke of Richmond. H. Grove and J. Jarman, as well as Phillip Chapman and C. W. Tanner had some excellent Downs and Half-breds.

The cold weather during the week has caused a brisk and continued demand, and steady at a slight advance in value as compared with last week.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned:

	To-day.		Dec. 11th, 1899.
7½ to 8 stone Downs	5s 10d to 6s 0d	..	5s 8d to 5s 10d
9-stone ditto	5s 6d to 5s 8d	..	5s 6d to 5s 8d
10-stone half-breds	5s 0d to 5s 2d	..	5s 2d to 5s 4d
12-stone Lincolns	4s 10d to 5s 0d	..	4s 10d to 5s 0d
9-stone Irish	5s 0d to 5s 2d	..	4s 8d to 4s 10d
10-stone Down ewes	4s 2d to 4s 4d	..	4s 0d to 4s 2d
11-stone halfbred ditto	3s 8d to 3s 10d	..	— to —
4½ to 5 stone fat lambs	7s 8d to 7s 10d	—	— to —

The following table shows number of sheep exhibited this year and last, together with the current top rate:—

	s. d.		s. d.
1900 .. 7,490	7 10	1900 .. 14,570	8 0
1899 .. 7,570	7 6	1899 .. 13,080	8 0
1898 .. 9,040	8 0	1898 .. 15,000	8 10
1897 .. 12,000	8 4	1897 .. 16,000	8 4
1896 .. 11,200	8 4	1896 .. 16,000	8 0
1895 .. 11,200	8 4	1895 .. 16,000	8 0
1894 .. 13,200	8 4	1894 .. 20,000	8 0
1893 .. 11,200	8 0	1893 .. 19,450	8 10
1892 .. 15,200	8 4	1892 .. 20,000	8 10

[illegible] being only a limited supply of cattle benefited this week, but prospects are worth recording.

The pig supply was small, but sufficient to meet all demands, the best sides ranging from [illegible] per 8lb.

London Central, Monday.—Moderate supplies, trade slow last. Cattle realised to [illegible] best quarters 4s 8d to 4s 6d; roastings, 5s 4d to 5s 8d. Sheep: Ewe, 2s 10d to 3s 2d; wether, 4s to 4s 2d; hindquarters, ewe, 4s to 4s 4d; wether [illegible] to 5s 6d. Pigs: Large, [illegible] to 4s 6d; small [illegible] to 4s.

St. Pancras (Hunts.), Monday. [illegible] pens, 370; pens, 10; horses, 8. Beef, 7s 0d to 7s 6d; mutton, 7s 0d to 11s 1d; pork, 6s to 7s 3d; sows, 5s to 6s 3d. Fat and store cattle, sheep, and pigs fair demand. Milch cows, fair show and trade, prices £14 to £23.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 588. To-day's supply [illegible] compared with Monday last showed a [illegible] and [illegible] trade for [illegible] was [illegible] than caused by the [illegible] supply. The best [illegible] from 720 to 760lb, made 4s 6d per 8lb, offal given in. On Saturday last 2,000 beasts from the United States were offered for sale, meeting with a firm, steady trade especially for best quality; the best on offer [illegible] to 4s 6d per 8lb. Sheep, 1,352, numbering 827 more than on Monday last. The supply consisted entirely of shipments from the United States, trade for which was rather slow, at from 3s 10d to 4s per 8lb. A few lambs were on the market and were quoted at 5s. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 958, 4s 2d to 4s 3d per 8lbs, to dress from 720lb to 760lb. No sheep on the market.

FEEDING STUFFS.

London, Monday.—Linseed Cake: Trade as dull as ever. The American market is better, owing to Continental demand, so we cannot look for supplies to any extent from that source. Cotton cake continues in demand at last prices. Linseed [illegible] dearer, especially for near positions.

English linseed cake	£5 16 0	to	£5 12 6	ex mill
Indian Calcutta linseed cake	[illegible]			ex quay
American Western linseed cake	7 12 6	to	7 17 6	ex quay
Russian oil cake	7 12 6	to	7 17 6	ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 per cent. oil)	6 15 0	—		ex warehouse
Decorticated cotton cake	£6 17 6	to	7 0 0	ex quay
Decorticated cotton meal	6 17 6	—		ex quay
London made cotton cake	4 17 6	to	5 0 0	ex mill
Egyptian cotton cake (in bags)	4 15 0	to	4 16 3	ex quay
Burton desiccated ale grains (bags included)	4 12 6			on rail, Burton
Rangoon Rice Meal	4 12 6		—	ex warehouse
Russian linseed in bulk, per 416lbs	2 14 6	to	2 18 0	ex warehouse
Calcutta linseed in bags, per 410 lbs	2 19 0			ex warehouse

—ROBT. AND JOHN HEWETSON

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. De May, hop factors, 67, Borough High-street, London, S.E., report: There is no alteration to note. Market remains quiet, prices firm.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that with the close approach of Christmas business in grass and clover seeds, as is always the case, is confined to very narrow limits; meantime quotations generally are unchanged, and holders, in view of the moderate stocks on hand, await with confidence the opening of the New Year's campaign. Full prices are asked for mustard and rape seed, both of these descriptions being in short supply. Canary and hemp seed, with a quiet demand, keep steady in value. Niger seed is scarce and wanted. There is no change to day in either blue peas, haricot beans, or speckled beans, but a spell of cold weather would greatly increase the sale of all kinds of pulse. The Board of Trade returns give the imports of clover and grass seeds into the United Kingdom for the eleven months of this year ended 30th November as 232,617 cwts, value £448,177, as against 259,472 cwts, value £480,162, for the same period of 1899.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

Wheat cargoes opened with a slightly improved demand for American, and 3d. advance for future shipment is asked. Other sorts are firm at currencies. There is a good enquiry for round maize cargoes, but flat sorts are out of favour. Persian barley continues in request, but brewing kinds are not much sought after, and business in Azoff feeding for May shipment is to note to be exciting. American oat cargoes have some steady buyers at full prices. Cargoes of cottonseed are the turn dearer for futures shipment.

BUSINESS DONE.

WHEAT.—Odessa, [illegible] shipment, Walla Walla, 2s 4½d; Argentine, [illegible] shipment, [illegible] 2s 4½d; Argentine, prompt shipment, [illegible] 2s 4½d; Argentine, [illegible] shipment, [illegible] 2s 4½d; Northern, prompt shipment, New Zealand, [illegible] passage.

MAIZE.—Steamer to sail May [illegible] on passage; Argentine, 20s 9d, on passage; American, 19s 9d, December shipment, old crop; American, 18s 6d, February shipment.

BARLEY.—Persian, 17s 3d, prompt; Azoff, [illegible] May shipment.

OATS.—White Libau, 13s 9d, prompt shipment; American white clipped, 15s., on passage.

BEANS.—Saida, 29s. on passage.

[illegible]

[illegible]

[illegible]

[illegible] Egyptian, £6 12s 6d, February shipment.

[illegible] continued on page 791.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

In anticipation of a better demand for fat beasts at Islington owing to the great market day falling so late this year, a larger number of prime quality were sent up for sale, especially from Scotland and Norfolk; they, however, met with a slow and dragging trade. The previous week's rates were, however, well maintained, but for all other grades lower prices had to be accepted, notwithstanding which a clearance could not be made. Fat butchering cows and bulls were in full supply, and were difficult to cash, there being less demand both by town and country buyers, a good many of the former being left unsold. Very little inquiry for rough cattle. At the foreign cattle market, Deptford, there was an increase of over 1,800 on the supply; for the best on offer, consisting of States beasts, trade ruled firm and steady on all three market days, but Canadian ranchers were sold on easier terms. The total number of beasts offered for sale on both markets was 5,869, consisting of 2,370 British and 3,499 foreign, these latter comprising 2,938 from the United States and 561 from Canada. The following were the top rates paid per 8lbs. (sinking the offal):—80 to 90-stone Scotch, 4s. 10d.; 90 to 95-stone Herefords, 4s. 10d.; 90-stone Dublins, 4s. 6d.; 90-stone Norfolks, 4s. 9d.; 100-stone Shorthorns, 4s. 6d.; 110-stone Shorthorns, 4s. 2d.; 90-stone fat cows, 3s. 10d.; 90-stone States beast, 4s. 5d. to 4s. 6d.; 90-stone Canadians, 3s. 6d. to 3s. 9d. The sheep trade at Islington both for wethers and ewes was of a slow nature, especially for the latter, which made rather less money, sales of the former being governed by the previous week's rates; the few foreign sheep at Deptford on Monday were difficult to sell. The total number penned at both markets was 7,615, consisting of 7,180 British and 435 Canadians. Best pens made, per 8lbs, as follows (sinking the offal):—7½ to 8-stone Downs, 5s. 8d.; 8-stone Scotch, 5s. 8d.; 9-stone Downs, 5s. 6d.; 10-stone Irish, 5s.; 10-stone Downs, 5s. 4d.; 10-stone half-breds, 5s. 2d.; 10-stone ewes, 4s.; 12-stone halfbreds, 5s.; 8 to 8½-stone Canadians, 3s. 10d. to 4s. Owing to the nominal supply of calves (20) trade is not worth noting or quoting. Pigs were in full supply, numbering 570, trade for which was a shade firmer on both days; the best small breeds on offer made 4s. 6d. per 8lbs. (sinking the offal).

Trade in the West.

If we except the few sales passing in milch beasts, and also in barreners, both of which are still commanding good prices—the former up to £22 apiece for good milchers, and from £23 to £34 per pair for the latter—attention just now is almost exclusively centred on the Christmas trade, which, although fairly satisfactory in some respects, is yet rather disappointing in others, the buoyancy in the beef trade a short time ago having inspired the hope that better prices all round would have been realised than graziers have yet been able to obtain. Still, the consolation, such as it is, remains that things might have been much worse than they really are. Whilst good steers and heifers—which range in round numbers from £20 up to £40 apiece—can be quoted at 12s. to 13s. per score, this cannot be called a very bad price; but then it is only the very ripest qualities, and daintiest weights that bring this figure, plenty of the ordinary runs of Christmas bullocks selling from 11s. to 12s., and others of indifferent grades at 10s. to 10s. 6d. Prices are all the more disappointing, therefore, owing to the high expectations that had been entertained of an exceptionally good Christmas trade. Mutton is generally looked upon as selling relatively better than beef; but then butchers are very fastidious, and just now only care to look at the very best—choice wethers and ewes of light weights—which sell from 7½d. to 8¾d. per lb., the price depending entirely upon quality. Calves retain their recent firmness, and porkers—which constitute the chief article in demand in pigs—are selling exceedingly well up to 10s. and 10s. 6d. per score. Therefore, as far as the western markets are concerned, there is very little about which graziers or agriculturists can complain very much.

Trade in Ireland.

Thursday last was the "big" or Christmas market in Dublin; but, strange to say, there was a large falling off in the supplies of both cattle and sheep, there being 1,120 fewer beasts and 872 sheep. This large decrease, however, did not effect much improvement in prices, which were very little better than the previous market. Cross-Channel buyers were present in good force, and picked up any choice bullocks and heifers early in the day at fair prices, and with the ordinary run of cattle the fall of the previous week was probably recovered. Small choice heifers made from 10s. to 15s. per head more money. There was a very limited supply of really well-finished cattle, and English buyers were disappointed, but most of them supplied their wants from the winter show at Balls Bridge. Rough second-class cattle met with a very irregular and unsatisfactory sale, and a large number were held over unsold. Ox and heifer beef made from 52s. 6d. to 56s., and some extra good lots from 57s. 6d. to 59s.; second class, 46s. to 50s.; and other descriptions 38s. to 44s. per cwt. The trade in sheep was a little more active. Best wether mutton was worth from 6d. to 6¼d. per lb.; ewe, 4½d. to 5½d. Prime veal scarce and unaltered in price, but rough sorts moved slowly. Demand for good dairy cows active, and high prices given for best quality of springers and new milchers, which sold from £17 to £21. A good supply of pigs, and with a large attendance of English buyers trade was better at slightly higher prices, and a clearance was effected. Best lightweight pigs made from 45s. to 47s. per cwt., and coarse from 32s. to 40s.

Trade in Scotland

John Swan and Sons, Limited, give the following as their report on above for the current week:—The number of cattle on offer this week has been a fair average, but a considerable proportion only very secondary quality. Owing to the excessively unfavourable weather, trade throughout has been generally quieter, and prices about from 10s. to 15s. a head under the previous week. Sheep have been in rather shorter supply, demand moderate, and prices generally the turn lower. Pigs and calves in small numbers, and they have made full quotations. A fair supply of store sheep; anything of a good class met a fair inquiry, and a good clearance effected. A small supply of store cattle; best class in rather better demand, and a clearance of this description effected, but a few secondary cattle left over. Milch cows were shown in smaller numbers of the previous week, and prices were obtained on all classes; especially the better sold exceedingly dear. Quotations: Best beef from 7s. 6d. to nearly 8s. 5d. per stone; best mutton, 7½d. to 8¾d. per lb.

LONDON.

London Central, Wednesday.—No appreciable improvement in demand, and business again slow. Arrivals of beef included 45 tons Scotch, 780 Liverpool sides, 2,100 hindquarters, and 700 forequarters American refrigerated. Quotations:—Beef, Scotch, short sides, 4s to 4s 4d; long, 3s 8d to 4s; English, 4s to 4s 2d; American, Deptford-killed, 3s 8d to 3s 10d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, 3s 6d to 3s 8d; forequarters, 2s 6d to 2s 8d. Mutton: Scotch, 4s 2d to 4s 6d; English wethers, 4s to 4s 4d; ewes, 3s to 3s 4d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 4d; and Dutch, 3s 8d to 3s 10d per 8lb.

London Central, Friday.—Supplies good, and slightly improved demand, while fair business was effected. Arrivals included 100 tons Scotch, 360 Liverpool sides, 2,200 hindquarters, and 1,700 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s to 4s 2d; long, 3s 8d to 3s 10d; English, 4s to 4s 2d; American, Deptford-killed, 3s 8d to 3s 10d; Liverpool, 3s 7d to 3s 9d; American refrigerated hindquarters, 3s 8d to 3s 10d; forequarters 2s 8d to 2s 10d. Mutton: Scotch, 4s 4d to 4s 8d; English wethers, 4s to 4s 4d; ewes, 3s to 3s 4d; Canterbury, 3s 1d to 3s 4d; Wellington, 3s to 3s 2d; Sydney and River Plate, 2s 6d to 2s 8d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 6d; Dutch, 3s 8d to 4s; and Irish, 3s 6d to 3s 8d per 8lb.

Islington, Thursday.—Fair supply of beasts on offer, a good many of which consisted of fat bulls and rough cattle. Dull den and. Moderate supply of sheep penned, for which slow inquiry, but prices of both wethers and ewes were without appreciable change. Quotations: 9-stone Down wethers, 5s 6d; 10-stone half-bred, 5s to 5s 2d; 10-stone Down ewes, 3s 10d to 4s; exceptionally, 4s 2d; 10-stone half-breds, 3s 6d to 3s 8d. Calves were in moderate request, the best on offer making 5s 4d. Pigs in fair supply, ruled without essential alteration Neat small, 4s 2d to 4s 4d per 8lb, to sink the offal. Total supplies: 220 beasts, 780 sheep, 20 calves, 380 pigs, and 10 milch cows.

COUNTRY.

Boston, Wednesday.—A very small market, only a few stores, and for these there was little demand. Best bullock beef, 7s 6d to 8s; cow beef, 7s 6d to 7s 9d per stone. Stores, £9 to £11. No demand for in-calvers. Calves, 60s to 65s. Wethers, 7½d to 8d; ewes, 5½d to 6d per lb. Strong store lambs, 38s to 42s each.

Braintree, Wednesday.—A moderate trade, porkers being in demand. Stock penned: 18 beasts, 178 fat sheep, 68 hogs, 316 store pigs, 6 cows, 12 calves, store sheep scarce, and 3 horses. Cows were in demand.

Brigg, Thursday.—Only a moderate show of horned stock, and buyers were thinly represented. Business was by no means brisk, and only a limited number of lots changed hands. Milch beasts and in-calvers ranged from £12 to £18; drapes, £8 to £11; two-year-old steers and heifers, £9 to £12; and calves, 30s to 40s per head. Very few sheep penned, and scarcely any business was done.

Bristol, Thursday.—Very short supply of beef for Christmas market. Extra qualities scarce, 63s per cwt; good descriptions, 60s to 62s, others 54s to 58s. Sheep limited in number; choice wethers, 7½d to 8d per lb, ewes 6d; trade very slow. About 700 pigs; bacon pigs 9s 6d, porkers 10s 6d per score. Only 200 store cattle, slow sale, nearly all sold at late rates.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
8 sc 10 lbs to 9 sc 10 lbs	2½ in. and under..	9s 0d
Under 10 sc 10 lbs	Not exceeding 2½ in.	8s 6d
Under 11 sc 10 lbs	Not exceeding 2¾ in.	8s 0d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND Co., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 790; sheep, 630; pigs, 417; horses, 9. Beef, 7s 6d to 8s 6d per stone; mutton, 4s 4d to 5s 8d; pork, 6s to 7s. Christmas market, and not so many store beasts, but nearly all cleared Fat beasts, a good show, and fair prices were made all round. Fat sheep, a short supply, and prices better. Stores, a few lots to hand, and all sold. Fat pigs, a good supply, and trade brisk at late rates. Stores, not a very good trade. Hay, straw, and roots, short supply and a fair trade.

Canterbury, Saturday.—Fair offering of bullocks, but very few sheep. Trade was slow. Rough Irish calves ranged from £4 15s to £5 10s; useful Welsh bullocks, £7 15s to £11; shorthorn yearlings, £7 to £9. A few rough cows and calves were also disposed of.

Carlisle, Saturday.—The stormy weather of the past week prevented dealers bringing cattle over from Ireland, and the result was that the supply was smaller than usual. A number of excellent stall feeding heifers were shown, and there were also groups of wintering heifers and polled bullocks. The attendance of buyers was small, and trade was quiet. Wintering heifers were quoted at £6 10s to £8 15s and £10 10s; polled bullocks £12 10s; stall feeding heifers, £13 10s to £14 10s. No young pigs offered.

Colne, Wednesday.—The market was not very largely stocked, and sales fell off. Best English calvers, £16 to £22 10s; geld cows, £14 to £20; fat cattle, £13 to £15; crossbreds, £8 to £12; bullocks, £12 to £16; lambs, 19s to 24s; halfbred sheep, 33s to 35s; ditto wethers, 36s to 38s; Scotch sheep, 22s to 26s; wethers, 32s to 34s; Scotch lambs, 14s to 16s; beef, 5½d; mutton, 6d to 6½d; lamb, 6½d to 7d per lb.

Doncaster, Tuesday.—Fully an average supply of cattle, and sheep for the time of the year, and buyers well represented, but trade not very brisk, late prices being obtained. Beef, 7s to 7s 9d per stone; good sheep, 7d to 8d; secondary, 6d to 6½d per lb.

Dorchester, Saturday.—Large supplies of fat stock for the Christmas trade, including some prize-winners from the Smithfield show. Trade generally was slow, and only the finest brands commanded high prices. Beef sold up to 12s per score. Sheep were in moderate supply, but good prices were only obtained for the primest lots.

Driffield, Wednesday.—There was a good show of beef, and fair prices were made, the primest sorts making up to 8s 6d per stone. Shearlings, 8d per lb; ewes, 6d to 7d. A fair number of grazing sheep, which made up to 40s per head.

Dublin, Thursday.—Good class stall-feds met with fair trade at slightly improved prices. Rough sorts of grass cattle, although considerably diminished in numbers, were still in excess of requirements, local traders and exporters confining their attention more to beef suitable for Christmas. Fair demand for sheep, best qualities of heavy wethers and fancy light weights for home consumption making more money. Shipping qualities and ewes unaltered. Cattle (best), 30s to 31s per cwt. Other descriptions, 26s to 29s per cwt. Mutton, 5½ to 6¾d per lb.—GANLY, SONS, AND CO.

Gainsborough, Tuesday.—Fair show of calves, which met with a ready sale at 34s to £2, being a slight reduction on last week's prices.

Gisburn, Wednesday.—The number of beasts was about an average, and trade not very brisk. English cattle unaltered. Sheep and lambs about unchanged.

Glasgow, Wednesday.—Supplies shorter. Trade fair. Sheep sharper. Top mutton, 8¾d; secondary, 7¾d per lb. Top Scotch cattle, 68s; top Irish, 58s to 60s; secondary, 54s to 56s per cwt. Dead meat slow owing to this being Advent. Values, however, steady. Best States beef, 5¾d; Canadians, 5¼d to 5½d; cows, 4½d to 4¾d per lb.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 775, calves 56, sheep and lambs 1,101, pigs (fat and sows) 31, sucking pigs 6, pigs (stores, not more than ten) 246, pigs (stores, more than ten) 205, horses 50, colts 15. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb: veal 9d per lb; lamb, 8½d per lb; pork, 4½d to 5d per lb: bacon, 4d to 5d per lb.

Hereford, Wednesday.—This was our Christmas fair, but the supply was not much above the ordinary market. The mild weather made buyers very cautious, and prices consequently did not come up to expectations, only the best beasts selling fairly well, at about 6½d per lb. One of the largest buyers was Mr Hollis, Birmingham, who purchased nearly £500 worth under the hammer. The sheep trade was slow, the top price for wethers being 7½d to 8d per lb, and ewes were down as low as 5½d Calves sold well, up to 5 guineas. Pig trade not quite so good; porkers, 9s 6d to 10s 6d per score; bacons, 9s. Trade for store cattle dull.

Leicester, Wednesday.—Very heavy consignments of home fed bullocks came to hand to-day, and a steady trade was done in choice qualities, but inferior were slow. Prime bullocks made 6¼d per lb; secondary, 6d to 6½d per lb; cows, 5d to 5½d per lb; and heifers 6d to 6¾d per lb. Sheep sold freely at 7¾d to 8d per lb for choice light weights; large sheep, 7d to 7½d per lb; and ewes, 6d per lb. Calves sold slowly at 7d to 7½d per lb.

Leicester, Saturday.—Very fair supplies of home-bred stock in good condition. Trade sluggish at easier rates. Milch cows, £15 to £22 per head. Bullocks £8 to £14 each. Young stock, dull trade.

Lincoln, Friday.—Only a moderate supply of beasts, and a dull trade, Young bullocks made £10 to £12, and cows up to £18 per head. The number of sheep was small, and trade was slow. Lambs made 28s to 40s, and ewes up to 30s each.

Lincoln, Friday.—Short supply. For beasts excellent demand and owners of milch cows were particularly firm. Price went up to £21, and a few beasts fetched even £22. Best bullocks, very few of which were offered, realised £14 to £16, and young stock £6 to £11. Supply in sheep department exclusively of lambs; best, 30s to 40s and remainder down to 20s. Pig trade slow; no alteration in prices.

Newcastle, Tuesday.—Heavy cattle trade, buyers holding off for Christmas supplies next week. Pork in good demand. Numbers:—Cattle, 2,464; sheep, 5,555; calves, 48; pigs, 1,080. Prices (sinking offal):—Beef, 5s to 8s, and pork, 5s to 9s per stone. Mutton, 6d to 8d; and veal, 5d to 8½d per lb.

Newport, Wednesday.—The quotations were:—Best beef, 6¾d to 6¾d per lb; secondary, 6d to 6¼d; best wether mutton, 7¾d to 8d; cows, 5½d to 6d; lamb, 8d. A short supply.

Norwich, Saturday.—There was a pretty good show of store beasts here to-day; trade was quiet on former terms. The show of fat cattle was large, in anticipation of the Christmas holidays, and there were some London dealers present. The business done was effected at 8s to 8s 6d per 14lb. Store sheep showed little change; hoggets were quoted at 35s to 41s per head. Fat sheep, which were in moderate supply, made 8s 6d to 9s and 9s 6d per 14lb.

Preston, Wednesday.—Good supplies, but little business for beef, for which recent rates were maintained Sheep sold fairly well, and calves were in poor demand. Beef, heifers and bullocks, 6d to 6¼d; cows and bulls, 5d to 5½d; hogs, 7¾d to 8¼d; tups and ewes, 5d to 6¼d; calves, 6d to 7½d per lb. At market:—Cattle, 2,753; sheep, 6,184; calves, 112; pigs, 73. The Christmas market will be held on Tuesday, December 18.

Sheffield, Tuesday.—A larger show of milch beasts than usual, and a very fair business done particularly in the best lots, which made £20 to £26; secondary sorts, £13 to £16 10s.

Shrewsbury, Tuesday.—Cows with calves and fat stock better both in price and demand with a good trade all round. Small supplies of sheep and calves. Quotations:—Beef, 6d to 6¾d; mutton, 7¾d to 8¾d; and veal, 7¾d to 8¾d per lb. Porket pigs, 9s to 10s 6d, and bacons, 8s 6d to 9s 6d per score. Cows

with calves up to £23 5s. Hay up to £3 12s 6d per ton. Fat pigs made up to £10 15s and cattle up to £33 5s. Number offered:—575 cattle, 47 cows with calves, 500 sheep, 71 calves, 114 fat, 104 porket, and 362 store pigs.

Sp lding, Tuesday.—No fat beasts offering, owing to Christmas fat stock show being fixed for this week. Beef is worth about 7s 9d to 8s per stone. The mutton trade not so good; ewes, 6½; Lincolns and half-breds, 7d to 7½d per lb.

Stockton, We lnesday.—There were on offer 206 cattle, 344 sheep, and 464 pigs. Best cattle a small supply at prices ranging from 7s 6d to 8s per stone; rougher kinds, 6s 6d to 7s; sheep, 8d; ewes, 6d; tups, about 5d per lb.

Taunton, Saturday.—A small supply, moderate attendance, and somewhat dull trade.

Uttoxeter, Wednesday.—There was a large amount of horned stock in the Smithfield. The quality was unusually good, a good deal of fat stock being on offer. Brisk business was done in all classes. Calving cows sold from £14 to £17 10s, calving stirks £9 to £11, barren cows £9 to £12, barren stirks £6 10s to £8, yearlings £4 to £5, one-year-old bulls £6 to £7, two-year-old bulls £8 10s to £10 each; beef, 5d to 6½d per lb. A fair number of sheep penned; fat sheep 6d to 8d per lb. Pigs made from 8s to 9s 6d per score lb.

Wakefield, Wednesday.—Only a moderate trade for both beef and mutton; prime beef made 6½d per lb; and other qualities, 5d to 6d. Small sheep, 8½d per lb; strong sheep, 6½d to 7½d; ewes and tups, 5d to 6½d. Numbers penned:—Fat beasts, 1,926; sheep, 3,217.

Wakefield, Wednesday.—There were some choice animals on offer, which have been sent a week in advance of the usual Christmas show. Trade was slow, but prices were fully those of last week, indeed for choice beef 7d per lb was top price. Mutton slow trade, shearlings making as high as 8½d, rougher sorts 7½d, ewes and tups from 6d. Beasts penned, 1,925; sheep, 3,201.

Wolverhampton, Wednesday.—Large attendance, but business was not over brisk. The supply of beasts was large, but of sheep and calves there was not a great number shown. Beef, 5d to 6½d per lb; mutton, 6d to 8½d per lb; veal, 6d to 8d per lb; bacon pigs, 7s 3d per score; porkets, 18s 6d per score; and sows, 7s 6d per score

Worcester, Saturday.—Market well supplied in all departments, but the mild weather has a depressing effect upon trade. Best quality beef sold at late rates; mutton rather lower; and pigs were scarcely so firm. Beef, 6d to 6½d; inferior, 5d to 6d; wether mutton, 7d to 8d; ewes, 5d to 6d per lb; pork pigs, 10s to 10s 6d; bacon, 9s to 9s 6d per score.

FOREIGN.

Deptford, Wednesday.—Beast entries, 974 head. Trade very slow at 4s 2d to 4s 5d; exceptionally, 4s 6d for United States and 3s 4d to 3s 6d Canadian per 8lb, to sink the offal.

BUTTER.

Tuesday.—Bedale: 1s 10d to 2s per roll of 24oz. Leeds: Danish, 122s to 127s 6d per 112lb; Irish creameries, 102s to 106s; York lump, 15s to 16s per stone; ditto, long rolls, 1½lb, 1s 9d to 1s 11d; fresh butter in 1lb prints, 1s 3d to 1s 4d per lb. Settle: 1s 1½d to 1s 2½d per lb. Sheffield: 1s 3d to 1s 4d per lb. Spalding: 1s 1d per lb. Stone: 1s 3d to 1s 4d per lb.

Wednesday.—Barnsley: 1s 4d to 1s 5d per lb. Boston: 1s 2d to 1s 4d per lb. Colne: 1s 3d per lb. Goole: 1s 3d per lb. Hereford: 1s 4d per lb. Keighley: 1s 4d per lb. Kirbymoorside: 1s 3d per lb. Knaresborough: 2s 1d to 2s 2d per roll of 24oz. Louth: (wholesale), 1s 2d per lb. Market Drayton: 1s 3d to 1s 4d per lb. Market Weighton: 1s 2d per lb. Masham: 1s 8d to 1s 9d per roll of 24oz. Northallerton: 1s 9d to 1s 11d per roll of 24oz. Stockton: 1s 4d to 1s 5d per lb. Whitby: 1s 3d to 1s 4d per lb. Worksop: 1s 5d per lb.

Thursday.—Brigg: 1s 2d to 1s 3d per lb. Driffield: 1s 1d per lb. Kidderminster: 1s 3d per lb. Penistone: 1s 3d per lb. Ripon: 1s 10d to 2s per roll of 24oz. Scarborough: 1s 3d to 1s 6d per lb. Wetherby: 1s 4d to 1s 6d per lb.

Friday.—Altrincham: 1s 4d per lb. Derby: 1s 3d per lb. Easingwold: 1s 2d to 1s 3d per lb. Grimsby: Choicest Danish, 125s to 128s per cwt; Dutch, 112s to 118s; Canadian, 100s to 112s. Helmsley: 1s 2d to 1s 3d per lb. Knutsford: 1s 4d per lb. Leeds: Danish, 122s to 127s 6d per 112lb; Irish, 102s to 106s; York lump, 15s to 16s per stone; ditto long rolls, 1½lb, 1s 9d to 1s 11d; fresh butter in 1lb prints, 1s 3d to 1s 4d per lb. Leyburn: 1s 10d to 1s 11d per roll of 24oz. Lincoln: 1s 2d per lb. Otley: 1s 11d to 2s 1d per roll of 24oz. Whitchurch: 1s 2d to 1s 3d per lb.

EGGS.

Tuesday.—Bedale: 7 for 1s. Leeds: Yorkshire, 18s to 20s per 120; Irish, 13s 6d to 16s; Danish, 10s 6d to 12s 6d; Austrian blues, 8s to 9s; ditto reds, 6s 6d to 7s. Settle: 6 to 7 for 1s. Sheffield: 8 or 9 for 1s. Spalding: 7 for 1s. Stone: 6 to 7 for 1s.

Wednesday.—Barnsley: 6 and 7 for 1s. Boston: 6 or 7 for 1s. Colne: 2s 8d per score. Goole: 7 for 1s. Hereford: 8 to 10 for 1s. Keighley: 6 for 1s. Kirbymoorside: 8 or 9 for 1s. Knaresborough: 6 for 1s. Louth (wholesale): 10 for 1s. Market Drayton: 6 to 8 for 1s. Market Weighton: 8 for 1s. Masham: 7 and 8 for 1s. Northallerton: 7 for 1s. Stockton: 6 for 1s. Whitby: 7 for 1s. Worksop: 3s per score.

Thursday.—Brigg: 8 or 9 for 1s. Driffield: 10 for 1s. Kidderminster: 7 for 1s. Penistone: 8 for 1s. Ripon: 7 for 1s. Scarborough: 7 for 1s. Wetherby: 6 or 7 for 1s.

Friday.—Crewe: 6 or 7 for 1s. Derby: 6 or 7 for 1s. Easingwold: 7 or 8 for 1s. Grimsby: Austrian, 7s 1d to 9s 2d per 120; Hungarian, 7s 2d to 9s 5d; Helmsley: 8 or 9 for 1s. Leeds: Yorkshire, 18s to 20s per 120; Irish, 12s 9d to 15s 6d; Danish, 10s 6d to 12s 6d; Austrian blues, 8s to 9s; ditto reds, 6s 6d to 7s. Leyburn: 8 for 1s. Lincoln: 7 or 8 for 1s. Otley: 6 or 7 for 1s. Whitchurch: 8 or 9 for 1s.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter.—There is a very good demand for really choicest quality Australian and New Zealand butters, and for the latter the demand is accentuated. Prices remain at 110s to 112s per cwt for choicest, but 114s is occasionally made for fancy brands. Finest brings 102s to 106s, but for the lower qualities no improvement is visible. The Copenhagen committee has not altered the official quotation this week, and the market remains firm in the Danish capital. Cheese.—For Canadian there is no change in either demand or prices worthy of mention. The price of Canadian cheese to-day is 5s per cwt less than it was last year at this time, when it rose to 60s.—W. WEDDEL AND CO.

WOOL.

London, Friday.—Wool, English, per pocket of 240lb:—Fleeces, Southdown hoggs, £8 to £11; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11; Leicester ditto, £6 to £7. Colonial, per lb:—Victorian, fleece, superior, 1s 4d to 1s 5d; scoured, good, 1s 5½d to 1s 6d; scoured, average, 1s 4d to 1s 4½d; greasy, average to fair, 10d to 10½d; New South Wales, scoured, average, 1s 1d to 1s 2d; greasy average, 7½d to 8¼d; South Australian, greasy, average, 6d to 6½d; New Zealand, scoured, average, 1s 2d to 1s 3½; greasy, average, 7½d to 8d; Cape, scoured, superior, 1s 3½d to 1s 4½d; fleece, average, 5½d to 7½d; greasy, average, 5d to 6½d; Natal, scoured, 1s to 1s 1d; greasy, average, 5¾d to 6¼d; crossbreds, greasy, Victorian, good to superior, 9d to 11d; New Zealand, fine, 9½d to 10d; ditto, medium, 6¾d to 7½d; ditto, coarse, 5½d to 6½d.

Bradford, Thursday.—The tone of the market is still fairly good, though there is not much business to support it. Merino top makers have put up their prices so much that business is practically suspended. There is a better inquiry for fine cross-breds. Medium and strong descriptions are very quiet, and English are steady but slow. Yarn and piece trades without change.

Canterbury, Saturday.—More business doing, although prices show no improvement. All Kent wools freely command 6½d per lb, with from 4½d to 5d for lamb wool; 6½d to 7½d for half-breds, and from 8d to 10d for downs. Locks are quoted at from 2d to 2½d per lb.

Leicester, Saturday.—Improved tone. In English wool the values are steady at late rates. In yarns there is fair activity in making up special orders. In cashmeres prices have gone up.

FEEDING STUFFS.

London, Thursday.—Linseed has been a firm market with a moderate demand. La Plata is not offered at all freely and rates have improved for this description of seed. Calcutta to London and near 57s 9d buyers. November-December 57s 3d, April-June 46s 6d. La Plata December 50s 9d, December-January 48s, January-February 45s 9d. Hull steady. Calcutta April-June 46s 6d, La Plata December-January 47s 9d, January-February 45s 9d. Azoff October-November 54s 6d. To the Continent, Bombay, February-March 50s 9d, March-May 49s 3d. Calcutta, April-June 46s 3d. La Plata December-January 48s, January-February 46s. Azoff-Novorossisk afloat 50s 6d, December-January 50s 3d c.i.f. Linseed cakes steady. London made £8 10s to £8 12s 6d. Russian, £7 15s to £8 ex dock. American Westerns at £7 17s 6d. Cotton cakes quiet. London made £4 17s 6d to £5. Egyptian £4 15s to £4 16s 3d. Rapeseed continues quiet. Brown Calcutta to London November-December 43s 9d, March-May 39s 6d. To the Continent we quote, Yellow Guzerat November-December 52s, April-June 46s 6d, Yellow Cawnpore March-May 43s, Brown Cawnpore November-December 47s 3d, March-May 39s 9d, Brown Calcutta November-December 44s 6d, April-June 40s, Jamba to Hull April-June 29s 3d, Ravison January-February 33s 6d. Cottonseed.—Demand moderate, prices steady. Near London £6 13s 9d, December-January-March £6 13s 9d. Hull spot £6 11s 3d, December-March £6 10s. Cargoes January £6 13s 9d, February £6 13s 9d sellers. The import into London for the week has been 2,169 tons, and since 1st January 43,417 tons against 36,942 tons corresponding time last year.—THE PRODUCE BROKERS' COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes: With the continued open weather, and relatively high values, there is a very limited demand, while supplies, although not large, are amply sufficient. Russians and Americans sell slowly and without change. There is little fresh business passing in English and quotations are unaltered. Cotton cakes: A fair quality of Egyptian are available on spot, which, with a good enquiry, are firmly held. English move off quietly and unchanged. Decorticated cake and meal in warehouse offer as before. Maize germ meal: Arrived parcels of American are obtainable on rather better terms, while for December to February seaboard shipment £5 3s. 9d. would be accepted. Rice meal: Rangoon ex dock is unchanged, and £4 7s. 6d. ex ship is asked for January arrival.

—PINNOCK BROS., Mark Lane

Hull, Tuesday.—The wheat trade is very quiet to day; home-grown meets a fair sale at about the same prices as last week. Foreign about the same as last week. Malting barley steady at quite late rates for good samples. Grinding unchanged. Oats and beans unaltered from last week. Maize dull, but without material change in values. Linseed: The arrivals are 1,418 qrs from Konigsberg, 10,363 qrs Odessa; total 11,781 qrs. The market is a shade firmer, and a little more disposition shown for business. Calcutta, 46s 9d the quotation. Black Sea, 54s the exact value spot. Petersburg, 54s 6d. Riga, 54s buyers. River Plate firmer; during the week as low as 46s 6d has been accepted, and for Dec.-Jan. 47s 6d to 47s 9d now the value; Jan.-Feb, 45s 9d asked. Cottonseed: there has not been much activity in the market since our last, and lower prices accepted, spot having been sold at £6 12s 6d to £6 11s 3d. Forward positions rather steadier at £6 11s 3d passage and to March, after £6 10s taken middle last week, though rather sellers thereat to-day. Linseed cakes: Steady, with rather better demand. The shortage of seed, spot and near, imparts a very firm feeling with first-hand sellers. Cotton cakes: In good demand at late rates. Hemp. Unchanged.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 17s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 2s 6d PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 0s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 5s 0d PER TON. ALL F.O.R. HULL.

MOLASSINE, packed in bags, of 1½cwt. each. Price per cwt. 7s. 6d. Price per ton, £6 15s., on rail at works, Silvertown, Essex.

FRUIT AND VEGETABLES.

Borough, Saturday.—Arrivals of best qualities of potatoes were on a limited scale, but very large supplies of inferior descriptions were available. Trade for the former was brisk, but business on the latter made extremely slow progress, and prices were difficult to maintain. A good supply of greenstuffs evidenced a moderate sale. Potatoes: English Reading Giants, 3s to 3s 9d; Professor Maerkers, 3s 3d to 3s 9d; British Queens, 3s 6d to 5s; Up-to-Dates, 3s 6d to 5s; Belgian and Dutch: Imperators, 2s 6d to 3s; Magnums, 2s 9d to 3s; French and German Magnums, 3s 3d to 4s per cwt. Cabbages, 2s to 2s 6d; savoys, 2s 6d to 3s per tally; Brussels sprouts, 1s to 1s 3d per half-sieve; parsnips, 2s 6d to 3s per bag; turnips, 2s to 2s 6d; parsley, 1s to 1s 6d per dozen bunches; celery, 6s to 1s per dozen bundles; English onions, 4s to 4s 6d per cwt; Valencia, 6s to 6s 6d per case; English apples, 2s 6d to 6s per bushel; Nova Scotian, 9s to 12s per barrel; oranges, 8s to 14s per box; grapes, 8s to 10s per barrel; chestnuts, 7s to 9s per bag.

Covent Garden, Saturday. [illegible] supplies were limited [illegible] Potatoes: Best samples [illegible] 3s; seconds, 2s to 2s 6d per cwt. Cabbages, 2s per dozen; Brussels sprouts, 2s per ½ sieve; carrots, 2s per bag; turnips, 2s per bag; onions, 3s per cwt; parsley, 1s per dozen bunches; horseradish, 1s per bundle; celery, 9s to 1s per dozen bundles; English apples, 4s to 6s per bushel; Normandy, 9s per barrel; Canadian, 12s per barrel; pears, 2s per dozen; Belgian grapes, 2s to 2s 6d per lb; Almeria grapes, 9d to 2s; Belgian, 6d to 1s per lb; Almeria, 18s per barrel; English apples, 3s to 7s per bushel; Scotian, 10s to 18s per barrel; Californian pears, 1s to 2s per box; Egyptian oranges, 3s to 3s 6d per case; Messina, 3s to 4s per case; Valencia, 8s to 16s per case; Tangerine oranges, 2s to 3s per dozen; pineapples, 1s 6d to 4s each; bananas, 4s to 6s per bunch; lemons, 2s to 4s per case; tomatoes, 1s to 2s per lb; cucumbers, 1s to 2s each; mushrooms, 1s to 2s per lb; chestnuts, 7s per bag; walnuts, 7s per sack.

POTATOES.

Borough and Spitalfields, Saturday. [illegible] past week the arrivals of best samples [illegible] light, but the stock in hand [illegible] Trade has been brisk for best samples, [illegible] been a dragging trade, with prices [illegible] English: Reading Giants, 3s to 3s 9d; Professor Maerkers, 3s 3d to 3s 9d; British Queens, 3s 6d to 5s; Up-to-Dates, 3s 6d to 5s; Belgian and Dutch Imperators, 2s 6d to 3s; Magnums, 2s 9d to 3s; French and German Magnums, 3s 3d to 4s per cwt.

Goole, Wednesday.—Potatoes: There were [illegible] on offer here today. Trade was rather quiet at last week's price, 80s per ton.

HOPS.

Canterbury, Saturday.—Quiet, but prices [illegible] quantity of hops unsold is such that holders decline offers below current rates. Medium lots of useful quality are fast being cleared.

Worcester, Saturday.—Trade quiet [illegible] Worcester hops, and the small demand prevailing is [illegible] of merchants' stocks. There is not likely to be any considerable volume of business done before Christmas, and in the meantime all hops in growers' hands are very [illegible].

Worcester, Saturday.—There has been no trade doing in new hops on our market this week, and only a few bales of yearlings have been weighed at the public scales. Prices keep very firm, owing to the few hops left, and more money will have to be paid when the spring demand sets in.—PIERCY AND CO.

HAY AND STRAW.

Whitechapel, Saturday.—Short supplies and a [illegible] demand, business being of a good character. Best clover, 85s to 100s; inferior ditto, 80s to 85s; specially picked hay, 92s 6d; good ditto, 80s to 87s 6d; inferior ditto, 50s to 60s; mixture and sainfoin, 70s to 90s; and straw, 25s to 36s per load.

Cumberland, Saturday.—Best selected hay, 2[illegible] good ditto, 75s to 80s; inferior ditto, 50s to 70s; prime clover, 85s to 97s 6d; good ditto, 70s to 80s; inferior ditto, 60s to 65s; best mixture, 80s to 90s; and straw, 24s to 36s per load.

FOREIGN HAY AND STRAW.

London, Saturday.—There has been rather more inquiry this week, but the volume of trade passing is extremely small. We quote Canadian timothy and clover mixture, 83s; Dutch 1st cut clover, 88s 6d to 90s; Dutch and French 2nd cut clover, 90s to 92s 6d; good Dutch hay, 75s; inferior Dutch hay, 65s, all per ton, delivered by barge alongside.—FULLER AND PRENTIS, 9 and 10 Great Tower Street, E.C.

MANURES.

Liverpool, Friday. Fertilisers are idle at the [illegible] rates, and likewise feeding stuffs; values of the latter tend in buyers' favour, and annexed are to-day's quotations:—Nitrate of soda, best quality, i.e., guaranteed 95 per cent., pure, in bags, £8 7s 6d to £8 10s per ton; East India bone meal, in bags, £4 7s 6d per ton; kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton; palm nut cake, prime, in bags, £5 5s to £5 7s 6d per ton; linseed cake, American thin oblong, prime, in bags, £7 12s 6d to £7 16s 3d per ton; linseed cake, English, prime, in bulk, £8 15s to £9 per ton; linseed cake, foreign, round, prime, in bags, £8 12s 6d per ton; cottonseed cake, N.A., decorticated, [illegible] in bags, £6 15s to £7 2s 6d per ton; cottonseed cake, English, decorticated, prime, soft, in bags, £7 5s to £7 7s 6d per ton; cottonseed cake, English, undecorticated, prime, in bulk, £4 15s to £5 per ton; cottonseed cake (crushed), 20 to 25 per cent. oil, guaranteed, prime, in bags, £7 5s per ton; maize germ meal, English, prime, in bags, £5 7s 6d to £5 10s per ton; rice meal, Rangoon, as imported, in bags, £4 15s to £4 17s 6d per ton; Indian meal, coarse to fine grinding, prime, in bulk, 11s to 11s 6d per 240lb; [illegible] fine bold feeding, in bags, £3 3s to £3 5s per qr, 416lb; N.A. cloverseed, new red, fair to good, in bags, nominal; D.N.S. brand superphosphate of lime, guaranteed 30 to 31 sol, in bags, nominal; D.N.S. brand superphosphate of lime, guaranteed, 30 to 31 sol, in bags, nominal; D.N.S. brand superphosphate of lime, guaranteed, 35 to 36 sol., in bags, nominal; basic slag, prime quality, guaranteed 15 to 20 per cent phos., in bags, £1 11s to £1 12s 6d per ton; [illegible] prime quality, guaranteed, 35 to 40 per cent. phos., in bags, £1 13s 6d to £1 14s 6d per ton; basic slag, finest quality, guaranteed, 38 to 45 per cent. phos., in bags, £1 16s to £1 17s 6d per ton, at the producing depots.—H. JONES LANCASTER AND CO.

Winsford Cheshire, Saturday. [illegible] salt at the works: Common white [illegible] per ton; screened rock salt, 8s 6d per ton, for truck loads in bulk—THE SALT UNION, LIMITED.

LIVE STOCK.

OUR ILLUSTRATIONS.

The three fat Suffolks were exhibited at the Smithfield Club's show last week by the Earl of Ellesmere, of Stetchworth Park, Newmarket (who was also the breeder), and carried everything before them. They were shown in the class for three fat wethers of the Suffolk breed above twelve and under twenty-four months old, and they came out at the top of the list, afterwards being awarded the £15 silver cup for the best pen of their breed, the £50 challenge cup for the best pen of three short-woolled sheep or lambs in the show, and finally the Prince of Wales's Challenge Cup, value £100, for the best pen of three sheep or lambs in the show bred by the exhibitor. The same animals were also exhibited at Norwich, but they were not so successful there, being first in their class and reserve for the special prize for the best pen of shearling wethers or ewes in the show. At Norwich their weight was given as 7cwt. 3qrs. 24lbs., and at Smithfield 8cwt. 2qrs. 2lbs.

The crossbred steer Cock o' the North was exhibited at the Smithfield and Birmingham Shows by Captain H. L. Townshend, Caldecote Hall, Nuneaton. It won first prize in the class for crossbred steers over two and under three years old at both shows, and was reserve for the £25 silver cup for the best crossbred, and the £50 silver cup for the best steer or ox at Smithfield, and reserve for the £30 prize for the best animal in Classes 17 to 24 (Welsh, crossbreds, Kerries, and Dexters) at Birmingham. Cock o' the North was bred by the late Mr. W. H. Lumsden, Balmedie, Aberdeenshire, his sire being Mantlet of Blairmore 13650 (Aberdeen-Angus), and his dam Twinkling Star 64931 (Shorthorn). When exhibited he was a little over two years and ten months old, and weighed 17cwt. 3qrs. 13lbs. at Birmingham, and at Smithfield 9lbs. less.

Mr. R. J. Colman, Bracondale Woods, Norwich, won a first prize and the breed cup at the Smithfield Show with the Red Poll heifer Barbara III., sire Lord Nock 4010, dam Barbara 6922, bred by the late Mr. F. E. Colman, Nork Park, Epsom. Barbara III. was also exhibited at the Norwich Fat Stock Show, where she was also first in her class, and was awarded the prize of £15, for the best Red Polled beast in the show. She is close on two years and ten months old, and weighed 14cwt. 0qr. 4lbs. at Norwich, and 6lbs. more at Smithfield.

The Devon steer Baden Powell, sire Harold 4th 3595, dam Duchess 38th of Pound 14174, by Masterpiece 2837, was bred by Mr. A. C. Skinner, Pound Farm, Bishop's Lydeard, and exhibited at the Norwich, Birmingham, and Smithfield Shows by Mr. John Wortley, Frettenham, Norwich. At the first named exhibition Baden Powell was entered in the class for steers of any pure breed other than Shorthorn or Red Polled, over two and under three years old, and here he had for a rival the magnificent Hereford steer Lord Roberts (also belonging to Mr. John Wortley), and as a result he was placed second. At Birmingham, however, the two were, of course, in different classes, and this time Baden Powell came out at the head of his class, and also won the cup for the best Devon, a performance he repeated at Smithfield. His weight at Norwich and Birmingham was exactly the same, namely, 14cwt. 1qr. 23lbs., but before reaching the Smithfield Show he lost 13lbs.

The Welsh steer, which is without a name, was the winner of a first prize at Birmingham and second at Smithfield. It was exhibited by the Hon. F. G. Wynn, Glynllifon, Carnarvonshire, and was bred by Mr. W. Roberts, Llwydfarn, Talycafn, R.S.O., its sire being Cynto, and its dam Blackan. It is just under three years old, and weighed at Birmingham 17cwt. 2qrs. 20lbs., and at Smithfield 1qr. 3lbs. less.

The Welsh heifer Bryny Wern, whose sire was Bryntwr, and dam Garreg Bach, was bred and exhibited by Mr. R. M. Greaves, Wern, Portmadoc. She was only shown at the Smithfield Club's exhibition, and she won the first prize in her class and also the breed cup. Her age and weight were respectively—two years ten months three weeks; 16cwt. 0qr. 6lbs.

STOCK AND SHOW NOTES

By Herdsman.

Messrs. Alfred Mansell and Co., of Shrewsbury, have just received a letter from Mr. George Simonds, of Tasmania, which reads as follows:—"My Shropshire shearling ram, bred by Messrs. Evans, to be known henceforth as 'Austral Star,' arrived by the ss. Paparoa on the evening of October 29th in good order, and it will interest you to know that I am perfectly satisfied with the selection. The other sheep sent with the same vessel turned up in a most healthy condition, reflecting creditably on the arrangements made for the journey."

The entire herd of pure-bred Shorthorn cattle, belonging to Mr. W. H. Hall, of Cross Canonby, Maryport, Cumberland, is to be sold by Messrs. John Thornton and Co., on Wednesday, January 9th, at Cross Canonby. The herd, which is sold in consequence of Mr. Hall's advanced years and retirement from active business, has been in existence over fifty years. It was first established at Gilcrux, and afterwards removed to Cross Canonby, the original cows having been obtained from Mr. Gilbanks, of Whitefield, and Mr. Sowber Watkin, of Plumpton. Good bulls were obtained from eminent breeders, Sir Humphrey 9640, one of the earliest, being purchased from Mr. Senhouse, of Nether Hall. Wedding Guest 73871, by Sea King—Lady Rosedale, by the well-known prize bull Ingram's Faith, was used three seasons, and is the sire of a large number of animals for sale; as also is Village Chief 78072, bred by Messrs. Mann from the old Brayton Benson tribe.

Village Chief is still in service, as well as Double Benedict 70726, from Madge Millicent, who was by Beau Benedict, a bull that may be said to have been the making of the late Mr. Robert Thompson's herd at Inglewood. In fact, this stock is very full of the blood of that famous herd, as well as of that at Brayton. It has been reared on a very healthy farm adjoining the Solway Firth. The cows are capital milkers and have been kept for butter making and calf rearing; casting is unknown. For many years no cows have been purchased, but fresh blood has been brought in through the sires, with good judgment, as the excellent young stock will testify.

Mr. Hall's farm stock, comprising a small choice pure-bred flock of Lincoln sheep, of Messrs. Dudding, Norman, and Mann's blood, about 300 cross-bred Border Leicester and Highland sheep, the cart horses, crop of 190 acres, and implements, will be sold on the same day by Mr. Williamson, of Wigton.

The Council of the Royal Dublin Society are acting munificently in promoting and fostering the success of their great spring show. This year, and at several previous shows, some dissatisfaction was expressed by exhibitors, particularly in the classes of Shorthorns, Herefords, and Aberdeen-Angus, which always held an important place among the leading breeds, and so far at least as these three classes are concerned, the Council of the Society have just determined to increase by £354 the money prizes allotted to their owners. At the last spring show Shorthorns had £198 distributed amongst them, Herefords £80, and Aberdeen-Angus £110, this amounting to £396, and now, with £354 added, the total prize awards in these classes at the spring show will reach the considerable figure of £750.

Red Polls will again have £32 in money prizes, Galloways £20, Ayrshires £24, Kerries £54, Dexters £54, Jerseys £54, Guernseys £5, and dairy cattle £20. Swine will have £66, agricultural horses £173, Hackneys £176, asses £5, harness horses £149, polo ponies £83, while in the jumping competitions £130 will be awarded. Draught horses and vehicles will have £43 15s. awarded in money prizes. The class prizes thus amount to £1,865, and with numerous valuable cups, medals, and special prizes, and of service premiums for bulls and boars added, the money value to be awarded the spring show exceeds altogether £5,000.

As the result of a conference held recently between the Royal Dublin Society and the Department of Agriculture and Technical Instruction, the Society propose to introduce a change in their scheme for the improvement of the breed of horses in Ireland. They will, it is understood, hold a show of thoroughbred stallions in March, 1901, when £2,500, part of the fund payable annually to the Society under the Probate Duties Act, will be offered in premiums, subject to certain conditions of service.

In the House of Commons on Thursday Mr. Powell Williams stated that the number of horses landed in South Africa since the commencement of the war amounted, according to the last return, to 117,730. The number of mules was 64,730; 5,689 horses were lost on the voyage and 1,997 mules. No reports have been received showing the number of horses captured from the enemy or lost in the war.

Referring to the recent shipment per ss. Persic, of the White Star line, of twenty-four shearling ewes to Mr. James Gibb, of Melbourne, by Messrs. Alfred Mansell and Co., of Shrewsbury, which without doubt is the largest and most valuable selection of Shropshire sheep ever taken to the Antipodes, the following particulars are given. Eight beautiful ewes bred by Mr. Philo Laos Mills, including the Bath and West of England and R.A.S.E. winners sired by Joe Chamberlain 9520, a son of Odstone Conservative 8153, Odstone Peacemaker 10048, winner Birmingham R.A.S.E.; Scotland's Hero 10116, winner R.A.S.E., bred by Mr. Buttar, by Crested Knight 8957 (sire of Royal Record, sold for 310gs.); and Royal Stuart 9665, by Lord Patriot 4627. Five ewes hailed from Mr. Buttar's noted flock, and were typical nice ewes sired by Crested Knight 3957, before alluded to; Corston Knight 9862, bred by Mr. Buttar, by Crested Knight; and Hallyburton 937, bred by Mr. Harding, by The Constable of Chester 7754. Mrs. Barrs supplied three choice ewes, including a first prize winner at Leicester Show and two others, all sired by Mr. Bowen-Jones's 185gs. Ensdon Four B's. Two extra good ewes had been purchased from Messrs. Evans's flock, one sired by Star of the Morning 10145, bred by Mr. A. E. Mansell, by Dream Star 8977, and the other by Mr. Minton's 60gs. Montford Monarch 10016, by the Royal winner Phenomenon 8680. Mr. A. E. Mansell supplied three nice typical ewes, sired by Fortification 9498, the sire of Mr. Mansell's Royal winner sold at 240gs., Dream Star 8977, and Bonny Dreamful 9362.

The remainder (three) came from Mr. Minton's celebrated flock, and were ewes of a beautiful stamp, two of which were sired by Phenomenon, winner R.A.S.E., and one by Odstone Pirate 10049, by Odstone Pilot 8662. The whole of these ewes had been served by the very best sires obtainable, amongst which may be mentioned Strong Bone 10548, Mr. Fenn's 100gs. ram in 1899; Substitute, an own brother to Mr. Tanner's 120gs. ram, sold to Mr. Burbury, of Tasmania; an 85gs. ram, bought by Messrs. Evans at Harrington, by Fortification 9498; Odstonian 10054; Black Watch, Mr. Mills' 80gs. purchase at Mr. Buttar's sale; Milas, Mr. Mills' 52gs. ram, purchased at Mr. Muntz's sale; Ontario 10468, Buttar's Reserve 9381, Corston Judge 10034, Montford Judge 10435, etc.

Special care had been taken in selecting these ewes to procure close dense fleeces and nice cherry skins, and Mr. Gibb is to be congratulated in obtaining such a well-bred collection from some of the leading breeders of this valuable breed of sheep. Messrs. Alfred Mansell and Co. personally attended to every detail of the shipment, and the sheep were sent out in charge of a junior member of the Mansell family.

Basingstoke Christmas Fat Stock Sale.—Messrs. Hugh E. Raynbird and Sons held their 28th annual auction sale of fat stock on Wednesday, which attracted a very numerous and influential company of agriculturists and buyers from all parts. The supply consisted of 170 fat beasts, 736 fat sheep and lambs, 48 calves, 395 fat pigs, and 148 head of poultry, consigned by about 160 feeders. The buildings were fairly brisk and well maintained for all the best cattle, but the late sellers had slightly the worst of the business. Buyers thought the trade was good; sellers said it might have been better; but with few exceptions they were well satisfied to clear out. The ruling prices were similar to last year, viz., prime Devon and polled beasts, 7d. to 8d. per lb., ditto Shorthorn, 6½d. to 7d.; bulls, cows, and inferior beasts, 5½d. to 6d. per lb. With a supply in excess of last year's Christmas market the sheep as offered consisted of ripe Hampshire Down, Southdown, and Exmoor sheep and lambs. The trade, taken as a whole, was fairly brisk, a clearance being nearly made for the best weights good quality mutton late prices were well maintained.

CATTLE.

Importation of Animals (Ireland).

Foot-and-Mouth Disease.

The Department of Agriculture and Technical Instruction for Ireland desire to intimate that it has been decided to relax the prohibition which for some months past has been in existence against importation of animals (*i.e*, cattle, sheep, goats, and other ruminant animals, and swine) from Great Britain into Ireland; and the following is an outline of the regulations which will come into force in regard to such importations until further notice:—

(1) Except in the case specified in paragraph 5 below, a permit from this department will in each instance be necessary before importation can be effected.

(2) The grant of permits will be dependent on the result of inquiries which the Department will cause to be made in connection with each application.

(3) Permits, when issued, will state what further conditions (if any) have to be fulfilled to enable the importation to be completed.

(4) Shipping companies, before accepting animals for importation, should see that they are accompanied by a permit wherever a permit is necessary, and that the conditions therein laid down have up to that point been complied with.

(5) In the case of sheep imported from places in Scotland and shipped at Scotch ports, the requirement as to production of a permit will be dispensed with. In all cases of this kind the animals will be allowed to be imported without previous application to the Department, provided they are accompanied by a veterinary surgeon's certificate of health given at the time of movement and by a declaration that during the preceding three months they have not been in contact with any diseased or suspected animals, and subject also to the condition that they are found free from disease on examination by a veterinary inspector of the department on arrival at the port of entry in Ireland.

(6) Shipping companies trading to Scotch ports should be careful to see that in the case of any sheep sought to be imported from thence the certificate and declaration specified in paragraph 3 above are duly forthcoming prior to shipment, as the non-production of such documents on arrival in Ireland would render the landing of the animals liable to be disallowed.

Tuberculosis and the Foreign Cattle Trade.

At the annual dinner of the Aberdeen-Angus Club, held at the Tavistock Hotel, London, on the 8th inst., under the presidency of Mr. W. S. Ferguson, of Pictonhill, a discussion took place upon tuberculosis as it affected the foreign cattle trade. Mr. Ferguson, who initiated the discussion, said some of the restrictions placed upon the cattle trade, particularly upon the trade with the Argentine Republic, were, in his opinion, unfair to the stock-breeders in this country. He suggested that the tuberculine test, which was applied to the cattle on landing at ports in the Argentine, should be applied before the animals left the country. He understood that the particular objection to such a proposal was that animals could be "faked" and made to pass the test whilst they were really unsound. He believed it was the case that if the tuberculin were injected into an animal some weeks before the official test was to be applied, then the tuberculin would not react upon the second occasion. He did not believe that any responsible stock-breeder would do such a thing as to "fake" animals, and considered that it would afford a greater degree of protection to the buyers in the Argentine Republic if the tests were applied by inspectors officially appointed to conduct the work in this country.

Professor Macfadyen spoke next. He admitted that the Chairman had made out a strong case from a seller's point of view. It might be difficult to convince the buyers in the Argentine that nothing was done to interfere with the value of the test. He did not suggest that any member of the club would "fake" animals, but he had heard of a hypodermic syringe being seen in the possession of men who had charge of cattle crossing the Atlantic. Prof. Macfadyen also pointed out that it did not follow that an animal which had been found free from tuberculosis in this country would be found equally free when it arrived at the Argentine. It might develop the disease on the way.

After a long discussion, it was unanimously resolved to memorialise the Board of Agriculture with a view to having the restriction upon the cattle trade modified in the way in which the chairman had suggested.

LORD ELLESMERE'S PEN OF SUFFOLK SHEEP. CHALLENGE CUP, CHAMPION PLATE, AND BREED CUP WINNERS AT THE SMITHFIELD SHOW.

Shrewsbury Store Stock Sales.

Messrs. Alfred Mansell and Co., auctioneers, of Shrewsbury, held their last store cattle sale for the season on Friday last, when, as usual, a very useful lot of cattle was offered for competition. The auction was well attended, buyers hailing from many of the southern and eastern counties. Within the past year cattle have been sold at this Mart from no less than thirty counties in Ireland. The prices on Friday ruled as follows:—Hereford steers, £12 5s., £11 10s., £11 7s. 6d., £11 5s., £11, £10 10s.; Hereford bullocks, £13 17s. 6d., £13 15s., £13 10s., £13 5s.; polled bullocks, £12 17s. 6d., £12 15s., £12 10s., £12; polled heifers, £10 10s., £10 7s. 6d., £10, £9 15s.; Shorthorn steers, £12, £11 15s., £11 12s. 6d., £11 10s.; Shorthorn heifers, £13 10s., £13, £12 15s., £12 10s., £11 17s. 6d.; Welsh cattle, £10 12s. 6d., £10, £9 10s., £8 15s., £8, £7 15s. The first sale of the coming season will take place on Friday, January 11th, for which a large entry has been received.

The fair held at Tipperary on Monday was a large one. A good demand prevailed for calves and one and a-half year olds, but older cattle sold slowly, and a number failed to find purchasers. The small supply of springers met a good demand. Quotations: Calves, first class, £5 5s. to £5 15s.; second class, £4 to £4 17s. 6d. Yearlings, first class, £8 15s. to £9 10s.; second class, £6 5s. to £8 12s. 6d.; third class, £4 10s. to £6. Two-year-olds, first class, £12 5s. to £14 10s.; second class, £9 to £11 10s.; third class, £7 10s. Springers, first class, £15 10s. to £18; second class, £12 10s. to £15.

ALL farm live stock should be given "MOLASSINE." It is an excellent food and condiment combined. See advertisement on back page of this issue.—[ADVT.]

SMITHFIELD SHOW.

Mr. Wortley wins the Championship.

The hundred and second show of the Smithfield Club, at the Royal Agricultural Hall, London, was brought to a conclusion on Friday, after having, as usual, extended over five days. It was a most interesting display, for there was a decrease in each division, comparing the entries with those of last year, and a still greater falling off from the number of the Centenary Show of 1898, while the quality of cattle and sheep were much superior to those of any of the five preceding shows.

The cattle entry was fifty-two fewer than last year, the sheep twenty, the pigs five, and the number of sheep thirteen, whilst the carcases of beasts balanced at the same total. Satisfaction must be found from the fact that the quality of the exhibits has never been higher than at the present show, and that the efforts wisely made by the Council of the Smithfield Club to encourage animals which mature early, and are consequently far cheaper to bring to market, are clearly bearing good fruit. On Monday His Royal Highness the Prince of Wales opened the show, with Sir Nigel Kingscote in attendance, the illustrious visitor being received by Mr. Leopold de Rothschild, the president for the year, Lord Feversham, Sir Walter Gilbey, Lord Moreton, and Mr. Hanbury, the Minister of Agriculture.

The championship awards were remarkable for having reversed some of the Birmingham judgments, and thus greatly diminishing the success which was anticipated for the Queen. For the silver cup offered to the exhibitor of the best beast in the show not over two years of age neither the Queen's Shorthorn heifer nor Mr. Learner's crossbred heifer was eligible, and it was awarded to Mr. John Ross's younger crossbred heifer, a fine beast for her age. The competition was not at its greatest when the judging for the silver cup offered for the best steer or ox in the hall was in progress. Still, there were several made breed cup winners in the running for these honours, and a good beast was needed to come out at the top. The feat was accomplished by Mr. John Wortley's fine Hereford. Then came the tussle for the female championship, and the Birmingham judgment was reversed by placing Mr. Learner's Norwich champion crossbred above the Queen's Shorthorn Cicely, the great winner in Bingley Hall. Mr. Learner's heifer is the more symmetrical and the better handler of the two. Mr. Wortley's Hereford steer was placed as the best beast of either sex in the show, thus putting him, not only above the Queen's heifer, which had beaten him at Birmingham, but also above Mr. Learner's heifer, which had beaten his Birmingham victor. The Hereford, however, was not in the running for the Queen's challenge cup, as he was not bred by his exhibitor, and the same remark applies to Mr. Learner's heifer. Therefore, Her Majesty had not her chief rivals to contend with in the last contest, and won her own trophy for the third time, thus becoming entitled to retain it.

Cattle.

HEREFORDS.

The Hereford classes were certainly very well filled as regards their quality. In numbers they were not exceptionally strong, though a good average. Many of the animals had been present at the Birmingham show the previous week, and for the most part retained their positions. In the older class of steers a little alteration was caused by the exhibition of Her Majesty the Queen's steer that had been entered for Birmingham and not sent. It was very generally thought from what had been heard of this steer that he would prove the champion of the year, but, however, as frequently is the case, an animal at home by himself and at a show in competition with others is a very different thing, and so the Birmingham reserve champion proved quite superior to his opponent. The younger class of steers, however, came first in the contest, and these were placed exactly as in the previous week, Mr. John Price's very big steer, who, by the by, looked none the worse for his outing, being placed first. This bullock has very great development for age, the best in the show, turning 15cwt. 0qr. 8lb. at a year and ten months, and he handles well, and also carries a good, deep, well-sprung [illegible]. He was got by Truant, his dam by Boniface. Her Majesty the Queen came second with a steer by Launcelot, weighing 12cwt. 1qr. 25lb., a beautiful steer in the hindquarters, but falling somewhat in the front, nevertheless, very good quality. Mr. A. P. Turner's third, as we said of him at Birmingham, is about as perfect a good as any in the class, though he has not sufficient speed about him to go on for further growing; he is capital beef, well filled on the top and firm. A second entry from Windsor was r. and h.c., and an entry of Mr. W. T. Barneby's c.

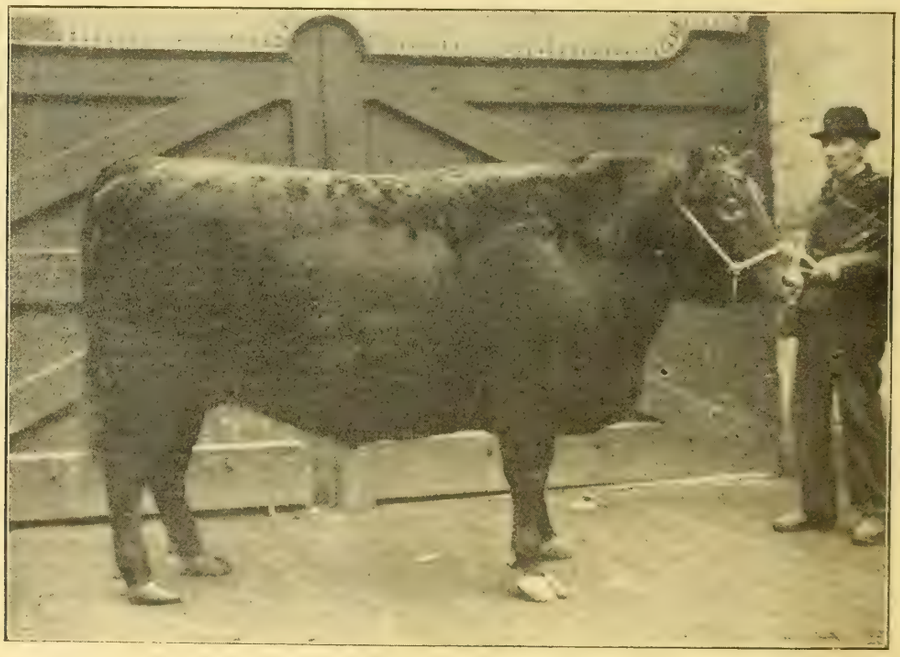
There were nine entries in the older class of steers, most of which, as already mentioned, were at Birmingham and suitably placed. Mr. Wortley's steer again came to the front, and here at the Agricultural all the leading honours open to him to Norwich, having

the Hereford-breed cup winner, the best ox in the show, and finally the best animal of any age, breed, or sex in the hall. He has retained his bloom wonderfully from Birmingham, and is so immensely deep in ribs and ripe, and filled up with beef of the right kind that these good properties outweighed his slight plainness of the hind quarters, which is, however, very apparent. He still stands at 17cwt. 1qr. 25lb. weight, sired by Bountiful, his dam by Sir Frank. Her Majesty's steer was placed second. He was got by Ladas, the sire of last year's champion, and is certainly a most remarkably good bullock. His loin and back are of the best so far as roasting beef is concerned, and he is neat at the setting on of tail, with good thighs. In scale he is considerably lighter than the winner, and in showing himself the weakness of the hocks gives a very apparent slope to the hindquarters, which detracts from his general contour. Mr. Hyde Cooke's third prize one (second in the Midlands) we liked very much, and he certainly ran the Windsor bullock closely for the second place. He is a capital-topped and well-finished bullock, and is little short of the weight of the first prize one. He was got by Ruler, out of a cow by the Crome Court bull Golden Miner. A second entry of Mr. Cooke's was reserved; h.c.'s were given to two very good bullocks of Mr. John Price's and Mr. A. E. Hughes's, and c.'s to Mr. Wm. Taylor's and Mr. J. J. Cridlan's entries. Heifers were a small class of three entries, Mr. A. E. Hughes's Ladylike II. having an easy victory, as she had previously. Mr. W. Taylor's two young heifers showed to better advantage in London, being neat and level, and were given second prize and the reserve card.

SHORTHORNS.

This breed came out in very good force indeed, especially when we take into consideration the fact of the great demand that has been experienced for such a long time past for the best class of them for breeding purposes. The quality, too, was of very high character. In the younger steers the Windsor entry, Robin Hood, who took the leading honour in the class at Birmingham, here repeated that performance. He was looking in capital bloom, and his level flesh, good shape, and handling brought him well to the front. He was sired by Prince Victor, out of Rosemead, by Nobleman, and weighs 13cwt. 2qrs. 14lb. The second steer had not previously made his appearance in the south, being a new comer from the North from the Earl of Rosebery's Dalmeny Park herd. He weighs somewhat heavier than the Windsor bullock, and he is well shaped and handles firmly. Perhaps it may be urged that he is a little flat in the ribs, which is not quite to our liking. He was bred by Mr. Finlay Munro, Ivy. sire Regulator, dam by Distiller. Miss Alice de Rothschild well deserved the third honour given her for Flower Boy, by Cabin Boy, from a Ringleader cow. He scales 13cwt. 3qr. 11lb., and is a particularly neat, nice steer, and well developed for age. A fourth prize was added in this class, and given to a very nice bullock, bred and shown by Mr. John Ross, from Meikle Tarrel, and a son of the fine old sire, Ringleader. He is a little lighter in weight than the two last-mentioned ones, but in shape and quality runs very close up to them. The reserve card and an h.c. was accorded to a white steer from the Sandringham herd, a level-backed one, and good in his hair and quality of flesh, rather a little plain in the horns from a breeder's point of view, otherwise a very nice steer.

Coming to the older bullocks of this breed, very great changes were experienced from the Birmingham decisions. There were several newcomers that had been to the Edinburgh Show also for an outing, and so there were many more to select from, and both the Northern and the Midland judges' decisions were in several cases altered. In London the coveted distinction fell to the Earl of Rosebery's steer, bred by Mr. Gordon, the get of Abbotsford II., out of Tit Bits, by Touchstone. He stood second at the Edinburgh meeting. His weight is good—15cwt. 3qr. 20lb.—and he is extra well finished, a good back, and correct bottom line, one of the deep, wide, short-legged class—altogether a square, good fat steer, and not too big; indeed a cwt. more would not have hurt him. Next in order came a very good steer of Lord Calthorpe's that we do not recollect having seen before—a very level-backed one, well covered with good roasting beef, and handling very well. He is just inclined to be a little uneven at the tail head, otherwise would be a hard nut to crack. His weight, too, is a great help, being 16cwt. 2qrs. 16lb. He was bred by Mr. John Ross, and sired by Maximilian. Miss Alice de Rothschild carried off the third prize with one of her steers that had been at Norwich and Birmingham—a wide, good lined and well-fleshed one, got by Cash. He scaled 16cwt. 0qr. 13lb., and his quality was good enough for anything. His companion that had beaten him upon previous occasions now had to fall back to an h.c. The reserve card went to Mr. F. C. Fletcher for a very big steer bred by Mr. A. Reid, sired by Lord Dunovan, and scaling 18cwt. 1qr. 6lb., the heaviest of his breed. He is good in quality, too, though not quite as firm as some of them, or perhaps scarcely as evenly filled up, nevertheless capital in the best parts, and seemed very hardly used. He was, we understand, first in his class and breed at the Northern show last week. The heifer class was much stronger than in the Midlands, the solitary entry at that exhibition being now swollen into four or five. The champion of the Birmingham Show was in her place, and looking very fit, neither having lost weight or bloom to any extent, and was given easily first in her class, and also winner of the breed cup of the Shorthorns. The London weight was 16cwt. 0qr. 14lb., her sire Prince Victor, and dam Christobel, by Crœsus. Messrs. Grant, of Auchnacree, carried off the second place with a thick-fleshed heifer by Idol, bred by Mr. C. M. Cameron, scaling 15cwt. 0qr. 21lb., and very ripe, though in share a little wanting. Captain Archibald Stirling came in third with a rather young and small, still neat and good quality heifer, bred by Sir W. G. Gordon-Cumming, and the reserve card was allotted to a heifer by Master Archer, shown by Mr. George Inglis. In Cicely the Shorthorns provided the best bullock in the show bred for exhibition.



CAPTAIN H. L. TOWNSHEND'S CROSSBRED COCK O' THE NORTH. RESERVE FOR THE BEST STEER OR OX, AND RESERVE FOR THE BEST CROSSBRED AT THE SMITHFIELD SHOW, AND RESERVE FOR BEST CROSSBRED AT BIRMINGHAM.

ABERDEEN-ANGUS.

As compared with the show of this breed in the Midlands, the London entry was very encouraging indeed. The classes were well filled, and the animals all round a most creditable lot. The best of this breed was the first prize junior steer—a circumstance that has not often happened, as it is seldom we see steers of this breed in the highest places, the heifers usually being such models of shape and beauty as to carry all before them. The younger steers, as in the other breeds, came first under notice, and the first steer in the class was the best and champion of the breed, and also winner as the best steer under two years old in the hall. He was shown by Mr. George Bruce, and at a year and ten months pulls up the beam at 13cwt. 3qr. 7lb. He is very level in his shape and feeding, with good muscular sort of flesh, and handles capitally. Mr. John Hunter, of Fochabers, bred him, and his sire was Password, dam by Zebra of Dalmore. Mr. John H. Bridges was breeder as well as exhibitor of both the second and third prize ones, the former weighing 13cwt. 1qr. 11lb., and the latter 12cwt. 3qr. 15lb. These were sired by Jackanapes of Ballindalloch, and are very good steers in every respect. Perhaps the third bullock has a tendency to become a little plain, but the handling and the hind quarters are very good. The reserve card went to Colonel Tufnell for a lengthy, well-grown, good steer, bred at the Langleys, got by Doodle, out of a cow by Goldseeker.

Steers over two and under three years brought out several that were very good. The first honour went to the Earl of Rosebery for Black Diamond, a rattling good beast, pulling up the beam at 17cwt. 0qrs. 10lb., bred by Mr. John Grant, and sired by Black Prince. He is deep in body, with good full loins and thighs, and handles capitally. His greatest need is a little more behind the shoulders. Mr. George Bruce came in second with a bullock bred by Mr. Robert Strathdee, sired by Dullanbrae. He scales 16cwt. 1qr. 6lb., and is very firm in his handling, as well as symmetrical and good in general appearance and quality. Mr. Henry Casswell's third was bred by Messrs. Casswell at Spalding, and sired by Somerby Blossom. He is very ripe and heavily and evenly fleshed, and pulls the beam at 16cwt. 3qrs. 6lb. Sir W. G. Gordon Cumming was second with a level backed, good-roasting beef bullock, bred by Mr. W. Wilson, of Coynachie, and got by First Quality. H.c. was given to Mr. D. C. Bruce for a very massive, thick beast, bred by Sir G. M. Grant and sired by Grandee of Ballindalloch.

Heifers came forward to the number of half-a-dozen entries, and certainly competition was very close between two or three of these. However, at the finish the Earl of Strathmore's Aquilegia repeated her Birmingham victory. As we said of her there, she is very perfect in shape and head character, and beautiful in her quality. In size, however, she is rather on the light side, having but 13cwt. 1qr. 6lb. to her credit, and close upon three years old. She was sired by Boaz of Ballindalloch. The Earl of Rosebery's Abbess III. of Kippendavie, bred by Colonel Patrick Stirling, and sired by Lethnot III., came second. She has 2cwt. more substance, and is a wonderfully well and level fleshed heifer, with good breeding and quality, altogether a capital specimen of the breed. Mr. Arthur Egginton was given the third prize for Black Empress III., bred by exhibitor, and sired by Mailbag. She is extremely well furnished, and a most symmetrical, neat heifer, with good loins and roasting beef. The reserve and h.c. were accorded to Captain Townshend's thick-fleshed red heifer, bred by the late Mr. Lumsden, of Balmedie, and thoroughly well ripe though a little uneven. Altogether this breed made a very satisfactory display.

SUSSEX.

The yearling steers of this breed were not so numerous as last year. Only four of the six entered put in an appearance. The first winner was found in Mr. H. T. West's rather handsome one, of fine stature, the heaviest in his class, his scaling being 13cwt. 2qrs. 14lb. The Earl of Derby came second with one carrying a level top, but a litle narrow behind. Mr. Saillard's third prize one seemed to require more grazing, and Mr. Godman's reserve was small and neat, the lightest of the four. The two-year-old steers were a much better lot. The Earl of Derby's first winner carried a grand, well-covered middle and good proportions generally, with a level, well-covered back. The second and third beasts of Mr. Saillard and Lord Winterton were also noticeable, and those of Mr. A. J. Thomas and Mrs. Hill's, which were reserve and h.c., carried good flesh. The heifers—six in number—were, if anything, still better, and the cup winner was among them, the Earl of Derby's Melody, handsome and shapely, also well covered with rich flesh. Mr. Winch was second with May Fly, also a wealthy, broad, compact heifer, and the third winner and reserve of Mr. Thomas and Mrs. Hills were very deserving.

RED POLLS.

The yearlings of this breed were also short in number, but there was a very nice quartette of them, Mr. J. E. Platt winning first prize and reserve with wealthy ones, not quite so perfect as they might be at the tail, while H.R.H. the Duke of York won with Red Cap, very wealthy, although not quite even. Mr. A. G. Scorer had a small shapely one, which was h.c. The class for two-year-olds brought seven to the competition. Mr. Platt was again first with one carrying a broad level top, with nice quality flesh. H.R.H. the Duke of York again came second with a handsome level-backed one, scaling about the same as the first; but the Hon. A. E. Fellowes brought a very massive one for third prize, giving a live weight of 19cwt. 2qrs. 3lb. This beast had a very broad span, thickly coated. Mr. Bocock and Mr. Harvey Mason worthily received barren honours. The heifers—four in number—had considerable merit, and Mr. Russell J. Colman's Barbara 3rd was not only first, but had the breed cup. She was evenly-proportioned, with a good outline, and scaled 10lb. over 14cwt. H.R.H. the Duke of York could only come reserve with Moonlight, Mr.

A. J. Smith winning second prize with Glossy 2nd, a tall heifer of straight character.

GALLOWAY.

This breed was one of those not in such force as last year. In the yearling class Sir John Swinburne came to the front with a wealthy one, carrying a good middle, and scaling 12cwt. 1qr. 2lb. This was the heaviest, the Duke of Buccleuch coming second with a symmetrical one called Canny Scot, his Great Scott, which was reserve, being somewhat heavier. Mr. A. J. Thomas's What Ho! made a very good third winner. The two-year-old steers were only four in number, but so good that the three prizes and reserve were awarded. The Earl of Antrim's Sam 3rd, of just 15cwt., was not only symmetrical in form, but well covered and a good handler. Mr. H. C. Allfrey's Rival had a little more substance and was deep in form, but lighter in front than the first winner. Captain Townsend's Sambo was third, and Mr. Thomas reserve with other two very deserving ones. There were also four heifers, and Sir John Swinburne's Scottish Queen 3rd, the first winner, had the breed cup, which her handsome, well-shaped form, standing low to ground, richly deserved. The Crichton Royal Institution owned two of the others, which were second and reserve, and Mr. Allfrey came in for third prize, all three being of good quality.

WELSH.

Ther was a good representation of this breed, the steers under two years numbering nine, six of which were noticed. Mr. R. Hughes won all three prizes, a very creditable exploit certainly, and, in fact, he exhibited four all over 12½cwt., and the three winners not wanting many pounds each of 13cwt. They were well shaped, and carried excellent flesh. Mr. Greaves exhibited two which were h.c., and one of them, Black Bach, which was reserve, stood high on legs, and scaled over 13½cwt.; but Colonel Platt's c. steer was 13¾cwt. The two-year-old steers were ten in number. Mr. W. E. Oakley was first with a very shapely one of excellent quality, the Hon. F. G. Wynn's second prize one being a very fine specimen, much weightier, as he scaled 17cwt. 1qr. 17lb., and Mr. Wynn had a second exhibit, which was c., of fine stature likewise, but not carrying quite so much substance. Mr. Greaves was third with a handsome one, not quite level, Mr. Oakley having a second good steer, for which he was h.c., and Mr. Hughes taking third with a broad-shaped, compact one. A trio of nice heifers won the two prizes and reserve, and Mr. Greaves's Bryn-y-Wern, which was first, had the cup. The other two, Madryn Belle and Madryn Queen, were very shapely, but were nothing like so heavy as the first winner, which scaled 6lb. over 16cwt. Colonel Platt owned the Madryn heifers.

HIGHLAND.

This breed also made an excellent representation. Seven steers under three years old put in an appearance, and H.R.H. the Prince of Wales carried off both the first and third prizes with two very handsome animals in their heads and coats, the good flesh they carried, with beef to the heels, being also noticeable. Sir W. Ogilvy-Dalgleish divided the Royal steers for second prize with another handsome animal with branching antlers and nice hair, and his reserve steer of darker colour was worthy of high estimation. The oxen over three years were ten in number, and Lieut.-Colonel Home Drummond came to the front with his handsome yellow-brindled one, the heaviest in the class, as he was 4lb. over 17cwt. To him was awarded the breed cup. H.R.H. the Prince of Wales had another noble specimen in the class, and the Earl of Moray's Angus of red colour was notably attractive, as well as Sir Reginald A. Cathcart's reserve ox of the same colour. Two or three of the others received barren honours. The heifers, six in number, formed a commended class, the first winner of which was the Earl of Durham's Suina 3rd, which scaled 14¼cwt. H.R.H. the Prince of Wales was again second with Nicoletti, of a nice brindle red colour, which was 12lb. over 14cwt. None of the others were quite so weighty, a light brown, belonging to Mr. Yerburgh, M.P., being third, and the Earl of Durham's cream-coloured Bhuide Crombh being reserve.

DEVONS.

Preference, as usual, is given in the catalogue to the Devon breed. Owing to the alterations in the classes, Birmingham decisions can scarcely be used for comparison, except when the question of championship arises. Mr. Samuel Kidner adjudicated upon the Devon classes, and he did his work not only expeditiously, but also remarkably well. The first class was for Devon steers not exceeding two years old. There, undoubtedly, Mer Majesty the Queen stood far and away best with a rare good one, sired by Dauntless; he has a capital loin, deep sides, and is fairly well put together. He was also selected as reserve for the Devon breed cup. The second prize went to Mr. Alfred C. Skinner for a well-bred animal with capital fore-end and good loin, but a trifle weak behind. A very close third was Mr. Alfred Bowerman's Domino, which has a capital back and loin and stands well, but needs a little more forward; probably he will be seen again at Smithfield next year. Any way, he is well worthy of the trial. The same owner was placed reserve with Tit-Bits. The fourth prize was given to Viscount Portman's George's Brother, a big, lumpy bull that will stand another year's feeding very well. Viscount Portman also received a highly commendatory notice with Winnie, one of Mr. J. C. Williams's breeding, sired by Pretty Middling, also receiving a similar honour. In the class for Devon steers above two years old there were seven entries, and there was no doubt as to the selection of Mr. John Wortley's Baden-Powell for first position and winner of the breed cup as well. He is a fine big animal, and fed to perfection and handled well. The second prize was secured by Mr. J. C. Williams, Caerhays, St. Austell, with a smart one with capital loin, but which might have been better behind. The third prize was secured for the Queen with one sired by Pansy's Duke, a steer a trifle light in the thighs, a bit plain forward, but very nice middle. Reserve was given to Viscount Portman's Willie, who has now probably seen his last show; he is a nice lump of beef at present. Devon heifers made a weak class in the competition, including Captain Townshend's Birmingham winner, who repeated that performance, and was also second to Mr. Wortley's Hereford as best ox or steer. He was bred by the late Mr. Lumbton, has had many owners, and is of most beautiful quality, weighing, also very satisfactorily, 17cwt. 0qrs. 0lb. Mr. Arthur de Rothschild's followed, as it did last week, and both are now exactly the same weight. The third best beast in the class was shown by the Earl of Rosebery, a big, shapely, and good ripe bullock, his weight 17cwt., Angus and Shorthorn cross, like the first and second animals. The one shown by Mr. Douglas Fletcher was also a fine beast, and similarly bred. He was not exceeding two years old come next. The best of these was a very neat one of Mr. John Ross's, a perfect plum—out of a Ringleader cow, and weighing 12cwt. 2qrs. 20lb. A second entry from the yard was also reserved, the second and third prizes going

MR. R. J. COLMAN'S REDPOLL HEIFER, "BARBARA 3RD." BREED CUP WINNER AT THE SMITHFIELD SHOW, AND BEST REDPOLL AT THE NORWICH SHOW.

of two. The first went to the Queen with Dainty, 1 year 11 months 3 weeks old. She is rather deep, with a good underline. Many critics will think that the second prize heifer, Mr. J. C. Williams's Waterhen 6th, should have been placed first, but seeing she was so small, and being also 2 years 10 months 2 weeks 1 day old, the judge did perfectly right in passing her over.

KERRY, DEXTER, AND SHETLAND.

In the class under two years there were only two entries, but they were of exquisite quality and even proportions of the Dexter breed, bred by Messrs. Robertson and Sons, but owned and exhibited by Mr. Joseph Thorley. There was more competition in the class of older steers, and H.R.H. the Prince of Wales won with a beauty—red and white in colour, with a grand pale face and handsome head, a span of rib and level back which could scarcely be surpassed, and a thick covering of rich flesh was over his well-kept form. The only defect was coarseness of tail, but he stood broad and low to ground, with a weight seldom given by a Dexter. Mr. H. G. Nash won the second prize with one of fairly good quality, but not so handsome or well-proportioned. In the Heifer class, Sir W. Gilbey won first with a small symmetrical one of rare quality, which but for a slight defect at the rump end, would have been very perfect. Mr. J. Thorley's second prize heifer was of exquisite character, but not quite so even as the first winner.

CROSS-BRED CATTLE.

As compared with many former years there was a great falling off in the entries in these classes, and there were also a good number of absentees, which, probably having found their level at one or other of the previous shows, had been withdrawn to try their luck at local or smaller competitions. The quality, however, was very good, and cannot be complained of. Steers not exceeding two years old were a good class, with some five or six of very even merit. Mr. Robert Turner had a couple of very straight-backed, symmetrical, and well-fleshed steers, Angus and Shorthorn crosses, that were placed second and third respectively, and weighing 13cwt. 1qr. 21lb. and 13cwt. 2qrs. 18lb. Mr. John Ross divided these with one of Ringleader's sons, scaling 14cwt. 2qrs. 8lb., and the fourth prize went to Mr. H. A. Horn, Mr. Douglas Fletcher being reserved and h.c. Several other very good steers ran close up.

The class for steers over two and not exceeding three years was not at all numerically strong. There are, however, three or four excellent bullocks to the Earl of Rosebery for a fine young, but promising, heifer, the third being a little small. Between two and three years the competition was exactly the same as at Birmingham, with similar results. Mr. Clement Stephenson's very symmetrical heifer playing second fiddle to Mr. Learner's Norwich champion, who to-day was given champion of the cross-bred section and also of the females, beating Cicely in the contest for that supremacy. Mr. Douglas Fletcher came third with a very symmetrical and ripe Angus and Hereford cross, and one or two others received cards.

SMALL CROSS-BREDS.

The small cross-breds mustered well. H.R.H. the Prince of Wales taking the lead in the steer class and Mr. Russell J. Colman in that for heifers. The Prince's Shorthorn-Dexter steer had an admirably well-covered outline. Mr. Norman C. Cookson's Frolicsome was the second winner in the steer class, and very symmetrical and of good quality, but not so weighty as the Prince's steer. The Prince had also a heifer in the other class, likewise of the Shorthorn Dexter class, handsome in appearance and outline, but not so ripe as those placed above her. Mr. R. W. Hudson had placed second to Mr. Colman with Duchess of York, broad in form and carrying nice flesh. Mr. J. Thorley and Mr. H. Tait Robertson were h.c. for good heifers, as also was Mr. R. G. Nash for his steer, Lucan Champion.

Below we give our usual table, showing the age, weight, and average daily gain of the prize-winning cattle:—

Breeder and Owner.	Age.	Weight.	Average Daily Gain.
DEVONS.	Days.	lbs.	lbs.
(Steers under 2 years old.)			
1. H.M. the Queen	671	1415	1·46
2. Mr. A. C. Skinner	685	1386	1·38
3. Mr. A. Bowerman (Domino)	716	1386	1·81
4. Viscount Portman (George's Brother)	664	1385	1·66
(Steers over 2 and under 3 years.)			
1. Mr. J. Wortley (Baden Powell)	1084	1666	1·48
2. Mr. J. C. Williams	1081	1448	1·63
3. H.M. the Queen	1084	1664	1·66
(Heifers under 3 years.)			
1. H.M. the Queen (Dainty)	703	1061	1·44
2. Mr. J. C. Williams (Waterhen 6th)	1048	1074	1·02
HEREFORDS.			
(Steers under 2 years.)			
1. Mr. J. Price	687	1055	2·46
2. H.M. the Queen	686	1377	1·99

Sheep.

This year's Smithfield Show will be one in future years remembered, not by the large entry in this section, but by its high average merit. The tail end one so often finds at shows was there, of course, but not nearly so moderate as is often the case; in fact, fewer entries had the effect of very considerably increasing the merit.

The Leicesters, following the classification of the catalogue, came first, two classes, as had all other breeds, one of lambs and the other of wethers, and there were four entries in each class, M. E. F Jordan being first in each class with some grand specimens of his breed. Taking his lambs first, his pen, which gave an average daily gain of 10.62oz., were notably a well-fed pen, and might have taken precedence of the same exhibitor's wethers in the Breed Cup contest, instead of following them, as they were better specimens of their breed. Mrs. Perry Herrick was second for lambs and for wethers, good and well-fed typical pens. As before intimated, Mr. E. F. Jordan was winner of the Breed Cup with the older pen, their average daily gain being 6.83oz., firm and good in their flesh, with well-sprung ribs and good loins. We thought them an excellent pen.

Border Leicesters had an entry of three pens, two in the lamb class from the Earl of Rosebery's flock, to the premier of whom went also the Breed Cup; a real good pen of lambs, which were noticeable for their sound flesh, good backs and legs, and on account of their average daily gain, 10.54oz. In the wether class Mr. J. D. Fletcher was without competition, and secured with a typical pen premier honours and r.n. for Breed Cup.

The Cotswold breed were poorly represented, Mr. F. Craddock being the only exhibitor, sending two pens, one of lambs, who took the Breed Cup, and one of wethers, which were first in their class. These pens were, of course, typical of their breed, but were not of quite so high merit as we have seen in former years; the Cup winners, however, have an excellent daily gain, 10.32oz.

Hard luck certainly follows the Lincoln breed in its attempt to secure the championship of the Show. Last year Mr. H. Dudding's grand pen of lambs went down before the black-faced mountain sheep, and this year's pen of first prize wethers, an almost ideal pen of wethers, the heaviest, by-the-by, of the whole of the sheep entries, and we believe of any pen of yearling wethers ever before shown at Smithfield, 10cwt. 11lb. After the Lincolns had won easily the Longwool championship, they succumbed to Lord Ellesmere's Suffolks in the final contest. Mr. Henry Dudding's flock provided the second prize, a pen of wethers which, whilst not having the great weight of the leading pen, were of a grand type, with very excellent fleeces and good flesh, two other entries, one of Mr. W. B. Swallow's, which were r.n., and another of Mr. Dudding's being unnoticed. In the lamb class Mr. Dudding's excellent, good fleshed, wide, deep limbs, were rightly preferred for the leading honour, and, indeed, so high were the merits of his pen that they also secured the r.n. for the Breed Cup over all the other winners in this section of the Show.

Mr. J. Pears, who was well to the front with a pen of lambs hardly so good on the backs as the leading pen, came in second in his class, and the r.n. went to Riby's second entry, noticeable more perhaps for the excellence of their fleece than the leading pen from the same flock. The Lincoln entries in both classes, all of which were present, were eight, the same number as were present last year.

The Kent and Romney Marsh were represented by twelve pens, two more than last year, but the breed was hardly so well represented as last year; in fact, the best exhibit at the local shows this year was unfortunately not entered. The flock of Mr. T. Wotton's was, however, pre-eminent, securing first for lambs and for wethers, these two pens taking also the Breed Cup and r.n. for the same; they were well fed, but were hardly so well covered as might have been the case, particularly the lambs. Mr. Henry Rigden, the veteran Kent breeder, was equally successful, booking the second award in both classes, though in that for lambs he was a bit lucky in securing the preference over the pen of Mr. Freeman, whilst the entries from Mr. J. E. Quested's flock would appear to indicate by their merit and quality that this flock in the future will be one that will secure a very prominent place in the breed contests, for their type and character as well as the quality of their flesh was good.

An entry of three only was found in the Devon Longwool class, all being in the lamb class, the premier pen of which, from Mr. J. H. Gibbings' was of exceptional merit and development, showing an average daily gain of 12½oz.; this pen secured the Breed Cup and were conspicuous in the Longwool Champion contest, though they were safely beaten by Mr. H. Dudding's more evenly matched pen of lambs. The same breeder's second pen took second honours and r.n. for Breed Cup, whilst Mr. A. C. Skinner secured third honours.

MR. J. WORTLEY'S DEVON STEER, "BADEN-POWELL." BREED CUP WINNER AT SMITHFIELD AND BIRMINGHAM SHOWS.

Cheviots had a notable entry in respect of quality, numbering seven entries, four of which came from Mr. J. McDowall's fold, the leading pen of which, the first prize wethers, were champion of the sheep section at Edinburgh, their daily gain being 7.20oz.; the same exhibitor was also second, and both of these pens were of high quality, their flesh being firm and good, and the same exhibitor was also clearly to the fore in the lamb class, being first and r.n., with two excellent pens, which, when handled, gave great satisfaction. Half a dozen pens comprised the Blackfaced Mountain class, Mr. J. McDowall, as in the Cheviots, securing the Breed Cup, its r.n., two firsts and a second prize; the cup winners were of real merit, though, when handled, we thought they were hardly so well covered or as firm as we have in former years found in this breed, but the pen of lambs, although alone in their class, were of a grand class, and if they are kept on will probably make excellent sheep next year, for the quality of their flesh, as disclosed when under hand, was excellent.

The Southdowns, the prince of mutton breeds, again made, as in the past four years, the largest entry in the section. The lamb class was notable for the success that two comparatively young breeders secured, for Mr. Whitaker Wright, who grand pen head the class, has only once before competed at this show. This pen of lambs were on excellent type and splendid flesh, and their high average daily gain 8.70oz., together with their excellent conformation and symmetry, ought to have secured for them the Breed Cup also. Next came an almost equally good pen from Col. McCalmont's flock, deep in flesh, wide in the loins, with full twist and excellent dock; they were a grand pen. Then came a useful pen from Mrs. Montefiore's flock, whose proper position in the class should have been fifth and not third, for the two pens from Mr. C. F. Field's flock which came in fourth and r.n. were superior

to them in flesh, type and conformation. The class as a whole, several other entries being noticed, was a good one. The wether class, ten of the thirteen entries being present, was another good one; that the awards were not in accord with the public opinion was clearly palpable, and it is to be regretted that such was the case from the fact that the pen many considered best in the show was by this oversight debarred from receiving probably the first honour of the show. The pen referred to was Col. McCalmont's wethers, whose excellent flesh, deep leg, full twists, and good backs, together with their high average of daily gain, 5·29oz., where only in the judge's opinion entitled to a bare h.c., a poor recompense for such a grand pen of sheep.

The premier award went to that justly popular nobleman the Duke of Richmond, whose luck in securing this and the Breed Cup also, with so soft a fleshed pen, was noticeable, for even after the passing over of Colonel McCalmont's pen there was a second pen, the one from Sandringham, that did not get all they should have done. Had Colonel McCalmont's pen been first they would have been right in their second place, but seeing this pen was so placed they should have without doubt taken precedence of the Goodwood pen, they being firm in the flesh, better covered on loin and back, and wider in front, though hardly so good in the leg as the winners, which were, we may say, more made up than their closest competitors. A second pen from Goodwood came in for third honours, and several others were mentioned (see prize list).

The Hampshire Downs were hardly so numerously represented as in the more recent years, and we do not think that the whole entry was hardly so good, but there is one thing certain, that rarely, if ever, has a better pen, weight, flesh, and quality considered, ever been made cup winners than that grand pen of Mr. T. F. Buxton's, which were without doubt rightly placed at the head of their class, the lambs, their daily gain being 12.23oz. per day; following these came a pen of Lord Rothschild's, in every way a typical pen of their breed, but who must be accounted lucky in securing preference over Mr. Buxton's second pen, which were placed third, for their backs lacked the grand touch of the latter, and they were no more than equal to them in other respects; a fourth prize was worthily won by a most typical pen of wide, deep lambs from Mr. E. Whalley Tooker's flock, who was very close up to the leading pens. The wether class, with the exception of Mr. Buxton's leading pen, was not of special merit; the class was very creditable, but we have seen better ones. Mr. Buxten's pen were r.n. for the breed cup.

The Suffolk breeders are deserving of congratulation upon the unique success their breed has secured by Lord Ellesmere's excellent pen securing for the second time the proud position of champion, short wool section, and winners of the Prince of Wales's challenge cup; there were but four pens of wethers present. The Stretchworth pen, clean outclassing all the other pens, went first, its daily gain being 7.70oz. Major Baird's level well-fed, and good-fleshed pen, with probably less waste than the former, came in for second honours. There were nine pens present in the lamb class, and the awards were very difficult to follow, viewed from the fat stock show point of view; had it been a breeding show one would have not in any degree questioned them, for Mr. H. E. Smith's two most typical pens were, from a breed point, clearly first, but when the question of flesh came under notice, we prefer that pen of Colonel McCalmont's which were third. However, all the pens were well fed, the latter, in our view, being the better butchers' pen of the three, and much our preference.

A better entry of their breed gladdened the Shropshire men, and with the increased entry we are inclined to think there was better quality, for we have seldom, if ever, seen a better fleshed pen of Shropshires than was that breed cup-winning pen of lambs from Mr. P. L. Mills' flock, whose wealth of flesh, and its merit, is amply proved by their high average of daily gain, namely, 10.18oz. Lady Rothschild's highly meritorious pen came in for second honours, being preferred for this place in preference to Mr. P. L. Mills' pen, which were hardly so wide and good in the leg. The wether class was equally noticeable by the high merit and quality of the two pens which secured first and second honours for Ruddington Hall, a pair of grand entries, they were good in flesh and highly creditable both in conformation and type.

The Oxford Downs, so far as the lamb class was concerned, were far stronger than for some years, the particularly fine well-fed pen from Mr. H. W. Stilgoe's flock, that were leading class winners and breed cup winners were of grand merit and quality, with real good firm flesh; a daily gain of 9.50oz. testifies how good was its quality. The entries of Mr. J. G. Williams, which were second and r.n., give clear indication that that breeder has a flock of high character, and that there is great merit in it, for these lambs, though out-classed by the leading pen, were very good ones. Mr. Howkins had a useful pen, which were rather fortunate in being placed above the r.n.

The Dorset Horns, etc., made a better and larger entry than has been the case for some time. Mr. James Toop was first in the lamb class with a well-fed good-fleshed pen that also took the breed cup; Mr. W. J. Horn, a well-known supporter of this breed, came in for second and third honours with pens of excellent quality. It should, however, be mentioned that the breeder of the winning sheep was Mr. C. B. Stiby, and of the second and r.n. pens Messrs. F. and S. Hicks, and Mr. W. T. Barneby sent up two good pens of Ryeland sheep in the wether class; these were awarded first and second prizes respectively.

The cross-bred classes were full of interest, and instruction, and it is to be regretted that the awards of the judge in the wether class were hardly in accord with the general opinion outside. However, mistakes will sometimes occur, and when they do, for they cannot always be avoided, they are, as they were in this instance, much to be regretted. There was no doubt as to the first award in the lamb class, Mr. F. I. Matthews's excellent pen being clearly entitled on all grounds to it, but that the second pen, whose backs were not at all well covered, and whose touch lacked that firmness one expects to find in well-fed sheep, were preferred over Mr. James Toop's capital pen is to be regretted; the latter, being both better covered and firm, and deeper in flesh, had to be content with third, whilst a pen of Mr. T. Rush's came in for r.n.

The wether class was headed by a pen from Mr. F. I. Matthews, which were open to grave objection; their backs were not well covered, and the deficiency in the leg and twists was so clearly apparent that one wonders the *raison d'être* of the award, for Mr. T. Rush, with a grand pen of wethers, level and well-covered in their back, with full twist, deep and wide legs, and grand loins, which were put second, clean outclassed the winners, which, unfortunately for their section, took the Breed Cup, and at once put them out of the running for the Champion Contest. A second pen from Mr. Rush came in for third honours, and one from Mr. W. Robison fourth.

Mr. J. McDowall had the Scotch cross classes all to himself, and was successful in taking two first and one second award with some highly meritorious specimens of this very useful breed of sheep.

The Champion Contests.

The Lincoln wethers of Mr. J. Pears, with their great weight and substance, coupled with high quality and good flesh, quickly asserted their preeminence in this section, and the r.n. was equally expeditiously settled in favour of the Lincoln lambs of Mr. H. Dudding's.

The Shortwool championship was a more tedious matter, and we are clearly of the opinion that the Hampshire Down pen of lambs from Mr. T. F. Buxton ought to have taken precedence here for their grand flesh, early maturity, and development, to say nothing of their commercial value, which ought easily to have given them precedence over either pens of wethers, the Earl of Ellesmere's and the Duke of Richmond's, which were champion and r.n.

The final contest for the blue ribbon, the Prince of Wales's Cup, was thus narrowed down to the wether pen of Suffolks from the Earl of Ellesmere (the cup holder) and the Lincoln pen of Mr. J. Pears, the average daily gains of these two pens being 7.70 and 9.12, both being of the same age. The award was to the Earl of Ellesmere's pen, who, being the holder of the Challenge Cup, wins the same outright. This award was open to considerable question, for there was, we think, a preponderance of opinion that the better pen were the losers. Be this as it may, every breeder of live stock will congratulate Lord Ellesmere upon this conspicuous success, and condole with the loser, Mr. J. Pears, upon the hard luck that robbed one of the most typical pens of Lincoln sheep ever shown of the honour of once again taking the championship of Smithfield to the home of one of the principal flocks of that breed which at the present time is most valuable in the sale rings both of this country and Argentina.

Below we give our usual table, showing the age, weight, and average daily gain of the prize-winners in the sheep classes:—

Breed and Owner.	Age.	Weight.	Average Daily Gain.
	Days.	lbs.	lbs.
SHROPSHIRES. (Wether lambs under 12 months old.)			
1. Mr. E. F. Jordan	242	482	1·99
2. Mrs. S. Perry Herrick	249	510	2·04
(Wether sheep over 12 and under 24 months.)			
1. Mr. E. F. Jordan	607	779	1·28
2. Mrs. S. Perry Herrick	611	868	1·41
BORDER LEICESTERS. (Wether lambs under 12 months.)			
1. Earl of Rosebery	256	510	1·99
(Wether sheep over 12 and under 24 months.)			
. Mr. J. Douglas Fletcher	618	615	·99
COTSWOLDS. (Wether lambs under 12 months.)			
1. Mr. F. Craddock	263	514	1·95
(Wether sheep over 12 and under 24 months.)			
1. Mr. F. Craddock	621	810	1·30
LINCOLNS. (Wether lambs under 12 months.)			
1. Mr. H. Dudding	294	572	1 94
2. Mr. J. Pears	294	594	2·02
(Wether sheep over 12 and under 24 months.)			
1. Mr. J. Pears	659	1031	1·56
2. Mr. H. Dudding	659	980	1·48

Breed and Owner.	Age.	Weight.	Average Daily Gain.
	Days.	lbs.	lbs.
KENT OR ROMNEY MARSH. (Wether lambs under 12 months)			
1. Mr. T. Wotton	255	522	2·04
2. Mr. H. Rigden	249	455	1·82
3. Mr. E. Neame	256	472	1·84
(Wether sheep over 12 and under 24 months.)			
1. Mr. T. Wotton	621	853	1·37
2. Mr. H. Rigden	614	788	1·28
DEVON OR OTHER PURE LONG-WOOLLED. (Wether lambs under 12 months)			
1. Mr. J. Henson Gibbings	273	644	2·32
2. Mr. J. Henson Gibbings	273	623	2·17
3. Mr. A. C. Skinner	287	471	1·69
CHEVIOTS. (Wethers lambs under 12 months).			
1. Mr. J. McDowall	226	440	2·16
2. Mr. J. Mc D. Jamieson	242	446	1·84
(Wether sheep over 12 months.)			
1. Mr. J. McDowall	591	861	1·45
2. Mr. J. McDowall	591	750	1·26
3. Mr. A. Gould	628	600	·94
MOUNTAIN. (Wether lambs under 12 months.)			
1. Mr. J. McDowall	226	366	1·61
(Wether sheep over 12 months.)			
1. Mr. J. McDowall	591	654	1·10
2. Mr. J. McDowall	591	582	·98
3. Sir J. Gilmour, Bart	591	586	·99
SOUTHDOWNS. (Wether lambs under 12 months.)			
1. Mr. Whitaker Wright	294	482	1·63
2. Col. H. L. B. McCalmont, M.P.	280	448	1·6
3. Mrs. Montefiore	294	435	1·47
4. Mr. C. F. Field	287	411	1·43
(Wether sheep over 12 and under 24 months.)			
1. Duke of Richmond and Gordon	638	561	·87
2. H.R.H. Prince of Wales	638	564	·88
3. Duke of Richmond and Gordon	638	574	·89
HAMPSHIRE DOWNS. (Wether lambs under 12 months.)			
1. Mr. T. Fowell Buxton	317	730	2·30
2. Lord Rothschild	303	521	1·71
3. Mr. T. Fowell Buxton	310	521	1·68

(Wethers first-cross from Cheviot, Scotch and Mountain breed, under 12 months old.)			
1. Mr. J. McDowall	233	505	2·12
(Ditto over 12 and under 24 months.)			
1. Mr. J. McDowall	59	871	1·45

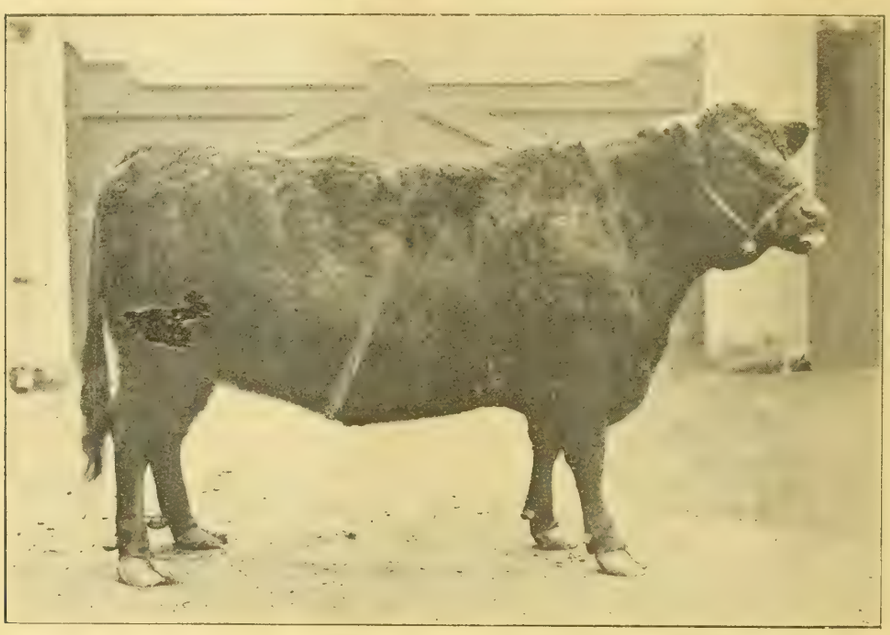
Pigs.

This year a steady improvement was shown throughout the pig section, the weakest in numbers of which was the Small Whites, which is surely on the decline in popularity in these quality days. In the classes for Small Whites there were only two entries in the class for not exceeding nine months old. Here the Hon. D. P. Bunbury, Cloghill House, Highwood, Wales, easily carried all first prizes and the breed cup with a pair with rare bone and size. Mr. Arthur Hiscock's reserve pen was much admired. In the next class for pigs exceeding nine but not twelve months, Mr. Arthur Hiscock was the only reserve for the breed cup with some beautiful pigs, the Earl of Carnarvon being represented only by entries in the class.

Middle Whites are again regaining lost ground and no one could complain as to any lack of quality, the uniform excellence of these classes. In the class for under nine months the Hon. D. P. Bunbury

took first prize and the breed cup for pigs of length, depth, and quality, Mr. George Attkins being second with a pair of capital-backed pigs. H.R.H. the Prince of Wales was third, and a most deserving third. The whole class received mentions from the judge, as did also the class for over nine months. Here there were only nine entries, but what they lacked in numbers they most certainly made up in quality. Mr. Nathaniel Benjafield had a very close fit for first position and reserve for the breed cup, but his pigs were a trifle longer than Mr. Arthur Hiscock's second prize-takers, Mr. Sanders Spencer coming in third.

Large Whites, as a rule, were scarcely so long as usual, but they were much better put together in the young class. The Earl of Rosebery scored with a matching pair, Mr. Sanders Spencer being some distance behind for second position, whilst the third



Mr. R. M. Greave's Welsh Heifer, "Bryn-y-Wern," Breed Cup Winner at the Smithfield Show.

prize lot of Mr. George Attkins was still further back from the front. The older class of Large Whites were far and away the strongest. Here the Earl of Rosebery took first prize in the class, the breed cup was placed reserve for champion plate, and also reserve for the Duke of York's Challenge Cup for the best pen of two pigs in the show bred by the exhibitor. These pigs were of good length, lovely quality, deep-sided, and excellent hams. Mr. Arthur Hiscock was placed second and reserve for the breed cup with a well-bred pair.

The Black breed did not make a large entry either in numbers or quality, and this is the more regrettable seeing the efforts made to popularise this breed. In the younger class there were but two entries; here Mr. Nathaniel Benjafield secured an easy win and the breed cup, Mr. George Petit being second and reserve for the cup. In the older class Mr. Arthur G. Creech took first with very fat, heavy pigs. Berkshires, as usual, made exceptional classes, there being ten in the young and twelve in the older class. Mr. Arthur Hiscock had a very close contest to secure first and reserve for the breed cup, his were well brought out. Mr. Julius Fricker was second, his pigs not standing so well. The Earl of Carnarvon took third. The judge gave one h.c. and four commendations in this class, but the next class furnished the champion of the show in the splendid pair with grand loin, deep sides, nicely shaped hams. As a reward for bringing these out so well Mr. Richard Fowler took first prize of £10, the Berkshire cup plate for the best two pigs in the show, as well as H.R.H. the Duke of York's challenge cup. Mr. George T. Tomkins' second prize pair were scarcely so even as could be wished.

Tamworths made small classes of good quality, the pigs showing rather more condition than is usual with this breed. Mr. E. Ibbotson scored easily over Mr. D. W. Philip in the young class, who, however, won easily in the next with a pair of capital quality, good coats, clean and well grown. He took the breed cup as well. Mr. George Attkins was placed second, and also reserve for the breed cup.

The keenest competition in the pig classes was undoubtedly amongst the cross-breds, and Mr. James Burbidge had no enviable task in making his selections in the young class. Mr. Alfred Brown took first and reserve for the breed cup with a Large White and Berkshire cross; they have excellent backs, but drooped a little at the tail. Mr. Arthur Hiscock was second with a pair that lacked the length and depth, but were more handsome. In the older class he scored however, with a pair of good length, level backs, rare loins, and plenty of choice meat, nicely coated; these secured for him the first prize and breed cup. Mr. Julius A. Fricker was second with pigs that had full, heavy hams, Mr. J. P. Chiswell's third prize lot being a trifle coarse in the skin. Single pigs, as usual, made a truly grand show In the class for any white breed the Earl of Rosebery had a very good win with his Large White, possessing a rare back and loin, the championship of the single pigs going to him also. Mr. Mitchell took second also with a Large White, Mr. Arthur Hiscock coming in third with one of the same breed. H.R.H. the Prince of Wales and Mr. Sanders Spencer both received h.c. cards for their Middle Whites. Blacks made an entry of three only, Mr. George Attkins taking premier position. Berkshires made a capital class, Mr. N. Benjafield being first and reserve for single champion, Mr. Julius Fricker being second. Four entries of Tamworths, and here Mr. George Attkins succeeded in defeating Mrs. E. Ibbotson and Messrs. D. W. Philip and Garrett Taylor. During the week there was a most active demand for pigs, most of them being sold at very satisfactory prices.

Carcase Classes.

The cattle and sheep slaughtered for the carcase competitions were on view for the first time on Wednesday. They were exhibited in the annexe to the great hall, on the Barford Street side, and attracted a good deal of attention. The display of beef was not large, but the quality was extremely satisfactory. The judges, in compliance with the wish of the council, judged the animals when alive, and it is deserving of notice that they were successful with each of the three classes in selecting the first prize animal, and were very nearly right with the recipients of the minor prizes.

The champion prize for the best beast in the classes was won by Mr. J. Douglas Fletcher. That shown was one year and eight months old, and was sired by an Aberdeen-Angus out of a Shorthorn dam. The Queen, with a pure Aberdeen-Angus under three years old won a first prize in a class for steers, and with a heifer of the same age, and also of the Aberdeen-Angus breed, won another first prize. Both these beasts were sent from Abergeldie Mains, and likewise both, in addition to being exhibited, were also bred by the Queen.

The choice body of Galloway Shorthorn beef which won second honours in the junior steer class for Sir J. Swinburne was placed reserve for the championship. These carcases and several others were all of superb quality, being beautifully marbled and mixed.

The show of mutton was not so uniform, but several choice lots were on view. The championship of this section went to the carcase of a cross lamb by a Devon longwool ram belonging to Mr. John Hayman, Milverton, Somerset; the carcase of the first prize short-woolled lamb, a Southdown-Suffolk cross shown by Mr. F. N. Bocock, Newmarket, receiving the reserve champion ticket. Sir J. Gilmour showed the first prize long-woolled wether carcase (Mountain variety), and first honours in the short-woolled wether class went to a Norfolk-horned carcase exhibited by Colonel McCalmont.

The carcases were submitted to sale by public auction on Friday. The market on the whole was regarded as being of a much more open character than in some previous years. The tone seemed better; competition among the buyers was a little more keen than usual, and the prices realised were considered to be satisfactory. This is attributed, especially in regard to mutton, to the conspicuous absence from the lists of inferior or low class fat sheep, which are a drug in the market There is one other circumstance which may have also tended as a factor to the better prices obtained, this being that the sale was held a little closer to the actual Christmas retail markets than usual, and the consequent reduction in the risks attendant upon keeping meat for any very prolonged period. The champion beast of the show, Mr. Douglas Fletcher's cross-bred (Aberdeen-Angus—Hereford), was sold at six shillings the stone. This animal was shown in the class for steers, under two year old, and the lowest price per stone realised for the carcase of an animal in the same class was four shillings and sixpence. A slightly higher figure, viz., six shillings and twopence, was obtained for the prize beast in the senior class for steers—the Queen's Aberdeen-Angus. The champion of the sheep classes, Mr. John Hayman's long-woolled lamb, was purchased for seven shillings and sixpence a stone, the next highest price for lambs being six shillings and fourpence. The selling price for Mr. F.N. Bocock's short-woolled wether lamb that was first in its class and champion of the sheep sections was ten shillings and sixpence per stone.

Table Poultry.

The exhibition of dead poultry, which for the first time was open to visitors without any extra charge for admission, was largely patronised, and its excellence amply repaid a visit, it being one of the best of its series and strikingly superior to that of last year. It was rendered all the more interesting by a large contribution of French poultry, which were lacking in 1899; while the Belgian section was as large as it was last season. Ducks were exhibited in three classes of couples and a group class, besides the foreign section. They made a large and fairly good show, though not, perhaps, equal to their display on one or two previous occasions. Geese were admirably represented, and there were some very heavy and perfectly fed birds among them. English turkeys, again, were excellent—perhaps better than they have been at most of the preceding exhibitions. Of the foreign exhibits, the French fowls were most interesting, many of them being extremely fat on their backs, which were turned upwards for exhibition; and some, especially those in the class for La Flèche, were remarkable for the whiteness of their skins and their delicacy of quality. French geese were also well shown, but the turkeys are greatly inferior to English. Belgian exhibits were various sorts and sizes.

Miscellaneous.

In no year in the history of the Smithfield Club has the exhibition of machinery, implements, farm produce, seeds, and fertilisers at the annual show been anything like so great as it is in the present. Several of the exhibits were made for and were shown at the Paris Exposition. To this end the metal parts of some agricultural implements were silver-plated, and the wooden sections fashioned of satinwood, which was afterwards polished. There was an almost bewildering display of portable and horizontal engines, implements, and machines. Several of the great seed-growers had displays of roots and other farm products raised by their respective customers.

List of Judges.

CATTLE.

DEVONS: Mr. Samuel Kidner, Bickley, Milverton, Somerset.
HEREFORDS: Mr. J. H. Yeomans, Stretton House, Hereford.
SHORTHORNS: Mr. William Wright, Scamblesby House, Hemingby, Lincolnshire.
SUSSEX: Mr. Alfred Heasman, Court Wick, Littlehampton.
RED POLLED: Mr. Herbert Blofield, Quidenham, Attleborough.
ABERDEEN-ANGUS: Mr. Samuel Davidson, Beech Hill, Inverness.
GALLOWAY: Mr. Robert Shennan, Balig, Kirkcudbright.
WELSH: Mr. John Jones, Dinarth Hall, Colwyn Bay.
HIGHLAND: Mr. John McGillivray, Ballachroan, Kingussie, N.B.
CROSS-BRED: Mr. James McWilliam, Stoneytown, Keith, N.B.
KERRY, DEXTER, SHETLAND, AND SMALL CROSS-BRED: Mr. H. D. Betteridge, Drayton House, Littlebury, Essex.
£50 Cup, Best Beast, not exceeding two years old; £50 Cup, Steer FOR £50 Cup, Heifer, The Queen's Challenge Cup value £150; 100-Guinea Champion Plate: Mr. Francis Evans, Bredwardine, Hereford.

SHEEP.

LEICESTERS AND BORDER LEICESTERS: Mr. John Twentyman, Hawkrigg House, Watton, Cumberland.
COTSWOLDS: Mr. W. T. Garne, Aldsworth, Northleach.
LINCOLNS: Mr. Joseph Brocklebank, Carlton-le-Moorland, Newark.
KENTISH OR ROMNEY MARSH: Mr. Francis de B. Collard, Minster Abbey, Ramsgate.
DEVON OR OTHER PURE LONG-WOOLLED BREEDS: Mr. E. R. Berry-Pell, Westleigh House, Bideford, N. Devon.
CHEVIOTS: Mr. George Douglas, Handlope, Jedburgh, N.B.
MOUNTAIN: Mr. Andrew G. Sprot, Beelaw, Berwick, N.B.
SOUTHDOWNS: Mr. William Toop, Westergate, Aldinghame, Chichester.
HAMPSHIRE-DOWNS: Mr. James Flower, Childrick, Salisbury.
SUFFOLKS: Mr. F. S. Lewis, Henhurst, Ipswich.
SHROPSHIRES: Mr. J. Bowen-Jones, Beckbury, Shrewsbury.
OXFORD DOWNS: Mr. A. F. Milton Dence, 16 Queen Street, Oxford.
DORSET OR ANY OTHER PURE SHORT-WOOLLED BREEDS: Mr. W. Foverby, Vine Farm, Dorchester.
CROSS-BREDS: Mr. George Sturton, sen., 74, Central Meat Market, London, E.C.
The £50 Challenge Plate for the Best Pen of Long-woolled Sheep in Classes: Mr. Richard Fisher, Lincolnshire, Beverley.
The Cup Challenge Plate for the Best Pen of Short-woolled Sheep in Classes: Mr. F. N. Bocock, Chippenham Lodge, Newmarket.
The Duke of Wellington's Challenge Cup for the Best Pen of Sheep in Classes under 2 Years: Mr. Peter Dawn, Pasture House, Sedgefield, Durham.

PIGS.

WHITE BREEDS: Mr. John Burgess, Beer-wash, Derby.

BLACK AND BERKSHIRE: Mr. J. W. Kimber, Fyfield Wick, Abingdon.
TAMWORTH: Mr. W. H. Mitchell, Elmdene, Kenilworth.
CROSS-BRED: Mr. James Burbidge, Streatly Farm, Reading.
The £20 Champion Plate for the Best Pen of Pigs; the Duke of York's Challenge Cup, value £50; the £5 Champion Plate for the Best Single Pig: Captain H. Heaton, Worsley, Manchester.

CARCASE COMPETITION.

Mr. William Reid, sen., 160, Central Meat Market, London, E.C.; Mr. John Wortley, Frettenham, Norwich.
£5 Champion Prize for the Best Carcase of Beef, and £5 Champion Prize for the Best Carcase of Mutton: Mr. Frederick Redman, 146, Borough High Street, S.E.

Champion Prizes.

CATTLE.

A silver cup, value £25, for best beast not over two years: Mr. John Ross, Meikle Tarrell, Fearn, N.B. (cross-bred heifer); r, Mr. G. Bruce, Tochineal, Cullen, N.B.

A silver cup, value £50, for best steer or ox: Mr. John Wortley, Norwich (Lord Roberts); r, Captain H. L. Townshend.

A silver cup, value £50, for best heifer: Mr. W. E. Learner, Dilham, Norwich (Ladysmith); r, The Queen.

A champion plate, value 100gs., for best beast in the show, and gold medal to the breeder of the best beast in the show: Mr. J. Wortley, Frettenham, Norfolk (Lord Roberts); r, Mr. W. E. Learner. Gold medal to breeder: Mr. H. F. Russell, Pembridge, Herefordshire.

The Queen's challenge cup, value £150, for the best beast in the show, bred by the exhibitor: The Queen (Cicely); r, Earl of Strathmore, Glamis, Forfar.

SHEEP.

A champion plate, value £50, to the exhibitor of the best pen of three long-woolled sheep or lambs in the show: Mr. John Pears, Mere, Lincoln (Lincolns); r, Mr. H. Dudding, Stallingboro', Great Grimsby. Gold medal to the breeder: Mr. J. Pears.

A champion plate, value £50, to the exhibitor of the best pen of three short-woolled sheep or lambs in the show: Earl of Ellesmere (Suffolks); r, Duke of Richmond and Gordon. Gold medal to the breeder: Earl of Ellesmere.

The Prince of Wales's challenge cup, value £100, for the best pen of three sheep or lambs in the show, bred by the exhibitor, and gold medal to the holder, but not final winner of the cup: Earl of Ellesmere (Suffolks); r, Mr. John Pears.

PIGS.

A champion plate, value £20, to the exhibitor of the best pen of two pigs in the show: Mr. R. Fowler (Berkshires); r, Earl of Rosebery. Gold medal to the breeder: Mr. R. Fowler.

A champion plate, value £5, to the exhibitor of the best single pig: Earl of Rosebery (Large White); r, Mr. N. Benjafield.

The Duke of York's challenge cup, value £50, for the best pen of two pigs in the show, bred by the exhibitor, and gold medal to the holder, but not final winner, of the cup: Mr. R. Fowler (Berkshires); r, Earl of Rosebery.

BREED CUPS.

CATTLE.

A silver cup, value £25, for the best Devon: Mr. J. Wortley, Frettenham, Norwich (Baden-Powell); r, Her Majesty the Queen

A silver cup, value £25, for the best Hereford: Mr. J. Wortley (Lord Roberts); r, Her Majesty the Queen.

A silver cup, value £25, for the best Shorthorn: Her Majesty the Queen (Cicely); r, The Earl of Rosebery, K.G. (Talisman)

A silver cup, value £25, for the best Sussex: The Earl of Derby, Birtley, Witley, Godalming (Melody); r, Mr. H. T. West, Terry's Cross, Woodmancote, Henfield

A silver cup, value £15, for the best Red Polled: Mr. R. J. Colman, Bracondale Woods, Norwich (Barbara 3rd); r, Mr. J. E. Platt, Howbury Hall, Bedford.

A silver cup, value £25, for the best Aberdeen-Angus: Mr. G. Bruce, Techineach, Cullen (Cock o' the North); r, The Earl of Strathmore and Kinghorn, Glamis Castle, Glamis, Forfar (Aquilegia).

A silver cup for the best Galloway: Sir John Swinburne, Bart., Capheaton, Newcastle-on-Tyne (Scottish Queen 3rd); r, The Earl of Antrim, Glenarm, co. Antrim (Sam 3rd of Minnidow).

A silver cup for the best animal of the Welsh breed: Mr R. M. Greaves, Wern, Portmadoc (Bryn-y-Wern); r, Mr. W E. Oakeley, The Plas, Tan-y-bulch, Merionethshire (Gorchafaeth).

A silver cup, value £20, for the best animal of the Highland breed: Lieut.-Col. H. E. S. Horne Drummond, Blair Drummond, Perthshire; r, The Earl of Durham, Bowes House Farm, Fence Houses, co. Durham (Suina 3rd).

A silver cup, value £25, for the best cross-bred: Mr. W. E. Learner (Ladysmith); r, Capt. H. L. Townshend, Caldecote Hill, Nuneaton (Cock o' the North).

A silver cup, value £25, for the best animal in the Kerry, Dexter, Shetland, and small cross-bred classes: H.R.H. The Prince of Wales, K.G. (Patriot); r, Mr. R. G. Nash, Finnstown, Lucan, co. Dublin (Lucan Bobs).

SHEEP.

A silver cup, value £15, for the best pen of Leicesters: Mr. E. F. Jordan, Eastburn, Driffield; r, Mr. E. F. Jordan.

A silver cup, value £10, for the best pen of Border Leicesters: Earl of Rosebery, Dalmeny Park, Edinburgh; r, Mr. J. D. Fletcher, Rosehaugh, Avoch, N.B.

A silver cup, value £15, for the best pen of Cotswolds: Mr. F. Craddock, Eastington, Northleach; r, Mr. F. Craddock.

A silver cup, value £15, for the best pen of Lincolns: Mr. J. Pears, Mere, Lincoln; r, Mr. H. Dudding, Stallingboro', Great Grimsby.

A silver cup, value £15, for the best pen of Kentish: Mr Thomas Wotton, Sturry, Canterbury; r, Mr. Thomas Wotton.

A silver cup, value £15, for the best pen of Devons or other pure long-woolled breed: Mr. J. H. Gibbings, Week Barton, North Tawton, Devon; r, Mr. J. H. Gibbings.

A silver cup, value £15, for the best pen of Cheviots: Mr J. M'Dowall, Girstingwood, Kirkcudbright, N.B.; r, Mr. J. M'Dowall.

A silver cup, value £15, for the best pen of Mountain: Mr J. M'Dowall; r, Mr. J. M'Dowall.

A silver cup, value £15, for the best pen of Southdowns: Duke of Richmond, Goodwood; r, Mr. W. Wright, Lea Park Godalming.

A silver cup, value £15, for the best pen of Hampshire Downs: Mr. T. F. Buxton, Ware, Herts; r, Mr. T. F. Buxton.

A silver cup, value £15, for the best pen of Suffolks: Earl of Ellesmere, Stetchworth Park, Newmarket; r, Mr. H. E. Smith, Welton, Suffolk.

A silver cup, value £15, for the best pen of Shropshires: Mr. P. L. Mills, Ruddington Hall, Notts; r, Mr. P. H. Mills.

A silver cup, value £15, for the best pen of Oxford Downs: Mr. H. W. Stilwell, Adderbury, Banbury; r, Miss Alice de Rothschild

A silver cup, value £15, for the best pen of Dorset, or any other pure short-woolled breed: Mr J. Toop, Bosham, Chichester; r, Mr. W. J. Horn, Hindside, Hatfield.

Silver cup, value £15, for the best pen of cross-bred animals: Mr F. J. Matthews, Bircham, Newton, Lynn; r, Mr. F. J. Matthews

PIGS.

Silver cup, value £10, for the best pen of any Small White breed: Hon. D. P. Bouverie, Coleshill House, Highworth; r, Mr. A. Hiscock, jun., Manor Farm, Motcombe

Silver cup, value £10, for best pen of any Middle White breed: Hon. D. P. Bouverie; r, Mr. N. Benjafield.

Silver cup, value £10, for the best pen of any Large White breed: Earl of Rosebery; r, Mr. A. Hiscock, jun.

Silver cup, value £10, for the best pen of any Black breed: Mr. N. Benjafield; r, Mr. G. Pettit, The Firs, Friston, Saxmundham.

Silver cup, value £10, for the best pen of Berkshires: Mr R. Fowler, Broughton Farm, Aylesbury; r, Mr. A. Hiscock jun.

Silver cup, value £10, for the best pen of Tamworths: Mr. D. W. Philip, Whitacre, Birmingham; r, Mr. G. Atkins, High Street, Highgate.

Silver pen, value £10, for the best pen of any distinct or cross breed: Mr. A. Hiscock, jun.; r, Mr. A. Brown, Hill Farm, Southampton.

CARCASE COMPETITION

Champion prize of £5, to the exhibitor of the best carcase in Classes 87 to 89: Mr. J. Douglas Fletcher; r, Sir John Swinburne, Bart.

Champion prize of £5, to the exhibitor of the best carcase in Classes 90 to 93: Mr. J. Hayman, Milverton Court, Milverton, Somerset; r, Mr. F. N. Bocock, Cropley Grove, New-market.

Prize List.

DEVONS.

Class 1.—Devon steers not exceeding two years old: 1, H.M. the Queen, Flemish Farm, Windsor; 2, Mr. Alfred C. Skinner, of Pound Farm, Bishops Lydeard; 3, Mr. Alfred Bowerman, of Capton, Williton, Taunton (Domino); 4, Viscount Portman of Bryanston, Blandford (George's Brother); r and hc, Mr. Alfred Bowerman (Tit Bits); hc, Viscount Portman (Winner); Mr. J. C. Williams of Caerhays, St. Austell; Col. A. F. Walter of Bearwood, Wokingham (Forester).

Class 2.—Devon steers above two and not exceeding three years old: 1, Mr. John Wortley (Baden-Powell); 2, Mr. J. C. Williams; 3, H.M. the Queen; r, Viscount Portman (Willie).

Class 3.—Devon heifers not exceeding three years old: 1, H.M. the Queen (Dainty); 2, J. C. Williams (Waterhen 6th)

HEREFORDS.

Class 4.—Hereford steers not exceeding two years old: 1, Mr. John Price of Court House, Pembridge, Herefordshire; 2, H.M. the Queen; 3, Mr. A. P. Turner of The Leen, Pembridge, Herefordshire; r and hc, H.M. the Queen; c, Mr William T. Barnehy of Saltmarshe Castle, Bromyard.

Class 5.—Hereford steers above two and not exceeding three years old: 1, Mr. John Wortley (Lord Roberts); 2, H.M. the Queen; 3, Mr. William Hyde Cooke of The Green, Shelsley Kings, Worcester; r and hc, Mr. William Hyde Cooke; hc, Mr. John Price; Mr. Allen Edwards Hughes of Wintercott, Leominster (Nordan); c, Mr. John Joseph Cridlan of Home Farm, Maisemore Park, Gloucester (Red Indian); Mr. Henry William Taylor of Showle Court, Ledbury, Herefordshire

Class 6.—Hereford heifers not exceeding three years old: 1, Mr. Allen Edward Hughes of Wintercott, Leominster, Herefordshire (Ladylike 2nd); 2, Mr. Henry William Taylor of Showle Court, Ledbury, Herefordshire (Violet Agnes); r, Mr. Henry William Taylor (Innocence).

SHORTHORNS.

Class 7.—Shorthorn steers not exceeding two years old: 1, H.M. the Queen (Robin Hood); 2, The Earl of Rosebery, K.G., of Dalmeny Park, Edinburgh (Royal Standard); 3, Miss Alice de Rothschild of Waddesdon Manor, Aylesbury (Flower Boy); 4, Mr. John Ross of Meikle Tarrel, Fearn, N.B.; r and hc, His Royal Highness the Prince of Wales, K.G. (Constant).

Class 8.—Shorthorn steers above two and not exceeding three years old: 1, The Earl of Rosebery, K.G. (Talisman); 2, Lord Calthorpe of Elvetham Park, Winchfield, Hants (Thumper); 3, Miss Alice de Rothschild (Sabinus); r and hc, Mr. Fitzroy C. Fletcher of Letham Grange, Arbroath, N.B.; hc, Miss Alice de Rothschild (Juryman).

Class 9.—Shorthorn heifers not exceeding three years old: 1, H.M. the Queen (Cicely); 2, Messrs. Grant of Auchnacree, Brechin, N.B. (Primrose); 3, Captain Archibald Stirling of Keir, Dunblane, N.B. (Queen of Vittyre); r and hc, Mr George Inglis of Newmore, Invergordon, N.B. (Pearl).

SUSSEX.

Class 10.—Sussex steers not exceeding two years old: 1, Mr Henry Thomas West of Terry's Cross, Woodmancote, Henfield; 2, The Earl of Derby; 3, Mr P. F. R. Saillard of Buchan Hill, Crawley; r and hc, Mr. Joseph Godman of Park House, Godalming.

Class 11.—Sussex steers above two and not exceeding three years old: 1, The Earl of Derby; 2, Mr. P. F. R. Saillard; 3, Earl Winterton of Shillinglee Park, Petworth; r and hc, Mr Albert Jesse Thomas of Burgates Hill, Rudgwick, Sussex (Northern Prince); hc, Mrs Ernest Hollis of Red leaf, Penshurst, Kent.

Class 12.—Sussex heifers not exceeding three years old: 1, The Earl of Derby; 2, Mr W. F. Wood of Tilsden Court, Kent (Tilsden Myrtle); 3, Mr Albert Jesse Thomas (Miss Till 2nd); r, Mrs Ernest Hollis (Penshurst Nancy); hc, Mr Joseph Godman (Noble Lady 2nd).

RED POLLED.

Class 13.—Red Polled steers not exceeding two years old: 1, Mr. James E. Platt of Howbury Hall, Bedford; 2, His Royal Highness the Duke of York, K.G., Sandringham (Red Cap); r and hc, Mr James E. Platt; hc, Mr Alfred [illegible] Norwich (Thomas Cock); c, Mr [illegible]

Class 14.—Red Polled steers above two and not exceeding three years old: 1, Mr James E. Platt; 2, His Royal Highness the Duke of York, K.G. (Duchess); 3, The Hon. Assheton E. Pelham, M.P., of Hemingbrough Hall, North Riding (Lord); hc, Mr E. N. Buxton of Copdock Hall, Ipswich; r and hc, Mr R. Hovell Mason of Newton Hall, Sawston.

Class 15.—Red Polled Heifers not exceeding three years old: 1, Mr. Russell J. Colman (Barbara 3rd); 2, Mr Alfred James Smith of Bucklesham Woodbridge (Lady 2nd); r and hc, His Royal Highness the Duke of York, K.G. (Maid [illegible])

ABERDEEN ANGUS.

Class 16.—Aberdeen Angus steers not exceeding two years old: 1, Mr George Bruce of Techineach, Cullen (Cock o' the North); r and 4, Mr John H. Bridges of Lydgate House, Stroud, Gloucestershire; r, Colonel William Neville Tufnell of Langleybury, Chipperfield (Manus).

Class 17.—Aberdeen Angus steers above two and not exceeding three years old: 1, The Earl of Strathmore and Kinghorn of Glamis Castle, Glamis, Forfar (Aquilegia); 2, The Earl of Rosebery, K.G. (Abbess 3rd of Kippendavie); 3, Mr. Arthur Eggintz of South Ella Hall (Black Empress 2nd); r and hc, Captain H. L. Townshend of Caldecote Hall, Nuneaton (Cock o' the North); hc, Mr R. W. Hudson of Dunesfield, Great Marton, Lytham (Dunesfield).

GALLOWAYS.

Class 19.—Galloway steers not exceeding two years old: 1, Sir John Swinburne, Bart., of Capheaton, Newcastle-on-Tyne; 2, The Duke of Buccleuch and Queensbury, K.G., K.T., of Drumlanrig Castle, Thornhill, N.B. (Crimea Scott); 3, Mr. Albert Jesse Thomas of Burgates Hill, Rudgwick, Sussex, hc, (What Ho); r, The Duke of Buccleuch (Good Scott).

Class 20.—Galloway steers above two and not exceeding three years old: 1, The Earl of Antrim of Glenarm Castle, Glenarm, co. Antrim (Sam 3rd of Minnidow); 2, Mr. Herbert C. Allfrey of Thorpe Perrow, Bedale, Yorkshire (Rival); 3, Captain H. L. Townshend (Sambo); r, Mr. Albert Jesse Thomas.

Class 21.—Galloway heifers not exceeding three years old: 1, Sir John Swinburne, Bart. (Scottish Queen 3rd); 2, Crichton Royal Institution of Crichton Farm, Dumfries (Princess Fanny); 3, Mr. Herbert C. Allfrey of Thorpe Perrow, Bedale, Yorkshire (Reliance); r, Crichton Royal Institution

WELSH

Class 22.—Welsh steers not exceeding two years old: 1, Mr Robert Hughes; 2, Mr. William Hughes; 3, Mr. Robert Hughes; r and hc, Mr. R. M. Greaves of Wern, Portmadoc (Black Bach); hc, Mr. R. M. Greaves (Count); c, Colonel Henry Platt, C.B., of Gorddinog, Llanfairfechan (Plas Prince).

Class 23.—Welsh steers above two and not exceeding three years old: 1, Mr. William E. Oakeley of The Plas, Tan-y-bwlch, Merionethshire (Gorchataeth); 2, The Hon. F. G. Wynn of Glynllifon, Carnarvon; 3, Mr. R. M. Greaves; r and hc, Mr. Robert Hughes; hc, Mr. William E. Oakeley of The Plas, Tan-y-bwlch, Merionethshire (Manad); c, The Hon. F. G. Wynn

Class 24.—Welsh heifers not exceeding three years old: 1, Mr. R. M. Greaves (Bryn-y-Wern); 2, Colonel Henry Platt, C.B. (Madryn Queen); r and hc, Colonel Henry Platt, C.B. (Madryn Belle)

HIGHLAND.

Class 25.—Highland steers not exceeding three years old: 1, His Royal Highness the Prince of Wales, K.G.; 2, Sir Walter [illegible] Bart.; 3, [illegible] Colonel Robert Pringle; r, His Royal Highness the Prince of Wales, K.G.; hc, Sir Walter [illegible] Bart.; c, Mr James Young of Carbrook, Falkirk, N.B. (Jock).

Class 26.—Highland steers above three and not exceeding four years old: 1, Lieut.-Col. H. E. S. Horne Drummond; 2, His Royal Highness the Prince of Wales, K.G.; 3, [illegible] Duke of Argyll; r, [illegible] Duke of Argyll; hc, [illegible] Sir Walter [illegible] Bart.; c, Lieut.-Col. H. E. S. Horne Drummond; hc, [illegible] Colonel Robert Pringle; r, [illegible] Mr Robert A. Yerburgh, M.P.

HON. F. G. WYNN'S WELSH STEER, FIRST PRIZE AT BIRMINGHAM AND SECOND PRIZE AT SMITHFIELD.

CROSS-BREDS.

Class 28.—Cross-bred steers not exceeding two years old: 1, Mr. Robert Turner of Cairnton of Boyndie, Portsoy, N.B. (Black Knight); 2, Mr. John Ross; 3, Mr. Robert Turner [illegible] and hc, Mr. J. D uglas Fletcher of Rosehaugh, Avoch, N.B. (Duncan); r, Mr. John A. Horn of Brangan, Portsoy, N.B. (Tom Thumb); hc, Mr. John Ross.

Class 29.—Cross-bred steers above two and not exceeding three years old: 1, Captain H. L. Townshend (Cock o' the North); 2, Miss Alice de Rothschild (St. Brieux); 3, The Earl of Rosebery, K.G. (Brigadier); r and hc, Mr. J. Douglas Fletcher (Blue Duke); c, Mr. J. Douglas Fletcher (Rover); Captain Archibald Stirling of Ken, Dunblane, N.B. (The Command).

Class 30.—Cross-bred heifers not exceeding two years old: 1, Mr. John Ross; 2 and 3, The Earl of Rosebery, K.G. (Marigold and Village Belle); r and hc, Mr. John Ross; c, Miss Alice de Rothschild (Synthesis).

Class 31.—Cross-bred heifers above two and not exceeding three years old: 1, Mr. W. E. Learner of Dilham, Norwich (Ladysmith); 2, Mr. Clement tSephenson of Sandyford Villa, Newcastle-on-Tyne; 3, Mr. J. Douglas Fletcher; c, Miss Alice de Rothschild (St. Bryde).

KERRY, DEXTER, AND SHETLAND.

Class 32.—Kerry, Dexter, and Shetland steers not exceeding two years old and not exceeding 8cwt. live weight: 1 and r, Mr. J. Thorley of Ringdale House, Faringdon (My Mistake and Up Guards).

Class 33.—Kerry, Dexter, and Shetland steers above two and not exceeding three years old, and not exceeding 10cwt. live weight: 1, His Royal Highness the Prince of Wales, K.G. (Patriot); 2, Mr. R. G. Nash (Lucan Bobs); r and hc, Mr. Norman C. Cookson of Oakwood, Wylam, R.S.O. Northumberland (Daniel Prince).

Class 34.—Kerry, Dexter, and Shetland heifers, not exceeding three years old, and not exceeding 9cwt. live weight: 1, Sir Walter Gilbey, Bart., of Elsenham Hall, Essex (Dexter Miss); 2, Mr. J. Thorley (La Mancha Dot); r and hc, Sir Walter Gilbey, Bart. (Dexter Maiden); hc, Mr. R. Tait Robertson of The Church Farm, Babraham, Cambridgeshire (La Mancha Poppy).

SMALL CROSS-BRED CATTLE.

Class 35.—Steers not exceeding three years old: 1, His Royal Highness the Prince of Wales, K.G. (Valiant); 2, Mr. Norman C. Cookson of Oakwood, Wylam, R.S.O., Northumberland (Frolicsome); r and hc, Mr. R. W. Hudson (Duke of York); hc, Mr. R. G. Nash (Lucan Champion).

Class 36.—Heifers not exceeding three years old: 1, Mr. Russell J. Colman (Flo); 2, Mr. R. W. Hudson (Duchess of York); r and hc, His Royal Highness the Prince of Wales, K.G.; hc, Mr. J. Thorley (Ringdale Success); Mr. R. Tait Robertson (La Mancha Norma).

SHEEP.

LEICESTERS.

Class 37.—Pen of three fat wether lambs of the Leicester breed under twelve months old: 1, Mr. Ernest Francis Jordan of Eastburn, Driffield; 2, Mrs. S. Perry Herrick of Beau Manor Park, Loughborough; r, Mr. Ernest Francis Jordan.

Class 38.—Pen of three fat wether sheep of the Leicester breed above twelve and under twenty-four months old: 1, Mr. Ernest Francis Jordan; 2, Mrs. S. Perry Herrick; r, Mr. Ernest Francis Jordan.

BORDER LEICESTERS.

Class 39.—Pen of three fat wether lambs of the Border Leicester breed, under twelve months old: 1, The Earl of Rosebery, K.G.; r, The Earl of Rosebery, K.G.

Class 40.—Pen of three fat wether sheep of the Border Leicester breed, above twelve and under twenty-four months old: 1, Mr. J. Douglas Fletcher of Rosehaugh, Avoch, N.B.

COTSWOLD.

Class 41.—Pen of three fat wether lambs of the Cotswold breed, under twelve months old: 1, Mr. Frederick Craddock of Eastington, Northleach.

Class 42.—Pen of three fat wether sheep of the Cotswold breed above twelve and under twenty-four months old: 1, Mr. Frederick Craddock.

LINCOLNS.

Class 43.—Pen of three fat wether lambs of the Lincoln breed under twelve months old: 1, Mr. Henry Dudding of Riby Grove, Stallingboro', Great Grimsby; 2, Mr. John Pears of Mere, Lincoln; r, Mr. Henry Dudding; hc, Mr. William B. Swallow of Horkstow Villa, Barton-on-Humber.

Class 44.—Pen of three fat wether sheep of the Lincoln breed above twelve and under twenty-four months old: 1, Mr. John Pears; 2, Mr. Henry Dudding; r, Mr. William B. Swallow.

KENTISH OR ROMNEY MARSH.

Class 45.—Pen of three fat wether lambs of the Kentish or Romney Marsh breed under twelve months old: 1, Mr. Thomas Wotton of Tile Lodge, Sturry, Canterbury; 2, Mr. Henry Rigden of Lyndinge, Hythe, Kent; 3, Mr. Frederick Neame of Macknade, Faversham, Kent; r and hc, Mr. John Egerton Quested of The Firs, Chariton, Kent.

Class 46.—Pen of three fat wether sheep of the Kentish or Romney Marsh breed above twelve and under twenty-four months old: 1, Mr. Thomas Wootton; 2, Mr. Henry Rigden; r, Mr. John Egerton Quested; hc and c, The South Eastern Agricultural College of Wye, Ashford.

DEVON OR OTHER PURE LONG-WOOLLED BREED.

Class 47.—Pen of three fat wether lambs of the Devon, etc., breed under twelve months old: 1 and 2, Mr. John Henson Gibbings of Week Barton, North Tawton, Devon; 3, Mr. Alfred C. Skinner of Pound Farm, Bishops Lydeard, Somerset.

CHEVIOTS.

Class 49.—Pen of three fat wether lambs of the Cheviot breed under twelve months old: 1, Mr. John McDowall, of Girdstingwood, Kirkcudbright; 2, Mr. James McD. Jamieson, of Muttonhole, Ford, N.B.

Class 50.—Pen of three fat wether sheep of the Cheviot breed above twelve months old: 1 and 2, Mr. John McDowall; 3, Mr. Alexander Guild of Aberlady Mains, Aberlady, N.B.; hc, Mr. H. W Hope of Luffness Mains, Aberlady, N.B.

MOUNTAIN BREED.

Class 51.—Pen of three fat wether lambs of the Mountain breed under twelve months old: 1, Mr. John McDowall.

Class 52.—Pen of three fat wether sheep of the Mountain breed above twelve months old: 1 and 2, Mr. John McDowall; 3 and r, Sir John Gilmour, Bart., of Lundin and Montrave, Leven, Fifeshire.

SOUTHDOWNS.

Class 53.—Pen of three fat wether lambs of the Southdown breed under twelve months old: 1, Mr. Whitaker Wright of [illegible]; 2, Colonel H. B. McCalmont, M.P.; [illegible]; Mr. Mortimer of Worth Park, Crawley; 4, r, and hc, Mr. Charles [illegible] of Fetcham, Leatherhead; hc, Mr. Jeremiah Colman of [illegible]; Mr. R. W. Ardeme; Mr. [illegible]; Mr. [illegible] Essex (twice).

Class 54.—Pen of three fat wether sheep of the Southdown breed [illegible] twelve and under twenty-four months old: 1, The Duke of [illegible] of Goodwood, Chichester; 2, His Royal Highness the Prince of Wales, K.G.; 3, The Duke of [illegible] of Goodwood, K.G.; r and hc, Earl Cadogan, K.G.; hc, Earl Cadogan, K.G.; Colonel Harry L. B. McCalmont, M.P.

[illegible]

Class 56.—Pen of three fat wether sheep of the Hampshire Down breed above twelve and under twenty-four months old: 1, Mr. Thomas Fowell Buxton; 2, Lord Rothschild; 3, Mr. Thomas Fowell Buxton; r, Lord Rothschild.

SUFFOLKS.

Class 57.—Pen of three fat wether lambs of the Suffolk breed under twelve months old: 1 and 2, Mr. Herbert E. Smith of The Grange, Welton, Suffolk; 3, Colonel Harry L. B. McCalmont, M.P., of Cheveley Park, Newmarket; r and hc, Major E. W. Baird, Exning House, Newmarket; hc, Colonel Harry L. B. McCalmont, M.P.; The Earl of Ellesmere of Stetchworth Park, Newmarket.

Class 58.—Pen of three fat wether sheep of the Suffolk breed above twelve and under twenty-four months old: 1, The Earl of Ellesmere; 2, Major E. W. Baird; r and hc, Colonel Harry L. B. McCalmont, M.P.; hc, The Earl of Ellesmere.

SHROPSHIRES.

Class 59.—Pen of three fat wether lambs of the Shropshire breed under twelve months old: 1, Mr. Philo L. Mills of Ruddington Hall, Ruddington, Notts; 2, Lady de Rothschild of Aston Clinton, Tring, Herts; 3, Philo L. Mills; r, Captain Henry L. Townshend; c, Captain Harry L. Townshend.

Class 60.—Pen of three fat wether sheep of the Shropshire breed above twelve and under twenty-four months old: 1 and 2, Philo L. Mills; r, Mr. Herbert Mitchell of Longnor Hall Farm, Penkridge, Staffordshire; c, Captain Harry L. Townshend (twice).

OXFORD-DOWNS.

Class 61.—Pen of three fat wether lambs of the Oxford-Down breed under twelve months old: 1, Mr. Hugh W. Stilgoe of The Grounds, Adderbury, Banbury; 2, Mr. J. G. Williams of Pendley Manor, Tring, Herts; 3, Mr. Benjamin Howkins of Bromham, Bedford; r and hc, Mr. J. G. Williams.

Class 62.—Pen of three fat wether sheep of the Oxford-Down breed above twelve and under twenty-four months old: 1 and 2, Miss Alice de Rothschild of Waddesdon Manor, Aylesbury.

DORSET OR ANY OTHER PURE SHORT-WOOLLED BREED not specified in any of the foregoing Classes.

Class 63.—Pen of three fat wether lambs of the Dorset or any pure short-woolled breed not specified in any of the foregoing classes under twelve months old: 1, Mr. James Toop of Bosham, Chichester (Dorset); 2, r, and hc, Mr. W. J. Horn, of Handside, Hatfield (Dorset); c, Mr. Jasper Culverwell of Clavelshay Farm, North Petherton, Bridgwater (Dorset).

Class 64.—Pen of three fat wether sheep of the Dorset or any other pure short-woolled breed not specified in any of the foregoing classes above twelve and under twenty-four months old: 1 and 2, Mr. William Theodore Barneby of Saltmarshe Castle, Bromyard.

CROSS-BREDS.

Class 65.—Pen of three cross-bred fat wether lambs under twelve months old: 1, Mr. Fred. I. Matthews of Bircham Newton, Lynn; 2, Mr. W. H. Hall of Six Mile Bottom, Newmarket; 3, Mr. James Toop; r and hc, Mr. Thomas Rush of Mitchells, Saffron Walden, Essex; hc, Mr. James Toop.

Class 66.—Pen of three cross-bred fat wether sheep above twelve and under twenty-four months old: 1, Mr. Fred. I. Matthews; 2 and 3, Mr. Thomas Rush; r and hc, Mr. William Robinson of Willington Manor, Bedford.

Class 67.—Pen of three fat wether lambs, first cross from Cheviot, Scotch, and Mountain breeds, under twelve months old: 1, Mr. John McDowall.

Class 68.—Pen of three fat wether sheep, first cross from Cheviot, Scotch, and Mountain breeds, above twelve and under twenty-four months old: 1, Mr. John McDowall.

PIGS.

SMALL WHITES.

Class 69.—Pen of two pigs of any Small White breed not exceeding nine months old: 1, The Hon. D. P. Bouverie; r and hc, Mr. Arthur Hiscock jun., of Manor Farm, Motcombe, Shaftesbury.

Class 70.—Pen of two pigs of any Small White breed above nine and not exceeding twelve months old: 1, Mr. Arthur Hiscock, jun.; r and c, The Earl of Carnarvon of Highclere Castle, Newbury.

MIDDLE WHITES.

Class 71.—Pen of two pigs of any Middle White breed not exceeding nine months old: 1, The Hon. D. P. Bouverie; 2, Mr. George Attkins, of High Street, Highgate; 3, His Royal Highness the Prince of Wales, K.G.; r and hc, Mr. J. G. Williams; hc, Mr. E. Henry Loyd of Langleybury, King's Langley, Herts; Mr. Arthur Hiscock, jun.; c, Mr. John Pearre Chissell of Cowgrove Farm, Wimborne, Dorset; Mr. Sanders Spencer of Holywell Manor, St. Ives, Hunts.

Class 72.—Pen of two pigs of any Middle White breed above nine and not exceeding twelve months old: 1, Mr. Nathaniel Benjafield; 2, Mr. Arthur Hiscock, jun.; 3, Mr. Sanders Spencer; r and hc, Mr. George Attkins; c, Mr. E. Henry Lloyd of Langleybury, King's Langley, Herts.

LARGE WHITES.

Class 73.—Pen of two pigs of any Large White breed not exceeding nine months old: 1, The Earl of Rosebery, K.G.; 2, Mr. Sanders Spencer; 3, Mr. George Attkins; r and c, Mr. Arthur Hiscock, jun.

Class 74.—Pen of two pigs of any Large White breed above nine and not exceeding twelve months old: 1, The Earl of Rosebery, K.G.; 2, Mr. Arthur Hiscock, jun.; 3, Mr. William Mitchell of The Vale, Kirby Bedon, Norwich; r and hc, Mr. Nathaniel Benjafield.

BLACKS.

Class 75.—Pen of two pigs of any Black breed not exceeding nine months old: 1, Mr. Nathaniel Benjafield; r and hc, Mr. George Pettit of The Firs, Friston, Saxmundham.

Class 76.—Pen of two pigs of any Black breed above nine and not exceeding twelve months old: 1, Mr. Arthur Gerrard Creech of Newton House, Sturminster Newton, Dorset; 2, Mr. George Attkins; r and hc, Mr. George Pettit.

BERKSHIRES.

Class 77.—Pen of two pigs of the Berkshire breed not exceeding nine months old: 1, Mr. Arthur Hiscock, jun.; 2, Mr. Julius Augustus Fricker of Burton, Mere, Wilts; 3, The Earl of Carnarvon; r and hc, Mr. Alexander Henderson, M.P., of Buscot Park, Faringdon; hc, Middlesex County Asylum, Tooting, Surrey; c, Mr. Richard Horwood of Upper Farm, Drayton Beauchamp, Tring; Mr. John Pearce Chissell of Cowgrove Farm, Wimborne; Sir H. F. De Trafford, Bart., of Hill Crest, Market Harborough; Mr. George T. Tomkin of The Moat, Marden, Kent.

Class 78.—Pen of two pigs of the Berkshire breed above nine and not exceeding twelve months old: 1, Mr. Richard Fowler; 2, Mr. George T. Tomkin of The Moat, Marden, Kent; 3, Mr. Richard Edward Horwood; 4, Mr. Arthur Hiscock, jun.; r and hc, Mr. Nathaniel Benjafield; hc, Mr. John Pearce Chissell of Cowgrove Farm, Wimborne; Mr. R. W. Hudson; c, Mr. Richard Edward Horwood.

TAMWORTHS.

Class 79.—Pen of two pigs of the Tamworth breed not exceeding nine months old: 1, Mrs. E. Ibbotson of Gun Hill, Arley, Coventry; r and c, Mr. D. W. Philip of The Ashes, Whitacre, Birmingham.

ANY DISTINCT OR CROSS BREED.

Class 81.—Pen of two pigs of any distinct or cross breed, not qualified to compete in any of the foregoing classes, not exceeding nine months old: 1, Mr. Alfred Brown of Hill Farm, Southampton; 2, Mr. Arthur Hiscock, jun; 3, Mr. John Pearce Chissell; r and hc, Mr. George Attkins; c, Mr. Nathaniel Benjafield.

Class 82.—Pen of two pigs of any distinct or cross breed, not qualified to compete in any of the foregoing classes, above nine and not exceeding twelve months old: 1, Mr. Arthur Hiscock, jun.; 2, Mr. Julius A. Fricker of Burton, Mere, Wilts; 3, Mr. John Pearce Chissell of Cowgrove Farm, Wimborne; r and hc, Mr. George Attkins; c, Mr. Alfred Brown of Hill Farm, Southampton.

SINGLE PIGS.

Class 83.—Single pig of any White breed not exceeding twelve months old: 1, The Earl of Rosebery, K.G.; 2, Mr. W. Mitchell; 3, Mr. Arthur Hiscock, jun.; r and hc, Mr. Alfred Brown; hc, His Royal Highness the Prince of Wales, K.G.; Mr. Charles Elmhurst Duckering of The Cliff, Kirton Lindsey, Lincolnshire; Mr. Sanders Spencer; The Hon. D. P. Bouverie.

Class 84.—Single pig of any black breed not exceeding twelve months old: 1, Mr. George Attkins; 2, Mr. George Pettit; r, Mr. Arthur Gerrard Creech.

Class 85.—Single pig of the Berkshire breed not exceeding twelve months old: 1, Mr. Nathaniel Benjafield; 2, Mr. Julius A. Fricker; 3, Sir H. F. de Trafford, Bart., of Hill Crest, Market Harborough; r and hc, Mr. Arthur Hiscock, jun.; hc, Mr. Richard Edward Horwood; Mr. Alfred Brown, of Hill Farm, Southampton; The Earl of Carparvon; Mr. Alexander Henderson, M.P., of Buscot Park, Faringdon.

Class 86.—Single pig of the Tamworth breed not exceeding twelve months old: 1, Mr. George Attkins; 2, Mrs. E. Ibbotson; r and hc, Mr. Garrett Taylor, of Trowse House, Norwich.

CARCASE COMPETITION.

Class 87.—Steer not exceeding two years old: 1, Mr. J. Douglas Fletcher; 2, Sir John Swinburne, Bart.; 3, Mr. C. H. Berners of Wolverstone Park, Ipswich; r and hc, Mr. James Young of Cadboll, Fearn, N.B. (General).

Class 88.—Steer above two and not exceeding three years old: 1, H.M. the Queen; 2, Mr. James Young (Baden-Powell); 3, Mr. J. G. Young (De Wet); r and hc, Mr. R. G. Nash (Lucan Tomtit).

Class 89.—Heifer not exceeding three years old: 1, H.M. the Queen; 2, The Duchess of Newcastle of Clumber, Worksop, Notts (Daisy); 3, Mr. J. Douglas Fletcher; r and hc, The Executors of the late Mr. Joseph Smith of Catterall Hall, Garstang (Lady Roberts).

SHEEP.

Class 90.—One long-woolled wether lamb not exceeding twelve months old: 1, Mr. John Hayman; 2, Mr. William Kennedy of Luce Farm, Ecclefechan, N.B.; 3, Mr. James McD. Jamieson of Muttonhole, Ford, N.B.; r and hc, Mr. John McDowall; c, Mr. J. Douglas Fletcher.

Class 91.—One long-woolled wether sheep above twelve and not exceeding twenty-four months old: 1, Sir John Gilmour, Bart.; 2, Mr. Charles T. A. Robertson of Little Horringer Hall, Bury St. Edmunds; 3, Mr. J. Douglas Fletcher; r and hc, Mr. H. W. Hope; c, Mr. Alexander Guild.

Class 92.—One short-woolled wether lamb not exceeding twelve months old: 1, Mr. F. N. Bocock of Cropley Grove, Newmarket; 2, Mr. Lloyd H. Baxendale of Greenham Lodge, Newbury; 3, Mr. Thomas Fowell Buxton; r and hc, Earl Cadogan, K.G., of Culford Hall, Bury St. Edmunds; hc, Colonel Harry L. B. McCalmont, M.P.; Mr. Herbert E. Smith of The Grange, Walton, Suffolk; c, Mr. John Hayman; Mr. S. R. Sherwood of Playford, Ipswich.

Class 93.—One short-woolled wether sheep above twelve and not exceeding twenty-four months old: 1, Colonel Harry L. B. McCalmont, M.P.; 2, Mr. T. T. Pitt of Piper's Farm, Good Easter, Essex; 3, Mr. P. F. R. Saillard of Buchan Hill, Crawley; r and hc, The Earl of Carnarvon; hc, Mr. Lloyd H. Baxendale of Greenham Lodge, Newbury; c, Mr. Thomas Fowell Buxton.

Chichester.

Judging by appearances, the annual show of fat stock at Chichester, which took place on Wednesday and Thursday, is on the down grade, and those interested in the welfare of the exhibition will have to bestir themselves if it is to regain a position of importance among the fat stock shows of the county. It would be idle to pretend that on this occasion it was at all worthy of the district which the Society seeks to represent. For such a large and important agricultural area, its proportions were, indeed, almost insignificant, and the poverty of the situation was strikingly revealed in the department for fat beasts, where in five classes there were only ten entries all told. In only one of these classes were there sufficient exhibits to necessitate the Committee parting with a second prize. The fact that the fixture clashed with the great exhibition at the Royal Agricultural Hall, Islington, was, of course, not in its favour, but even allowing for any gaps in the ranks of competitors which Smithfield occasioned, it can hardly be gainsaid that a place like Chichester should be able to do far better than it did this year. Mr. G. F. Stanford, Mr. J. Bonham Carter, and Mr. E. E. Braby were the principal winners in the classes for fat beasts. An exceedingly well proportioned, fleshy crossbred heifer (Aberdeen-Angus and Sussex), belonging to Mr. Stanford, which had been successful at other local shows this year, was adjudged to be the best animal in the yard, Devon steer, the property of Mr. Bonham Carter, being reserve. The entries of sheep, like those of cattle, were very poor in number, though quality was fairly well represented. Mr. C. F. Field, of Felpham, gained two first prizes, and took the premium of £10 for the best pen in the show. Mrs. Montefiore and Mr. E. Whidley Tooker also won first prizes, the Pagham Harbour Company and Mr. James Toop failing to repeat their successes of last year. There was only one class for pigs, and in that Mr. Benjamin Aylwin, of Sidlesham, secured the first award, with Mr. H. M. Kimbell, of Chichester, second. In the minor departments of the show the classes for roots, corn, and dead poultry generally filled well, and in each section the display was of an interesting character.

FIRST-CLASS representatives and agents required throughout the United Kingdom for the sale of "MOLASSINE"—Write for particulars to the "MOLASSINE" Co., LTD., 36, Mark Lane, London, E.C.—[ADVT.]

The Annnal Agricultural Dinner.

The annual agricultural dinner of the Central and Associated Chambers of Agriculture and the Farmers' Club was held at the Holborn Restaurant on the evening of Tuesday, December 11th, 1900. Mr. J. R. Eve, chairman of the Farmers' Club, presided, and the Vice-Chairmen were Mr. B. St. John Ackers, Mr. J. F. Beddall, Mr. S. B. L. Druce, Mr. Ernest H. Godfrey, Mr. W. Lipscomb, Mr. Fred Street, and Mr. Henry Williams.

Amongst those present were the Right Hon. R. W. Hanbury, M.P. (President of the Board of Agriculture), the Right Hon. Henry Chaplin, M.P., Sir James Blyth, Bart., Sir Mark J. McTaggart Stewart, Bart., M.P., Sir Jacob Wilson, Mr. T. H. Elliott, C.B., Mr. R. S. Balden, Mr. J. Beecroft, Mr. J. Bowen-Jones, Mr. F. A. Channing, M.P., Mr. Cary Coles, Mr. A. C. Cope, Major Craigie, Mr. C. B. Davies, Mr. T. Davies, Mr. F. A. Fulford, Mr. J. Whitehouse Griffin, Mr. Endre György (Hungarian Agricultural Attaché), Mr. A. F. Jeffreys, M.P., Mr. J. Heywood Johnston, M.P., Mr. John Kendrick, Mr. J. McIntosh McColl, Colonel Maude, Colonel Victor Milward, M.P., Mr. R. Jasper More, M.P., Mr. Rouse Orlebar, Professor John Penberthy, Mr. R. Henry Rew, Mr. H. Standfield, Mr. H. Stopes, Mr. R. Stratton, Mr. Garrett Taylor, Mr. C. P. Tebbutt, Mr. John White, Mr. J. T. Wilson, and over one hundred others.

Communications expressing regret at inability to be present were received from the Earl of Derby, K.G., Lord Burghclere, the Right Hon. Walter H. Long, M.P., the Right Hon. Horace Plunkett, Mr. Victor Cavendish, M.P. (chairman of the Central Chamber for 1900), Mr. J. Grant Lawson, M.P., (vice-chairman of the Central Chamber for 1900), Mr. M. D'Arcy Wyvill, and Mr. R. A. Yerburgh, M.P.

Loyal Toasts.

The CHAIRMAN, in proposing the toast of the Queen, remarked that the longer we lived the more we esteemed the many virtues of our beloved Queen. Englishmen also appreciated the example which Her Majesty set of sympathy with her people both in their joys and in their sorrows. The Queen herself had not been without grief this year, apart from the troubles and anxieties which had been entailed by the war in South Africa; but notwithstanding her own personal griefs she had not failed to remember her subjects. He was sure that agriculturists always rejoiced when they saw Her Majesty's name in the prize list. They could readily imagine that the Queen kept on her farm in honour of the Prince Consort, who established it. (Applause.) He might safely state that the Prince of Wales was the most popular man in England, and that the Princess of Wales was the most popular woman in England. He always felt that it was a happy day for England when the Princess stepped upon our shores to become the mother of our future kings. The other members of the Royal Family were following in the steps of their father and mother. This year the Duke of York was a competitor with his father and against his father and against Her Majesty for the prizes that were offered for the best stock at the various shows in which they could compete. (Applause.)

Both toasts having been duly honoured,

"Success to Agriculture"

The Right Hon. HENRY CHAPLIN, M.P., proposed the toast of "Success to Agriculture." He said: I rise with great pleasure at the word of command to propose the next toast upon the list. It is one which I can assure you in all respects is thoroughly congenial to me, because it is the toast of "Success to Agriculture," and it is alike my duty and my pleasure to couple with that toast the name of your distinguished guest, Mr. Hanbury, the new Minister of Agriculture. (Cheers.) I have known Mr. Hanbury now for many years in public life. I have watched his career with great interest, both as a member of the House of Commons before he was in office, and also as a capable and most hard-working colleague in Her Majesty's Government. I have seen him for five years fill a most difficult and arduous post with great ability and success, and I am sure that every gentleman in this room will join with me in heartily congratulating Mr. Hanbury upon the well-deserved promotion which he has earned. (Cheers.) Your welcome to Mr. Hanbury to-night I feel convinced will be all the warmer because I think that agriculturists everywhere thoroughly appreciate both the tone and the spirit of the speech which he made immediately after his appointment, in which he declared his determination to do all that in him lay for the promotion of the oldest, and what he described also as, perhaps, the least prosperous at the present time, of all the industries of the United Kingdom. Gentlemen, he might have termed it, too, I think, with perfect truth, the largest industry that we possess—(cheers)—because I believe it to be a fact that cannot be questioned that more capital and more labour are employed in the pursuit of agriculture than are employed in any other single industry in the kingdom at the present time. That it is Also the least prosperous is a matter upon which I am afraid that there can hardly be a difference of opinion among those who are thoroughly acquainted with the subject. The condition of the industry, of course, varies in different districts, and according to the nature of the farm. If I were to express my own opinion I should say that probably at the present time dairy farming is the branch of the industry which has suffered least, and which is, perhaps, doing best to-day, and which is the least in need of help and of assistance. But even in the case of dairy farming, in my humble opinion, there is great room for improvement and for development. I acknowledge with gratitude the good work which is being done at the present time by the different county councils, and by various other institutions in the country, for the improvement of dairy farming; but there is a great deal which is still left to be done. Otherwise why is it that, with all the natural advantages which we possess in the United Kingdom for the manufacture of dairy products equal to those of any country in the world, we continue to import such enormous quantities of dairy produce from abroad? With regard to dairy education I can only say that my opinion remains to-day what it always has been. In addition to all that is being done at present I should like to see the work undertaken by the Board of Agriculture upon a most comprehensive scale (applause) and with ample resources at its back. If that were done under the auspices of my right hon. friend, with all his experience and all his powers of organisation and of administration, I feel very sure that we should very quickly see a most remarkable change in the relative proportions of home and foreign dairy produce consumed within this country. (Applause.) But it is where the farm is arable that the condition at the present time, in a season like the present, is, in too many districts, something which I think I might describe without exaggeration as almost disastrous. I have had excellent opportunities myself of judging of this in what used to be known as the premier corn county in the country, namely, Lincolnshire, because I was in every part—I think I might say almost in every corner—of that county during the recent General Election, and everywhere, unfortunately, I was met with the same story, "The very worst year, squire, which we have had since 1879," is what they said to me. I do not know what it may be at the present moment in other parts of the country, but I do know that only two or three days ago I had a letter from one of the best known agriculturists in the kingdom, who wrote to me from a northern county in these words: "As far as arable farms are concerned this is the worst year on record." And I am afraid that probably that may apply to wider districts of the country. The reason of this is very simple. To grow wheat at the present prices, unless under wholly exceptional circumstances, is a certain loss, and consequently to a very great extent barley has been obliged to take the place of wheat. But, as everybody knows, barley is what is called an exceedingly gambling crop. It is so terribly dependent upon the nature of the season, and in a season like the present the meaning of this is that you are only able to grow about one half of the crop that you ought to grow, and what you do grow, in all probability, is most indifferent in quality. Consequently you are hit in both ways. You have only half the crop, and you get a greatly worse price for that small crop which you have. Under such circumstances it does not require a conjurer to be able to guess what the condition of farming under those circumstances is going to be at the end of the year. Well, what is to be done? That is always a question of difficulty in connection with agriculture; but I do believe that, in this particular case, Providence has directly intervened in the interests of farming. Day after day we read of people by thousands being poisoned by bad beer—that is to say, poisoned by beer which is made of substitutes for malt and hops, which have turned out to be so injurious that a great many people have really died in consequence. ("Shame!") Now, assuming that the allegations are true (I have no opportunity of judging of them myself, but, from all that is said and published upon the subject, it seems to me that there can be very little doubt about it), then two things in my judgment are absolutely certain. One is that no Government can continue to permit the manufacture of poisonous beer, and the other is that the conclusions of the Committee who sat and reported upon the use of beer materials, I think about two years ago, have been absolutely falsified by the results. The only member of that Committee who was right in his conclusions was our old friend, Mr. Clare Sewell Read—(loud cheers)—who had the courage and the ability to write a very different minority report upon the subject. I must confess that I have some responsibility myself, and I am quite ready to bear all the share of the blame which is my due. When that report was published, as the then President of the Local Government Board I was content to accept it and take it upon trust, without carefully examining the evidence. I ought to have examined the whole of the evidence, perhaps—it was extremely bulky—(laughter)—instead of taking it upon trust. I consider that the whole position from that time to this has been changed by the disclosure of these facts, and by the fact also that the conclusions of that committee are so directly at variance with those facts. And, in my opinion, the time must come for an entirely new departure in connection with this question. All that is needed, it seems to me, is this: namely, the intervention of two Government Departments—those of the Local Government Board. The Local Government Board is the guardian of our public health, and I am delighted—and I never met a man about whom this in my life—that my old friend Mr. Walter Long is my successor in that Department. He is the best of good fellows and the very best of friends, and one who, I think, if he can legitimately do so, will always have a warm corner in his heart for the interests which all of you represent here to-night. (Cheers.) The other Department is the Board of Agriculture, in the person of my right hon. friend who, in future, will be the guardian angel of that interest, and who, I hope, is destined to be the great champion of the barley growers of this country. If I may presume to say so, it does seem to me that those two Ministers have a golden opportunity at the present moment of "killing two birds with one stone." What we want them to do is this—to save us from being poisoned by bad beer, and to give us good beer and honest beer instead of bad, and, it seems to me, to set the barley-grower on his legs again, and by that means to confer an enormous boon upon all the agriculturists throughout the whole country. If they are able to put their heads together and to devise some legitimate means of doing this, I am sure that they will not only earn the gratitude of the whole agricultural world, but they will do something for that industry which that industry never will forget. Well, gentlemen, I must not keep you on an occasion like the present. ("Go on.") No, you are all, very naturally, waiting to hear what Mr. Hanbury has got to say to you. But there is just one other subject upon which I must say a single word to-night. It is always a matter of the greatest difficulty to do anything in these days in Parliament of material advantage to the agricultural interest, but we were able to do something of that nature during the last Parliament when we passed the Rating Bill. (Cheers.) It brought upon us unbounded abuse from certain quarters; but I never wavered in my opinion—and I do not think that I ever shall—that it was a notable instalment towards removing what was generally admitted to be an intolerable injustice which had weighed for so long and so heavily upon agricultural land in this country. Unfortunately, that Act expires next year, and what every agriculturist in the country at the present moment is most anxious about, I am certain, is this. They are all aware that a Royal Commission is sitting at the present moment, and that in their deliberations this question is included; but what the agricultural party in this country desire is that, whatever may be done in that respect, there shall be no lessening, no minimising whatever, of the advantages conferred by that Act, and that, unless something is provided giving greater advantages to the agricultural land of the country, the Act should either be made permanent or be renewed. Of course, gentlemen, I have never dreamed for a moment of expecting from Mr. Hanbury any reply to these suggestions that I have made to-night; nor am I seeking in any way to—as it is vulgarly called—try to "draw" him. Nothing would be more improper upon my part, and nobody knows better than myself that it would be impossible to ask him to make any pronouncement of the kind upon an occasion like the present, and that it would be impossible for him to do so. But I hope that it has not been out of place if I have endeavoured, with regard to the last two subjects which I have mentioned, to voice as clearly as I can what I believe to be the general—I will go further and say the unanimous opinion of the agricultural world with regard to those two particular questions at the present time. I have done so in order that they may be submitted to his consideration, and I know Mr. Hanbury well enough to know that, whatever may be his ultimate decisions, any opinions widely entertained and held and submitted to him by the agricultural community will at all times command from him a thoroughly full and most fair consideration. Now, gentlemen, with some apology for having delayed you, I am afraid, at almost too great length—("No, no")—I conclude by proposing to you "Success to Agriculture," coupled with our heartiest good wishes for the success of Mr. Hanbury's career in his new position as the Minister of Agriculture. (Cheers.)

The Right Hon. R. W. HANBURY, M.P., on rising to reply was received with loud cheers. He said: Of all the men fitted to propose this toast, perhaps the most fit of all is my right hon. friend himself. He is not only recognised, I think, generally, as almost the tutelary genius of agriculture, but he was the first President I might almost say [illegible] even—of the Board of Agriculture; and for the last five years he has been president of a department which, it seems to me, by its decisions can exercise a greater influence upon the fortunes of agriculture even than the Board of Agriculture itself. He is a veteran, and I am a novice, a man who has to change his mind off from the old set of rails on to a new set which may carry him into new regions with difficulty at any rate, he has not yet [illegible] explored. Well, gentlemen, it is said by some that in order to preside over agriculture you must have [illegible] your task in amount of special knowledge and experience which is not required in any other depart-

ment. On the other hand, it is said that, perhaps, to have an open mind, a mind that has not travelled too long in the same groove, is a better recommendation. Well, I am sorry to say that I have neither of those qualifications in their completeness. (Laughter.) It is perfectly true that some twenty years since I had the honour of being the chairman of the Staffordshire Chamber of Agriculture, and to that extent it may be said that the open mind does not altogether exist. It is also perfectly true that, so far as concerns dairy farming, which my right hon. friend has described as one of the most growing operations connected with the agricultural interest, my mind has never been a *tabula rasa*. I am not prepared to yield to my three predecessors in the office in interest in the department of agriculture, and I hope that I am not presumptuous in saying that I am not prepared to yield even in experience. But with regard to the idea of being an expert generally in farming, farming, it occurs to me, is so various—it is really so many occupations instead of being one occupation—that I should like to know whether an all-round practical expert is anywhere to be found. I confess I have never met him. I do not believe that this compendium of agricultural lore, this walking encyclopædia of agricultural knowledge, is anywhere to be found. The only possible place where I can suggest that he might be found would be hidden away in disguise in the shape of the youngest leader writer in the London office of the smallest agricultural journal. (Laughter.)

It is a somewhat significant fact that while all the other trades and occupations in this country are ranged under the Board of Trade, agriculture stands in proud isolation alone. It has a Department of its own. What is the reason of this? It is partly, no doubt, that it is our oldest industry. It is partly due also to the fact that it is still, I am glad to say, in spite of all that has happened, the greatest of our industries to-day. But I think that there is something more than that, because to recognise the claims of agriculture as of paramount importance is to recognise, not the claims of a class, but an interest of the nation.

The rural districts supply us with those healthy British men and women whom, as I have said, we cannot find elsewhere. We may depend upon it that, if that recruiting ground were to be lost, not only should we lose the vigour wanted in our towns for our manufacturing industries, but the strong arm of the soldier also would fail us in the great task of Imperialism. Looking back to the century that is just coming to an end, when I recollect that at the beginning of this century the rural population was more than half of the whole of England and Wales, whereas now it is, I think, a little under one-fifth, and when I recollect that, while the whole population of England has increased from nine millions to twenty-nine millions, over the whole of the century, the rural districts have only increased in population by two millions, and during the last fifty years have actually decreased in population, I say that is a black spot upon a century which, on the whole, has been for this country at any rate a hundred years of glorious history. The toast is the toast of "Success to Agriculture," and, of course, so far as the means of success are concerned, the means of success in agriculture, I take it, are the same as in every other occupation. I do not take it that agriculture is a secret caste or a mystery, success in which is to be gained by hidden forces or by merely cabalistic methods. I understand that to a great extent the same qualities which win success in other occupations win success in agriculture, though, of course, we always have the weather and foreign competition against us. In an old country like this, and especially in old occupations, we have to recollect that it is the distinctive character of most occupations in an old country like our own that we must avoid all kinds of waste in every form, and even, as it were, to convert into means of profit what seem to be our waste products, and to make a scientific accuracy take to a great extent the place of mere rule of thumb, and to produce the very best product that we can, whatever our occupation may be. This, I take it, is the secret of success in every occupation, and it applies to agriculture just as much as it does to any other trade. But it does strike me that, whatever the British farmer may do, he starts with two unique disadvantages. The first is that his success, when it comes, is never on the same scale as success in other trades and occupations. The same fortunes are never made, and I venture to say that they never were made. And the margin of profit is so small, even in a successful year, that it is not possible in the occupation of agriculture, as it is in that of other trades, to set one successful year against, it may be, a series of bad years. There is also, it occurs to me, the further disadvantage that, after all, even the largest farmer carries on what is, in comparison with some of our larger trades, a small occupation, and he is also living to a great extent isolated and apart, and so co-operation to him is a greater necessity that it is, perhaps, to men engaged in any other occupation whatever. That, of course, is especially the case in the particular branch of the agricultural industry in which I am myself concerned. I am glad to see that in the sale of milk, for instance, the principle of co-operation is spreading, and it is absolutely necessary that it should spread, even to protect the farmers against themselves, so that they should not undercut one another in their prices and sell their milk at ridiculous prices. Then there is the further necessity for co-operation in the production, we will say, of butter. Why is it, after all, that the foreigner sends something like fifteen million pounds worth (I think it is) of butter to this country in a year? It is because you not only want co-operation to increase the quality of the product, but you want it, even more, to sell at any rate on anything like a wholesale scale. You want it to produce uniformity, which is the real secret why the trader, as a rule, buys foreign butter. This leads me to the further question of how far the State ought to interfere with an industry like this. I should say that it ought to interfere on precisely the same principles that it interferes with other trades. It is not the duty, I take it, of the State to provide crutches for feeble and incompetent people, but it is the duty of the State to provide an open pathway for capable and self-reliant people. It is the duty of the State not to unduly favour the farmer, but it is the duty of the State to see that other classes are not unduly favoured as against him. (Cheers.) I think that, as regards remedies by the State, I am one of those who do not believe that anything very practical could be done for agriculture by heroic remedies or *coups d'état*. I notice, for instance, that the produce per acre of this country is very much in excess of those countries where the landlords are such as some, no doubt, would like to see them in this country. I notice, for instance, that even the price of corn was a great deal higher during the American and during the Franco-Prussian war than it ever was in the days of protection. And, even with regard to a remedy which is proposed by my right hon. friend, and therefore which I feel bound to treat with the greatest possible respect and regard, namely, bimetallism, I might be allowed to say, though perhaps I ought not to say it, that I have never been able to see why you should artificially decrease the value of the sovereign any more than you should artificially decrease the price of land. It fortunately happens that bimetallism has, I think, for the moment disappeared in the presence of the huge discoveries of gold in South Africa and in Western Australia. But it struck me that agriculture has now become so varied, and to a great extent, too, the interests of various branches are so conflicting that it is impossible to have one universal cure-all. And it is very consoling to me, coming to this Department as I do, to find that most of the ten suggestions which are placed before me are smaller suggestions for smaller remedies dealing with admitted evils. In fact, it seems to me that they are practical remedies for practical ends, suggested by thoroughly practical men. But then the suggestion that occurs to me is this: If you want these things done by the State, what do you understand by that term? When you ask the Board of Agriculture to do all this for you, how far are you aware of the powers of the Board of Agriculture? I am sorry to say that one of the first things that have struck me since I have entered into the office is the very limited powers of the Board of Agriculture. I am one of those who think that for agriculture, as for a good many things, a benevolent all-powerful despotism might work a great deal of good, and I am not so afraid of responsibility that I should be unwilling to undertake the task myself (laughter); but, unfortunately, that state of things does not exist. Let me take what I think is a fair example. Let me take the ten requirements which are sent in to us by the various Chambers of agriculture as to the legislation that ought to take place for the benefit of agriculture. I do not want to go through the whole list, but I will deal with the first of them, and with the most important of them; and I find that eight out of the ten are subjects connected with other Departments, and not, unfortunately, with the Board of Agriculture. I will say this, though, that I do conceive that it is the duty of the Board of Agriculture, even if these things are not actually within its own province, to act as the watchdog of agriculture, and to do its utmost, as undoubtedly I shall, to impress upon my colleagues in the Cabinet the necessity of undertaking some, at any rate, of these tasks. Let me take them in order. In the first place, there is the question of local taxation. That, of course, is entirely outside the actual scope of the Board of Agriculture. It is in the hands of the Local Government Board, and it could not be in more excellent hands than in those of my friend, Mr. Walter Long. It is not a matter with which the Board of Agriculture can deal. Then I come to the question of railway rates. One knows how hardly they do undoubtedly hit the agricultural interest. (Cheers.) I was a member of the Railway Rates Joint Committee which sat some years ago, but on looking back on what has happened since I think that we made a mistake in not requiring railway companies to show us exactly how the joint rates were made up. I think that we ought to know, when there is a case either of goods coming from abroad or of goods travelling over various railways, how the whole charges are apportioned amongst the different companies on the journey; but I am bound to say that our task on that committee was an exceedingly difficult one, because there was practically no competition with the railway companies. I do not know whether that defect can ever be made good; but in my opinion no more foolish act was ever perpetrated by any department or by any statesman than when the canals were allowed to fall into the hands of the railway companies. (Cheers.) I believe that the introduction of competition into what is now a practical monopoly both by land and water is the only way in which you can get fair rates. Then there is the question of paying compensation for animals slaughtered for tuberculosis. That was a question which I recollect was brought before me in my own constituency at the last election. There, again, animals are slaughtered, not in the interest of agriculture, but in the interest of the health of the people, and therefore that is a subject for the Board of Agriculture in the first place, though I am bound to say that I still adhere to my opinion that the Board of Agriculture ought to bring pressure to bear on other departments and do what they can reasonably do in these matters; but in the first place, at any rate, the matter is entirely for the Local Government Board. Then, again, we have the matter of the beer duties which have been referred to by my right hon. friend, and a most important question it is. There is no possibility of doubt as to its importance, not only from the agricultural point of view, but from a national point of view as well. Again, what is the position of the Board of Agriculture with regard to it? Beer, under the Act, is not necessarily an agricultural product. It may be made, I believe, of anything practically that you like, whatever the rubbish may be. So long as there is not more than 2 per cent. of proof spirit in it it is beer. (Laughter.) That is how the matter stands. I am only stating to you a fact, and you may draw your own conclusions from it. But I do believe that there is a spirit awaking amongst those who drink beer most—the working classes, and it is to them I think that we shall have to look, and I believe that they will soon find out that, as a rule, taking their beer all through, it is heavier and more intoxicating even in good times than the beer sold in any other country; and, of course, as we have now found out, there is the risk of their being poisoned into the bargain. I cannot, as my right hon. friend said, express any definite opinion, but I have, I confess, my own views on the matter, and I say that it is a matter to be considered, not only from the agricultural but from the national point of view. (Cheers.) Then I pass to another question, and that is with regard to another department. It is a matter which I think nearly touches the agricultural interest, and that is the question of education. I think that in our elementary schools in our country parishes at the present moment the education given is not the kind of education that ought to be given. (Loud cheers.) I think that it is the kind of education which is eminently fitted to make the children attending those schools dissatisfied with country life, and I say again not purely from the agricultural point of view, but from the national point of view, we ought in those villages to have education given which will tend to interest our children in country life, and do something to keep up that supply for national purposes of which I have spoken. (Cheers.) Again, with regard to the Science and Arts grant, I confess that I am not at all satisfied that too much of that money does not go to our towns, and I do not think that enough of it comes to our country villages. I am afraid that a great deal of the grant which is given even in our towns for agricultural purposes is gained by people who have no intention whatever to embark in agriculture, and who simply take it up as a way of interesting their minds in what is no doubt an interesting subject. Then as to the grant—I confess it is a small grant—of something like £8,000 a year. Although I come from the Treasury, which is certainly not given to extravagance, I do think that £8,000 a year is a somewhat limited grant to give to the schools of this country. I think that perhaps to start with it was well to have a limited grant. I am not quite certain that if we had given the money lavishly and wholesale to start with a great deal would not have been wasted. But these things have now been going on for some years. We make our ground good as we go along, and it does seem to me that agriculture has some claim upon an increased grant. But, on the other hand, as far as I have been able to gain information as yet, I think there is too great a tendency on the part of even some of those schools which have received the grant not to consider the case of the actual practical work of farmers. But the farmer is after all the man whom we must consider, and I am afraid that as regards some of these schools perhaps the money does not reach the place for which it was primarily intended. Then there is another department about which I should like to say a word, and which I think has done something, and done something for agriculture. I had the privilege in the last Parliament of being responsible for two departments, not only the Treasury but the Post Office. I am glad to say that during the five years I do think that the Post Office did something for agricultural interests. No doubt it was a great advantage that the farmer should be put into closer communication with the outside world by having his letters delivered to him a little more regularly than he had them before, and I think, too, that it was an advantage not to have to pay for telegrams when you are living anywhere within the three mile area, and

on the other hand I had something to do with the introduction of penny postage in this country, at any rate on the part of the Government, and I think that it would be a great advantage to the agricultural interest if the telephone could be worked more cheaply in the agricultural districts. But I am bound to say that there are two sides to this question. I used to be pressed with questions very often with regard to the introduction of an agricultural parcels post. I was told by several enthusiastic reformers, "If you will only introduce an agricultural parcels post you will be working wonders for agriculture." At the Post Office we carefully considered the question, and I believe the chief reason why we did not introduce that was in the interest of agriculture itself. I do not know how far we made a mistake; but at any rate the idea that we had was this. We had found from experience that the persons who take the greatest advantage of opportunities like that are the large firms in London, and we thought it would be more taken advantage of by them than it would by isolated farmers, and that the result might be that you might have village shops inundated with produce from London instead of the produce of the villages themselves. That really was, as I say, the reason which we had in our minds. Now, gentlemen, I am really afraid that I have detained you far too long. ("No." "Go on.") With regard to this toast, "The Success of Agriculture," I fancy that in the days when this toast was first originated agriculture meant a totally different thing from what it means at the present moment. It represented to a much greater extent the type of agricultural industry in which my right hon. friend the member for the Sleaford division is most interested. During the century, and even during the last half-century, a change has come over the conditions of agricultural life, and perhaps I may in a few words say what, so far as I understand, are the principal changes that have occurred. In the first place, the success of agriculture, I am afraid to a very large extent, must depend more and more on the mere fact of our proximity to our own markets at home. We depend more upon perishable articles which would not bear the cost of transport from abroad, and that is practically at the present moment the only protection that exists for the whole of our agricultural interest. But another change has arisen at the same time owing to the increased prosperity of our working classes. I am glad to say that there has grown up in this country amongst the bulk of the people—the working classes—during the last thirty years, taking this year 1900 as compared with 1870, a demand for agricultural produce, especially of meat, butter, and milk, such as were never dreamed of, at any rate, at the beginning of this century. The demand for meat alone has increased by no less than very nearly 40 per cent. Well, that is, of course, a considerable growth. Then take another change that has taken place. In 1870 sixty-eight acres out of every hundred were under plough. At the present moment forty acres only are under plough and fifty-two under grass. There is another curious change that has taken place in all the old countries of the world. I mean the diminution in the number of sheep. The number of cattle in Great Britain has gone up very largely during the thirty years, but the number of sheep has decreased by something like two millions. That is a change that is going on in every old country of the world, and nobody, as far as I know, has yet been able to offer any explanation of that remarkable fact. Fortunately, the decrease in England has been less than in any other country. In some portions of England the change is very small indeed. In portions of Scotland there has been an actual increase. But taking the whole country through, there has been a diminution of nearly two millions of sheep. Now, gentlemen, I really must draw this long speech to a conclusion. In the first place I must thank you very heartily indeed for the kind reception which you have given to me personally. I am bound to say that in this year agriculture is, as it is in most years, considerably strengthened and encouraged by the high example which is set by the Royal Family itself. The Chairman has alluded to the success won by the Queen, and no doubt at the Birmingham Show, at any rate, the successes on the part of Her Majesty were without any parallel whatever. She won, I think, absolutely three champion cups. Then there is another encouraging feature with regard to agriculture, and it is this: I am glad to have another Board of Agriculture side by side, as it were, with our own. I am glad that a Board of Agriculture has been formed in Ireland, and I think that great advantage may accrue to both countries if those two Boards of Agriculture work together in thorough harmony. I shall certainly endeavour at the Board of Agriculture in England to work in thorough harmony with the Board of Agriculture in Ireland. I am quite certain that having these two Boards side by side we ought between the two, at any rate, to knock up something which may be of real advantage. Then I, at any rate, have another advantage in my new office. I am told on good authority that my right hon. friend refuses to sit like a cherub up aloft in the House of Lords to watch over the fortunes of agriculture, and that we are still to have the benefit of his great services in the House of Commons. I can only say that his presence there will be to me of inestimable benefit, and whether he makes his presence felt in friendly advice, as I am sure he sometimes will and there will be no man more ready to consult him than I shall be, because I know to what a great authority I shall be appealing whether he makes his presence felt, I say, in friendly advice or in benevolent criticism, as I have no doubt he will do sometimes, I feel sure that both the advice and the criticism will do me good, and I shall be glad to listen to them both. I am glad to retain the presence of my right hon friend in the House of Commons, and I shall ask him for his cordial assistance, and I am sure that he will render it to me in the task which I am perfectly willing to undertake, which is to give my whole and undivided energies to the duties which have been set before me, and to do all that I can, even though my own powers in the direction of the Department may be, perhaps, more limited than I could wish, to promote the prosperity of agriculture, the oldest and the greatest of all the industries of this country. (Cheers.)

The Central Chamber and the Farmers' Club.

Mr. JOHN HEYWOOD-JOHNSTON, M.P., in proposing the toast of "The Farmers' Club and the Central and Associated Chambers of Agriculture," said he was very glad to undertake the duty, because it enabled him to congratulate agriculturists upon having Mr. Hanbury as President of the Board of Agriculture. He had watched Mr. Hanbury's career in the House of Commons for the last seven years, and he could tell them that he was a man of exceptional sagacity and untiring industry, and one who never rested until he satisfied his mind as to the merits of any subject which was brought before him. He must have commended himself to them that night by the speech of sound sense which he had just delivered. With regard to the toast, he might state that he had himself been a member of the Farmers' Club for a considerable number of years, and he had perused with great pleasure the admirable papers which were read there from time to time. The two societies concerned in the toast might be regarded as sisters in one family, having a common object and a common interest. The results of many of the discussions at the Farmers' Club during the fifty years of its existence were represented by legislation in the Statute Book of the country. The Chamber of Agriculture was an institution which focussed the common wants and needs of agriculturists from time to time. The Central and Associated Chambers gathered up the individual wants and interests and feelings and wishes of agriculturists generally, so that they could be presented in a useful, feasible, and practical form. Many of the most helpful suggestions for legislation which had been presented to the Board of Agriculture had come from the Central Chamber. He would couple with the Farmers' Club the name of their Chairman, Mr. Eve. He was the representative of a family which was well known in the county of Bedford, and which had been largely connected in a very useful way with agricultural interests, and his name was certainly a household word among them. With regard to the Central Chamber of Agriculture, the Chairman of that body, his friend, Mr. Victor Cavendish, was absent, as he was now being re-elected to Parliament upon his having taken office in the Ministry. He was quite sure that they might heartily congratulate him. In the absence of Mr. Cavendish he would couple with the toast a name which was very familiar to them—that of Mr. Arthur Jeffreys. He was a well-known and very useful exponent of the agricultural interest, and always on the spot, and always well primed, and he had done a great deal to keep the agricultural interest alive.

Mr. J. R. EVE (Chairman of the Farmers' Club) said he very much appreciated the compliment which had been paid to him by his being put in the chair that evening as representing the Farmers' Club. The depression in agriculture had been referred to by Mr. Chaplin, who as well as anybody, and perhaps better than anybody, knew where the shoe pinched. Mr. Hanbury had referred to the question of the diminution in the number of sheep. Those persons who were practically acquainted with agriculture knew that the diminution was due to the shortness of money. When stress came the sheep went first. This was a very deplorable incident, because the absence of sheep depreciated the value of the land. There was nothing that would tell on a farm like a flock of sheep. They were the best manures that could possibly be found. The diminution which had been referred to was one of the most deplorable results of the depression in agriculture. They had had the advantage of hearing from Mr. Hanbury a speech which would commend itself to all who had listened to it. Mr. Hanbury need not fear that he would have too little to do. There were many opportunities in agriculture for the energy and the administrative abilities which the right hon. gentleman was said to possess. One subject with which he might deal was the consolidation of the Agricultural Holdings Acts. (Cheers.) The subject of pure beer was another matter with which he might deal. They all liked to drink pure beer, and they wanted their beer made of barley malt and hops. Again, swine fever was not yet exterminated. There were many agricultural matters as to which research was needed, and if indirect help in these could be given by the Board of Agriculture it would be a great boon. Reference had been made to the fact that Mr. Chaplin had declined the very great honour of a peerage which had been offered to him in order that he might continue in the House of Commons to advocate the cause of agriculture. While they welcomed their new friend, Mr. Hanbury, and their old friend, Mr. Chaplin, they must not omit to pay a tribute of respect to the late Minister of Agriculture, Mr. Walter Long. Mr. Long had passed an Agricultural Holdings Act, which he (Mr. Eve) for one regarded as all that a reasonable person could expect, though he knew that he was at issue with many on that point. Mr. Long was also to be commended for his perseverance, in the face of abuse, with the Order for the muzzling of dogs. (Applause.) In conclusion, Mr. Eve thanked the company for the toast of "The Farmers' Club" and for their kindness in coupling his name with it. (Cheers.)

Mr. A. F. JEFFREYS, M.P., said he was sorry that Mr. Victor Cavendish, the Chairman for the year of the Central Chamber, was not present to respond. The appointment of Mr. Victor Cavendish and Mr. Grant Lawson as Ministers of the Crown reflected great honour on the Central Chamber. The Central Chamber had pressed forward equally with other agricultural bodies those objects which were dear to the hearts of farmers. They had, he thought, exercised a great deal of influence in getting the Agricultural Rates Act passed, and they meant to use their influence to prevent its being dropped. Farmers now knew the value of that Act, and they knew it was a very difficult thing to take a bone out of a dog's mouth. The Chamber took great credit for urging the Agricultural Holdings Amendment Act. Although all their views were not carried out, they had done their best. The Central Chamber had now two further objects in view, and these they would urge as strongly as they could. One was to obtain legislation for securing pure beer, and the other was to take means for preventing the great damage caused to farmers' crops by fires arising from the sparks of railway engines. These points would be pressed to the utmost of their power. Mr. Hanbury had alluded to co-operation for business purposes. There was another direction in which they ought to co-operate, and that was in pressing their claims on the Government for the remedying of the grievances under which they suffered. Mr. Hanbury had very justly alluded to agriculture as the greatest industry in the country. As to the diminution in the number of sheep, he thought that it was brought about by a cause which was different even from that which the Chairman had suggested. In his own county it had arisen from much arable land being turned into pasture, the pasture being often of the worst description. Where they had formerly a good breeding flock they now had no flock at all, or only a dry flock brought on to be fed for the butcher. It was a great misfortune that so much arable land was going out of cultivation and being turned into poor grass land. He thanked them heartily for the way in which they had honoured the toast.

The "Royal" and Other Societies.

Sir MARK STEWART, M.P., in proposing the toast, said that they knew the magnitude and wealth of the Royal Society, and the large ground it covered. It was the parent of all other agricultural societies. He might say as a Scotchman that even Scotch agriculturists looked to the Royal to set them an example to be followed. The Highland Society of Scotland joined with the Royal Agricultural Society in giving joint diplomas, not only in agriculture but also in dairying, and those diplomas had been found most admirable. Perhaps now Ireland might join in the same direction. The three countries could not be too much allied, and they could not overlap too much. It had been observed that the dairying interest was perhaps the most remunerative of any agricultural interest at the present time. The reason of its being the most remunerative was that in many large dairy centres the co-operative principle was fairly well established. It would be of great use to agriculturists to recognise the power of co-operation. As to the question of education, he was one of those persons who believed that if the children of farmers and agricultural labourers were educated more in accordance with their position and with their requirements in after life they would become better scholars and take a more lively interest in their work. He would urge upon the Royal Agricultural Society of England that, instead of giving so many prizes for the stock and pedigree stock, they should devote the money to the invention of labour-saving machinery, so that farm work might be done without so much drudgery by the workers, and that a better class of men and women might be obtained. He had upon his premises a milking machine and many other mechanical appliances. His farms extended over nearly 5,000 acres, and he was anxious to [illegible] machinery that [illegible]. He concluded by coupling with the toast the name of Mr. Bowen-Jones, who was so well known as a member of the Council of the Society.

Mr. BOWEN-JONES thanked them for the [illegible] which they had done to the Royal and the other agricultural societies. He was glad to be able to say that the Royal Agricultural Society, during the sixty years of its existence, had done much to promote the interests of agriculture in many ways. It was chiefly through the instrumentality of the society that live stock, including horses, cattle,

sheep, and pigs, had been raised to their present high level. This branch of agriculture was the sheet-anchor of the British farmer. The Royal Agricultural Society through its Chemical and Botanical Committees was employed in promoting the science of agriculture long before county councils came into existence, and had done incalculable good to the community in investigating and exposing frauds in manures and feeding stuffs, and in investigating questions connected with the relation of crops, and the extirpation of weeds at the farms which had been generously placed at the disposal of the Society by the present Duke of Bedford and his predecessors. It had also done much to improve agricultural education. The diplomas obtained by the advanced students were looked upon as being the most important of all testimonials of capacity. The national diploma of dairying was now awarded jointly by the Royal and the Highland Agricultural Society of Scotland, and the honour of the award was justly appreciated. As to the future, though many of the members regretted the change that was contemplated, and which would alter many of the social and other characteristics of their beloved old society, there was still plenty of room for its continued operations, and he hoped that they would give their earnest and best efforts to the improvement of agriculture in the future as they had done in the past. The Society would obtain for the agricultural interest many advantages if it still continued to carry out its motto, "Practice with Science." As to the smaller agricultural societies, he looked upon them as feeders to the great national society, and their existence was of great value in that respect. They enabled the smaller men who could not compete in the great show-yard of the country to serve, as it were, an apprenticeship, and gradually work their way up, so that they might become benefactors of their country.

The Visitors.

Colonel VICTOR MILWARD, M.P., proposed "The Visitors." In referring to the present wants and demands of agriculturists he said that it would be better to single out two or three and enforce them, rather than spread their efforts over a very large area at one time. He cordially agreed with the selection of subjects which Mr. Jeffreys had indicated, namely, the Agricultural Rates Act, compensation for damage to crops caused by railway engine sparks, and pure beer. He would couple with the toast the name of Mr. Garrett Taylor, a well-known Norfolk agriculturist, who had successfully followed the motto of the Royal Agricultural Society, "Practice with Science."

Mr. GARRETT TAYLOR, in acknowledgment of the toast, said that he had very kindly feelings towards the Farmers' Club, and had been a member for about 25 or 30 years. There was one great fad which ran through all the speeches which were made by members of both political parties in connection with agriculture. They always said to agriculturists, "My good friends, combine! For goodness sake, combine!" His own experience was that the man who produced an article would do far better to keep away from combination as much as possible. (Laughter.) Their political friends all said that farmers were so weak because they did not combine; but he could tell them that the men who combined ended, as a rule, in the Bankruptcy Court. At all events, they did not pay their rents. Those were facts. He was not talking nonsense. (Laughter.) They could not tell him of any combination of dairy farmers that had not lowered the price of milk till it was unremunerative to produce that article. His advice to agriculturists was to fight their own battles, to produce the best article, to keep it in their own hands, and to sell it at the best price. On behalf of the visitors he thanked them for the toast.

The company then separated.

NOTICE TO READERS AND CORRESPONDENTS.

Owing to pressure on our space (notwithstanding that this issue is enlarged to forty pages) by the length of our reports of the Smithfield Fat Stock Show, the Central Chamber of Agriculture meeting, and the Agricultural Dinner, we have been obliged to hold over many others of societies and shows, reviews, etc., which we hope to clear off next week.

Altrincham Agricultural Society. The balance-sheet presented at the annual meeting of this society, held on Tuesday, showed that the total income for the year was £2,670 18s. 7d. The expenditure, which included £1,517 19s. 6d. for prize-money, amounted to £2,799 5s. 2d., which meant a loss on the year's working of £128. The assets of the society amount to £1,491.

Lisburn Fair (Co. Antrim), held on Monday, was a very small one. A good demand prevailed for springers. Prices:—Calves, second class, £3 to £4 Yearlings, second class, £6 to £7 5s.; third class, £3 15s. to £5 10s. Two-year-olds, second class, £8 to £9 10s.; third class, £5 12s. 6d. to £7. Springers, second class, £12 7s. 6d. to £15; third class, £9 7s. 6d. to £11.

BY LUPULIN.

Home Notes.

In The Borough.

very little business is heard of between factors and merchants. The latter occasionally look round with inquiries as to the present feeling of growers who are holders of hops, and I have reason to believe that orders would soon be placed if concessions of price could be obtained. Bids are, in fact, made, and factors urged to submit them to their clients, but knowing the temper of their country friends, factors generally decline to trouble them with any offers that are known to be outside the possibility of acceptance. On the other hand several of the merchants have been fairly busy, and some important parcels are now transferred into consumers' hands, at prices that are undoubtedly satisfactory to sellers. We are all now waiting for Christmas, and no revival of trade is expected till the holidays have passed, nor indeed until we arrive at the second week in January. In the meantime any parcels of sound hops which can be disposed of at moderate prices, can be readily sold, as merchants would be glad to secure them before the advance, which will certainly be established when general business gets into form again.

N.A.E.H.G.

Poison in Beer.

The meeting held on Wednesday last at the Hop Exchange, under the presidency of Colonel Brookfield, M.P., was one of the largest and most enthusiastic in the records of the Association, the board-room being filled to overflowing. Many of our visitors were inconvenienced by standing during the proceedings, and as our gallant president entered the room he was greeted by loud applause, as it was the first opportunity for several of the party to welcome him since his return from his perilous experiences in South Africa.

Amongst those present were Lieut.-Colonel Warde, M.P., Lieut.-Colonel Cheesman, Mr. Herbert Leney, Mr. James Chalcraft, Mr. Santer, Mr. Knight,, Mr. Eames, Mr. H. Lillywhite, Mr. Bensted, Mr. Thirkell, Rev. J. J. Kendon, and a large number of others from the southern districts, the Midlands being represented by Mr. John Powell (Worcester), Mr. J. A. Partridge (Tenbury), and Mr. Charles Ockey (Ledbury).

Apologies for unavoidable absence were read by the Secretary from Mr. Laurence Hardy, M.P., Captain Boscawen, M.P., Sir R. Harrington, Bart., Mr. Albert White, Mr. W. W. Berry, Captain Heygate, Mr. H. Reader, Mr. George Neve, Major Neve, Hon. Ralph Neville, and many other gentlemen, all of whom expressed in their letters their warmest sympathy with the object of the meeting, and their urgent desire that legislation to secure the purity of the national drink should be pressed upon the Government.

Colonel Brookfield.

expressed his confidence that the Secretary had represented the feelings of all the members of the Association in summoning that meting. To the general public it might appear that their aims were selfish, but as the whole of the beer consumers were seriously affected by recent events, the insistence upon absolute freedom from adulteration had become a national question. (Applause.) They as hop-growers had a right to take advantage of the position they were now face to face with, and notwithstanding the difficulties with which they had to contend, they should persevere in the prosecution of their demands. Their greatest hindrance appeared to be the Chancellors of the Exchequer, as all that had held that office had hitherto gone out of their way to pooh pooh the pure beer question, and to ridicule the requests of the public with regard to the use of substitutes for barley, malt, and hops. Looking upon the brewing industry as a veritable milch cow in times when enlarged revenue was required, every facility was given to brewers for the manufacture of their product from any materials so long as none of them could be shown to be directly dangerous to health or life. Chancellors were consequently loth to offend brewers, and in that connection he (Colonel Brookfield) thought it was high time that public attention should be directed to the attitude assumed by the Chairman of the Inland Revenue Board, who openly congratulated himself upon the "excellent relations" subsisting between his department and the brewing trade. It was distinctly the duty of the board to protect the public from adulterations, in the sense expressed in the Food and Drugs Act and other legislation with the same object. (Hear, hear.) Former enquiries had always caused their association to be suspicious of what was going on in this business in Manchester and some other large towns. The results they had predicted had now appeared, and therefore in spite of the gibes of the Chancellor of the Exchequer, or the congratulations of the Chairman of the Board of Inland Revenue, he believed that the public were now heartily with them in demanding that legislation in the direction so urgently required should be attended to without delay. (Applause.) When the use of adulterated beer had led to wholesale poisoning, and to a large number of deaths, the time had surely come for everyone to take action. (Hear, hear.) But there was encouragement for the future in the utterance of the newly-appointed President of the Board of Agriculture, who at the meeting of the Central Chamber is reported to have said in reference to this matter that under the present law "beer could be made of almost any rubbish so long as it did not contain more than two per cent. of proof spirit." He also intimated that the beer consumers were being awakened by recent disclosures, and that it seemed probable that an alteration in the law would have to be effected. Those were important words for a Minister to use. (Hear, hear.)

Two Courses were Open to Them.

One which he (the speaker) preferred was to throw in their lot with the barley growers in demanding pure beer legislation; the other was to ask the Government to carry out the single recommendation of the Select Committee, which sat in 1890, namely, that hop substitutes when used should be declared. (Hear, hear.) The principle of that recommendation could be extended to substitutes for malt. The Bill for "better securing the purity of beer," introduced into Parliament in 1896, would very likely be redrafted. That Bill attempted to define what was pure beer, and declared that where anything except barley-malt, hops, water, and yeast were used in the brewing of beer the public should be notified of the fact. At the same time, the Bill enabled other substances to be introduced, provided they were sanctioned by an authority

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interest and benefit to the members of the society.*

THE

LIVERPOOL VESTA CAKE CO.

In submitting their List of Cakes and Meals wish to bring to the notice of their customers that the same are manufactured for the several purposes for which they are respectively recommended. The Company will consequently feel obliged if when ordering customers will take note of the following descriptions, which may be some guide in their selection.

"VESTA" FATTENING CAKE OR MEAL

ANALYSIS.—Oil, 11·13; Albuminoids, 21·25; Carbo-Hydrates, 36·40.

For Stall Feeding and finishing purposes the Vesta Fattening Cake is the very highest class of food by reason of its maximum total of feeding constituents, combined with its quick assimilation, which makes it the most rapid fattening cake of the day.

"VESTA" FEEDING CAKE OR MEAL.

ANALYSIS.—Oil, 10·12; Albuminoids, 20·24; Carbo-Hydrates, 36·40.

For Milking and Feeding at same time, and also for young stock and sheep, the Vesta Feeding Cake is the standard quality, its total constituents being equal to that contained in the best cake of other makers, and the very best value for the money.

"VESTA" GRAZING CAKE.

ANALYSIS.—Oil, 9·11; Albuminoids, 28·32; Carbo-Hydrates, 31·38.

For Feeding and Fattening at Grass the Vesta Grazing Cake is the best substitute for decorticated and undecorticated cotton cakes. It combines the qualities of both without their drawbacks, and cattle can be fattened and ready for any show or market as quickly as if fed in stall.

"VESTA" DAIRY CAKE OR MEAL.

ANALYSIS.—Oil, 8·10; Albuminoids, 20·24; Carbo-Hydrates, 44·48.

For Milk, Butter, and Cheese Productions the Vesta Dairy Cake will furnish a maximum flow of rich milk without impoverishing the cow; the materials used in its manufacture are of a character to keep the animal in a most healthy and improving condition.

"VESTA" LAMB FOOD.

For Ewes and Lambs the Vesta Lamb Food is a highly palatable and a most nutritive food. It keeps the Ewes in grand milking condition and promotes strong, healthy growth in Lambs, ensuring early maturity and early fattening, which are of vital importance to breeders It is supplied in whole cakes or nutted.

"VESTA" CREAM AND MILK MEALS.

For Calf Rearing.

The Cream Meal is as near perfection as possible; new milk can be dispensed with when the calf is a few days old. The Cream Meal used in conjunction with separated milk is an excellent food.

The Milk Meal, although not so perfect a food, is very nutritious, prevents scour, rears fine healthy calves.

N.B.—In reference to the above Meals it would be a great advantage to give the Calf a little Fattening or Feeding Cake when it is two months old; same must be given in a dry state, say a small handful to start, increasing gradually, reaching about 2 lbs by the time the Calf has arrived at six months old. But in no case whatever must the cake be given in the form of gruel.

afterwards to be named. He insisted that when the public asked for beer they should be supplied with a pure article, just as they expect to be supplied with other articles of pure food. He would certainly deprecate any further inquiries by committees or experts, of which they had had more than sufficient, the only results of the last investigation being a pronouncement that there was no necessity for interference with the existing condition of things, a conclusion that recent events had emphatically contradicted and entirely set aside. (Hear, hear.) He concluded by moving the following

Resolutions:—

(1) "That this meeting of the National Association of English Hop growers, in view of the recent revelations with regard to the use of 'substitutes' in the manufacture of beer, is emphatically and unanimously of opinion that legislation for adequately securing greater purity of ale and beer ought no longer to be delayed."

(2) "That copies of the above resolution be forwarded to the Prime Minister, the President of the Board of Agriculture, the President of the Board of Trade, and the President of the Local Government Board." (Applause.)

Lieut.-Col. Warde, M.P.,

said he had great pleasure in seconding the Chairman's proposals, expressing the hope that the serious events which had taken place in Manchester and many other places would induce members of Parliament, other than those who represented barley or hop-growing districts, to support the demand for a Pure Beer Bill." (Hear, hear.) He also took advantage of the opportunity of congratulating Col. Brookfield on his safe return from South Africa after the prominent and successful part he had taken in the war. (Applause.)

The proposition was supported by Mr. Wadman (Sussex), who, in a brief but forcible address, emphasised the remarks of the chairman, and urged all those present to endeavour to arouse public interest in that important question in their several localities.

Mr. John Powell recommended that in demanding legislation they should exactly define the standard of purity, and limit it to barley-malt, hops, water, and yeast. He also gave an example of the strictness of the German Government in these matters, by stating that a brewer had been heavily fined in Nuremberg, when a small quantity of carbonate of soda had been discovered in the brewery by the official inspector.

Mr. C. T. Ockey stated that he would ask his local Board to adopt their resolution, and would urge other Boards throughout his district also to accept it. (Applause.)

Mr. Partridge declared that no agitation was needed in his county, as every individual advocated and desired pure beer, brewed from pure ingredients.

Lieut.-Col. Cheesman (Ashford) was strongly of opinion that the town population would at once demand pure beer legislation, if an opportunity for expressing their views was afforded, and suggested that efforts would be made by the Association to promote a movement in that direction.

The resolution was carried unanimously.

Mr. Herbert Leney proposed a vote of thanks to Colonel Brookfield, whose patriotism and whose devotion to their interests he warmly admired. The President briefly acknowledged the compliment, and the meeting separated.

(*For Hop Market Reports, see pages* 793, 795.)

Hitchin Fat Stock Show and Sale.—The forty-sixth annual show and sale of Christmas fat stock at Hitchin, took place on Tuesday, in the Cattle Market. The supply of stock was an average one both in quality and number, and there was a good attendance of farmers, etc. The following were the prize-winners:—Fat calf, Mr. H. J. Marsh, Holwell; Mr. H. Miller, Offley. Fat bullock, Mr. Dumbelton, Elstree; Mr. G. Simkins, Shillington. Fat heifer, Mr. E. Snow Fordham, Ashwell; Mr. G. Simkins, Shillington. Ten fat wethers, Mr. G. F. Pigott, Cookers End; Mr. H. George, Kimpton Hall. Ten fat tegs, Mr. W. Jackson, Hill End, Hitchin; Mr. C. S. Marsh, Offley. Ten fat ewes, Mr. F. Coxall, Pirton. Four fat pigs, Mr. F. Gosling, Wellbury; Mr. H. J. Marsh, Holwell. Fat sow, Mr. F. Gray, Kimpton; Mr. H. J. Marsh, Holwell. Dealers' prize for the best fat bullock (£5), Mr. W. Nichols, Biggleswade; Mr. F. Allingham, Lilley. Mr. J. Thorley's prize for the best fat bullock (a piece of plate value £3 3s.), Mr. Dumbelton, Elstree; Mr. G. Simkins, Shillington. The sale was conducted by Messrs. J. R. Eve and Son, who brought under the hammer 162 oxen and heifers, 617 sheep, 35 lambs, 5 calves, and 21 pigs. The best prices obtained for bullocks were £36, £33, £31 10s., £30, and £28 5s., others selling at figures ranging down to £14 15s. For sheep the highest price was £3 11s., obtained for an old Down wether, the next highest being £3 10s. 6d., paid for clipped Down lambs. Others sold down to £1 6s. The top figure realised for pigs was £9 5s., and the lowest £2 14s. The total proceeds of the sale was £5,012 7s.

AGRICULTURAL LAW.

The Land Laws.

On Tuesday last week Mr. A. R. Ingpen, Q.C., delivered a lecture on "Reformation in the Law of Real Property" before the members of the Solicitors' Managing Clerks' Association at the Middle Temple Hall. Mr. Justice Cozens-Hardy presided. Mr. Ingpen said the two leading principles which should guide legislation on the subject were that land should be made capable of the easiest transmission from one owner to another, and, secondly, that land should be made available of the fullest use by those to whom it belonged. During the present reign great strides had been made in the reformation of the law relating to property, including the passing of the Wills Acts, the Transfer of Real Estates Act, the Conveyancing Act, the Settled Estates Act, and the Agricultural Holdings Act. These laws had become necessary through the increase of population, trade, money, and personal property. So far as agricultural land was concerned, he said legislation should prevent the aggregation of land and secure the tenant farmers' compensation for capital expended on the improvement of the soil. He further suggested the necessity of the transfer laws being made less cumbersome; the duration of the settlements of land more restricted; that settled estates should be as easily disposed of as unsettled estates; that the Married Women's Property Act should be reformed; and that real property should be put on the same footing as personal property. The burning question of the day, however, was how to make the conveyance of land less cumbersome and expensive. It was absolutely essential in the interests of the public that there should be something like a codification of the conveyancing laws adopted. Legislation was making rapid strides in the direction of an assimilation of the devolution and transfer of estates to the existing system of title of Government Stocks. Any partial registration system, such as now existed in London, did not satisfy the public.

Votes of thanks were passed to the lecturer for his address, and to the chairman for presiding. Mr. Justice Cozens-Hardy said he was convinced that the lawyers of the present day did not know so much about the land laws as the lawyers of the past. He was sanguine in expecting great things from the Land Transfer Act.

WATERLOO ROUND CAKES,

PUBLICATIONS.

THE NEW ZEALAND FARMER. Bee and Poultry Journal. An illustrated monthly publication, containing practical and scientific information on Farming, Stock Breeding, Cattle, Horses, Sheep, Dairying, Fruit Growing, etc. The only paper entirely devoted to Farming matters and circulating throughout the Colony. Price 1s.; by post, 1s. 2d. Proprietors, The Brett Printing and Publishing Co., Ltd., Auckland. London Manager, R. B. BRETT, 2 and 3, Imperial Buildings, Ludgate Circus, London, E.C.

THE JOURNAL OF THE BOARD OF AGRICULTURE. Issued by the authority of Her Majesty's Board of Agriculture, and printed and published by Laughton and Co., 1, Essex Street, Strand. Published each quarter day. Price 1s. Yearly subscription, 5s. (post free). This publication contains information as to the position of agriculture at home and abroad, Crop Prospects in Foreign Countries, and further particulars obtained from Foreign and Colonial Reports, Diplomatic and Consular Dispatches, and other sources of intelligence accessible to the Department; together with Notes on Dairying, Fruit Farming, Poultry Rearing, and other rural industries. Short descriptions of Noxious Insects and Fungi, with appropriate remedies; statements of the Quantities and Values of Agricultural Produce Imported and Exported; and records of the Current Prices of Grain, Meat, Dairy Products, Fruit and Vegetables, are given in each number. The official and highly valuable information contained therein commands for the Journal an unique position and circulation throughout the world amongst those interested in Agriculture and its kindred branches. The Statistical matter being of much service for frequent reference renders the Journal in constant demand by Members of Both Houses of Parliament, Landowners, and others interested in the welfare and progress of Agriculture.—LAUGHTON and CO., 1, Essex Street, Strand, London.

REGISTER OF BRITISH LIVE STOCK BREEDERS.

HORSES.

SHEEP.

LINCOLN LONGWOOL.

HOYLES, GEORGE, Manor House, Skidby, near Hull.—Pure LINCOLN LONGWOOL SHEEP. Registered Flock 136. Sires used: Skidby Constitution 3069, sire Skidby Conservative 1346, g. sire Old Constitution 308; Skidby Tory 1583, sire Riby A 358; Leconfield Pride, sire Casswell (16) 1753; Skidby Friar, sire Abbot 1—from the celebrated flocks of Messrs. Henry Dudding, J. Casswell, Hy. Smith, jun., etc. Heavy-wool Sheep for export. Also prize and prize-bred Polled Angus, Shire Horses, and English Ponies for inspection and sale.

ANDERSON, JOHN, Chapel Farm, Barton-on-Humber, Lincolnshire, Breeder of pure-bred LINCOLN LONGWOOL SHEEP. Flock Book 106. These sheep are noted for having hardy constitutions, true character, and long, lustrous wool.—Telegrams: "John Anderson, Barton-on-Humber."

T. C. DIXON, Brandesburton, Hull.—Pure LINCOLN LONGWOOL SHEEP, of best blood. Wool a speciality, with quality and size combined. F.B. 69. Rams, Ewes, and Lambs for Sale. Inspection invited. Telegrams as above

FIELDSEND, C. S., Belmont, S. Willingham, Lincoln. Flock No. 59. Pedigree RAMS and EWES for SALE.

DUDDING, HENRY, Riby Grove, Gt. Grimsby, Lincolnshire, has always for inspection and sale a large flock of pure LINCOLN LONGWOOL SHEEP, including many prize-winners, having taken the leading prizes for many years at the Royal and other shows for both rams and ewes including champion medals at both the Paris Exhibitions, Vienna, Amsterdam, Canada, Australia, New Zealand, and all the leading prizes at Chicago; also the first for the best collection of Lincoln fleeces of wool at the Royal Windsor Show, which proves the character of this flock, which is most famous for their great size and 125 years' good breeding. Rams from this flock made the highest average on record last year. Riby Grove is seven miles from Great Grimsby, and three from Stallingboro' Station. Telegrams, "Dudding, Keelby."

HAMPSHIRE DOWN.

FLOWER, JAMES, Chilmark, Salisbury. Undoubtedly the leading flock of the day; in show yard records at all the largest shows, including the Challenge Cup at the Salisbury Great Prize Sheep Fair six years in succession; also highest average for same period for 100 ram lambs at annual sale, at Britford Fair, August 12. The Flock is one of the oldest existing, combining fine quality, strength, constitution, and true character. "Fossil," sire of the highest-priced Hampshire Down Ram ever sold, was bred at Chilmark, and in service there last two seasons.

COLES, CARY, late C. and T., Manor House, Winterbourne Stoke, Salisbury.—Registered HAMPSHIRE DOWNS, prize-winners at the Royal, Bath and West, Royal Counties, and other shows. Sheep of all ages for sale; selections from 1,000.

SHROPSHIRE.

COOPER, WILLIAM, AND NEPHEWS, "Cooper's Dip" Works, Berkhamsted, England. Breeders and Exporters of pure Shropshire Sheep. First and Third Prize for Ewes, Royal Show, 1898. Five hundred breeding Ewes. The largest export flock of Shropshires in England. The sires used present season include 310 Guinea Champion "Royal Record," Two First, One Second, and One Third Royal Show Prize winners.

LIVE STOCK AGENTS.

INVERNESS, WEST HIGHLANDS.—JAMES ARNOTT, Scotch Live Stock Agent, Ellandonan, Inverness, established 1870, selects and supplies on commission all classes of SCOTCH STOCK. He attends all the leading markets to purchase Stock at lowest rates. References can be given if desired to customers who have been annually supplied. All orders are personally attended to. List of classes and approximate prices sent on application. Reference required; terms cash. Telegrams: "Arnott, Inverness." J.A. is now booking orders. N.B.—Polled Angus or West Highland Heifers and Black-faced Gimmers, Ewes, Wedders, and Lambs for crossing or feeding, in truck loads, at moderate prices. Fat Stock of all classes also purchased.

WINTERING and FEEDING CATTLE.—E. GOODWIN PREECE will be glad to receive orders for BULLOCKS and HEIFERS IN FORWARD CONDITION suitable for yard or stall feeding; also WINTERING CATTLE OF ALL CLASSES, including Bullocks, Heifers, Dairy Cows, Dairy-bred Heifers, Stock Bulls, etc. Shropshire, Hereford, Cheshire, Radnor, and Montgomery being breeding districts noted for the big class of stock produced, buyers can rely upon having well-bred stock bought at lowest market prices, either by live weight or per head. A few lots of good in-lamb ewes for sale.—Address, Portland House, Shrewsbury.

HALL'S
SANITARY
WASHABLE
DISTEMPER

(PATENTED)

A NEW SANITARY WATER PAINT,

HAS GREAT ADVANTAGES

SOME OF WHICH ARE AS FOLLOWS:—

It sets hard, Kills Vermin, and Disinfects.

It is washable in 3 weeks, does not scale, and can be Painted or Varnished. Made in two qualities, for inside and outside work.

It is made in Dark Rich Shades as well as in Light Tints, contains no Lead, and does not Turn Black.

It only requires the addition of Water to make it ready for use, so that anybody can apply it.

It is Cheaper, Cleaner, Healthier, and more Artistic than Wall Paper.

It makes an excellent Shading for Greenhouses, the inside quality lasting about 9 months, the outside quality several years

Mark Lane Express Agricultural Journal.

The Only English Journal devoted exclusively to Agriculture.

MONDAY, DECEMBER 24, 1900.

Correspondents are requested to address all communications for the Editorial Department to THE EDITOR, "Mark Lane Express," 1, Essex Street, Strand, London, W.C.

Advertisements, Subscriptions, and business communications should be addressed to THE PUBLISHER, "MARK LANE EXPRESS," 1, Essex Street, Strand, London, W.C.

HEDGE TRIMMINGS.

Although the daily press has, with its usual perception and penetration, decided that the recent case in the Grantham County Court anent the placing of yew clippings upon the highway settles a new point of law there is nothing novel about it. It has long been well settled law that a person who places dangerous materials where another person's cattle can reach them must take the responsibility for such a breach of the law. The only novelty was as to the distinction between a highway and a neighbour's land, which in law amounts to nothing. Before discussing the meaning and effect of the case it may be well to mention the chief points which were proved in it. The owner of a heifer claimed seven pounds for its loss through its death being caused by its eating yew leaves which the defendant had cut from a hedge and left upon the roadside. The facts of the case do not seem to have been seriously disputed. The learned judge held that the case did not depend upon negligence, believing that neither the plaintiff's daughter (who was in charge of the animal) nor the defendant were aware of the danger of yew leaves to cattle, but that it depended upon the fact of the deposit of such trimmings being a nuisance. His Honour expressed the opinion that there could be no doubt that it was a nuisance from the legal point of view to put anything upon a highway that was a danger to "persons, cattle, or other animals lawfully using such highway." It was quite immaterial whether the person who put it there knew or did not know whether it was dangerous or not. The defendant had no right to the highway at all for his private purposes, and he had no right to put the trimmings from his hedge upon it, whether they were poisonous or not. To do so was to be guilty of a nuisance, and one which caused loss to the plaintiff. The result of the case was judgment for the amount claimed—seven pounds. This decision, although anything but novel, is important, for it shows two things: First, that no person has a right to use a highway for a private purpose as apart from a right of way; and that, secondly, a person who disposes of dangerous material in such a way as to cause injury to the cattle of another must be held liable for any loss. There were two distinct wrongs in the case: misuse of the road and negligence resulting in damage.

The law as to poisonous trees and noxious herbs is not by any means as simple as might be understood by any who merely examined it in a casual manner. There is a very great difference between the position of a landlord and a neighbour in such a matter. The law does not regard the landlord as warranting his land to be free from such dangers. That means that the mere letting does not amount to such a warranty: and there cannot be any liability unless there is a definite and distinct warranty, which, as it relates to land, must be in writing, or it cannot be binding. On the other hand, a neighbour may very easily render himself liable in damages.

Perhaps the best known case is one where a company owning a cemetery had planted yew trees for ornamental purposes, and had allowed them to grow over or through the boundary fences. They were eaten by the cattle of a neighbouring farmer, and it was held that he was entitled to recover damages on the ground that the tenant was not bound to examine the boundaries of his farm to see if his neighbours allowed any dangerous trees to grow over his land. It is more than probable that the judges regarded this overgrowth as a sort of trespass, which would, of course, carry damages for all consequences reasonably resulting therefrom. It is somewhat strange, but, all the same, it is a fact, that many people do not seem to be aware of the dangerous results of cattle eating yew tree clippings. Cases which show this are by no means few. Such a case as this shows how careful a man ought to be in this matter, not only for the safety of his own cattle, but also for the purpose of avoiding the consequences which may legally follow if some other person suffers damage through such negligence. Probably the only way to be safe is to at once burn such clippings: but why should such trees be grown at all upon agricultural land.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to December 15th, 1900, were £74,562,868 against £71,995,819 in the corresponding period of the preceding financial year, which began with a balance of £10,919,173. The total expenditure was £125,510,650 against £79,445,804 in the same time in the previous year. The Treasury liabilities on December 15th, 1900 amounted to £3,237,170 against the same date in 1899 to £2,586,818.

SAMPLES.

By a Man of Mark Lane.

The other day a titled enthusiast told the world that she knew of someone who made £800 a year out of poultry. Experienced persons doubted this, and wanted to know how it was done. A correspondent of the *Daily Mail*, signing himself "Ducker," writes from Buckinghamshire, asserting that a profit of £600 a year can be realised if a man "works on scientific principles." He says:—

"I know the truth about poultry-farming, for I know what it is to be there. If a man goes in for supplying the London market with Aylesbury ducklings, cockerels, and new laid eggs, he will have to rear 5,000 ducklings, 2,000 chickens, and keep 300 laying hens. To feed these he will have to employ three men six months of the year, and work like blazes himself from dawn till dark all through the spring and summer. To rear 5,000 ducklings he must set at least 7,000 eggs. These will average 2d. each, probably more, unless he keeps the ducks to lay them. If he has good luck, and works on scientific principles, he may clear £600 a year. If he is going in for exhibition, that is a different thing, for it is a subject I know little about. All my days have been engaged in the other branch."

Why do not these successful folks tell us how it is done? The mere statement that it is done is no help to anybody. If "Ducker" would explain how much land he has, the money he has expended in buildings and stock, the amount paid for food, attendance, etc., and details of all expenditure, as well as particulars of the sales, there might be ground to work upon. The above letter is no guide. There are thousands of farmers who "work like blazes" and have to be content with less than £600 a year; nay, even with half or a quarter of that sum.

On many farms there is a considerable number of machines which are worked by steam power. Where this is the case the information given by a daily contemporary, that there has been a slump in the price of coal in Durham during the past few weeks, will be read with satisfaction. It is reported that the best steam coal, which fetched 27s. in September, is now selling at 14s.; coke has fallen from 33s. a ton, free on board at the Tyne, to 21s.; and bunker coal is going for 12s., as against 17s. 6d. The fall is attributed to the slackness in the iron trade, and the putting out of blast of some of the Cleveland furnaces. German importers are also said to have rejected large quantities of coal, on the ground that the consignments were of inferior quality to sample. Shipbuilders are withholding orders for plates, in the hope of a fall in prices, and there is litle prospect of any recovery in the coal market. Perhaps the inland consumer's turn will come next.

Lady Warwick had a meeting at the hostel bearing her name at Reading a few days ago. This is the place where lady agriculturists are manufactured. It was stated in the report that the number of students had greatly increased, those in the horticultural section now numbering twenty-nine, in the dairying section ten, and in the poultry section two, while there were ten short-course students. In the horticultural section, in addition to the ordinary work of a garden, instruction was given in florist's work and table decoration, and also in the growing of large crops of tomatoes, chrysanthemums, and other flowers and vegetables. As it seemed quite illogical to train students in the growing of produce without showing them also how to sell it, a marketing department had been opened in connection with the farm. All surplus fruit, vegetables, poultry, and eggs had been sold either to private customers or to wholesale buyers, the sales for September and October amounting to £55. Picking, packing, and despatching were all taught to students who had finished their regular course. So far the demand for students in each branch had exceeded the supply, and the hostel had thus been able to find posts for all fully-trained students who required them. During the last two years the hostel had started ten women in careers both remunerative and useful.

Like many other institutions, the Lady Warwick Hostel does not appear to be over-burdened with funds. It only needed £50,000 to do its work. Her ladyship threw out the idea that some saintly millionaire should "consent to become the pious founder of a Women's Agricultural and Horticultural College. She hoped she would be able to get at such a millionaire somehow, because she believed the scheme opened up enormous possibilities for women who really meant business. £100,000 was subscribed in ten days for a college at Khartoum. Half that sum would found a college for Englishwomen, who were really as important, though they were, perhaps, less interesting, than the Soudanese." This week it is announced that the "saintly millionaire" (or, as Lord Warwick has described him, "a wealthy gentleman") made his appearance and contributed the £50,000 to the Women's Agricultural College at Reading. The name of the saint has not yet transpired, but we hope soon to assist, so far as we are able, in the process of canonisation. This particular endowment will give a great impetus to the work at the Reading Hostel, and an abundant supply of highly trained jardinières and dairymaids may be expected. I trust the demand will not fall short of that supply.

The *Economist* tells us, in its review of the stock markets in 1900, that throughout the year there has been comparatively little of lively interest and less of actual business in them, and, speaking quite generally, the level of quotations is lower at the end of the twelve months than it was at the beginning. Perhaps the most striking feature in connection with the leading departments has been the long-continued apathy of the public alike in regard to investment and to more or less speculative securities. The variations in "gilt-edged" securities have been of comparatively slight importance as a rule. Consols have fallen from 1½ to 1¾, owing to the issue of the War Loan and other Government borrowings; but India sterling loans and rupee paper have improved, while Colonial Government bonds and Home Corporation stocks have generally declined, in sympathy with the fall in Consols and the relative dearness of money. In both the latter groups there have been some conspicuous exceptions. The department which has experienced the most universal set-back in prices, however, has been that in which Home Railway stocks are dealt in. The movement has been mainly caused by the unsatisfactory range of dividends for the first half of the year, and the practical certainty that the addition, amounting roughly to 50 per cent., to the coal bills of the companies will necessitate a further reduction of distributions for the current six months, and probably for the first half next year. There have been very few features of interest in the market for Foreign Government bonds. A hint only is needed at the extravagant advance in armament shares, the rather less extravagant improvement in coal, iron, and steel companies' securities on the one hand, and the heavy fall in some brewery stocks, and some of the cotton and woollen issues, on the other hand.

The last Manitoba Government crop bulletin for the year shows that the total yield of cereals in the province during that time amounted to 25,000,000 bushels. The drought and unfavourable weather at one time threatened to ruin the grain crop. The wheat yield is estimated at 13,000,000 bushels, an average of 8.9 bushels per acre. The quality of all cereals is poor. The bulletin also shows that 16,500 cattle have been exported, and that great progress has been made with dairy produce.

A Jumping Prize Dispute.—At the Lambeth County Court on Tuesday, the Crystal Palace Company sued C. and J. Jeromes, horse dealers, living at Coldfield, near Birmingham, to recover £15. The plaintiffs' case was that defendants entered their grey gelding Comet for the 12-stone hunters' jumping competition at the National Horse Show at the Palace in May last. Comet won the first prize, £15. At the request of the defendants, who alleged they wanted the money, a cheque was sent them early in June. Subsequently it was learned that Comet had previously won a prize at a show where the total prizes exceeded £100, and as this was a direct violation of the rules with respect to the competition in question, defendants were asked to return the £15. This they refused to do, stating "they were perfectly satisfied, and were not like a lot of kiddies playing at marbles." (Laughter.) The defendants alleged that the time for making objections had expired, also that plaintiffs, by their own rules, could not have recourse to law. The defendants did not appear. Judge Emden said there had clearly been the suppression of a material fact, and this suppression caused a misapprehension. He gave judgment for the plaintiff company, with costs.

AGRICULTURAL POLITICS.

By a Lobbyist.

There is a grave danger in connection with the demand for a Pure Beer Act, a very grave danger. This danger arises, if I may adopt a paradox, from the very popularity of the suggestion. Both parties in the State are anxious to make it an object of Parliamentary ambition, and both will scheme to secure the particular kudos. Of course, it may be urged that inasmuch as Sir Cuthbert Quilter was the first to give vitality to the effort, the Unionists should have the recognition which ought to be the reward of passing a most desirable law into operation.

On the other hand it must not be forgotten that, pre-eminent as he has undeniably been in the agitation, Sir Cuthbert has had Liberal associates. For instance, Mr. Frederick Wilson, M.P., has been almost as enthusiastic as he has been, and he has allied to a demand for beer brewed from malt and hops a cogent and forceful plea that the public-houses should be free—in a word, that the publican should no longer be the victim of the abominable tied-house system. This does not constitute a claim for Liberalism, but it provides a specious reason for fashioning one.

Mr. Chaplin has done well to throw himself into the agitation. He has at once given it a force and a political dignity that must make for Parliamentary redress. I am sure the right hon. gentleman will pardon me for saying that I think it an act of political unwisdom to lament that the Pure Beer Bill of 1896 was not passed. He himself was in the Cabinet. He himself could have insisted on Sir Cuthbert Quilter being given facilities that would have meant the passing of the Bill into law. He himself could have demanded that the inquiry which was made, and which I agree was a mere official-rigged device, should be forceful, dispassionate, and practical. To lament now that the inquiry had the nature it had is to suggest the idea—wrong, as every man must admit with a politician of the character of Mr. Chaplin—of insincerity. Mr. Chaplin's better position would be to assert that, freed of responsibility, he is determined that naught shall prevent his securing a reform so desirable in the general interests of the community.

But let me for the moment advert to an old point of mine, and a point whose significance my readers have more than once recognised. We have had an election this week in the North. The constituency is situated in the district most affected by this matter. Moreover, the district though pre-eminently industrial, has undeniable rural interests and sympathies. Now, what happened? Not a single question bearing the slightest indication that the rural electors were interested in this matter was put to the candidates. "Malt," "hops," "chemical ingredients"—none of these things intruded themselves for a moment into the candidates' addresses or into the interpolations of the electors. The business was as dead as a ducat for electoral purposes, and none in the whole constituency so poor as to do it reverence. The committee of the Chamber of Agriculture have been splendidly wise in endorsing the summoning of a number of public meetings, but I would rather infinitely that the committee had played an active part in this election.

I suppose, after all, that the real scene of agitation will be the House of Commons. Well, then, the first thing to do is to formulate a distinct and definite body of agitators. Of course, the leader must be Sir Cuthbert Quilter. Mr. Chaplin is a more dominating personality, but to Sir Cuthbert belongs the credit of having given the question a practical character. Mr. Chaplin will be to him as a god of Olympus, a kind of superior mentor to a very keen eyed Telemachus. It is easy to enumerate who should be associated with them. First of all, there is Mr. Frederick Wilson, as pretty a strategist as you would find in a day's Parliamentary search.

I regret in this connection that Mr. Grant Lawson, an excellent and capable politician, should have joined the Ministry. I also regret in a lesser degree that Mr. Arlwyn Fellowes should wear the panoply of office. Both would have been useful auxiliaries. Mr. Jeffreys will be a valuable aid. Mr. George Lambert—unless the teetotal element in his constituency should refuse to allow him to purify the beverage of the

labourers—should be an excellent help. Mr. Strachey should do good work; Mr. Robert Price should be useful. But why need I enumerate more? I have shown the men we have in the movement, and I have indicated that we have more behind them. A Pure Bill Act should be a surety in the next session.

I have spoken of the danger of temperance malevolence preventing good men associating themselves with the movement. This is a real possibility. The temperance reformers are such reformers that many of them will not permit the beverage of the workers to be made pure. Let me point out the foolishness of their action. They know as well as any man can do that their great enemy is the big brewer. It is the big brewer—not, of course, men of the type of Bass or Guinness—who are guilty of these chemical concoctions, which are neither malt, hop, fish, fowl, nor good red-herring. If they injure these men, if they prevent them turning their mash tun into a kind of chemical laboratory, they will render their calling more expensive and less profitable, and they will do a little to foster the great national industry. Will this argument influence them? I fear me not.

A hint to Mr. Walter Long: He is too excellent a man to be allowed to walk into a pitfall. He has offended the London County Council. The London County Councillors intended that he should. They are Radical, and don't want this Government to realise their ambitions. Does Mr. Long perceive?

A hint to Mr. Chaplin: Be a little less demonstrative. Else your enemies will wonder at your sloth while in office.

PRACTICE WITH SCIENCE.

Royal Agricultural College, Cirencester.

The winter session of this college closed on Wednesday, when the principal, the Rev. J. B. McClellan, M.A., conferred the diplomas, scholarships, and other honours on the successful students. Referring to the approach of a new century, he dwelt on the excellent work which that college had done during nearly 60 years of the century now closing for the industry of agriculture in this country and empire and in other parts of the world. An interesting feature of the present diploma list was that one of the successful candidates and the gold medallist was a county scholar, another was a university graduate, and the third an Indian student. Another Indian student divided the first and second scholarships. The external examiners for the diploma were: In practical agriculture, Mr. W. C. Brown, Lincolnshire; in agricultural chemistry, Dr. J. A. Voelcker, M.A., London; in veterinary science and practice, Professor Sir G. Brown, C.B., Harrow; and in practical engineering, Professor H. Robinson, M.Inst. C.E., London. Following are the chief awards of the class list:—

HONOUR DIPLOMA OF MEMBERSHIP:
(Maximum Marks, 2100.)
(Qualifying Marks, 1400.)

James Foyster Bell, Shuckle-Crow, Keswick, Cumberland, 1845; William Inglehy Fosbery, B.A., Bryn Elwy, St. Asaph, Flintshire, 1545; Lakshmi Chand Sharma, Muzaffar Nagar, N.W.P., India, 1402.

HAYGARTH GOLD MEDAL.
(Maximum Marks, 2100.)
(Qualifying Marks, 1750

James Foyster Bell.

SCHOLARSHIPS.
(Open to the whole College.)
(Maximum Marks, 3000.)
(Qualifying Marks, 2500.)

FIRST AND SECOND SCHOLARSHIP, £25 and £10.

Herbert Bowman Beddall, Marston Park, Ampthill, Beds, 2869; Sheikh Makbul Husain, B.A., Oudh, India, 2852, æq.

THIRD SCHOLARSHIPS, £10.

George Arrow Lambert, 2, Thicket Road, Anerley, London, S.E., 2803.

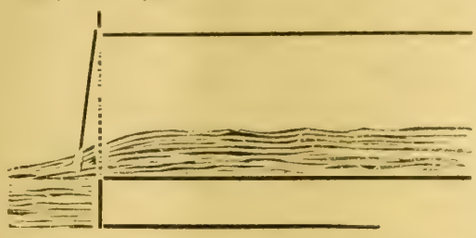
HONOURABLE MENTION FOR SCHOLARSHIPS:
Lindsell, 2775; Farwell, 2599.

Anthrax in Essex.—A suspicious case, believed, upon admission, to be one of anthrax, has been under treatment and observation at St. Bartholomew's Hospital for the past week, and the patient is now reported nearly well. Great interest was manifested in the case, owing to the outbreak of anthrax in the home counties. The patient, a stockman named Loftus Archer, 35 years of age, living at Needham, Hatfield, Broad Oak, near Harlow, Essex, had killed one of three beasts at Hatfield that were affected with anthrax, and was admitted to the hospital with apparently well-defined external symptoms of anthrax. There were, however, none of the usual signs of constitutional trouble, and the man was never put to bed during the whole period of his stay. So favourable has been the progress of the case, that it is now doubted by the hospital authorities whether the case has really been the dreaded anthrax.

LETTERS TO THE EDITOR.

Drain Pipes and Rats.

Sir,—I gladly reply to inquiry of "J. C." for rabbit and rat-proof ingress and egress to drains. A firm hailing from Thrapston I had some from; but I found from my experience as an old estate bailiff that, with the bars, leaves, etc., very often choked up the egress, and the last state was worse than the first. A good cure we found was to have a light iron shutter door, hung at a slight angle in the brickwork, or wood frame, so that when a flush of water came the door rose and let out small sticks, leaves ,etc.



The above is a rough sketch of it, and we found it a great saving of labour and trouble.—Believe me, yours very faithfully, S. W.

Block Test Competitions at Smithfield Show.

Sir,—In the *Daily News* of Thursday last, in an article upon the above show, the following passages occur:—

"The falling off in the numbers of the entries is accounted for in a somewhat peculiar fashion. It is said that what amounts to a feud exists between the butcher judges and the farmers. The latter say that some years ago they used to send 'Christmassy' kinds of beef for the carcase competitions, whereas, to suit their own ends, the judges gave the preference for the leaner kinds. It was the same with the mutton. The farmers consequently, much against their will, sent up their leaner kine, and then the butchers, not altogether the judges this time, having got the meat to their own standard, formed what in effect was a ring, and kept down the prices at the auction, so that it no longer paid the farmer either in prestige or in kind to have much to do with the carcase classes at the Smithfield Club's Show. Hence the falling away of the entries."

Believing, as I do, that these comments are incorrect, and calculated not only to injure the Block Test Competition at the show, but also to cause friction between feeders and butchers, and lead the former to believe he will not get a fair price for his wares in this competition, I hope you will see your way, in the interests of both classes, to afford me a little space to deal with the subject.

In the first place let me deny there is any feud between butchers and farmers. The loyal co-operation between the two sections at Tuesday's meeting dispels that fiction.

The statements about farmers sending "Christmassy" beef, and butcher-judges awarding the prizes to their leaner kinds, implies a want of acquaintance with the object of carcase competitions. These were only instituted some four years ago, and their very purpose is to encourage farmers to rear saleable animals, whose flesh is of a marketable character. If the judges in these "block test" competitions awarded prizes to the leaner kinds, they did that which was expected of them. There are plenty of other classes in which animals illustrative of the skill of the breeder and feeder can win renown, and become a source of profit to their owners.

I am somewhat at a loss to comprehend what the *Daily News* contributor means when he says, "The butchers, *not altogether the judges this time*, having got the meat to their own standard, formed what in effect was a ring, and kept down the prices at the auctions." With regard to the words in italics the judges in the carcase competitions consist to exactly the same extent of butchers as in former years. They have the same power as previously, and no more or less.

As for the forming of a ring to keep down prices at the auction, that is an effort of the imagination worthy of admiration. Mutton this year has, at this said auction, realised on the average 5s. 9d. per stone (of 8lb.), the prices ranging from 4s. to 8s., with a solitary exception that fetched 10s. 6d. Beef at the same sale averaged 4s. 10d. per stone, with a minimum of 3s. 4d. and a maximum of 6s. 2d., and I am inclined to think the publication of these figures more likely to encourage farmers to compete than to refrain from doing so.

I know perfectly well that during the past few years carcase competition meat has not realised a good price, but there were solid reasons for this circumstance. In the first carcase competitions the meat was too fat, and the joints unwieldly in point of size. Moreover, the meat was slaughtered and kept under adverse conditions, which do not obtain at the present time, therefore it would be useless and unwise to gird at lapses in management which have been remedied. Then, too, atmospheric conditions were bad, and under all the circumstances you will not be surprised to hear the meat had nearly always depreciated considerably before it was sold to the butcher.

I ask you to be good enough to publish these views, as your contemporary's remarks are calculated to deter farmers from sending to the Smithfield Show, and thus to injure what has proved a useful national institution. I am, yours etc.,

FREDK. RICHMAN,
Vice-Chairman, London Butchers Trade Society.
146, Borough, S.E., December 15th 1900

POISONED BEER.

Letter from Mr. Chaplin.

A large and enthusiastic meeting of merchants and farmers was held at Sleaford Town Hall on Monday, under the presidency of Alderman Jessopp, when a resolution in favour of securing the passing of a Pure Beer Bill was cordially adopted. Addresses were delivered by Captain Cole, Captain N. Reeve-King, Captain Cragg, Councillor Stow, Alderman Grummitt, and others, and it was resolved to organise a district petition to Parliament. With a view to obtain as many signatures as possible a large and representative committee, with members in every village, was appointed. In the course of the proceedings the following letter was read from Mr. Henry Chaplin, M.P.:—

Trentham, Stoke-on-Trent
Saturday, 15th December, 1900

Dear Mr. Jessopp,—I am very sorry that I cannot be at Sleaford to support you at the meeting which you are to hold on Monday, but I am heartily with you in the movement against the manufacture of poisonous beer, and unless I am much mistaken a good deal more will be heard upon the subject before Parliament meets again in February.

I asked a question of the Government yesterday, with the view of eliciting some further information as to the facts, and if we are to judge from the reception that it met with, in all parts of the House, and the full and comprehensive answer Mr. Long was good enough to give to it, it is evident that both Parliament and the Government recognise the importance of the subject.

When we receive the fuller information promised by the Local Government Board, and the report of their Inspector, we shall be better able to judge as to what alterations are required in the law.

But in the meantime the broad facts of the case appear to be as follows:—

A number of people, it is stated, have recently been poisoned by beer largely manufactured from substitutes for malt and hops, which have proved to be both dangerous and injurious, and some of them have died.

If these statements are correct, and so far as I know they are not denied, it follows that the conclusions of the majority of the Treasury Committee appointed to inquire into the use of beer materials have been absolutely falsified by the results, and the author of the minority report, who stood alone in his views, Mr. Cave Sewell Read, is proved to have been right.

The position of the question seems to me in consequence to be entirely changed. The British public are entitled to be safeguarded against beer manufactured from substitutes for malt and hops, which are now proved by this calamity to be injurious, and it is clear that the whole question must be reconsidered.

I am glad to know from the number of letters which reach me daily that a great number of meetings besides your own are being held on this important subject. The more it is ventilated the better, and the more quickly will the public understand of what vital interest it is to them.

I am sure that you will have a most successful meeting, and am, yours very truly,

(Signed) HENRY CHAPLIN.

A Question for the Public.

The calamitous results arising from the use of certain substitutes for malt in brewing beer, as recently published in the papers, lift the pure beer question from the region of the barley-growers alone into that of the consumers generally, and point to the desirability of united action on the part of the farmers and the public to press upon the Government the extreme necessity for prompt legislation to safeguard the health and lives of the people. This is no "Little Englander" question, but is as much Imperial as certain other matters recently so prominently before us. If the health of the people is allowed to be undermined, whence are we to draw our stalwarts to maintain our supremacy, and to protect our manifold interests in all quarters of the globe?

I am not at all sure that a Pure Beer Act will be such a boon to barley-growers in England as some seem disposed to believe, but I do not see how it can seriously injure them, particularly the growers of the finer qualities, an increased demand for which one would think must soon follow in Act of Parliament prohibiting "beerine" being sold as beer, and enacting severe penalties on those manufacturing and purveying concoctions of a deleterious nature. That being so, is it not imperative that meetings—not exclusively agricultural—should be held throughout the country, and that without delay?—I am, etc.,

H. G. FEW.

Cambridge, December 17th.

Meetings in Favour of Pure Beer.

At Tuesday's meeting of the Chester Board of Guardians a communication was received from the Risbridge Union, Suffolk, stating "that in view of the serious charges of arsenical poisoning in beer this Board requests Sir Cuthbert Quilter to bring the motion before the House of Commons, and earnestly

begs him to persevere with his Pure Beer Bill." Mr. Butler (Christleton) said he would like to know what their highly-paid inspectors had been doing. It was high time we had beer brewed from hops and malt. Mr. M. Kennedy (Chester) had no doubt the outcry against beer was justified. He considered that analyses were made according to the prices paid for them, and he thought they should be made by Government-appointed professors whom no local influence could touch. It was decided to support the resolution of the Risbridge Union.

The Selby and Stamford Boards of Guardians have passed resolutions urging Sir Cuthbert Quilter to push forward his Pure Beer Bill in the next session of Parliament.

A meeting of the South Durham and North Yorkshire Tenant Farmers' Protection Association was held last week at the Fleece-Hotel, Darlington. Mr. G. Smurthwaite (chairman) moved that a petition be sent to the Minister of Agriculture setting forth, first, that legal definitions should be made of the term of pure beer; secondly, that beer should be brewed from pure malt and hops; thirdly, that any beer made from maize, rice, etc., should have a distinctive name, and not be sold as beer. Mr. Dodds seconded, and said that measures should also be taken with the whisky distillers who made whisky from nasty German potatoes and other things. The resolution was carried.

At King's Lynn on Tuesday an influential meeting of farmers was held, and passed a resolution urging the Government to compel every brewer to declare all beer not made of malt and hops by the use of a distinctive mark. The 200 or 300 farmers present represented north, west, and south-west Norfolk, and the speakers included Sir W. H. B. Ffoulkes, Bart., Mr. George White, M.P., and Mr. T. L. Hare, M.P.

Mr. A. T. Jeffreys, M.P., presided over a meeting of the North-East Hants Agricultural Association at Alton, called to discuss the pure beer question. He strongly urged the introduction of a Pure Beer Bill in the next session. A resolution was carried unanimously that in the opinion of the meeting pure beer should be defined by Act of Parliament as a liquid composed of barley, malt, and hops and water, and that brewers should be compelled to disclose any other ingredients added thereto. Representatives of the Association were asked to join the deputation to the Government now being organised by the Central Chamber of Agriculture. Mr. Jeffreys stated that the deputation would probably be received by the Prime Minister or the First Lord of the Treasury about the end of January.

Pure Beer.

The movement in favour of a Pure Beer Bill is rapidly spreading. At the four corn markets of Newbury, Reading, Devizes, and Oxford, Mr. George Baylis has obtained the signatures of over 700 agriculturists, etc., hailing from Berks, Oxon, Hants, and Wilts. Petitions are now being signed in many of the villages, and leaflets distributed. Mr. Baylis, of Wyfield Manor, Newbury, would be pleased to forward forms of petition to any gentlemen desirous of helping. Arrangements are being made for holding a large meeting at the Town Hall, Reading, in January, when several M.P.'s will be present.

John Bull and the Berkshire Farmer.

John Bull: I am come to learn from you to what extent beer adulteration has injured agriculture.

Berkshire Farmer: In the year 1871 brewers used 271,435 cwt. of sugar; in 1881, 1,125,342 cwt., and in 1891, 2,045,524 cwt. That is, in 20 years, the sugar manipulated in breweries had increased from 13,000 tons to over 100,000 tons per annum.

John Bull: What quantity of barley malt did this sugar displace?

Berkshire Farmer: 2 cwt. of sugar takes the place of a quarter of malt. Therefore, in 1871, only 135,000 quarters of malt were displaced. This had increased to 562,000 quarters in 1881, and in 1891 the brewer dispensed with over a million quarters of barley.

John Bull: What barley was displaced last year by all malt substitutes, including maize and rice?

Berkshire Farmer: About 1,500,000 quarters, which should have been supplied by the British farmer.

John Bull: How many thousands of acres would be required to produce 1½ million quarters malting barley?

Berkshire Farmer: Reckoning 4 quarters to the acre, and allowing 8 bushels for seed and inferior grain, 500,000 acres would be required, grown on the four field system—barley once in four years. Two million acres of waste land could be brought into cultivation.

John Bull: I should like to bring the labourer back to the land. How many farm labourers would be required on 2,000,000 arable acres?

Berkshire Farmer: About 60,000, or, with women and children, an agricultural population of a quarter of a million.

John Bull: I will not forget the figures you have given me. I shall go now to Manchester and interview the glucose brewer.

GEO. BAYLIS.

Wyfield Manor, Newbury.

Alleged Arsenical Beer Brewed from Malt and Hops.

Mr. C. Estcourt, the Manchester City Analyst, in a letter to the Press says:—"I regret to have to state that glucose is not the only source whence arsenic has entered into the composition of beer. I have found arsenic in beers which I have known for a fact were brewed from malt and hops alone, and also where, in addition, only pure glucose had been used. I have examined a large number of samples of malt of different makers, and in a considerable number I have found arsenic. It was present in quite sufficient quantity to show (in beer brewed with the arsenical malt) as much arsenic as has been detected in beers brewed from arsenical glucose. I have not yet completed my investigations, but feel that brewers ought at once to be warned of the risk they run in using arsenical malt. Fortunately, as I have found on analysis, there are plenty of pure malts to be purchased, and brewers ought to see that their chemists (all brewers now have a chemist) examine every sample of malt."

Subsequently, Mr. Estcourt made a statement to an interviewer:—

"The explanation is simple," he said. "When the malt has completed growing it is damp and moist. If it were allowed to remain damp it would become mouldy and grow again. The desire of the maltster is to check that.

"The malt is therefore thrown on to a kiln and subjected to heat from coke or steam coal, and it comes into absolute contact with the fumes of the fuel. It follows therefore that if the coal or coke contains arsenic the malt becomes impregnated with the poison.

"Of course, the amount of arsenic in coal varies. If it were always to be found only in very small quantities there would be nothing to make a noise about, but I say the method of drying does not permit one to control the quantity. Again, the arsenic may increase according to the length of time the malt is heated.

"How did I make this discovery? I knew that infinitesimal quantities of arsenic were produced by this process of drying, but to my astonishment a brewer who had eliminated, as he supposed, all impure materials, and brewed his beer from malt and hops and pure glucose, sent me a sample, and I found it contained a good deal of arsenic."

What Kind of Malt?

Sir,—It is very necessary to know if the warning given by Mr. Estcourt applies to barley-malt, or is the term malt used by him merely the commercial name of the numerous preparations of rice, maize, etc., which are now used as substitutes for malt? Barley, when malted under right conditions, should contain no arsenic. Other so-called "malts," especially if chemically treated with sulphuric acid, may do so, but, however necessary it may be to suppress names, we ought at least to avoid confusion of terms.

—Yours faithfully, H. STOPES.

11, Queen Victoria Street, E.C., Dec. 19th.

The Brewers' Explanation.

A commission of experts, consisting of Sir Lauder Brunton, Dr. Thomas Stevenson, Dr. A. F. Luff, Mr. A. Gordon Salamon, Mr. Samuel Buckley, and Mr. J. Fletcher Moulton, Q.C., M.P., was appointed by the Manchester Brewers' Central Association to investigate into the circumstances of arsenical beer poisoning. This body has now presented the following report to the Association:—

The commission has now examined the sugars and all the other materials used in brewing in Manchester (with the exception of the malt), and they consider that it is clearly established that the arsenic found in deleterious quantities in the beer has been solely due to the contamination by arsenic of the sugars supplied by Messrs. Bostock and Company (Limited), of Liverpool. The arsenic in these sugars was undoubtedly derived from the impure sulphuric acid used in their manufacture.

The measures recommended by the commission a few days ago have, they learn, been effectively carried out. The whole of the beer in the manufacture of which any Bostock sugar was used has been destroyed, and there is no further danger from this source.

All the other brewing sugars on the English market have been analysed and have been found to be quite free from arsenic.

In view of the importance of the matter, the commission have instituted inquiries as to the manufacture of brewing sugars in the United Kingdom, and in this they have been assisted by the whole of the manufacturers of such sugars in a body, voluntarily offering them the opportunity of examining into the mode in which they conduct the manufacture. These manufacturers have stated collectively that it is, and always has been, their custom to use only such [illegible] and they have requested the commission to examine their invoices, works, etc., in order to verify these statements. [illegible] time has prevented the being done by personal examination up to the present, but the fact that all the specimens of brewing sugars as well as of glucose used for [illegible] purposes in the country have been found to be free from arsenic, and the necessity for the presence of arsenic has been [illegible] to the commission no doubt that this statement, when examined into, will be found to be correct.

The commission is quite unable to explain how Messrs. Bostock and Co. (Limited) came to employ an acid of the character actually used by them. The absolute necessity of using an acid free from arsenic in the manufacture of an article for human consumption must have been evident to everybody technically connected with the manufacture, and such acid is a common article of commerce. The price of the sugars in question was as high as any in the market, and apart from this, the quantity of acid used in the manufacture of the sugars is so small that the difference in cost of the best and the worst would only make a difference of a fraction of a penny per hundredweight of sugar. So that it is not a case of an attempt to cheapen production by the use of lower priced materials. The commission believe that it is this inexplicability which has rendered the matter so serious, and that the extent to which the mischief spread before it was detected was mainly due to the fact that the use of an acid containing arsenic in the manufacture of sugars was a contingency so improbable that it never occurred to those purchasing the sugars that it was possible that any danger could arise from that quarter.

The commission has been unable to detect the presence of arsenic in brewing materials other than sugar supplied by Messrs. Bostock and Co. (Limited), but they are aware that it has been asserted that traces of arsenic have been found in various samples of malt and hops. If such traces exist, they have probably been introduced in the operation of kilning, and the commission propose to examine more fully into the matter. None of the specimens of hops as yet yielded any traces. In any case the amount so introduced would appear to be exceedingly minute, and not sufficient to have any deleterious effect.

Beer from Oats.

A writer in the *Brewers' Gazette* says that there are several brewing firms in the United Kingdom who make a speciality of the production of beers from a proportion of oats. He has no hesitation in saying that malted oats form an excellent grain for improving the palate fulness of all beers which are likely to be given quick consumption. In making a comparison of the constituents of oats and barley, it may be pointed out that while the former contain about 14 per cent. of water, 56 per cent. starch, 4.6 per cent. fat, 1 per cent. cellulose, 5.7 per cent. sugar, 16 per cent. albuminoids, 2.5 per cent. ash, etc., barley contains about 12 per cent. water, 52 per cent. starch, 2.6 per cent. fat, 11.5 per cent. celluose, 4.2 per cent. sugar, 13.2 per cent. albuminoids, and 3.8 per cent. ash, etc. The chief difference between the two kinds of grain is in the cellulose and albuminoids. It will be noticed that oats contain more albuminous matter than barley, while the latter contains more cellulose than oats. It is the peculiarity and amount of the albuminoids of oats which cause this grain to impart such a rich palate fulness to beers, while the grain also produces a characteristic flavour of its own, which, unless too pronounced, meets with great favour. Now that material for the production of mild beers must of necessity contain a diminutive quantity of albuminous matter, the use of a certain percentage of oats will altogether improve the flavour of such beers, and, if mashed correctly, exert a stimulative action upon yeast reproduction during the fermentation process. The question of employing oats as a brewing material is by no means new, and where heavy percentages of raw grain, or even flaked maize or rice, are employed, a portion of the total grain should be of oats, as not only do they assist drainage, but prevent that extreme thin palate flavour so characteristic of beers that are produced to any extent by the aid of cereals deficient of albuminous matter. Practical brewers know only too well that to produce sound beers the amount of albumen in them must be extremely limited, and because this has been advocated so persistently, modern brewers have gone to the other extreme, with the consequence that the stability and vigour of the store yeast have suffered. This may be prevented by the judicious employment of oats, and if carefully handled they make excellent brewing material; while not yielding a high extract, they make up for this by imparting a greater palate fulness than even malt barley.

Substitutes Used by Brewers.

The following article, which appeared in the MARK LANE EXPRESS of January 29th, 1894, is reprinted by request, as bearing on the question of "pure beer" now at the front:—

Taking up one of the journals devoted to brewers' interests, and casually glancing at it, the number of strange substances found mentioned is very great. It is striking evidence of the use by brewers of other materials than malt and hops in beer. The following list of such things would probably startle even the most accustomed; but it has been prepared simply and solely by taking down, in the order in which they occur, the things advertised for sale, and which we know are used by brewers in the beer. Had we taken other substances the list, long as it is, would have been greatly augmented. The same substances occur more than once in some instances, because several makers of the same thing give it a distinctive name. Were the subject not too sad to laugh at, we might be tempted to make fun of the death and thunder threatened by rival makers who shall attempt to infringe each other's patent rights. We know from the files at Somerset House that the public have paid heavily in some cases for these valuable rights, but we find no trace in the law lists of actions brought against palpable infringements. We are also informed that the following list is by no means full, as certain traders do not advertise their goods, although they are admittedly freely used by brewers. Still,

FIRST-CLASS representatives and agents required throughout the United Kingdom for the sale of "MOLASSINE."—Write for particulars to the "MOLASSINE" CO., LTD., 36, Mark Lane, London, E.C.—[ADVT.]

somewhere about one hundred and fifty is a long list, and if farmers knew its full meaning it would be as sad to them as it is long and uncanny.

Lævo saccharum.
Inverted sugar.
Carameline.

Patent grist made from rice only.
Dextrin-maltose.
Dextro-saccharum.
Glucose.

The contention that beer is now better and purer because of the use of these nostrums is absurd. The two largest brewers use very few of these things; yet their beer is better liked by consumers, and their balance-sheets show that they make handsome profits. It is more fair to argue that because of the use of other material than genuine malt and hops, recourse is had to many of these horrid concoctions and chemicals. Any brewer using any substitutes other than malt and hops should be made to declare it. This is as much the consumer's as the farmer's question.

Mr. Chaplin on Adulteration.

A meeting convened by the Lincolnshire Chamber of Agriculture and Commerce was held on Friday in the Corn Exchange, Lincoln, to urge legislation on the subject of adulterated beer. There was a large attendance, and the Mayor (Mr. Pennell) presided, supported by Mr. Chaplin, M.P., Mr. Eubbleton Fox (chairman of the Lindsey County Council), Mr. J. Laverack, and Mr. W. S. White. Mr. Laverack moved a resolution that it was urgently necessary that the Government should as early as possible take such measures as might be necessary to prevent by legislation the manufacture and sale of poisonous beer in future. Mr. W. S. White seconded.

Mr. Chaplin, who was enthusiastically received, supported the resolution, and observed that he thought it might be said in truth that the workers of the country, the artisans who toiled in the towns, and the agricultural labourers in the country, were accustomed habitually to drink beer as part of the necessary and daily sustenance of their lives. Within the past few weeks thousands of those people in the North of England, in Lancashire in particular, had been poisoned by beer which, it turned out, had been manufactured from deleterious substances. Some of the people had lost their lives, and all that had happened in spite of all legislation against the adulteration of food. Having dwelt at length on the past attempts to obtain legislation to prevent the adulteration of beer, he referred to the Report of the Committee of Inquiry dated 1899, and said it was absolutely contradicted by the facts which been recently disclosed. The only member of that Committee who appeared to have been right in the past was their old friend, Mr. Clare Sewell Read, who himself wrote a Minority Report, and who urged emphatically his opinion that legislation or other provision was absolutely necessary to prevent the use of deleterious substances in the brewing of beer. The Report of the majority of that Committee undoubtedly raised some very serious questions, and the first was that a Committee appointed by the Treasury, whose first object was always to guard the revenue of the country, was not a satisfactory tribunal, and was not to be depended upon when the question at issue was that of the health of the community (applause); secondly, the conclusions of the Committee were rendered absolutely worthless by what had occurred since then; and, thirdly, that the whole question must be considered *de novo*, in fact, that there must be an entirely new departure in connection with the question. Two things appeared to him in connection with this subject to be perfectly clear. One of them was that no Government could continue to permit the manufacture and sale of beer by which the public were liable at any moment to be poisoned; and, secondly, if the question was to be effectively dealt with at all, it must be dealt with by the Government themselves. (Applause.) All bodies in the country interested in the question should, in his opinion, take steps to induce the Government to take the question up, and to include it in the programme of their legislation for the coming Session (applause)—and having so included it, to press it at the earliest possible moment to a satisfactory and effective conclusion. (Applause.) What should be the precise form the legislation should take upon the question, whether it should be the prohibition which was recommended in certain quarters, or a severe restriction upon the use of the substitutes recommended in others; or whether it should take the form of differential duties to be imposed upon beer according to the materials of which the beer was composed, were matters which he was sure, in the interest of English barley growers themselves, must be carefully and thoroughly thrashed out and considered. But they would be better able to judge when fuller information upon the subject was before them, and they had the means of knowing exactly how these things had occurred. (Applause.) He was glad, indeed, that Lincolnshire and Lincoln were taking a leading part in connection with the question, under the auspices of the Mayor, because it was not only important to the agricultural population of the country, but it was of even deeper interest to the health and well-being of the general community—(applause)—that they should be effectively protected for the future from poison in the beer which they daily consumed. If anything he had been able to say contributed in the least degree to the action of the Government in the direction which had been indicated, and so bringing about an effectual and permanent solution of the question, he could only say that it would always be to him a matter of the deepest satisfaction that he had been permitted to take part in the proceedings. (Cheers.)

The resolution was carried unanimously, and it was also resolved that a petition be presented to the House of Commons expressing alarm at the abuses that had crept into the manufacture of beer, and urging that a Bill be passed to give effect to the resolution.

A large and representative meeting of farmers and townspeople was held at Stamford on Friday to consider the beer question. Speeches in support of a pure beer Bill were delivered by the Marquess of Exeter, Lord Kesteven, Mr. Finch, M.P., Colonel Sackville, M.P., and several influential South Lincolnshire agriculturists, and a resolution was passed unanimously urging the Government to introduce a measure providing that the word beer applied legally only to beverage made from barley malt and hops, without the addition of any other material.

The Central Chamber Urges the Holding of Meetings

The Committee appointed by the Council of the Central Chamber of Agriculture on the 12th inst. to inquire into the beer question have arrived unanimously at the conclusion that the Chambers of Agriculture and other bodies in association with the Central Chamber should be requested to take immediate steps for the holding in their respective localities of special public meetings, open to all classes of the community, for the purpose of urging upon her Majesty's Government the necessity of dealing with the beer question during the forthcoming Session of Parliament. In view of the importance of securing uniformity of action on the part of the entire community, the Committee have framed the following resolutions, which they suggest should be moved at each of the proposed public meetings throughout the country:—

(1) "That in view of the recent serious accidents attributed to poison in beer, this meeting desires to urge strongly upon her Majesty's Government the necessity for passing, at the earliest practicable date, a Bill to secure purity in beer, and the legal definition of beer as the product of barley malt, hops, water, and yeast. This meeting also desires to urge strongly upon her Majesty's Government that in the interests of the public health, brewers of fermented liquors intended to imitate beer, as above defined, should not be allowed to use more than a fixed percentage of malt substitutes, and that those substitutes should be defined by law."

(2) "And further, that the Chancellor of her Majesty's Inland Revenue should be requested to [illegible] that, in addition to malt and sugar, no malt substitutes, except by means of licences of the Commissioners, and [illegible] the name of each and every brewer [illegible] be given, together with the [illegible] and the quantity of beer produced by him, and that these particulars be published quarterly."

It is also suggested that the resolutions after passed should be communicated at once to the Prime Minister, the First Lord of the Treasury, the President of the Local Government Board, the President of the Board of Agriculture, and the Members of Parliament. Copies of the resolutions passed should also be sent so as to reach the Secretary of the Central Chamber of Agriculture, at Bloomsbury Chambers, Westminster, not later than the morning of Tuesday, January 23rd, 1901.

Central Chamber of Agriculture,
Bloomsbury Chambers,
Westminster, S.W.

Old Age Pensions: An Actuary's Views.

Mr. C. Daniel Higham, President of the Society of Actuaries, in the course of his opening address of the session, made some remarks on old age pensions. He said: One would have imagined that the cost of five shillings a week to all comers of sixty-five years of age and upwards would have been immediately prohibitive, especially when recollecting that the increased taxation to provide it must include further duties on articles of daily consumption, so that the purchasing power of even this small allowance would be diminished to the extent of the sum thus transferred from one pocket to another. And if the grant be not to all, how especially generous would be the position of those whose savings just keep them above the line of succour, and who did not give away to friends a sufficient sum to bring them down to the qualifying level—he said nothing as to an entitling minimum of good character, for the impossibility of any such circumspection would have been; he should have thought, sufficiently apparent, were it not that it was still advocated by some.

Besides, with the improvident always asking for more, with political parties bidding one against another in what would have something of the nature of a bribe, and with vote-seeking candidates making promises to be fulfilled as they might, how long would any fixed limit as to the pension be allowed to last while the many were being taught to be beggars, and the morals of electorates, and those who wooed them, corrupted? The operations of the friendly societies would be injured, and all for a mere name, for unearned gifts from public funds were not the less outdoor relief because they were called old age pensions; and any suspicion of discredit which might now attach to the one would soon be affixed to the other, as was evidenced by the word "pauper," which did not in former days convey the stigma of the present.

That everyone had a right to a pension could not be admitted. But, if they saw the impracticability of certain wild proposals, and the danger not only to all incentive to thrift, but to the proper pride of working men, they were not unmindful of the hard lot of many of the aged poor, who had done their best in their day, but to whom circumstances had been unkind. The high spirit of the race was of greater importance than the sorrows of the few.

Two things were urgently needed in furtherance of thrift among, and in aid of, the classes in question. The Legislature should protect all provident funds in the hands of Trade Unions from any association with strike funds. A working man ought to be protected from losing his savings either by their dissipation during an industrial war or by his expulsion for failing to go out on strike when called on. The question of deferred annuities was more [illegible] a system, he looked for a solution of the problem without any violent upheaval or sudden great economic change, so foreign to the English character. He suggested that in lieu of the small pensions now granted to sailors and soldiers, a plan of, or, at any rate an option of taking, deferred annuities of a more satisfactory amount might be [illegible].

There has come to hand a copy of a new illustrated catalogue just issued by Messrs. J. O. Hobson and Co., Belfast, who are the manufacturers of high-class poultry appliances. The catalogue contains [illegible] which the [illegible] Royal and the Provincial Shows, etc. A [illegible] to the widespread popularity of the firm's goods. There is [illegible] testimonials, received since 1897.

BARLEY AND MALT.

By Hordeum.

Beer Consumption.

We hear a good deal just now about beer, and especially that such proportion of it which may be suspected of doing harm to consumers. Everyone must needs pity the unfortunate victims. Perhaps the fullest sympathy should be extended to the very large class of drinkers who take day by day merely sufficient to enjoy to the full all the advantages moderate and rational drinking confers. These, doubtless, have nevertheless been suffering from lowered vitality. The trouble in their case has not been sufficiently acute to lead to hospital treatment or to death, yet the suffering and loss remain, grave factors that merit more attention than they have yet received.

The Commission of Experts.

appointed by the Manchester Brewers' Central Association has now given in its report.

Were it not the fact, it would seem inconceivable that any body of men claiming to be called scientific could produce a document so glaringly inconsistent. Before they reach the third line of their "report," they state they have examined "all the other materials used in brewing in Manchester (with the exception of the malt)." Are we to understand from this that malt is a negligible quantity when investigating the composition of beer in this vicinity? The Excise returns of last year are truly awful as to the position of affairs. Still they had scarcely led any serious person to such a conclusion. In a few months we shall be favoured with the particulars relating to the use of materials by brewers up to September 30th last. At present we can only go up to the same date in 1899. Still, it seems difficult to follow why this exception should have been made by these experts.

On the day of the publication of this report the borough analyst for the Corporation of Manchester spread broadcast a solemn warning that he has discovered

Arsenic in Malt.

This dreaded arsenic had already been traced back to the indiarubber tubing, and the beer pulls used by publicans, whilst thoughtful citizens have been heard in public places to express pious gratitude that at least the doormats had not yet been even suspected, much less proved, additional sources of the epidemic. Of course, it is well known that in many breweries there are doormats. It is true that in many cases from the stern necessity of living hand to mouth of these most oppressed and hardly used (yet most benevolent and pure-minded) traders, the brewers, these mats consist of hop-pocketing, and it is well known (or the suggestion has been thrown out that it ought to be) that as sulphur is used by growers of hops, and hop pocketing is used for door mats, why waste energy and brain tissue in seeking for arsenic elsewhere when, so to speak, it lies at your very feet!

But I may be accused of being frivolous. Yet it is

The Gravity of the Evil

that leads me to show up the paltry findings of this committee by even more ridiculous suggestions if it be possible.

The great beer consuming public look for other and sterner things. Enquiry may be burked, and a thousand false scents may be drawn across the path, but consumers have a right to know

Who are the Users of the Sugar

as well as the unfortunate makers of it? What brewers have applied for relief to the Commissioners of Inland Revenue, claiming rebate on arsenical beer poured down the drains? Will this repayment of duty be granted?

If so, the man in the street has the right to know to whom the relief has been given, and its amount.

The excise authorities have proved

Singularly Incapable.

of protecting the public from evils which, if one's whole chemical knowledge were derived from the report of these Manchester experts, show how exceedingly simple it is to detect the presence of arsenic in beer, or in any of the numerous ingredients sanctioned by the honourable board.

But the public has a right to further knowledge. Why should any of these preparations be so assessed for duty that the brewer can deceive his customers; the duty paid falls far short of what it ought to be; the producers of honest materials be subject to unfair competition, and the consumer be defrauded?

All these questions have been raised before, and they have been met by the soft evasive answers with which the whole quadrangle in Somerset House continually echoes. Every enquiry has been met with the assurance that the department is an infallible safeguard of the public interests.

The public now knows the value of these assurances, and the time has arrived when we can appraise them at their true worth.

All this is dreary Christmas reading, and I am sorry. Oh, the pity of it all!

By Lupulin.

Home Notes.

The Borough.

The chief features in the week's trade are found rather in the general market than in that particluar section of it in which I am specially interested. Waggon loads of holly and mistletoe, enormous arrivals of turkeys and fruit, and other Christmas commodities, have pushed hops into the background, while within the offices of the factors and merchants the only signs of activity discernible are in connection with the seasonable reminders now being dispatched to customers and friends. As regards the hop trade itself calmness prevails, but whether the minds of traders are possessed by "the holy calm that leads to heavenly musings" I am not in a position to decide. I am rather of opinion that most of them would prefer other occupation, and that their acceptance of the present condition of affairs, being involuntary, is not unaccompanied by a considerable degree of discontent. However this may be, it is quite clear that the valuation of hops is not suffering, for current quotations remain firm, and there is no indication of any disposition on the part of growers to retire from the attitude they have maintained for some time in refusing to listen to the offers of merchants, who would not be unwilling to operate, even at this festive season, if they could do so on their own terms. "Labour" has, however, ceased for the time being, and the brethren are now called to "refreshment," which I heartily trust they will all enjoy without restraint. That the "profit" of the past season's trade may be productive of real "pleasure" during the holidays is my earnest wish for all concerned.

In connection with the movement now afoot for the production of a

Pure Beer Bill,

one of my correspondents, who is a planter of long experience, and whose admitted success in his calling demonstrates his skill and prudence, favours me with his ideas. He is decidedly of opinion that any further argument or inquiry is unnecessary, that this being of national interest the barley and hop growers cannot be accused of selfish motives in being associated with it, and that what is wanted is a measure for the protection of the consumers on similar lines to those which have been adopted by the legislature with respect to other food products. Such a measure can only be opposed by brewers on the ground that they have something in concealment which they are not willing to reveal to their customers. But my friend thinks that any attempt at a definition of what constitutes "pure beer" will be open to the argument that other subsances than barley-malt and hops may be used without detriment to the public health, therefore it will be well to avoid these hindrances to legislation, and to permit a defined amount of liberty in brewing, with this proviso, that all beer (or what is sold as such) shall be plainly labelled on the casks or bottles with a statement of the ingredients from which it is made, and that similar notices shall be displayed in all places where the article is sold to the general public. These regulations should be strictly enforced under heavy penalties, and inspectors appointed to examine breweries and licensed houses, and to report to a central authority, who should be empowered to take evidence, and to act as may be necessary for the public safety.

These suggestions are most excellent, and when put into practical form would doubtless accomplish all that the advocates of greater purity of ale and beer desire. No further evidence than that provided by the occurrences of the past few weeks is required to prove the necessity of a reform in the law governing this most important matter, and the people now demand it with no uncertain voice. As soon as the holidays are over energetic action, now being arranged for, will be commenced, and I hope to find that the Government will accept and pass the necessary enactment early in the coming session.

The Hop Trade Prosecution.

At the County of London Sessions, held at Newington on the 14th inst. (Mr. M'Connell, Q.C., Chairman), Samuel Wild, twenty-eight, warehouseman; John Langridge, forty-five, carman; Alfred George Studd, thirty-nine, labourer; James Stocker, fifty-three, dealer; and Charles Stocker, seventeen, labourer, were indicted for stealing and receiving a quantity of hops at Southwark. James Stocker was further indicted for applying a false trade-mark to three pockets of hops. No evidence was offered against Charles Stocker, and he was discharged. Mr. Bodkin conducted the prosecution against the remaining four prisoners on behalf of the Hop Trade Association. The case was fully reported in the course of a prolonged magisterial investigation at Southwark Police Court, and it may be remembered as originating in a novel procedure under the special Acts of Parliament for preventing the fraudulent repacking and false marking of hops.

A warrant, believed to be the first of its kind, was granted by the magistrate to the police, empowering them to search a warehouse in Swan Street, Borough, occupied by James Stocker, to seize any hops which might appear to have been fraudulently marked, and to detain the goods for a period not exceeding a month, pending the institution of such proceedings as might be found necessary.

The warrant was executed by a strong body of detectives, comprising Detective-inspector Godley, Detective-sergeants Kemp, Smith, and Monahan, and Detective Girdler, M Division, assisted by Detective-inspector Divall, H Division. They seized about £1,000 worth of hops, cloths, and stencil-plates, and incidentally discovered, it is alleged, three pockets of Sussex hops which had been stolen from Messrs. Parkes, Son, and Ayling, and had been repacked and falsely marked as Kent hops.

While the officers were on the premises two bags of loose hops, alleged to have been stolen from Messrs. Frier, Mayer, and Co., were brought there and promptly taken charge of, along with the carman who brought them, and thereupon the two Stockers were also arrested. Counsel for the prosecution stated that there was reason to believe that the raided warehouse had long been a receptacle for stolen hops. Mr. A. Gill appeared for the defence.

After a long hearing, the prisoner Langridge was acquitted, and the three others were convicted. Detective-inspector Divall stated that he had information that Stocker had been for years a receiver

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interest or benefit to the members of the society.*

To Hop Growers.—Users of Wire Work should buy the Best English Galvanised Steel Hop Strand, made by Rylands Bros., Ltd., Warrington, Lancs. For prices, &c apply to their London office 86, Leadenhall-street, E.C.; or their Sole Agent for Kent and Sussex, Mr. Edward Ball, 3 Newstead-road Lee, S.E.—[ADVT.]

of stolen property. Wild bore a good character, and Studd was well connected.

Mr. M'Connell said the case against Stocker was uncommonly bad. A nefarious business had been carried on at Stocker's warehouse, and he must go to prison for twelve months in the second division. In addition, he must pay the costs of the prosecution, together with £25 compensation to Messrs. Parkes, Son, and Ayling. Wild was sentenced to five months' imprisonment, and Studd to one month's imprisonment in the second division.

Foreign Notes.

Nuremburg.

Since the opening of this month there has been no practical change in the position of the hop market. A very quiet trade has been the rule, and prices have consequently receded to a small extent. As is usual at this season; the demand from brewers is limited, and the support given to the market by exports has been withdrawn, this class of business having considerably diminished. But recent sales, though so much reduced, are still in excess of the arrival, therefore a gradual absorption of stocks is taking place, and it is expected that at the opening of the new year inquiries for choice parcels, which have been lately rather neglected, will be heard of, and values will speedily be raised to their normal point.

Belgium.

There is very little interest to be found in the hop trade. With a slackening of demand, quotations have been gradually giving way for the past fortnight, and a few transactions are reported at 90 francs in the country markets. Bourse business, being entirely speculative, does not afford much guidance for actual value, but the figures recently quoted for Alost 8 mark are 85 francs by buyers, with sellers at 87½ francs.

France.

The business in first-hand parcels has practically ceased, most of the growers having sold out. The general commercial movements of the commodity continue, and it appears from the official returns that the imports for local consumption for the first 10 months of this year exceed those of 1899 by over 100,000 kilos, or about 2,000 cwt. The export of French hops this year during the period named are considerably less than in the corresponding month of 1899.

Arsenical Poisoning

by beer in England is creating some excitement in continental brewing centres, especially where glucose and invert sugars are used. The Bavarian brewers can safely smile where these disastrous results of adulteration are reported to them, as the strictly administered law prohibiting the use of any other constituents than barley-malt and hops completely protects the consumer from the remotest possibility of danger. But in Belgium, where "chemical" brewing is permitted and practised, the lesson deducted from our English experience is that chemists will become more necessary to brewers, in order to analytically examine the various products now introduced by scheming manufacturers into the brewing of beer. In olden imes, when the ingredients were limited to natural products only, scientific assistance was not needed. Would it not be better that we should revert to our former methods, with the satisfaction of security which would accompany such reversion, than continue to drink our beer in dread of consequences that may arise from scientific oversight or neglect?

America.

The New York market is very firm at recent rates. Although the buyers demand has fallen off, brewers are active buyers, and country buyers cannot find any growers willing to sell at less than 20 cents., the trade quotations now running up to 22 cents. The internal revenue from fermented liquors for October, 1900, shows an increase of more than half a million dollars over the same month of last year. The outlook is distinctly in favour of holders, who are confident of realising higher prices after the holidays.

(*For Hop Market Report, see page* 827.)

Illegal Removal of Pigs.—At the High Wycombe County Bench, on Saturday, Sir Robert Dashwood presiding, a singular plea was adduced by a farmer named Edward Brooks, of Penn, summoned for illegally removing thirty-nine pigs without a licence into a swine fever infected area in South Bucks. It appeared that the defendant had sixty pigs (one of which was lost), which he sold to Mr. Dulley, of Wooburn. Accused obtained a licence of removal for twenty pigs only, and thought that if he removed the swine in batches of twenty each the requirements of the Act would be met by the one licence for the twenty. It was pointed out, however, that that procedure was not allowed, and the Bench fined defendant £2 10s., with £1 9s. 6d. costs, the chairman commenting on the seriousness of the offence in an important agricultural district.

Border Union.

The annual meeting of the Border Union Agricultural Society was held in the Corn Exchange, Kelso, on the last day of November. There was a very representative attendance, and Mr. C. J. Cunningham of Muirhouselaw presided. The Duke of Buccleuch was reappointed president, and the following were elected vice-presidents: Duke of Roxburghe, Earl of Home, Marquis of Lothian, Lord Polwarth, Earl of Dalkeith, M.P., Lord Tweedmouth, Sir George B. Douglas, Bart., Sir Richard J. Waldie Griffith, Bart., Mr. C. B. Balfour, Mr. James Nisbet, and Mr. Alexander Lyal. Mr. Allan Stevenson, Commercial Bank, was reelected secretary, and a very representative committee was appointed.

In the annual report the committee expressed regret that there had been a deficiency in the accounts for the year of £146 5s. 11d., bringing the balance down to £52 10s. 2d. On almost all the branches of receipts there had been a falling-off, and in the expenditure most of the branches showed a decrease. The total receipts reached to £1,052 17s. 10d. for the year, and the expenditure to £1,199 3s. 6d.

Mr. Walter Rutherford, Crailing Tofts, moved the adoption of the report, and said it was increasingly urgent that the Society should retrench. The income for the past year had been rather more than the average for the past five years, and they had very little hope of an increase in that way. Regarding the annual show, he held that precisely as the prize list had been increased so had the deficit. The Society had this deficit to face, and the committee, with a view to effecting a saving, had adopted several recommendations.

Mr. Newton, Queenscairn, seconded the motion, and the report was adopted.

The meeting then proceeded to consider the four recommendations of the committee. The first was that, though there might be a bull sale, there be no show. Mr. Rutherford said that this would save the premiums, and that for a number of years now there had been a feeling that the gathering, owing to the loss sustained, be not held at all. During the past ten years it had lost the Society a sum of £400.

Mr. Johnston, Oxnam Neuk, asked who had to pay the expenses of the sale, if any. Mr. Rutherford said the idea of the committee was that both the bull sale and ram sale be self-supporting.

Mr. Johnston, Crailing Hall, disagreed with Mr. Rutherford. The Society existed primarily for the benefit of agriculture, and the holding of this show, even though there should be a slight loss yearly, was carrying out the primary object. He thought it would be a pity to allow the bull show to go down. The committee had been considering the cutting down of expenditure, but they had not apparently considered if the income coul dbe raised. For instonce, the subscription some years ago was reduced from £1 to 10s. He did not think that £1 was too much for membership of such a society.

Mr. Dunn, Redden, and several others supported Mr. Johnston, who put his suggestion in the form of a motion—viz., that the bull show and sale be held as usual, though with reduced expenditure.

Mr. Rutherford moved that the recommendation of the committee be approved, and remarked that when the subscription was reduced the membership rose from 140 to 330. The idea of the committee was to hold a bull sale at Penny and Kay's mart.

Mr. Stormonth Darling was not quite sure that it would be relevant for the society to adopt a resolution to hold a sale on other people's premises.

After some further discussion, Mr. Johnston's amendment was carried by a small majority.

The second recommendation was that the destruction of rooks be discontinued. Speaking in support of this recommendation, Mr. Rutherford said that upwards of £52 had been spent last year, and of the receipts the farmers had contributed the magnificent sum of £16. The recommendation was agreed to.

There was considerabl discussion over the third recommendation—viz., that the premium list at the annual show be reduced by £100. Mr. Rutherford, however, pointed out that the idea of the committee was to make the reduction where there was least competition, and the recommendation was adopted.

The fourth recommendation was that the entry money charge dfor rams at the ram sales be raised from 9d. to 1s., and this was agreed to, as was also a motion that the fixing of the dates for the gatherings be left to the committee. Mr. Rutherford rbought forward a motion to the effect that the admission money to the annual show be 1s. all day. The working classes were now receiving good wages, and the shilling was quite within their reach.

Mr. Hunter, Limpitlaw, seconded, and Mr. Roberton, Morebattle Tofts, expressed the belief that they would get a shilling as readily from the working classes now as sixpence.

Mr. Bruce, Jedburgh, thought that this move would be most unpopular ,and Mr. Johnston, Oxnam Neuk, urged that the admission be 1s. and 6d. as formerly. A vote was taken, and the Chairman declared Mr. Rutherford's motion carried by a large majority.

Newcastle Farmers' Club.

Mr. H. Crawford Smith, M.P., attended a meeting of the Newcastle Farmers' Club on the 1st inst.—Alderman Carrick in the chair—to advocate, on behalf of Lady Noble, Lady Trevelyan, and other ladies, who have been attending for two or three years past to look after the girls, a better system of conducting the local hirings. He read a letter from Mr. Johnson (secretary of the Durham and Northumberland Dairy Farmers' Association), who said that the present system of hiring in the district is antiquated and out of date, and in some cases unnecessary.

Mr. Smith suggested that the Farmers' Club should take control, and assist the Ladies' Committee in supplying agreement forms, etc. The Town Hall should also be taken to provide innocent enjoyment for the young people until they can be got out of the town, to prevent their being at the mercy of harpies in the streets.

Mr. John Knox Lyal favoured engagement through registry offices instead of the present system, and Mr. M'Laren said he was in favour of abolishing the hirings altogether and substituting advertising. He had tried that, and it answered admirably.

Ultimately a committee was formed to consider the whole question.

Contagious Diseases of Animals.

Summary of Returns Issued by the Board of Agriculture for the week ending Dec. 15th, 1900:—

NOTE.—The figures for the current year are approximate only.

A Market-Growers' Association for East Kent.

A meeting of market-growers was held recently at Ash, at which the Sandwich and District Market Growers' Association was formed, and the following committee elected:—Chairman, Mr. C. Herbert, Ash; treasurer, Mr. F. C. Heming, London and County Bank, Sandwich; hon. sec., Mr. Fred. F. Coleman, Sandwich; Mr. W. Fagg, to represent Ash; Mr. F. W. Quelch, Wingham; Mr. J. Caspell, Eastry; Mr. G. Caspell, Sandwich; Mr. T. Farrier, Worth; Mr. T. Cornes, Woodnesborough; Mr. H. Castle, Stourmouth; Mr. J. Grayson, Preston; Mr. W. D. Bayley, Staple. This committee have since met and formulated a workable scheme which will be a real benefit to the members of the Association. The committee will present a report to the next general meeting, which will be held at the Lion, Ash, early in January. The committee have decided to extend the district to include growers from Deal, Ramsgate, Margate, Minster, Ash, etc., and it is proposed that when these districts send members they shall be represented on the committee. A resolution to this effect will be presented at the next general meeting, the exact date of which will be duly advertised. Anyone interested in market growing, and willing to lecture or communicate papers on subjects of general interest, is requested to communicate with the secretary. Members of the Association can, through the secretary, obtain samples of fertilisers and artificial manures for expert examination, and obtain full reports on the same at very nominal charges. Further particulars as to this may be obtained on application to the hon. sec., Mr. F. F. Coleman, Sandwich.

LITERARY NOTICES.

The "Agricultural Handbook and Diary" for 1901 has now been issued. This is the second year of issue, and the present volume, like the last, contains many articles of interest and usefulness, all of which are dealt with in a clear and simple manner. The articles deal with such subjects as the "Treatment of Woods," by Colonel Bailey; "Butter-Making," by Ernest Mathews; "Short Wool Sheep," by H. Webb; "Calf Rearing," by F. Punchard; "Veterinary, with special reference to Cattle and Sheep," by Professor Wortley Axe; whilst there is an interesting article which is unsigned on "The Cost of Wheat Production." This article, together with the maps, which are also contained in the book, will enable the farmer to measure the forces against which he has to compete. There is also an agricultural summary of the year, by W. E. Bear, a full copy of the two Agricultural Acts passed last session—"The Agricultural Holdings Act" and the "Workmen's Compensation Act." The diary is in a most convenient form, and includes many of the most important racing and farming fixtures for the coming year. The book is published for the editors by Messrs. Vinton and Co., 9, New Bridge Street, London, E.C.

"Cash: How to Invest it," by "Experience," is the title of a book written with the object of giving the public valuable information concerning the buying and selling of stocks and shares. Among its contents are included chapters on brokers and jobbers, investment, speculation, bucket shops, dividends, and a mass of other useful knowledge. Simple language is used throughout, all technical terms being fully explained. The small capitalist can thus get from this work a clear idea of how to manage his money, and will be enabled to protect himself from ignorantly falling a victim to the seductive suggestions of touting circulars. The writer, who has employed a long and wide experience of Stock Exchange and money matters in this work, conceals his identity in order to distinguish the book from the advertising pamphlets which are so extensively circulated. "Cash: How to Invest it" can be obtained of all booksellers, price 1s. net, or post free 1s. 2d. from the publishers, Dawbarn and Ward, Ltd., 6, Farringdon Avenue, London, E.C.

The "Farmer and Stockbreeder Year Book and Country Gentlemen's Almanack" for 1901 consists of 292 pages, is printed on beautiful paper, and published in most attractive form. There are two distinct sections in the "Year Book," viz., the "Year Book" and the "Almanack." Within the former category are included an extensive and comprehensive series of articles dealing with domestic live stock, practical farming and dairy farming. The editor's intention has been to provide something of interest to everyone on the farm, and when it is remembered that there are over thirty signed articles, besides comprehensive reviews of the various breeds of live stock during the year, not to mention the very complete tabulation of pedigree sales during 1901, it can be claimed with some measure of confidence that the object has been fulfilled. The sale record is one of the greatest features of the "Year Book," some thousands of sales being recorded in fifty pages or so set aside for the purpose, involving monumental labour on the part of Mr. Chapman, its compiler. The illustrations number close on 200, so that the "Year Book" section of this "Annual" is quite in keeping with the times. The "Country Gentlemen's Almanack" is represented by a series of tales useful for farmer and breeder alike, and may be regarded as that portion of the "Year Book" which will be kept for reference. Among the contributors are Sir Cuthbert Quilter, Rev. D. B. Montefiore, Mr. John Hill, Mr. J. Owen, Mr. J. H. Bridges, Mr. A. F. Parbury, Mr. E. G. F. Walker, Mr. James McCreath, F.H.A.S., F.S.I., Mr. Henry Smith, Jun., Mr. F. N. Hobgen, Mr. R. S. Gardiner, F.S.L., Professor Malden, Mr. Gilbert Murray, and others. The "Year Book" is published at the offices of the *Farmer and Stockbreeder*, 6, Essex Street, Strand, price 1s., post free 1s. 4d.

The "Live Stock Journal Almanack" for 1901 contains fifty special articles and numerous illustrations of noted specimens of the leading varieties of domesticated animals. There are also carefully compiled breeders' tables, lists of societies, fairs, statistics, etc., so that the book appeals strongly to all who are engaged in country pursuits. The opening article, with accompanying engraving, relates to a famous Hackney mare which established great celebrity for trotting towards the close of the last century. Mr. W. T. Trench, in a readable paper, advocates the claims of "Hunter Sires for Breeding Light Horses." Under the title "Army Horses Abroad" Sir Walter Gilbey, Bart., gives an interesting account of the types of military horses shown at the International Show at Paris, and proves how successfully foreign breeders have introduced English blood in order to secure the objects they have had in view. Mr. P. A. Muntz, M.P., has a sensible and pithy article on "The Demand for Heavy Horses and how to meet it." "The Rate of Growth in the Horse" is a subject dealt with in a most informing manner by Professor Cossar Ewart, and his elaborate paper is sure to be read with interest. Mr. C. Stein offers many valuable hints as to "Military Stables and Stable Management." Sir Richard D. Green Price, Bart, also touches on a question of the day in his contribution on "The Pony: Its Breeding for Army Purposes." "The Value of Local and County Shows" is ably handled by Lord Middleton. A pleasantly written paper is that by Professor Sheldon on "Features of Summer Grazing." Mr. Robert Bruce traces the improvement in "Our Breeds of Beef Cattle," and Mr. Primrose McConnell describes the "Management of a Milking Herd." Other papers are by Mr. Sanders Spencer, on "Pig Fancies"; Mr. F. Gresham, on "Sporting Dogs and Their Peculiarities"; Mr. E. Brown, on "Modern Poultry Keeping"; Mr. Gage Harper, on "Turkeys as Farm Stock"; and there is a brief article on "Kestrels and Sparrow Hawks." The price remains at 1s., and the publishers are Messrs. Vinton and Co., Ltd., 9, New Bridge Street, London, E.C.

Mr. Effingham Wilson, Royal Exchange, E.C., has just issued in pamphlet form an example of an advertisement inviting subscriptions for shares under the Companies Act, 1900. There is a preface by Mr. Anthony Pulbrooke and several notes, the whole being a timely reminder of the requirements of the new Act.

The November issue of the *Agricultural Gazette of New South Wales* has now come to hand. This is, as most of our readers are aware, a Government publication, edited by Mr. W. H. Clarke, and previous issues have abounded with useful information for those for whose interest it is issued; and the November number is not behind its predecessors in this respect.

From the Sun Fire Insurance Office, Threadneedle-street, E.C., we have received a nicely got up desk calendar, and a wall calendar, also a blotter, the last-named containing in addition to the calendar some useful desk information. As is well known, the Sun Insurance Office is a very old-established one, being founded 1710. The sum insured in 1899 exceeded £435,000,000, the premium income of that year being £1,027,636, whilst the reserve funds amounted to £2,065,593.

THE GARDEN.

Mild but stormy weather still prevails, though during the past week we have had rather less rain than usual, and the barometer shows a somewhat upward tendency, on the whole. Though Christmas is now close at hand the average temperature remains remarkably high, and a thermometer here on a due north aspect has stood at about 50degs.—a degree or two higher or lower only—for several days past. In the open air chrysanthemums, veronicas, laurustinus, and even fuchsias and myrtles are in bloom without the least protection, and in sheltered spots some primroses may also be found. A change may be looked for, however, about the 21st or 22nd inst., when the winter solstice and the advent of a new moon occur within a few hours of each other.

Potatoes of the earlier varieties are already commencing to sprout, even where kept quite cool. Consequently the entire stock of such (for seed) had better looked over at once, and as far as possible the sets should be laid out thinly in some light and not too warm place so as to strengthen the young growths. When allowed to make long, weak "spears" in a dark position these have usually to be sacrificed (even if they are not broken off accidentally) before planting, and then a second growth, which is never so strong or vigorous as the first, is made, and the sets are undoubtedly weakened, so that the crop suffers in more ways than one. Too much care cannot be taken to preserve the first shoots formed intact, and not to let them grow too long before planting, as well as to render them as sturdy and robust as possible. Some growers, again, thin them out to one—the strongest or best—on each set before planting, and though this may not make much difference in point of time, I believe that it tends to afford a larger and more even sample of tubers than if all the growths were left.

Of course the date of commencing to plant depends entirely on the natural mildness or otherwise of the locality, and on the weather experienced, but should the present conditions remain in force for another month or so, I should repeat the advice given in a previous article—that all possessed of naturally warm and sheltered ground in any favourable locality should plant one or more good breadths of a dependable early variety as soon as it can be done with any degree of safety.

Proceed with the forcing of rhubarb and sea kale as required, bringing in fresh batches of roots as the first begin to show signs of exhaustion. If a frame or two over a brisk hotbed, with bottom heat of 75deg. to 80deg., can be spared, fill them with strong four or five-year-old asparagus roots, laying them out on a few inches of light rich soil and covering to a depth of 4in above the crowns with the same. Water in well, and keep the frame close (or nearly so) and dark till the young growth appears, when light and air must be gradually admitted. When the shoots have been all cut and the roots removed a crop of early potatoes or radishes may usually be taken without renewing the hotbed.

Late-planted strawberries will probably succeed better than usual this season, there having been little or no frost to disturb them yet, and by this time they will be getting a good hold of the soil, especially as the weather has been so mild. When frost sets in early, and alternate spells of cold and thaw prevail, the late-planted runners get disturbed, if not actually thrown out of the ground, time after time; and when this occurs they can, of course, make no progress nor do much good next summer. If not in the ground by the early part of August at the latest, the best way to winter young strawberry plants is placed closely in a nursery or store bed in some sheltered spot, protecting them from hard frost with a little litter, and planting them out permanently in April or May.

The pruning of bush fruits, as well as of dwarf apples, pears, etc., in any form, and trees of all kinds on walls ought to be pushed on rapidly while the mild weather lasts. It is far better to get all such work done before Christmas if possible.

The pruning of newly-planted fruit trees is a somewhat disputed point, some holding that they should as a rule be cut hard back when planted, or soon afterwards; while others maintain that it is better to let them make a year's growth unchecked and then cut back to the required extent. Plenty of top growth and foliage undoubtedly favours the production of fresh roots, and, on the other hand, plants that are cut hard back at planting time usually "break" more or less weakly afterwards. There is much to be said on both sides, no doubt; but a very good general rule is to prune trees or bushes planted in November, or even up to about the shortest day, lightly to moderately, while those not got in till after Christmas will be better left alone to make a season's growth as they list.

Roses of any of the hardier sections may still be planted, but the teas and Noisettes will be better now left till about the end of March. A batch of well-established plants of the tea-scented kinds in pots may be brought indoors and gently forced into bloom, having pruned them previously, of course.

Carnations, hollyhocks, auriculas, and others in frames and pits must have plenty of air in all mild weather.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended December 15, 1900, together with the quantities imported in the corresponding week of the previous year :—

	1899.	1900.		1899.	1900
	No.	No.		Cwt.	Cwt.
Cattle ..	7,627	11,538	Wheat ..	1,318,300	1,137,300

Failure of the British Horticultural Association.—Meetings were held last week at the Carey-street offices of the Board of Trade, Lincoln's-inn, under the liquidation of the British Horticultural Association (Limited). The company was formed in December, 1898, with a nominal capital of £15,000, to carry on the business of nurserymen, florists, and horticultural auctioneers. It was apparently formed to acquire the business of the Metropolitan Floral Guild Company (Limited), then in liquidation, and subsequently sold the major portion of its Surrey nurseries with a view to avoiding trade jealousy. The company, in June, 1899, started the *Chronicle of Horticulture*, which was distributed gratis, and derived its income from advertisements. The Official Receiver was deputed to remain in charge of the liquidation.

FARM PROSPECTS.

Gloucestershire.

The weather continues mild and open, with every prospect of a green Christmas, and yet although we have had so much rain since the 1st of November, but few of the dried springs are started. All the autumn-sown crops, the clovers, and grass are looking wonderfully well, but as there is much truth in the old adage that winter growth won't fill the rickyard, a dry, cold check would now be very serviceable. Store stocks are healthy and doing well, with a small output of dry fodder, but prices, except for cows and calves, keep low, and at most of our Christmas markets trade was very disappointing, for with the present price of cake to make beef at 6½d. or mutton at 7½d., even when stores are bought cheap, don't leave much profit. Now or never

We must get a Pure Beer Bill passed.

but everyone should help, for if the brewers can gloss over the present calamity by announcement of the unnoxious qualities of their substitutes (not a word about purity in all their flaming posters), and the strong public opinion now pervading all classes dies out, good-bye to our hopes for ever. At the end of this century to look back over the last year is not a pleasant reflection, and with all our expenses steadily advancing, and the difficult labour question looming large before us, the outlook for the future is not a bright one, but that the good time will come soon is the hope of—J. H. W. (December 21st.)

Lincoln (South).

The weather during the last three weeks has been of a mild and open nature (in fact, several primroses are in full bloom in my garden), and while beneficial to the former in one way, it is rather detrimental in the other. Not a large acreage of wheat has been sown, but where it is up a good plant, and is looking strong and well. Ploughing and all other land work has been pushed well forward ready for manure carting should frost set in. Threshing, too, has been well followed up, and several yards will not require above one more journey for the machine. The corn trade is still very depressing, scarcely anything being done at Spalding on Tuesday. Wheat at about 26s. to 27s.; barley, 24s. to 27s.; oats, 15s. to 17s.; beans, 28s.; and peas at various prices up to 56s. per quarter. The Christmas fat stock shows have produced some excellent specimens of beef, mutton, and pork; but with cakes and feeding stuffs at the price, I fear there is

Not Much Remuneration for the Feeder.

Beef at from 7s. to 7s. 6d. per stone does not leave much margin for profit; mutton, too, has been selling badly, while pork, which is rather scarce locally, has been making from 6s. to 6s. 6d. per stone.

The potato trade is very dull just now; farmers, hoping for better prices, are not putting many on rails. The prospects generally are not very cheery for the farmer just now, but let us hope that the New Year may open with more seasonable weather, better prices, and a more prosperous outlook.—R. M. W. (December 21st.)—P.S.—Weather at time of writing bright and clear.

Mid-Somerset.

We are now in a mild winter season, with rather more wet than is congenial for live stock not housed, which is the case with a large proportion of the dairy cattle in Mid-Somerset, the stalls and yards in connection with the majority of the homesteads being sufficient to house perhaps twenty animals where eighty are often kept. Those in milk are of necessity housed, warmth being one of the most important agents in milk-producing. Young cattle are generally looking well after a grassy autumn. Grazing sheep have done well this autumn, and been remunerative. Ewes will shortly be in the lambing pens. Young wheat looking well.

Mangolds, so useful as winter food, were a fair crop, and taken well. Milk for the most part is sent to London, otherwise made into Caerphilly cheese, a variety of cheese consumed mostly in South Wales, for which there is a growing demand; a very remunerative business, and where the homestead is any distance from the railway station Caerphilly cheesemaking is much preferable.

Cider-Making

carried on more or less at most farmsteads during this season, is now almost finished. The apple crop was very partial, the produce from them good, and of very fair quality; of course, depending on the soil the apples grew on, the sorts of fruit, and lastly and very important, the manipulation of the article throughout, the beer scare in the North having given good cider already an increasing sale in many large towns. Cheese trade quiet. Pigs scarce, but not dearer. Price of horses of all classes has a distinctly upward tendency. Labour question a distressing and yet unsolved problem.—W. T. S. T. (December 21st).

North Wilts

Nothing very original or interesting can be said on this subject, I fear. Mildness is the general character of this season, absence of frost, and a moderate quantity of rain—very desirable weather for those who have stock chiefly depending upon the food of the pastures, but not favourable to the meat trade. Fat beef seems rather too plentiful at our Christmas markets to make much above 6d. per lb., except for a very fancy article, if a prize fat beast can be so called. The prospects of farming in the future are about as in the past. We may live till we get a really bad season, when we shall be like some of our unfortunate soldiers having spent our ammunition, we shall have no alternative but to give up.—J. S. (December 20th).

Somerset.

The rains have delayed the late wheat sowing, but what was put in early is up and looking well. Threshing is proceeding slowly under difficulties, as it is seldom we get two fine days in succession. The yield of oats is very poor, both in quantity and quality. Roots have continued growing, and are better than at one time they were expected to be. The very mild weather has kept the pasture wonderfully green and growing for the time of year, and there has not been half the quantity of hay used as there was last year at this time, so unless we get a very severe time, I should think farmers will have sufficient hay to see the winter through, and many be able to save a mow or two.

Stock are Doing Well,

but the prices of beef and mutton have not improved of late, and many of the Christmas fat stock sales have not come up to expectations. Cows and calves have been very dear, others are making moderate prices. Milk trade has been good this season, but cheese (except Caerphilly) has been a dull trade of late; but I hope it will improve with the New Year.—E. D. (December 20th).

In this neighbourhood the season has been more favourable for owners of live stock than for some years past. Hay is plentiful and good, roots are mostly a good crop and excellent quality, while, owing to the mildness of the season, both cattle and sheep still continue to pick up a good bit of their living off the pastures. At the Christmas sales, beef and mutton have gone off well, beef in some cases selling dear. Milk is and has been for some time in good demand, though the price is little or nothing higher. Stock appears to be generally healthy and in good condition. There is a good deal of complaint as to the yield and quality of the corn crops; at the same time, some very good samples of all kinds are to be met with on our local markets. The weather has been favourable for getting in wheat and other autumn work, roots being secured in capital condition. All sorts of

Summer Flowers are Still Blooming

in the open, while grass fields are as fresh and green as one expects them in April. Imported feeding stuffs continue dear, and little profit can come from feeding cakes at the present price. The chief source of complaint among farmers at the present time is the increased cost and difficulty of getting work done. No women and hardly any boys are to be found working on farms about here, and, as a result, men have to be paid high wages for doing work which formerly was done by boys and women at a third of the present cost.—C. P. (December 20th).

Somerset (North).

Death all round. The fat steers and heifers gone to wear their last breastplate in a butcher's window; the old gander calls for his family; the mallard quacks for a lost partner; the old gobbler gobbles no more; and yet all this has been done to increase the weight of the farmer's pocket. With April weather of tears and smiles; boisterous March without Christmas frost; with the roses of June and of midwinter hobnobbing in the gardens; with mignonette, summer and autumn chrysanthemums flowering in the open borders; with hyacinths pushing through; with pastures greener than in August last; well may the farmer question the fact of its being a dying century or not. Be it as it may, the farmer's year has not been such an over disastrous one, after all, in this portion of the country. May next year be as good, with a preference for a better one still.—N. S.

Foreign Prospects.

FRANCE.—Weather continues favourable to wheat and other crops. The settlement of the *bons d'importation* is still a long way off, and millers, apprehensive of results, confine their purchases to the supply of pressing wants. Plenty of water in the rivers and streams enables all the small mills to work, but there is no encouragement to make flour which if would be difficult to sell while the market is in its present unsatisfactory state.

BELGIUM.—The continued open season, although favourable for farmers, has produced a quiet market by checking demand for breadstuffs and keeping in check speculative inquiry.

HOLLAND.—Crop reports with little exception are satisfactory. Supplies in the interior are moderate only, but even these cause a drooping all round except oats being in good favour.

GERMANY.—Fine and cold weather [illegible] very mild and wet period, but an improvement [illegible] lowed in the market, which for several days [illegible] quiet, and in some cases weaker.

HUNGARY.—Weather was cold and unsettled, but not injurious to the crops. Wheat [illegible] had a quiet tone lately, but prices are [illegible] on the week.

ITALY continues to be the chief buyer of Russian wheat. Much rain has fallen in the Po [illegible] and inundations occurred not only in Rome but in the southern provinces as well. The position of the crop is most satisfactory.

RUSSIA.—Higher temperature is reported from most parts of the empire, and in some districts the snow covering has disappeared. In the eastern governments frost occurred lately, but it is hoped that the uncovered crops will not suffer much.

UNITED STATES.—The *Cincinnati Price Current* says there is less wheat and more maize being offered and marketed. The wheat crop situation is mostly unchanged, with the exception that a limited area of fly-infested wheat is showing unfavourable effects from freezing.—*Dornbusch.*

THE WEATHER.

MONDAY (December 17th).—The weather was for the most part fine over the Southern portion of the Kingdom, but a change had again set in over the Northern and Western districts. A large cyclonic disturbance was approaching from the Atlantic, and rain fell in Scotland and Ireland. Sunday night was very warm in the West, but it was rather cold in the Midland and Eastern parts of England.

TUESDAY (December 18th).—Dull and cloudy weather prevailed in most parts of England and Ireland, and rain again fell at several of the Western stations. Rain was measured in the morning as the result of the fall in the preceding 24 hours, in Scotland and Ireland, as well as at a few places in the West of England, and some of the measurements were fairly large. The temperature was still high for the time of year over England, but a brisk fall had occurred in Scotland and Ireland. The day was fair in London.

WEDNESDAY (December 19th).—The weather was fine over the greater part of our islands, but the sky was cloudy in many places. The shallow cyclonic disturbance which lay over the Bristol Channel on Tuesday subsequently travelled eastwards, and occasioned heavy rain over the South of England during the succeeding night. The barometer was changing slightly in England, and the winds were generally very light from the westward. Temperature had changed irregularly, the thermometer in the morning being several degrees warmer than on the preceding day in the South of Ireland, while a brisk decrease had occurred in most parts of England. The midday temperatures again exceeded 50 degrees in the Southern districts. The day was fine in London, and the highest temperature was 48 degrees.

THURSDAY (December 20th).—A rapid rise of temperature had occurred over the entire kingdom, the morning readings being ten or fifteen degrees higher than on the preceding day in many places. The midday temperatures ranged between fifty and fifty-five degrees. A strong south-west gale was blowing in Ireland and over the northern portion of the kingdom, and the winds were boisterous over the whole country. The day was dull and gloomy in London, with rain and strong squalls at times; the temperature rose to 55 degrees.

FRIDAY (December 21st).—There was a considerable improvement in the weather over the British Islands, and in many places the sun was shining brightly for several hours. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, over nearly the entire country, but the amounts were not generally large. The wind was boisterous in London in the early morning, but it soon subsided, and the day was fine and bright. The highest temperature rising to 59 degrees.

SATURDAY AND SUNDAY (December 22nd and 23rd).—The weather was very quiet over the Islands during the two days, and the temperature fell generally. On Saturday the sun was bright and warm at Belfast in the west of the storm area, but travelled away to the eastward. During Saturday night the thermometer fell to the freezing point and below in many parts of the country, and the highest temperatures on Sunday were in [illegible] than at Edinburgh in the [illegible] to fifty degrees. A thick fog prevailed [illegible] throughout Sunday, and the air was very damp. The highest temperature in the Metropolis was [illegible] degrees, which is [illegible] below the average. Fog was also prevalent in many parts of England, but it lifted for a time on our south coasts.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—The attendance of buyers was on a very small scale to-day, neither buyers nor sellers manifesting disposition for any business of any moment, while awaiting fresh developments on the turn of the year. Prices in general moved with precision. Good red, 29s 6d., and very fine, 30s 6d, while well-conditioned white is held for 30s, and fine fluffs 31s. 63lb delivered up. Foreign unchanged. Flour remains in sellers' favour in most cases The London Millers' Association made no alteration at this afternoon's meeting. Town households, 25s; and whites, 28s per sack. Top price, town made, 28s nett. English stone, 19s 3d to 19s 9d. Hungarian up to 29s. American first patents quoted at 25s to 26s; second ditto, 23s to 24s; first bakers, 20s to 21s; and second ditto, about 18s to 19s per sack. Grinding barley maintained for Persian, Azoff being against buyers. For the former, 17s 3d would be accepted ex ship, 17s 6d ex quay. Azoff 18s 6d ex ship, and 19s ex quay. Malting unchanged. Oats firm. American mixed clipped, 14s 9d ex ship, 15s ex quay. White clipped, 15s 7½d ex ship, and 16s 1½d ex quay, 40lb. Common Petersburg, 15s ex quay. Vologdas, 14s 6d to 14s 9d ex quay. 38lb. Maize about unaltered, flax being in sellers' favour. American mixed, old 20s 9d, new 20s 7½d ex ship, and 21s 6d landed. Sound La Plata, 24s ex quay. The market for beans and peas remains unchanged. Egyptian splits held for 31s 3d ex mill. Mazagans, 20s 3d landed.

Mark Lane, Friday.—The attendance of buyers was again very small at to-day's market, without, however, causing any disconcern amongst sellers. Prices compare favourably on the week. Good red, 29s 6d, and very fine, 30s 6d; well-conditioned white ruling at 30s to 30s 6d, and fine fluffs, 31s delivered up to 63lb. Foreign remains unchanged. American descriptions continue in ample supply on spot and unchanged. The market for flour remains in a slow state, and occasionally prices were in buyers' favour. The London Millers' Association made no alteration to-day. Grinding barley fairly steady, Persian ruling at 17s 3d ex ship, 17s 9d ex quay. Azoff in these positions, 18s 6d and 19s respectively. Malting ranges at 25s to 35s for English, according to quality. Oats firm, especially for all suitable qualities, which remain scarce, and tend upwards. American mixed slipped quoted 14s 9d ex ship, and 15s to 15s 3d ex quay. White clipped, 15s 9d and 16s 3d in these positions, 40lb Common Petersburg, 15s ex quay, 38lb and 40lb, 16s 3d upwards ex quay. Vologdas, 14s 6d to 14s 9d, 38lb ex quay. Maize maintained. American mixed, 20s 4½d ex ship, new, 20s 9d old. Bessarabian, 23s 6d ex ship. Sound La Plata, 24s ex quay. Beans and peas unaltered. Egyptian splits held for 21s 3d ex mill. Mazagans, 20s 3d landed. Canadian white peas, 29s 6d ex ship.

COUNTRY.

Ashford, Tuesday.—Trade was very quiet all round, and the wheats were in bad condition. White samples made 28s to 29s; and reds, 26s to 28s; malting barley of first quality, 30s to 33s; second quality, 26s to 30s; black oats, 13s to 20s; white ditto, 18s to 21s; tick beans, 31s to 34s; flat maize, 24s; round ditto, 27s to 28s per quarter. Flour unchanged.

Banbury, Thursday.—Wheat, white (old), 27s to 28s 6d per qr; wheat, red (new), 27s to 28s 6d per qr; beans (new), 28s to 30s per qr; oats (new), 16s to 18s per qr; oats (old), black, 21s to 22s per qr. Very small attendance, prices about the same as last week.

Bosto, Wednesday.—Wheat, 26s to 27s; grinding barley, 22s to 23s; malting barley, 24s to 30s; oats, 17s to 19s; peas, 45s to 65s; beans, 23s to 30s; maize, 22s 6d to 23s.

Braintree, Wednesday.—A quiet trade prevailed, wheat out of condition. Prices from 26s to 30s per quarter. Barley strongly represented, best qualities making from 30s to 35s, and seconds 26s to 30s.

Glasgow, Wednesday.—Wheat and flour remain quiet and unchanged. Indian corn meets a small demand at a decline of 3d per boll on the week. Grinding beans and Canadian peas steady. Barley, oats, and oatmeal quiet. Bran and thirds in small request at last week's prices.

Hereford, Wednesday.—Small market, and but few samples changed hands. Wheats were fully 1s per quarter cheaper. Quotations:—Wheat, white, 3s 2d to 3s 4d per bushel; red, 3s to 3s 3d per bushel; barley, 2s 9d to 3s 9d; oats, 2s to 3s; beans, 3s 8d to 4s; maize, 2s 8d to 3s; vetches, winter, 4s to 6s; spring, 3s 6d to 5s.

Ipswich, Tuesday.—Moderate supply of wheat, trade slow at about last week's rates. Reds, 28s to 29s; white, 30s 6d. Fair supply of barley, fine samples in request at fully late rates. Other descriptions slow. Oats firm. Maize about the same as last week. Beans and peas unaltered.

Leeds, Tuesday.—The wheat trade still rules quiet, but fairly steady, with a moderate consumptive demand, and prices are unchanged on the week, which is a healthy sign considering last week's heavy shipments. English barley in better request. Foreign neglected. Maize 3d dearer. Beans and oats steady.—DUNNS AND CO.

Leeds, Friday.—Very little demand for any kind of wheat, without any perceptible change from Tuesday's prices. New English making 27s to 29s; old, 30s to 33s; and foreign, 28s to 32s. More doing in English malting barley, best descriptions ranging from 25s to 31s. Maize, beans, peas, oats, and flour all firmly held.

Lincoln, Friday. Small supply of English wheat. Trade steady at last week's rates. Reds, 27s to 28s; whites, 28s to 29s; foreign quiet. Show of barley small and good malting parcels firm. In oats very little doing at late rates. Beans and peas no change.

Liverpool, Friday.—Wheat firm with a fair business at Tuesday's full prices. Flour is steadily held at last Tuesday's prices, but with only a very small business passing for foreign. The Liverpool Millers Association make no change in the minimum price of bakers'. Maize quiet owing to the near approach of Christmas holidays, and the demand is rather disappointing for mixed American; European practically exhausted. Plate in small request, and generally ½d. to 1d. cheaper. Barley: A quiet business doing at unchanged prices. Feeding slow, without alteration. Beans very firmly held with more inquiry especially from Scotland, Saidis showing 9d. advance since Tuesday. Peas steady, with a fair demand; a shade easier for Canadian. Oats: English are steady but slow. Foreign kinds have a moderate business at last market day's currencies. Oatmeal quiet, with prices favouring buyers. Oilcake steady with a moderate demand at about late rates.—SEGAR AND TUNNICLIFFE.

Louth, Wednesday.—This market was attended by an average number of farmers. For wheat trade was quiet at 26s to 27s 6d per qr. Barley was in small supply; best, 24s to 30s per qr. Oats of good quality were very scarce, and made full prices. Beans and peas were steady.

Maidstone, Thursday. Not much trade in wheat to-day as Christmas so near. Owners of the article did not press sales, so that the rates of last week were not lessened, and we note a firm tone at former cost. Barley a very quiet business, and only the best samples meet attention to any extent. Cold rough lots are very dragging and inclined to go lower. Oats fairly well "hold their own," though not a furious demand for them. Beans and peas are quiet, and, as they are rather scarce, some sold at full rates. Maize does not progress or retard much, and not many buyers for it. We do not note any alteration in other commodities.

Manchester, Thursday.—Little change is noticeable in values compared with a week ago. Trade has ruled quiet all along, only a comparatively small business has occurred again to-day. Sellers of most articles report only a retail inquiry and demand, prices having scarcely been tested during the last few days. It has been decided not to hold a market next Thursday owing to the Christmas holidays.

Newport, Wednesday.—There was a small attendance, little, if any, business being transacted. There was no change in any of the grains. Flour, fines, were quoted at 23s 6d.

Northallerton, Wednesday.—There was a fair attendance. Wheat, to 29s; white oats, 17s to 19s 6d; black Tartary, 17s to 18s per qr.

Plymouth, Thursday.—To-day's market has been quite a holiday one. Wheat maintains the same prices of last week, maize and barley tending in favour of buyers, and oats unaltered.—ORLANDO DAVIS AND CO.

Ripon, Thursday.—A few samples of barley on offer at late prices. The show of local wheat is light. A small attendance. Wheat, English, new, 27s to 29s; ditto, old, 31s; ditto, foreign, 30s 6d to 34s 6d; barley, malting, 24s to 29s; ditto, grinding, 21s to 23s; oats, old, 25s to 26s; ditto, new, 17s to 19s; maize, round, 24s to 27s; ditto, flat, 23s 6d per qr; beans, old, 1s per stone.

Romford, Wednesday.—Wheat trade slow at last week's prices. Red wheat made 27s to 29s, and white wheat 28s to 31s per quarter. Several samples out of condition.

Stockton, Wednesday.—There were only two or three samples showing of farmers' wheat, which made 28s per qr. During the week the trade in foreign wheat has remained steady on a fair consumptive demand, but prices show no change from last Wednesday. Maize and oats unaltered. Malting barley, very little showing at late rates.

Wakefield, Friday.—The trade has already assumed a holiday character, millers confining their purchases to pressing requirements and speculation remains dormant. The tone, however, is firm, all descriptions of wheat being fully as dear as this day week. Fine malting barley is relatively scarce and dear, inferior qualities are almost unsaleable. Beans 6d per qr dearer. Maize and oats steady.—DUNNS AND CO.

Wakefield, Friday.—We have a very quiet market to-day, and in the nominal business doing in wheats, last week's prices are quoted. The supply of barley is fair, with but a moderate enquiry, strictly confined to the finer qualities. Beans 6d per quarter dearer, other feeding stuffs unchanged.—MICHAEL SANDERSON AND SON, LIMITED.

Wolverhampton, Wednesday.—The market was of a holiday character, and business was limited. English wheat, 11s 6d to 12s per 216lb; oats (old), 15s to 16s, ditto (new), 10s 9d to 11s 3d; beans (old), 14s to 15s; ditto (new), 12s 6d to 13s 6d per 196lb; maize (old), 23s to 24s; ditto (new), 22s to 23s per 480lb.

Worksop, Wednesday.—Very small attendance, and small supply of grain. Few buyers. The market will not be open next week. White wheat (old), 30s to 31s; white wheat (new), 27s to 28s; red wheat (old), 27s to 30s; ditto (new), 27s to 28s; best barley, 28s to 32s; secondary, 26s to 28s; grinding barley, 23s to 25s; flat maize, 24s to 26s; round ditto, 27s to 28s; old white oats, 27s to 28s; new ditto, 18s to 20s; old black oats, 24s to 28s; new ditto, 17s to 19s per qr.

FOREIGN.

There has been a fair current of business in disposable wheat at Antwerp. A long spell of mild weather in the French country districts has been succeeded by frost; the change is not unwelcome, as it is calculated to check the growth of noxious vegetation and hurtful insects. Wheat has shown a firm tone at Bordeaux. At Paris, however, business has been inactive, last week's sales amounting to only 6,250 quintals. Transactions in wheat have also been proceeding upon a restricted scale at Paris; prices have shown no change. Flour for consumption has also remained without material variation in the French capital. The exports of flour from France to Great Britain in November were 76,300 cwt, as compared with 73,910 cwt in November, 1899, and 57,100 cwt in November, 1898. The aggregate exports in the first eleven months of this year were 703,140 cwt, as compared with 602,230 cwt in the corresponding period of 1899, and 393,210 cwt in the corresponding period of 1898. The Dantzic wheat market has remained without alteration, but a rather weaker tone has prevailed at Konigsberg. Prices have shown no increase of strength at Tunis, but rather more activity has, at the same time, been noted, from 10,000 to 20,000 quintals of hard wheat having been purchased on Marseilles account. The Odessa wheat market has been generally quiet. The quantity of wheat now en route for Europe is returned at 890,000 qr, as compared with 945,000 qrs at the corresponding date of 1899. The total of 890,000 qr, representing the quantity of wheat now en route for the Continent, is made up as follows:—France, 80,000 qr; Belgium, 220,000 qr; Holland, 165,000 qr; Germany and the North, 205,000 qr; and Italy, Spain, etc., 220,000 qr.

PROVISIONS.

Glasgow, Wednesday.—The arrivals of cheese in the Glasgow market this week were liberal, but owing to the recent wet weather the grocers had done a poor business, and did not feel disposed to renew their stock. The demand was therefore quiet. Cheddars and Dunlops 50s to 64s per cwt. American cheese dull.

Newport, Wednesday.—Good attendance, average supply, and good demand. Quotations: Caerphillies, 63s to 70s; fancy dairies, 72s to 74s; truckles, 56s to 64s; Cheddars, 54s to 58s; doubles, 56s to 60s.

BUTTER.

Wednesday.—Barnsley: 1s 4d to 1s 5d per lb. Boston: 1s 2d to 1s 4d per lb. Colne: 1s 3d per lb. Goole: 1s 3d per lb. Keighley (retail): 1s 4d per lb. Kirbymoorside: 1s 1d to 1s 2d per lb. Knaresborough (wholesale), 1s 9d to 2s; (retail), 2s to 2s 1d per roll of 24oz. Louth: (wholesale), 1s 2d per lb. Market Weighton: 1s 3d per lb. Masham: 1s 8d to 1s 9d per roll of 24oz. Northallerton: 1s 9d to 1s 11d per roll of 24oz. Stockton: 1s 3d to 1s 5d per lb. Whitby: 1s 4d per lb. Worksop: 1s 5d per lb.

Thursday.—Brigg: 1s 1d to 1s 3d per lb. Driffield: 1s 1d per lb. Evesham: 1s 2d per lb. Kidderminster: 1s 2d per lb. Penistone: 1s 4d per lb. Ripon: 1s 10d to 2s per roll of 24oz. Scarborough: 1s 3d to 1s 4d per lb. Sleaford: 1s 1d per lb. Wetherby: 1s 4d to 1s 6d per lb.

Friday.—Chester: 1s 3d per lb. Crewe: 1s 3d per lb. Derby: 1s 4d per lb. Easingwold: 1s 3d to 1s 5d per lb. Grimsby: Choicest Danish, 125s to 128s per 112lb; Finnish, 115s to 120s; Dutch, 112s to 118s; Canadian, 100s to 112s. Helmsley: 1s 3d to 1s 4d per lb. Leeds: Danish, 122s to 128s per 112lb; Irish creameries, 104s to 110s; York lump, 15s to 16s per stone; ditto long rolls, 1½lb, 2s to 2s 3d; fresh butter in 1lb prints, 1s 3d to 1s 4d per lb. Leyburn: 1s 10d to 1s 11d per roll of 24oz. Lincoln: 1s 2d to 1s 3d per lb. Otley: 1s 11d to 2s 1d per roll of 24oz.

EGGS.

Wednesday.—Barnsley: 6 or 7 for 1s. Boston: 8 for 1s. Colne: 2s 8d per score. Goole: 9 for 1s. Keighley: 6 for 1s. Kirbymoorside: 9 or 10 for 1s. Knaresborough: 6 or 7 for 1s. Louth (wholesale): 10 for 1s. Market Weighton: 9 for 1s. Masham: 10 for 1s. Northallerton: 8 or 9 for 1s. Stockton: 6 for 1s. Whitby: 6 and 7 for 1s. Worksop: 3s per score.

Thursday.—Brigg: 10 or 12 for 1s. Driffield: 10 for 1s. Evesham: 1s 6d per dozen. Penistone: 8 for 1s. Scarborough: 7 for 1s. Sleaford: 8 for 1s. Wetherby: 8 or 9 for 1s.

Friday.—Altrincham: 5 for 1s. Derby: 7 for 1s. Easingwold: 8 or 9 for 1s. Grimsby: Austrian, 7s 1d to 9s 2d; Canadian, 8s 6d to 9s 8d. Helmsley: 11 or 12 for 1s. Leeds: Yorkshire, 17s to 18s 6d per 120; Irish, 12s 6d to 14s; Danish, 10s 6d to 12s 6d. Leyburn: 9 or 10 for 1s. Lincoln: 9 for 1s. Otley: 7 and 8 for 1s.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter.—The demand for strictly choicest quality of Australian and New Zealand butter remains good, particularly in country districts, where large quantities have gone to provide for the Christmas market. Prices are easier to the extent of 2s per cwt., owing to rather large arrivals expected next week, combined with the desire of agents to clear their stocks before the holidays. The arrival of the "Kumara" butters at the agents' floors has been very disappointing, and butters which have not come to hand until the end of the week have been sold at 2s per cwt. less than those which reached the market at the beginning. The Copenhagen official quotation again remains unchanged, although there was an advance in price of 1s to 2s per cwt in Manchester on Tuesday. Dutch, French, and Italian butters are all dearer, and the only butter that is cheaper is the Australasian." Cheese.—There is no change in the Canadian market on this side, though there is a better feeling in Canada. The "Kumara's" New Zealand cheese is quoted at 54s.—W. WEDDEL AND CO.

POTATOES.

Borough and Spitalfields, Saturday.—Arrivals have been moderate, but the demand has been slow, with prices for samples except the best have been in buyers' favour. English; Reading giants, 3s to 3s 9d; Professor Maerkers, 3s 3d to 3s 9d; British Queens, 3s 6d to 5s; Up-to-dates, 3s 6d to 5s. Belgian and Dutch: 2s 6d to 3s; Magnums, 2s 0d to 3s; French and German, 3s 3d to 4s per cwt.

HOPS.

Worcester, Saturday.—Trade during the week has been confined to a few retail transactions out of merchants' stocks at about previous rates. There were no hops offered at market to-day. Stocks of all descriptions are unusually low, and the few hops in growers' hands are held for more money than is at present obtainable.

Canterbury, Saturday.—The market is quiet but firm. Medium lots are readily purchased, and an improvement is expected in the general trade with the arrival of the New Year.

FEEDING STUFFS.

London, Thursday.—Linseed has continued a slow market, and prices have given way a little, especially for forward positions, but closes firmer. Calcutta to London and near 57s, December 57s, December-January 56s 6d, April-June 45s 6d. La Plata December 51s 6d, December-January 48s 3d, January-February 45s 9d. Hull very quiet. Calcutta April-June 46s. La Plata December 51s 6d, December-January 48s 3d, January-February 46s. Azoff December-January 53s. To the Continent, Bombay, December-January 57s 9d, March-May 48s 10½d. Calcutta, April-June 46s. La Plata December-January 48s 6d, January-February 46s 3d. Azoff-Novorossisk December-January 52s c.i.f. Linseed cakes steady. London made £8 10s to £8 12s 6d. Russian, £7 15s to £8 ex dock. American Westerns at £7 17s 6d. Cotton cakes quiet. London made £4 17s 6d to £5. Egyptian £4 15s to £4 16s 3d. Rapeseed continues very quiet. Brown Calcutta to London November-December 44s, March-May 39s. To the Continent we quote, Yellow Guzerat November-December 51s 6d, April-June 45s 9d. Yellow Cawnpore March-May 43s, Brown Cawnpore March-May 39s. Brown Calcutta November-December 44s 6d, April-June 39s. Ravison January-February 33s 6d. Cottonseed has been a slow market with little change in rates, except spot Hull, which has declined smartly. Near London £6 13s 9d, December £6 13s 9d, December-January £6 12s 6d, February-March £6 12s 6d. Hull spot £6 8s 9d, December-March £6 10s buyers. Cargoes January £6 15s, February £6 15s.—THE PRODUCE BROKERS COMPANY, LIMITED.

Hull, Tuesday.—The wheat trade is fairly steady to day at about last Tuesday's prices for home-grown. Foreign in limited demand, without material alteration in value from last week. Malting barley meets a fair sale for good quality at late rates. Feeding sorts unaltered. English oats steady at full prices; foreign sells slowly. Beans maintain last week's prices. Flat maize dearer, owing to scarcity. Round dull, and rather easier to buy. Linseed: The arrivals are 100 qrs from Harlingen, 1,907 qrs Konigsberg, 3,728 qrs Libau, 3,498 qrs Novorossisk, 2,475 qrs Riga, 5,492 qrs Taganrog; total 17,200 qrs. The market is quiet, and very little business passing. Calcutta, nominal, 46s 9d. Black Sea, 53s 6d. Petersburg, 54s 9d. Riga and Libau, 54s 6d. River Plate, Dec., 50s 6d; Dec.-Jan, 47s 9d; Jan.-Feb., 54s 9d. Cottonseed: With large arrivals since our last, the spot market has shown weakness, and down to £6 7s 6d accepted, closing, however, with more inquiry thereat. A fair business done during last week at £6 11s 3d December, also same paid January, and was bidding Feb.-March, but £6 10s the quotation these positions to-day. Linseed cakes firm, but fresh orders are scarce. Cotton cakes: A good steady demand at previous rates. Hemp: Market very firm.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 17s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 2s 6d PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 0s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 5s 0d PER TON. ALL F.O.R. HULL.

MOLASSINE, packed in bags, of 1½cwt. each. Price per cwt. 7s. 6d. Price per ton, £6 15s., on rail at works, Silvertown, Essex.

HAY AND STRAW.

Whitechapel, Saturday.—A fair demand prevailed for the shorter supplies on offer. Best clover, 85s to 100s; inferior ditto, 80s to 85s; specially picked hay, 92s 6d; good ditto, 80s to 87s 6d; inferior ditto, 50s to 60s; mixtures and sainfoin, 70s to 90s; and straw, 25s to 36s per load.

Manchester, Wednesday.—Hay, 4½d to 5d; clover, 5½d to 6¾d; ditto (Lincoln), 7d; straw (wheat), 3d to 3½d; ditto (oat), 3d to 3½d per stone of 14lb.

FOREIGN HAY AND STRAW.

London, Saturday.—With continued short supplies, trade has been slightly firmer and full prices are obtainable. We quote: Canadian Timothy and clover mixture, 83s to 85s; Dutch 1st cut clover, 88s 6d to 90s; Dutch and French 2nd cut clover, 90s to 92s 6d; Good Dutch hay, 75s; inferior Dutch hay, 68s. All per ton delivered by barge alongside.—FULLER AND PRENTIS, 9 and 10, Great Tower Street, E.C.

WOOL.

London, Friday.—Wool, English, per pocket of 240lb:—Fleeces, Southdown hoggs, £8 to £11; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers £8 to £11; Leicester ditto £6 to £7. Colonial, per lb:—Victorian, fleece, superior, 1s 4d to 1s 5d; scoured, good, 1s 5½d to 1s 6d; scoured, average, 1s 1d to 1s 1½d; greasy average to fine, 1od to 1od. New South Wales, scoured, average, 1s 1d to 1s 2½; greasy average, 7½d to 8½d. South Australian, greasy average, 9d to 9½d. New Zealand, scoured average, 1s 2d to 1s 3d; greasy average, 9d to 8d; Cape, scoured, superior, 1s 3½d to 1s 4½d; fleece, average, 6½d to 7½d; greasy average, 5d to 5½d. Natal, scoured, 1s 0 to 1s 1d; greasy, average, 5½d to 6½d. Queensland, greasy. Victorian, good to superior, 9d to 11d. New Zealand, fine, 9d to 10d; ditto, medium, 6½d to 7½d; ditto, coarse, 5½d to 6d.

Bradford, Thursday.—The market is brighter, prices being well maintained all round, and fine wools being decidedly stronger for the results of the Liverpool sale. Mohair is quiet, but firm. The export yarn trade is being extended, business, and things are firm all through the trade. Fine mohair is wanted, and alpaca also. The piece trade also shows sign of improvement.

Canterbury, Saturday.—The improvement in trade continues, 6½d per lb being freely bid for Kent fleeces with a possibility of a fraction more being obtainable. Lamb wool 4d to 5d per lb.

Leicester, Saturday.—The improved tone of the [illegible] wool trade is well maintained. This is especially the case in merinoes, which are firmly held for the latest advance. In choice crossbreds there is more doing at firm rates. There is also a better tone in English wools, but only the choicest sorts are in demand. Skins change hands freely. In yarns the workpeople have been well employed. There is also a good turnover in fancy and lambswool yarns at hardened rates. Fine cashmeres dull.

MANURES.

Liverpool, Friday.—Added to the continued mild open weather, the near approach of the Christmas holidays has caused the demand for all produce to be even more restricted. A few sales are transpiring in basic slag, but other fertilisers are idle. For feeding stuffs there is little or no consumptive inquiry, and holders in some instances have reduced quotations. To-day's values are subscribed. Nitrate of soda, best quality, i.e., guaranteed 95 per cent. pure, in bags, £8 5s 0d to £8 10s per ton; East India bone meal in bags, £4 7s to £4 10s per ton; Kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton; Palm nut cake, prime, in bags, £5 5s to £5 7s 6d per ton; Linseed cake, American thin oblong, prime, in bags, £7 10s to £7 15s per ton; Linseed cake, English, prime, in bulk, £8 15s to £9 per ton; Linseed cake, foreign, round, soft and oily, in bags, £8 11s 6d per ton; cottonseed cake, N.A., decorticated, fair to prime, in bags, £5 15s to £7 2s 6d per ton; cottonseed cake, English, decorticated, prime, soft, in bags, £7 5s to £7 7s 6d per ton; cottonseed cake, English, undecorticated, prime, in bulk, £4 15s to £4 18s 9d per ton; cottonseed, crushed, 20 to 25 per cent. oil, prime, in bags, £7 2s 6d to £7 5s per ton; maize, germ meal, English, prime, in bags, £5 7s 6d to £5 10s per ton; rice meal, Rangoon, as imported, in bags, £4 15s to £4 17s per ton, Indian meal, coarse to fine grinding, prime, in bulk, 11s to 11s 6d per 240lb; linseed, fine bold feeding, in bags, £3 3s to £3 5s per qr 416lb; N.A. cloverseed, new red, fair to good, in bags, nominal; D.N.S. brand, superphosphate of lime, guaranteed 25 to 27 sol, in bags, nominal; D.N.S. brand, superphosphate of lime, guaranteed 30 to 31 sol. in bags, nominal; D.N.S. brand superphosphate of lime, guaranteed 35 to 36 per cent., in bags, nominal; basic slag, prime quality, guaranteed 30 to 35 per cent. phosphate, in bags, £1 11s to £1 12s 6d, at the producing depots; basic slag, prime quality, 35 to 40 per cent. phosphate, in bags, £1 13s 6d to £1 14s 6d, at the producing depots; basic slag, finest quality, guaranteed 38 to 45 per cent. phosphate, in bags, £1 16s to £1 17s 6d, at the producing depots.—H. JONES LANGAR AND CO.

Winsford (Cheshire), Saturday. Current prices for salt at the works: Common white salt, 11s per ton; fine screened rock salt, 8s 6d per ton (for truck loads in bulk).—THE SALT UNION, LIMITED.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The aspect of the autumn-sown wheat this Christmastide is satisfactory from Aberdeen to Algiers. So good an autumn for the wheat plant has seldom been known throughout the whole area of the region lying to the west of the tenth degree of eastern longitude. The feature peculiar to this region, which includes Spain, France, the Low Countries, and Western Germany, as well as the British Isles, has been an over average rainfall, which, had it come after eight months of full rainfall, would have been injurious; but, coming as it did after a hot, dry season, did nothing but good, except in the four instances, as on the Tiber, the Ebro, and the Garonne, where it was attended by heavy floods. East of the tenth parallel we have the great German and Hungarian plains, and beyond these the still vaster areas of Russia. The rainfall has diminished as we proceeded east, so that while Hungary had barely enough rain, Roumania had noticeably under an average, and the drought in parts of Russia has been severe.

Passing westward to America we have fairly good reports of the winter wheat in the United States, but in Argentina, where harvest has begun, the rains have been heavy, to the grave interruption of work in the north, though not impossibly to the plumping out of grain in the south, where cutting does not begin before January. The South American export surplus for 1901 is not expected to come within 3,000,000 qrs. of that of the now closing year.

The world's wheat production for the last seven years is estimated as follows, these figures including the Russian returns published in Nov. and the British final figures issued this month:—

1900	308,000,000 qrs.
1899	331,000,000 ,,
1898	357,000,000 ,,
1897	283,000,000 ,,
1896	304,000,000 ,,
1895	313,000,000 ,,
1894	320,000,000 ,,

Before 1894 a total of three hundred millions constituted a bumper year, but with 1894 Argentina came into the field, and we may now reckon an average production at not less than 310,000,000 altogether.

The undoubtedly "lean year" 1897 had one great statistical advantage. It admittedly cleared the grain cupboard of old stocks, and we started on January 1, 1898, with a minimum of reserves. Thus the three years, 1898, 1899, and 1900 stand on their own basis. They have needed about 930,000,000 qrs. of wheat, and they have had a total supply of 996,000,000 qrs. This has grown us full granaries in the United States, Argentina, Russia, and Roumania, but England, France, and Germany are known to have no extraordinary accumulation, and in India there has been positive dearth. The reserves of wheat in Canada and Italy are said to be moderate, but in Spain good. However, no precise figures are available for these countries.

The sales of British wheat last week were 121,000 qrs., against about 140,000 qrs. as a Dec. average. Farmers don't like a price below thirty shillings, and have no reason to like it. Foreign wheat and flour were in fair supply, but not quite up to an average. Thus, with English wheat supplies 15 per cent. below the mean and imports about 5 per cent. short, the stocks in granary had to be drawn upon a little, and the return for 22nd inst. is 2,906,000 qrs., against 2,949,000 qrs. on the 15th inst. Actual imports of the week were:—

Wheat	266,000 qrs.
Flour	164,000 sacks.
Maize	306,000 qrs.
Barley	80,900 ,,
Oats	79,500 ,,

The imports of oilseeds are not published weekly, but those for the last seven days are known to have been heavy, probably not less than 30,000 qrs. of linseed, 25,000 qrs. of cottonseed, and 10,000 qrs of rapeseed, poppyseed, and minor seeds.

The quantity of wheat on passage to the United Kingdom on 22nd inst. thus compared with the same date in the three previous years:—

Californian	1,100,000 qrs.
American	260,000 ,,
Argentine	240,000 ,,
Australasian	210,000 ,,
Russian	10,000 ,,
Other Countries	10,000 ,,
Total, 1900	1,860,000 ,,
1899	1,365,000 ,,
1898	1,510,000 ,,
1897	2,255,000 ,,

The average quantity on passage is 2,000,000 qrs., but as both 1899 and 1898 saw small quantities afloat at Christmas, the reviews, which make a comparison with one year only, are apt to mislead.

Of maize the following are the quantities on passage:—

East coast	600,000 qrs.
Round	140,000 ,,
Yellow	110,000 ,,
Total	850,000 ,,

Of barley there are 495,000 qrs. on passage against 570,000 qrs. a year ago. Present expectations are thus divided:—

	Qrs.
Malting Quality	380,000
Grinding ,,	115,000
Total	495,000

These figures are worth noting, for they show why feeding barley should be very stiffly held. The malting barley is of four leading types (1) Chevalier from California, worth 29s. to 30s. per qr.; (2) Brewing from California, worth 26s. to 27s. per qr; (3) Smyrna and Asia Minor barley, worth 24s. to 28s. per qr.; and (4) a small quantity of Syrian bright, but very hard. Barley worth perhaps 27s. on our market. There are 8,000 qrs. of beans on passage against 8,750 qrs. a year ago, and 12,500 qrs. two years since. Mr. Beerbohm's list for the 21st the following particulars not otherwise obtainable are given of the oilseeds on passage to the United Kingdom and to the Continent respectively.

	To the U.K.	To the Cont.
	Qrs.	Qrs.
Linseed	38,000	120,000
Rapeseed	11,000	40,000
	Tons	Tons.
Cottonseed	16,000	nil.

At this season it is instructive to compare prices at an uniform ton weight of different foods, as among other things it reveals how certain articles, regarded as too good for feeding to stock, poultry, etc., are in reality no dearer than other staples which are commonly used for that purpose.

	£	s.	d.	
Wheat	6	5	8	per ton
Barley	7	3	2	,,
Oats	6	2	8	,,
Cotton Cake	5	0	0	,,
Linseed Cake	8	10	0	,,
Rough Rice	6	0	0	,,
Rice Meal	4	10	0	,,
Locust Beans	5	5	0	,,
Good Bran	5	5	0	,,
Wheat Germ	5	12	6	,,
Coarse Maize Meal	5	5	0	,,
Good Sound Maize	5	10	0	,,
Maize Cones	7	10	0	,,
Rye Flour	7	10	0	,,
American Feeding Flour	5	15	0	,,
Barley Meal	6	0	0	,,

Of these sixteen articles the two cheapest will be seen to be rice meal and cotton cake, while the three dearest are barley, maize cones, and rye flour. About five guineas is a good medium price, and this will command locust beans, good bran, coarse maize meal, and the cheapest maize. The use of cheap maize is not recommended, for maize and rye are the two cereals damaged or sprouted samples of which set up severe complaints very often in the consumer. So much so is this the case with rye that we never quote anything of that staple which is not completely sound.

With respect to recent markets for a variety of minor staples it may be mentioned that good bold dari from Asia Minor has been in request at 25s. per qr., Russian buckwheat has had a fair sale at 26s. to 27s. per 416 lb., good Turkish canaryseed has made 33s. per 464lb., maize germ meal has risen to 110s. per ton, white groats have had a market at £13 per ton for Berwick fine type and £12 for Aberdeen. These are Mark Lane sales. Liverpool has been a good market for Canadian peas at 5s. 7d. per cental, for good (washed) Saida beans at 30s. per qr., for good Panderma beans at 27s. 6d. per qr., for round cut Canadian oatmeal at 19s. per 240lb. sack and for Turkish maize at 4s. 6d. per cental. Bristol has found a sale for American winter fancy flour at 23s. per sack and for best bakers' American spring at 20s. 6d., while some good Essex barley has realised 35s. at Braintree. Oats worth 20s. have changed hands at Newbury, and 51s. per arrived La Plata linseed has been paid at Hull.

THE BALTIC.

The market for wheat cargoes was very steady up to the close on Saturday. A cargo of Californian was placed at 30s., and three of Walla wheat at 28s. 6d., all four on passage. For Blue Stem, a variety of Pacific wheat, on passage, 29s 6d was paid. Australian new crop was in speculative offer at 30s. 6d. for January, 30s. 3d. for February, and 30s. for March shipment. New Zealand old crop was offered at 29s. 3d. for December and 29s. for January shipment. New crop is not yet offered. Other sales were:—No. 2 Hard Winter at 28s. 3d., No. 1 Northern at 30s. 9d., and fine Manitoba at 31s. 9d. per qr.

Maize cargoes for February shipment were offered at 18s. 6d. American, and 20s. Argentine. In the former a fair business was done. Odessa on passage made 22s. 3d., but for April and May shipment from the Euxine and Lower Danube 19s. is accepted, and we may therefore look for sound maize to be cheap in June and the summer.

Other cargo sales have been:—White clipped oats at 15s. 3d., Novorossisk barley at 18s. 3d., Bessarabian rye at 23s., Tangier canary-seed at 45s., and Canadian peas at 28s. per qr.

Sales of oilseed cargoes from the 17th to the 22nd included Calcutta linseed at 58s. on spot, 57s. 9d. due, and 46s. for April shipment. The price of Bombay on spot is 60s., and 49s. 6d. is the price for April shipment. Other sales were:—Egyptian cotton-seed, £6 12s. 6d., due before the 31st, and £6 13s. 9d. for shipment within a fortnight.

The arrivals of grain and seed laden vessels at ports-of-call for the week were 1 wheat (San Francisco).

The sailings of grain and seed laden vessels from ports-of-call for the week were 2 wheat (1 Barrow-in-Furness, 1 Cardiff).

Since January 1st, 1900, the total arrivals have been 326 wheat, 14 wheat and barley, 1 wheat and pease, 7 flour, 12 maize, 1 maize and oats, 27 barley, 19 beans, 10 locust beans, 2 pease, 1 linseed, 6 canaryseed, 2 fenugreek seed, 5 valonea; total, 433.

Last year during the same time the arrivals were 280 wheat, 10 flour, 6 maize, 9 barley, 1 barley and beans, 1 rye, barley, and oats, 12 beans, 4 locust beans, 7 linseed, 6 canaryseed, and 7 valonea; total, 343.

THE HOLIDAYS.

Mark Lane closed from Dec. 21 to 28. The Baltic closed on Dec. 24, 25, and 26. Stock Exchange closed on Dec. 25 and 26, and on Jan. 1. New York Markets closed on Dec. 24 and 25, and on January 1. Paris Market closed on Dec. 25 and Jan. 1. London Term Market.—No calls on Dec. 24, 25, and 26. Paris Term Market.—No calls on Dec. 25 and Jan. 1. New York Term Market.—No calls on Dec. 24 and 25, and Jan. 1. Chicago Term Market.—No calls on Dec. 24 and 25, and Jan. 1.

LONDON TERM MARKET.

This market is held twice a day, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per central recently made :—

WHEAT.—Calls.		Dec.	March.	June.
		s. d.	s. d.	s. d.
Dec. 17	11 a.m.	6 4 ..	6 7 ..	6 7

	4 p.m.	6 4 ..	6 7 ..	6 7
Dec. 21	11 a.m.	— ..	6 7 ..	6 7
	4 p.m.	— ..	6 7 ..	6 7
Dec. 22	11 a.m.	— ..	6 7 ..	6 7

A few sales of maize at 4s. per cental for Feb. delivery took place in the course of the week, and a solitary small transaction in Dec. wheat at 6s. 5d. on Saturday.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

The deposit required from members of the Term Market has been fixed at £50 *minimum* and 1s. per quarter margin on any purchases above 1,000 quarters.

LATEST MARKETS.

CORN.

Aylesbury, Saturday.—Thin attendance, and very little grain on the stands. The wheat trade was quiet at last week's prices. Other sorts of grain unchanged.

Cambridge, Saturday.—The wheat trade during the week has been quiet, but values have been maintained. The supply is small, and condition, though slightly improved, is still unsatisfactory. At this market to-day there was a small attendance. It was a holiday market, and very little business was done. Wheat changed hands slowly at last week's prices. Red 27s to 29s, and white up to 29s per 504lb. There was more inquiry for barley at rather improving rates.

Canterbury, Saturday.—A slow demand owing to the near approach of the holidays. Ruling prices :—White wheat, 29s to 31s 6d ; red ditto, 27s to 30s ; malting barley, 25s to 35s ; grinding ditto, 21s to 24s ; white oats, 18s to 21s ; ditto black, 15s to 20s ; peas, 30s to 33s ; tick beans, 32s to 35s ; mazagans, 27s to 29s ; flat maize, 23s to 24s ; round ditto, 27s to 28s per qr ; winter tares, 6s to 6s 6d per bushel.

Carlisle, Saturday.—Fair supply of oats in our market to-day ; moderate demand at late rates. New, 17s 6d to 18s 6d ; old, 23s 6d to 26s per 336lbs.—THOMAS ROBINSON.

Chester, Saturday.—The market was of a holiday character, and prices showed no alteration. Wheat was slow trade, but there was good consumptive demand for Indian corn. Quotations :—Wheat, white and red, 4s to 4s 1d per 75lb ; grinding barley, 3s to 3s 3d per 64lb ; beans, red, 4s 8d to 4s 10d ; old, 5s 6d per 80lb ; oats, new, 2s 3d to 2s 6d ; old, 3s 6d to 3s 9d per 46lb ; Indian corn, 11s to 11s 3d per 240lb.

Colchester, Saturday.—Holiday market. Small supply both of wheat and barley ; prices unchanged.—FRANCIS AND CO.

Dorchester, Saturday.—Trade ruled quiet all round. The continued damp weather still affects the supply, and there was a small attendance.

Leicester, Saturday.—A fair attendance, with moderate supply of wheat in better condition. Trade slow, at 27s to 31s per 36 stones. Good barley in better demand. Fine oats firm.

Newcastle-on-Tyne, Saturday.—To-day wheat closed much as heretofore. Flour no change. Malting barley disappointing to growers. Oats slack and cheaper. Beans, peas, and maize not so strong.—GEO. W. WATSON AND CO.

Newcastle-on-Tyne, Saturday.—Our to-day's market was quite of a holiday character, no change in any description of grain. Flour last week's quotations.—JOSEPH POLLARD AND CO.

Northampton, Saturday.—Good attendance ; supply and demand ; prices for grain and other farm produce about the same as last market day. White wheat, 29s to 30s ; red wheat (old), 29s to 30s ; barley, 26s to 32s ; barley (grinding), 21s to 24s ; oats, 19s to 22s ; old (fine), 25s ; beans, 28s to 32s ; old, 36s ; peas, 26s to 36s ; flour, 20s to 25s.

Peterborough, Saturday.—A small attendance and very much of a holiday market. The little wheat offering made last week's prices. Not much doing in Spring corn, but the tone was firm for all descriptions.—THOMAS HILL AND SON.

Reading, Saturday.—The proximity of the Christmas vacation had its effect upon the market to-day, which was of a holiday character both as regards attendance and supply, each being limited. There was but little wheat on offer, and the few sales which took place were at last week's quotations, while barley and other descriptions of corn underwent little or no variation in price from recent rates.

Sunderland, Saturday.—Business at this day's market of a holiday character, and prices of all descriptions of grain remain nominally unaltered from last week. Arrivals coastwise—Barley, 1,000 qrs. Foreign—Barley, nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Small supply of wheat, which sold at rather better prices than last week, the advance in some cases being as much as 6d per quarter. Malting barley was firm, with little offering. All feeding stuffs quiet.

Worcester, Saturday.—There was not much disposition to do business. English wheat scarce, and held for last week's full prices. Barley rather cheaper. Very quiet trade, and no alteration in value of feeding stuffs.

York, Saturday.—Quite a holiday market, little wheat offering ; sales at last week's prices. Fine wheat, 28s to 29s ; red and mixed, 27s to 28s per qr of 36 stones. Malting barley in good demand ; fine, 28s to 30s ; good, 26s to 28s ; ordinary, 24s to 26s per qr of 32 stones. Oats firm ; white Tartary, 16s to 17s ; black, 17s to 18s ; short, 18s to 19s per qr of 24 stones. Rye, 7d to 8d ; old beans, 10d to 11d per stone.

CATTLE.

Islington, Monday.—To-day's supply consists of about 200 beasts and 150 sheep ; a few of the former have been sold, but not in sufficient numbers to make quotations worth noting, and for sheep there is no inquiry.

London Central, Monday.—Moderate supplies, trade quiet. Beef : Scotch, short sides, 4s 4d to 4s 8d ; long, 4s to 4s 2d ; English, 4s to 4s 2d. Mutton : Scotch, 4s 2d to 4s 6d ; English wethers, 4s to 4s 4d ; ewes, 3s to 3s 2d ; Canterbury, 3s 1d to 3s 4d. Pork : English, 4s to 4s 2d per 8lb.

Canterbury, Saturday.—The supply was very limited, and not a large demand was experienced. Prices so far as tested remained unchanged.

Carlisle, Saturday.—The supply of Irish store cattle was an excellent one for this season, consisting of about 150 polled bullocks and heifers for wintering and stall-feeding purposes. The attendance was small, and trade slow a £13 10s for polled bullocks ; £6 10s to £10 10s for wintering heifers ; and £14 10s for stall-feeding heifers. Pigs a small show and slow sale at 21s to 23s 6d.

Dorchester, Saturday.—A fair delivery of fat stock, considering the near approach of Christmas and the requirements of trade being mostly met, and a good supply of store lambs. Fat beef met a fair sale, at 10s 6d to 11s per score. Milch beasts marked an upward tendency, prices showing a considerable advance on late markets. Barreners, despite the abundance of keep everywhere, made only a quiet sale.

Leicester, Saturday.—A small supply of stock in rather a poor condition. Trade very sluggish and prices easier all round. Milch cows sold slowly at £14 to £18 per head. Bullocks, £9 to £12 per head. Young stock a poor trade.

Norwich, Saturday.—Store beasts were in large supply here to-day ; trade ruled quiet at last week's rates. There were scarcely any fat beasts on offer ; the few transactions concluded were effected at 7s 6d to 7s 9d and 8s per 14lb. Store sheep moved off slowly at late prices ; keeping hoggets were quoted at 35s to 44s per head ; fat sheep, which were not freely offered, made 8s to 8s 6d and 9s per 14lb.

Worcester, Saturday.—Market was well supplied, but trade was unsatisfactory. Fat cattle sold slowly at about previous rates ; but sheep were less steady. The pig trade was firm, with a fair demand. Beef, 6d to 7d ; inferior, 6d to 5½d ; mutton, 7d to 8d ; ewes, 5d to 6d per lb. Pork pig 10s to 10s 6d ; bacon, 9s to 9s 6d per score.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—An improved demand prevailed for larger descriptions. Quotations :—Fowls : Yorkshire, 2s 3d to 3s ; Essex, 3s to 3s 9d ; Boston, 2s 6d to 2s 9d ; Surrey, 3s to 3s 6d ; Sussex, 2s 9d to 3s ; Welsh, 1s 9d to 2s ; Irish, 1s 6d to 1s 10d ; turkeys, cocks, 10s 6d to 27s 6d ; hens, 4s 6d to 6s 6d ; geese, 4s 9d to 5s 6d ; country ducks, 2s 6d to 3s 6d ; Rouen ducklings, 1s 6d to 1s ; feathered 3½d to 4d ; wild rabbits, 2d to 3d ; tame, 5s to 6s 6d each ; Australian, 7s 6d to 9s 6d per dozen ; pheasants, 3s to 4s 6d ; young partridges, 2s 6d to 3s ; old, 2s 6d ; young grouse, 4s to 5s 6d ; old, 3s 6d to 4s ; hares, 2s to 4s ; leverets, 2s to 2s 6d ; wild ducks, 1s 6d to 2s 6d ; widgeon, 1s to 1s 6d ; woodcock, 2s to 3s ; snipe, 1s to 1s ; golden plover, 8d to 1s ; black ditto, 6d each.

Liverpool, Saturday.—Beef : With the exception of the Christmas holiday demand, trade has been very dull and with larger offerings, the market is easier, and close quiet. We quote to-day : Canadian, corn-fed cut, 20lb to 22lb, 47s to 51s ; 26lb to 35lb, 45s to 47s ; 14lb to 18lb, 43s to 45s ; 36lb to 42lb, 43s to 45s ; 42lb to 48lb, 42s to 43s ; 48lb to 56lb, 41s to 42s ; 56lb to 64lb, 40s to 41s ; 64lb to 72lb, 39s to 40s ; 72lb to 80lb, 38s to 39s ; 80lb to 88lb, 37s to 38s ; 88lb to 96lb, 36s to 37s ; 96lb to 104lb, 35s to 36s ; 104lb to 112lb, 34s to 35s ; 112lb to 120lb, 33s to 34s ; 120lb to 128lb, 32s to 33s ; 128lb to 136lb, 31s to 32s ; 136lb to 144lb, 30s to 31s ; 144lb to 152lb, 29s to 30s ; 152lb to 160lb, 28s to 29s ; 160lb to 168lb, 27s to 28s ; 168lb to 176lb, 26s to 27s ; 176lb to 184lb, 25s to 26s ; 184lb to 192lb, 24s to 25s ; 192lb to 200lb, 23s to 24s ; 200lb to 208lb, 22s to 23s ; 208lb to 216lb, 21s to 22s ; 216lb to 224lb, 20s to 21s ; 224lb to 232lb, 19s to 20s ; 232lb to 240lb, 18s to 19s ; 240lb to 248lb, 17s to 18s ; 248lb to 256lb, 16s to 17s ; 256lb to 264lb, 15s to 16s ; 264lb to 272lb, 14s to 15s ; 272lb to 280lb, 13s to 14s ; 280lb to 288lb, 12s to 13s ; 288lb to 296lb, 11s to 12s ; long middles, 12lb to 14lb, 45s to 47s ; 14lb to 16lb, 44s to 46s ; 16lb to 18lb, 43s to 45s ; 18lb to 20lb, 42s to 43s ; 20lb to 22lb, 41s to 42s ; 22lb to 24lb, 40s to 41s ; 24lb to 26lb, 39s to 40s ; 26lb to 28lb, 38s to 39s ; 28lb to 30lb, 37s to 38s ; 30lb to 32lb, 36s to 37s ; 32lb to 34lb, 35s to 36s ; 34lb to 36lb, 34s to 35s ; 36lb to 38lb, 33s to 34s ; 38lb to 40lb, 32s to 33s ; 40lb to 42lb, 31s to 32s ; 42lb to 44lb, 30s to 31s ; 44lb to 46lb, 29s to 30s ; 46lb to 48lb, 28s to 29s ; 48lb to 50lb, 27s to 28s ; 50lb to 52lb, 26s to 27s ; 52lb to 54lb, 25s to 26s ; 54lb to 56lb, 24s to 25s ; 56lb to 58lb, 23s to 24s ; 58lb to 60lb, 22s to 23s ; 60lb to 62lb, 21s to 22s ; 62lb to 64lb, 20s to 21s ; 64lb to 66lb, 19s to 20s ; 66lb to 68lb, 18s to 19s ; 68lb to 70lb, 17s to 18s ; 70lb to 72lb, 16s to 17s ; 72lb to 74lb, 15s to 16s ; 74lb to 76lb, 14s to 15s ; 76lb to 78lb, 13s to 14s ; 78lb to 80lb, 12s to 13s ; 80lb to 82lb, 11s to 12s ; 82lb to 84lb, 10s to 11s ; 84lb to 86lb, 9s to 10s ; 86lb to 88lb, 8s to 9s ; 88lb to 90lb, 7s to 8s ; 90lb to 92lb, 6s to 7s ; 92lb to 94lb, 5s to 6s ; 94lb to 96lb, 4s to 5s ; short middles, 12lb to 14lb, 43s to 44s ; 16lb to 20lb, 42s to 43s ; fat backs (export), 38s to 41s ; long clear middles, 30lb to 40lb, 41s to 42s ; 40lb to 50lb, 40s to 41s ; 50lb to 60lb, 39s to 40s ; 60lb to 70lb, 38s to 39s ; 70lb to 80lb, 37s to 38s ; short clear middles, 16lb to 20lb, 42s to 43s ; 20lb to 24lb, 41s to 42s ; 24lb to 28lb, 40s to 41s ; 28lb to 32lb, 39s to 40s ; 32lb to 36lb, 38s to 39s ; 36lb to 40lb, 37s to 38s ; 40lb to 44lb, 36s to 37s ; 44lb to 48lb, 35s to 36s ; 48lb to 52lb, 34s to 35s ; 52lb to 56lb, 33s to 34s ; 56lb to 60lb, 32s to 33s ; 60lb to 64lb, 31s to 32s ; 64lb to 68lb, 30s to 31s ; 68lb to 72lb, 29s to 30s ; 72lb to 76lb, 28s to 29s ; 76lb to 80lb, 27s to 28s ; 80lb to 84lb, 26s to 27s ; 84lb to 88lb, 25s to 26s ; 88lb to 92lb, 24s to 25s ; 92lb to 96lb, 23s to 24s ; 96lb to 100lb, 22s to 23s ; 100lb to 104lb, 21s to 22s ; 104lb to 108lb, 20s to 21s ; 108lb to 112lb, 19s to 20s ; 112lb to 116lb, 18s to 19s ; 116lb to 120lb, 17s to 18s ; 120lb to 124lb, 16s to 17s ; 124lb to 128lb, 15s to 16s ; 128lb to 132lb, 14s to 15s ; 132lb to 136lb, 13s to 14s ; 136lb to 140lb, 12s to 13s ; 140lb to 144lb, 11s to 12s ; 144lb to 148lb, 10s to 11s ; 148lb to 152lb, 9s to 10s ; 152lb to 156lb, 8s to 9s ; 156lb to 160lb, 7s to 8s ; 160lb to 164lb, 6s to 7s ; 164lb to 168lb, 5s to 6s ; 168lb to 172lb, 4s to 5s ; short

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

This week witnessed the holding of the great market day on Monday, a full report of which appeared in our Monday's edition, the finish of that day's business, however, not being chronicled, owing to our report leaving early. With regard to value for the best Scotch and Devons quotations must be written fully 4d. per 8lb. lower than on the corresponding day last year, at which reduction a clearance could not be made, about 500 being left unsold. The trade was one of the slowest noted for many years, this being due to the market being held so late this year, the demand being much slacker owing to butchers supplying their requirements at the various country auctions. On Thursday but few transactions were recorded; fat butchering cows and bulls also met with a slow trade, prices ruling in favour of the buyer. At the foreign cattle market there was a light supply, with a firmly firm and steady trade, both in regard to tone and value, where it will be noted the total supply arrived from the United States. The total number of beasts offered for sale on both markets was 5.098, consisting of 3,310 British, and 1,788 from the United States, there being an increase of 940 in the former and a decrease of 1,711 in the latter. The following were the top rates paid per 8lbs. (sinking the offal):—95 to 100-stone Polled Aberdeens, 4s. 8d. to 4s. 10d.; 110-stone ditto, 4s. 6d.; 90-stone Devons, 4s. 8d.; 100-stone Norfolks, 4s. 8d. to 4s. 9d.; 110-stone ditto, 4s. 6d.; 95-stone Runts, 4s. 7d. to 4s. 8d.; 95-stone Herefords, 4s. 6d.; 90-stone Dublins, 4s. 8d. to 4s. 10d.; 95-stone Waterfords, 4s. 3d.; 100-stone Lincolns, 4s. 4d. to 4s. 6d.; 110-stone ditto, 4s. to 4s. 2d.; 100-stone fat cows, 3s. 8d.; 100-stone fat bulls, 3s. 2d. to 3s. 4d.; 90-stone States oxen, 4s. 4d. to 4s. 6d. The trade for sheep at Islington was of a rather firmer nature, there being a better supply in regard to quality, this being especially noticeable with respect to ewes, of which the number on offer was rather small. At the foreign cattle market the supply was larger, and for which there was a steady trade. The total number penned at both markets was 12,462, consisting of 11,110 (increase 3,930) and 1,352 foreign (increase 917). Best pens made per 8lbs. as follows (sinking the offal), 7½ to 8-stone Downs, 5s. 10d. to 6s.; 8-stone Scotch, 5s. 10d.; 9-stone Dows, 5s. 8d.; 10-stone ditto, 5s. 6d.; 10-stone halfbreds, 5s. 2d.; 12-stone Lincolns, 5s.; 9-stone Irish, 5s. to 5s. 2d.; 10-stone Down ewes, 4s. 2d. to 4s. 4d.; 11-stone halfbred ditto, 3s. 10d.; 4½ to 5-stone fat lambs, 7s. 10d.; 7½ to 8-stone States sheep, 4s.; lambs, 5s. The calf trade ruled slow, with only thirty on offer, the best of which made 5s. 4d. per 8lbs. The pig supply was small by 200 head, trade for which was rather firmer.

Trade in the West.

With Christmas once more with us, the trade of the past week has been almost entirely absorbed by purchases suitable to the special needs of the season, to the neglect of almost everything else except dairy beasts, which are still selling very well, and also the fresher condition of barreners, which the present veritably "green" season undoubtedly favours, there being at present in many districts just as much pasture keep as is often seen sometimes at spring-time. Good milchers are making up to £22 apiece, and the better class barreners £22 to £28, as most of the drafts of the latter of a special stamp have been caught up early in the season. The recent fat stock sales have scarcely been attended with the results some of the more sanguine anticipated, the prices of both beef and mutton having fallen below the prices many expected, seeing how well beef has been selling for the greater part of the season, and also mutton as well. But though graziers have failed to make all that they had expected of their bullocks, and flockmasters have had to accept a little less than they had hoped for their mutton, still on the whole there is very little seriously to grumble about or to complain of, for most of the beef has made from 11s. 6d. to 12s. per score for the best weights this Christmas, and some quite 13s., though it is equally true some very serviceable bullocks have barely reached 11s. where there was a plethora brought out almost too early for butchers to know what to do with, as many know to their cost how detrimental too early purchases are, and how much beasts will deteriorate between the time of purchase and slaughter. But in spite of the rates prevailing, the tone of the fair ruled fairly healthy in point of demand, and very few graziers have been compelled to hold their stocks over for want of buyers. The veal trade has kept uniformly buoyant all through, and prices have left little better to be desired; and the same may be written of pork, the heavier weights of porkers making quite 10s. to 10s. 6d., and baconers 8s. 6d. to 9s. 6d. Of course, the heavier grade of sows have been correspondingly cheaper. Good class mutton has been by no means a drug on the market like the poorer runs, the former selling freely at 8d. to 8½d. per lb., and seconds 7d. to 7¾d. Very choice lamb has fetched fancy prices for exhibition purposes—10d. to 1s. per lb. Best fat stock has been a little disappointing in price; this has been more than compensated for by the splendid trade there has been for turkeys and most kinds of poultry, the former as well as geese making more money than has been known for years—turkeys, 1s. to 1s. 3d. per lb., and geese 10d. to 1s. 2d.; but turkeys have undoubtedly been in greater demand this season than has ever been the case before. Therefore, taken as a whole, the Christmas trade to our mind compares very favourably with that of any previous season for years past.

Trade in Ireland.

Again there was a large decrease in both cattle and sheep in the Dublin market on Thursday, there being 1,830 less of the former and 1,454 of the latter. Business was the slowest and most sluggish experienced for years at what is considered the Christmas market for local traders. Rates were from 10s. to 20s. under last week, the rougher classes being very hard to sell. Prime stall-fed bullocks and heifers met with a ready enough sale, but they formed a very small part of the cattle offered for sale. Fairly good beasts also sold pretty well, but other sorts went very badly. Salesmen were very much disappointed at the slow buying, and one cause is said to be the very plentiful supply and low price of fowl this year. Best ox and heifer beef made from 52s. 6d. to 56s., and some extra choice up to 58s. and 59s.; good second, 46s. to 50s.; and rough, 38s. to 44s. per cwt. The trade for mutton was also very sluggish, and home buyers only seemed to want a limited number of aged wethers and medium-weight Mountain sheep. All other sorts were practically a drug, and a clearance could not be effected. The export trade in sheep was very limited. Prime wether mutton, 6d. to 6½d. per lb.; ewe, 4½d. to 5½d. Veal in small supply, and last week's rates well maintained for choice. A small market of good milch cows. First-class springers and newly-calved scarce and brought high prices. Best springers worth £20 and £21, and new milch cows £17 to £20. Pigs were in limited supply, and consisted principally of dealers' lots. Trade opened slowly, exporters trying hard to reduce rates, but taking advantage of the scarcity, salesmen were able to maintain prices. Nice choice porkers suitable for city trade brought rather fancy prices, selling from 48s. to 50s. per cwt. Store cattle at country fairs are not going as freely as some weeks ago.

LONDON.

London Central, Wednesday.—Good supplies, but quiet demand and only limited sales. Arrivals of beef included 150 tons Scotch, 1,800 Liverpool sides, 2,700 hindquarters, and 900 forequarters American refrigerated. Quotations :—Beef, Scotch, short sides, 4s 4d to 4s 6d, exceptionally 4s 8d, long 4s to 4s 4d; English, 4s to 4s 2d; American, Deptford-killed, 3s 10d to 4s; Liverpool, 3s 8d to 3s 11d; American refrigerated hindquarters, 3s 8d to 3s 10d; forequarters, 2s 4d to 2s 8d. Mutton: Scotch, 4s 8d to 4s 10d; English wethers, 4s 4d to 4s 8d; ewes, 3s 2d to 3s 4d. Veal: English and Dutch, 3s 8d to 4s. Pork: English, 3s 8d to 4s; Dutch, 3s 8d to 4s, and 3s 6d to 3s 8d per 8lb.

London Central, Friday.—Supplies good, but trade slow. Arrivals of beef included 50 tons Scotch, 700 Liverpool sides, 3,400 hindquarters, and 2,000 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 4d to 4s 8d; long, 4s to 4s 2d; English, 4s to 4s 2d; American, Deptford-killed, 3s 10d to 4s; Liverpool, 3s 9d to 3s 11d; American refrigerated hindquarters, 3s 6d to 4s; forequarters, 2s 4d to 2s 6d. Mutton: Scotch, 4s 2d to 4s 6d; English wethers, 4s to 4s 4d; ewes, 3s to 3s 4d; Canterbury, 3s 1d to 3s 4d; Wellington, 3s to 3s 2d; Sydney and River Plate, 2s 6d to 2s 9d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 3s 10d to 4s; and Dutch, 3s 8d to 4s 4d per 8lb.

Islington, Thursday.—A moderate supply of beasts was placed on the market, a good proportion of which consisted of those left unsold from Monday last, fresh arrivals mainly comprising fat bulls and rough cows from south-western districts. Very few buyers were present and trade ruled very slack, particularly for best cattle, while middling sorts moved off quietly. Scotch nominal at 4s 8d to 4s 10d per 8lb. Sheep pens were filled to a moderate extent, but the dulness prevailing in the cattle section was reflected on this market, and quotations in several instances were quite nominal; 9-stone half-bred wethers, 5s 6d; 10-stone ditto, 5s to 5s 2d; 10-stone Down ewes, 4s to 4s 4d; 11-stone half-bred ditto, 3s 8d to 3s 10d. Only a few calves were on the market, and met a quiet sale, the best making 5s. 6d. Pigs, in good supply, evidenced a moderate demand. Neat small sold 4s 4d to 4s 6d per 8lb, to sink the offal. Total supplies: 290 beasts, 550 sheep, 20 calves, 230 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—The best beef met with a good demand, prices being quoted up to 12s 6d per score. There was no demand for anything lower than choice. Small Kent mutton fetched 5s to 5s 6d per 8lb, and Downs 5s 8d to 6s. Large wethers and ewes were not wanted. Pork sold well, roasters making 10s 6d to 11s per score, and big hogs 9s 6d to 10s.

Basingstoke, Wednesday.—At Raynbird and Son's sale-yard, the attendance was small to meet a supply of 17 fat beasts, 18 calves, 113 sheep and lambs, 104 pigs, and 21 head of dairy and store cattle. Fat beasts made up to £17 15s; fat calves, 70s to £6; smaller, 45s to 55s; fat wethers up to 45s; ewes, 30s; lambs, 33s; fat hogs up to £5 17s 6d; porkers, 32s to 50s; store pigs, 9s 6d to 25s 6d; dairy cows up to £21 10s. A short supply of fat beasts met with a very slow trade and limited enquiry, local butchers having mostly filled their Christmas requirements, and the great fall in the prices in the London and other cattle markets has a serious adverse effect on the trade. A short supply of fat sheep and lambs were mostly cleared. Hants Down wethers and ewes made 5s. 10s 6d. to 6s. Lambs, 5s. 2s 6d. Exmoor ewes, 27s 6d. 30s. Store black face Scotch wether lambs, 19s, etc., etc. With a short supply of dairy cows on offer trade ruled brisk, there being a good attendance of buyers present. Fat calves met a clearance at late prices. Fat porkers sold readily with a firm trade. Store pigs were slightly lower in price. Ruling values:—Best quality fat sheep, 8d to 8½d per lb.; second ditto, 7d to 7½d per lb.; old ewes and inferior ditto, 5½d to 6½d per lb.; fat calves, 6d to 9d per lb.; fat porkers up to 11s per score.

Beverley, Wednesday.—A small supply of stock. The few beasts shown met with a ready sale at good prices. Sheep fetched plenty of money. There was a fairly good show.

Boston, Wednesday.—A small show and a very quiet trade. Store beasts, £10 to £12; in-calvers, £22; heifers, £18 to £21; calves, 65s; store lambs, 24s to 30s.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne :—

Prime stores.		Thickness of fat in any part of the back.		Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	—	2½ in. and under..	..	9s 0d
Under 10 sc 10 lbs ..	..	Not exceeding 2½ in.	—	8s 6d
Under 11 sc 10 lbs	—	Not exceeding 2¾ in.	—	8s 0d
Under 12 sc ..	..	Not exceeding 3 in.	—	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows :—Beasts, 402; sheep, 301; pigs, 490; horses, 12. Beef, 7s to 8s per stone; mutton, 4s 2d to 5s 6d; pork, 6s 3d to 7s. A smaller show store beasts and all cleared. Fat beasts, a very good show, and a fair trade. Fat sheep, short supply, and trade good. Stores. Fat pigs, a larger show, and prices well maintained. Stores, a fair trade. Hay, straw, and roots, a good supply, and fair trade all round.

Dublin, Thursday.—A dull, lethargic market, and no improvement quotable in prices. For a Christmas market the show of prime cattle was distinctly poor, and the rough sorts, which were too plentiful, could not be cleared even at a reduction. Sheep in excess of requirements, and except for something choice for local wants, lower prices prevailed, and a clearance impossible. Cattle (best), 31s to 33s 6d per cwt. Rough descriptions, 26s to 30s per cwt. Mutton, 5d to 6¾d per lb.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Beef and mutton in good demand at late rates. Horned bullocks, to £18; Shorthorn cows, to £17; Galloway heifers, £14; Ayrshire bullocks, to £14; cross-bred heifers, to £14; Ayrshire bullocks, to £13; Cheviot ewes, to £3 each.

Gisburn, Wednesday.—Small show of beasts, and prices had a drooping tendency, extending to 20s per head. English calvers £15 to £21, geld cows £13 to £19, cross-breds £5 10s to £11 10s, fat beasts £11 to £15, bullocks £12 to £15, lambs 19s to 24s, half-bred sheep 33s to 34s, ditto wethers 36s to 38s, Scotch sheep 21s to 25s, ditto wethers 31s to 33s.

Glasgow, Wednesday.—Number of cattle, 949; sheep, 4,526. Trade better, and values a turn dearer. Top mutton, 8½d to 8¾d per lb; secondary, 7¾d to 8d. Top Scotch cattle, 68s per cwt; top Irish, 60s to 62s. Dead meat: Improved demand, and values firmer; best States beef, 5½d to 5¾d; best Scotch, 6d; cows, 4½d to 4¾d.

Hereford, Wednesday.—Small demand for fat beasts, and consequently many prime animals remained unsold. Last week's prices, however, were maintained. Best quality, 5½d to 6¼d per lb. But few sheep, and very little demand, only choice wethers finding a demand; prices ranged from 6½d to 8d per lb, and ewes about 5½d per lb. Calves, which sold pretty well, 8½d per lb, and lambs about 8d per lb. Pigs the same as last week.

Hereford, Wednesday.—Return of stock brought to the cattle market this day :—Bullocks and cows 383, calves 77, sheep and lambs 687, pigs (fat and sows) 24, sucking pigs 30, pigs (stores, not more than ten) 215, pigs (stores, more than ten) 81, horses 1, colts 1. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 9d per lb; lamb, 8½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report supplies were as usual, short at the market following the Christmas sale; prices both for fat cattle and sheep were satisfactory, there being plenty of purchasers for the numbers penned. Beasts made up to £36 10s. Fat swine sold freely, the recent high rates being fully maintained. Weaning calves were well represented, several of the best making from 70s to 80s. Fat calves were in fair request without alterations in value. Several cows and heifers were penned, heifers making up to £22 5s. Shorthorn cows and calves £14 10s. Some good lots of grazing cattle were penned with prices much the same, ranging from £9 10s to £4 12s 6d. Numbers at sale—Beasts 389, calves 45, sheep 661, swine 762, horses 6.

Knaresborough, Wednesday.—At the fortnightly market to-day there was only a small show and a slow trade for grazing stock. Yearling bullocks and heifers, £6 to £8; two-year-old bullocks, £9 10s to £11; ditto heifers, £8 10s to £10 10s; calving cows, £18 to £20; calving heifers, £14 to £16 10s; geld cows, £8 to £10.

Leicester, Wednesday.—Very good supply of home-fed bullocks. Buyers and dealers were well represented, and trade ruled rather sluggish at easier rates, the bulk of the stock declining 10s to 15s per head. Bullocks, 6d to 6¼d per lb; cows, 5d to 5½d per lb; heifers, 6¼d. Sheep were a full delivery, and sold slowly at 7¼d to 7¾d per lb for choice light wethers; large sheep, 6¾d to 7d per lb; ewes, 6d. Calves a dull trade at 7d to 7¼d per lb.

Newcastle, Tuesday.—Excellent Christmas market. Beef 9d up on last year, mutton ½d dearer. Numbers :—Cattle, 2,452; sheep, 5,178; pigs, 1,715; calves, 64. Prices (sinking offal) :—Beef, 5s to 8s 6d; pork, 5s to 9s 6d per stone; mutton, 5d to 8½d; veal, 5d to 8d per lb.

Newport, Wednesday.—There was a small supply on Wednesday, and very few buyers attended. Messrs. Newland Davis, and Hunt brought under the hammer about 20 head of fat cattle and 150 sheep. The beef realised 6¼d to 7d per lb, wethers fetching 8½d per lb, and ewes 7d per lb.

Penistone, Thursday.—The cattle exhibited has been much below the average, all good dairy stock being bought up at good prices; best milch beasts, £18 to £22; secondary, £14 to £17.

Preston, Wednesday.—Fair attendance, and moderate supplies in all departments. Trade for calves was a little better, but prices were hardly varied all round. Beef, heifer and bullock, 6d to 6¼d; cows and bulls, 5d to 5½d; mutton, hoggs, 8d; Cheviots, 8½d; tups and ewes, 5½d to 6¼d; calves, 6¼d to 8d. At market—185 cattle, 1,960 sheep, and 75 calves.

Romford, Wednesday.—A very small market, owing to the nearness of the holidays. Fat beasts made from 4s to 4s 4d per stone. Trade for calves poor, at 5s 6d per stone. Best sheep made 5s 4d to 5s 8d, and ewes 4s 4d per stone. Pig trade about the same.

Stockton, Wednesday.—There were on offer 199 cattle, 1 calves, and 297 sheep. Very little Christmas beef was on show, and customers were few. Best cattle made 7s 6d to 8s per stone, and rougher kinds, 6s 6d to 7s. Calves sold at 7d per lb, sheep 8½d per lb, ewes 6½d, and tups 4½d to 5d.

Taunton, Saturday.—Very short supply. Small attendance, very little trade done.

Wakefield, Wednesday.—The Christmas show was a disappointing one, the day fixed being too near Christmas. Consequently many buyers had purchased. Beef: Slow trade, and only exceptional cases 7d per lb could be reached. Choice little sheep made 8¼d; good strong sheep, 7¾d; ewes and tups from 7½d. Trade was brisker in mutton, numbers penned being little less than half last year's. Beasts 1,865, sheep 8,[illegible].

Wakefield, Wednesday.—Although this was the annual Christmas show there was slow trade in both beef and mutton. Fine show of fat beasts, but quiet demand. Best beef, 6¼d per lb; other qualities, 5d to 5¾d; small sheep, 8¼d; strong sheep

7d to 7½d; ewes and tups, 5½d to 6½d. Numbers penned:—Fat beasts, 1,865; sheep, 2,612.

Wetherby, Thursday.—We had a fair show of cattle. Calving cows good to sell. Store stock a very slow sale at less money. No fat stock shown. Calving cows, £12 to £21 each; store beasts, £4 to £9 each; store pigs, 15s to 45s each; pork, 7s per stone.

Worksop, Wednesday.—A Christmas holiday market, which has sometimes been a good one for a few light weight animals, but to-day the contrary was the case. A few animals were shown, which met with anything but a ready sale, very few purchasers being present. The same applies to sheep and pigs.

York, Friday.—Calves, 8d per pound; small sheep, 8d per pound; large sheep, 7d to 7½d per pound; ewes, 6d per pound; small pork pigs, 7s per stone; large pork pigs, 6s 6d per stone; bacon pigs, 5s to 6s per stone.

FOREIGN.

Deptford, Wednesday.—Beast supplies totalled 756 an increase of 171 as compared with last Monday's figures, and consisted of shipments from the United States. The quality throughout was much poorer than last Monday, which caused trade to be of a slower nature, at 3s 11d to 4s 4d per 8lb, to sink the offal.

SOCIETIES.

Shropshire Sheep.

The annual meeting of the Shropshire Sheep-Breeders' Association and Flock Book Society took place on the 10th inst., at the Grand Hotel, Birmingham, Mr. J. Bowen Jones presiding. The secretary read the report, which stated that the present numerical strength of the Society was 252 life members and 211 annual members, making a total of 463. The statement of accounts showed the total worth of the Society up to September 29th to be £1,261 4s. 4d., made up as follows:—By investments, less amount due to bank, £1,120 16s. 8d.; and net cost of Flock Books on hand, £140 7s. 8d.; an increase of £9 15s. on last year's statement. The large and important shipments of Shropshire sheep had been a great feature of the year. The breed was now making considerable headway in different countries, both as a pure breed and for crossing purposes, and it thus behoved breeders to take the greatest care possible to maintain the supremacy of the breed at home and abroad as the sheep that will most readily adapt itself to any soil or clime.

During the year Shropshire sheep had been exported to the following countries:—South America, United States, Canada, South Africa, Russia, Australia, New Zealand, Tasmania, Germany, France, etc., viz., 361 rams and 503 ewes, or a total of 864, as against 1,086 in 1899, a record year, and 921 in 1898. The decrease was accounted for by the unfortunate outbreaks of foot-and-mouth disease in this country, which caused one of the principal foreign ports to be closed against the landing of English-bred stock, viz., Buenos Ayres, which this season has only taken 205 sheep, as against 298 in 1899 and 438 in 1898. The Council recommended that a sum not exceeding £85 be set apart in 1901 for the purpose of promoting the interests of Shropshire sheep-breeders, and making more widely known the special attributes of the breed.

In moving the adoption of the report, the chairman said the financial position of the Society was fairly satisfactory, the income amounting to £227, as compared with £221 last year and £299 in 1898. There had been a falling-off in the ordinary fees from £57 to £50, and an augmentation in the exportation fees from £28 last year to £50 this year. The expenditure remained about the same, £193, that being about the normal sum to pay out before distributing anything in the way of prizes. After deducting the £193 from the £227 there remained a balance of about £34, to which must be added £35 subscribed for a special purpose, or a total of £70 to be distributed in prizes. As they desired to spend in that way £85, they would exceed the amount at their disposal by £15, and it would be a question for the consideration of the Council whether they should not increase slightly the registration fees, so that the total income might be brought up to the full requirements of the Society.

The fact that fewer sheep were exported this year was due to the outbreak of foot-and-mouth disease in this country for a short period. He was convinced, however, that the country was now free from that pest, and in a short time, no doubt, Argentina would remove the restrictions which had been placed on the importation of pedigree stock to that country. When that was done the trade would soon become as important as it had been in the past. The money voted last year had been expended in prizes at the Royal Show at York, at the Shropshire and West Midland Show at Shrewsbury, at the Dublin Society's Show, and at the Birmingham Cattle Show, and the members might congratulate Mr. Philo Mills on having won the Society's prize. They had also given prizes to various shows abroad, and it would be a question for the Council to consider whether they should give so many prizes abroad or whether they should not curtail them and increase the number at home.

Mr. W. F. Inge seconded the resolution, which was carried. Messrs. R. Brown, C. Coxon, J. E. Farmer, T. Fenn, A. S. Gibson, W. F. Inge, P. A. Muntz, M.P., E. Nock, R. H. Stubber, W. Thomas, A. P. Turner, and H. Williams, were re-elected members of the Council.

On the motion of Mr. T. F. Cheatle, seconded by Mr. A. S. Berry, it was resolved to suggest to the Council of the Smithfield Club that the prizes for Shropshire sheep at the Smithfield Club Cattle Shows should be £10 and £5 for pens of three fat wether lambs under twelve months old, and £15, £10, and £5 for pens of three fat wether sheep above twelve and under twenty-four months old. Mr. Cheatle said that at present the order was reversed, but the view of Shropshire breeders was that the best prizes should be given to wether sheep.

National Pig Breeders.

An extraordinary general meeting of the members of this association was held, by permission of the Council of the Smithfield Club, in the club room of the Royal Agricultural Hall, Islington, N., on the 11th inst., Mr. P. L. Mills (President) in the chair.

The minutes of the last meeting were read and confirmed. The business before the meeting was to confirm the following resolution, passed at the annual general meeting, held at York, viz., "That Bye-law 2 be altered as follows:—'Life members shall pay on election a subscription of £15 15s.; but members of five years' standing may become life members by a payment of £10 10s., members of seven years by a payment of £8 8s., and members of ten years and upwards by a payment of £5 5s.'"

Mr. Hiscock then proposed, and Mr. J. Robertson seconded, that the resolution be confirmed, and that the secretary send a circular to members notifying the same, also giving the date of their election.—Carried unanimously.

A cordial vote of thanks was given to the Council of the Smithfield Club for the use of the room.

A Council meeting was held at the conclusion of the general meeting, when the minutes of the last meeting were read and confirmed, and several new members elected.

Messrs. Dodds' application for the prefix Mollington was granted.

The finance committee reported the balance at the bank to be £100 19s. 4d. Four members were still in arrear with their subscriptions for 1899, and 22 remain standing for the present year. The liabilities amounted to £37 5s. 6d. This report was adopted.

It was decided to offer to the Council of the R.A.S.E. four gold medals, value £5 5s. each, for champion prizes at the Cardiff Show, for the same breeds and under similar conditions as in previous years. It was also decided to offer silver medals at certain county shows, which shows will be decided upon at a future meeting.

The secretary was instructed to arrange for the next meeting to be held on Wednesday, February 27th, 1901, at the Agricultural Hall, Islington, N.

Shire Horse.

In the unavoidable absence of Lord Middleton (the President), Lord Hothfield (Past-President) occupied the chair at the meeting of the Council, held at the Society's House, 12, Hanover Square, on the 13th inst., when 24 new members were elected.

Finance Committee.

Mr. W. Cecil Salt submitted the report of this committees, indicating a balance of £379 8s. 7d. on the current account at the bankers, with £750 on deposit. The secretary's receipts since the last meeting had been checked and found correct, and accounts amounting to £762 9s. 3d. were ordered to be paid. This report was adopted.

Editing Committee.

Mr. J. W. Kenworthy (Vice-Chairman) presented the following list of prefixes for which application had been made, and which the Council had approved:—Belnie, W. M. Smith; Bledington, W. C. Jeffries; Chiltern, Joseph Brandon; Curf, R. R. Childs; Elmside, instead of Twyeross, Arthur Haywood; Garland, instead of Arley, James Whitlow; Purton, James Webber; Walpole, Richard Carter; West Riding, Arthur Lindley.

The committee recommended that in future the entries for the Stud Book should close on July 1st. The committee had carefully revised the proofs of the 1900 Show report, and presented it for press, while they reported that they had met the previous week, and had dealt with the entries received for Vol. XXII. of the Stud Book, to be issued early in the new year.

Mr. Kenworthy, in presenting this report, drew the attention of the Council to the proposal to close the entries on July 1st, instead of August 1st. This recommendation was due to the very large increase of entries in the Stud Book, and the necessary preparation for the press demanded a longer time than was at present available. To get the Stud Book out to the members before the Show, it was deemed desirable to close the entries a month earlier.

The report was then adopted.

Horse Show Committee.

Lord Hothfield reported that Mr. J. T. C. Eadie, Mr. T. B. Freshney, and Captain Heaton had accepted the invitation of the Council to act as judges at the next Show, while Professor Axe had accepted their invitation to act as veterinary inspector, and the three following gentlemen were selected to act with him, viz., Mr. J. C. Snowball, of Portsmouth; Mr. T. W. Lepper, of Aylesbury; and Mr. J. Malcolm, of Birmingham.

The grants to the London Cart Horse Parade and to the Provincial Cart Horse Parades were £50 and £75 respectively, renewed on the same conditions and lines as 1900, but parades held at any of the agricultural shows were debarred from participating in the latter scheme.

The tender from Messrs. Mappin and Webb for the new gold challenge cup for the best mare or filly in the show was accepted.

Notice of Motion.

Mr. A. H. Clark gave notice that at the next meeting of the Council he would move:—"That to the conditions of entry for Vols. XXIII. and XXIV. shall be added:—'That for the purposes of export, and to meet the requirements of the American Government, any mares having produce in Vol. I. to XXII. can, on application, be registered in Vol. XXIII. or Vol. XXIV.'"

Date of Council Meetings, 1901.

The Council then arranged the dates of their meetings for 1901, viz., February 5th (Hanover Square), February 28th (Agricultural Hall), April 2nd (Hanover Square), June 25th (Royal Show at Cardiff), November 5th and December 10th (Hanover Square).

Hackney Horse.

Meetings of the Council and committees were held at 12, Hanover Square, on the 11th and 12th inst., and 13 new members were elected.

The Council received from the judges selection committee the names of gentlemen suitable to officiate as judges at the next London show. The following were elected by ballot:—Yorkshire and district: Judge, Charles Goodlass, Skerne, Driffield; first reserve, G. M. Gale, Atwick Hall, Hull; second reserve, Alfred Craggy, North Newbald, Brough, Yorks. Eastern district: Judge, Joseph Morton, Stow, Downham; reserve, William Flanders, Witcham House, Ely, Cambs. Other districts: Judge, Sir Gilbert Greenall, Bart., Walton Hall, Warrington; first reserve, William Scott, Gilfoot, Carluke, N.B.; second reserve, Austin C. Carr, Broxton, Cheshire. Pony and Cob classes: Judges, Eustace Smith, Benton House, Newcastle-on-Tyne; John Major, Sledmere Grange, York; first reserve, Colonel Thwaites, Furze Hill, Pool, near Leeds; second reserve, H. W. Jermyn, Silfield, Wymondham, Norfolk.

Council Selection.

This committee reported that they had most carefully considered the numerous names submitted to them by members for the renewal of the Council by the appointment of ten new members in place of those retiring at the next show. From the names suggested, 30 were selected in the various divisions in such proportion that each district of the United Kingdom would be fairly represented on the Council. These 30 names would be submitted to the Council in February next, and 20 would be elected by ballot for insertion on the voting paper, a copy of which would be issued to every member.

Horse Show.

Sir Walter Gilbey, chairman of this committee, reported that the following four gentlemen had been appointed to assist Professor Axe in conducting the veterinary examination:—Mr. A. W. Briggs, M.R.C.V.S., 13, Harrison Road, Halifax; Mr. Fred. Low, M.R.C.V.S., Norwich; Mr. F. Roberts, F.R.C.V.S., Tunbridge Wells, and Mr. R. Rutherford, F.R.C.V.S., 8, Grove Street, Edinburgh. The committee recommended that the classification at the show should be resolved into three classes, viz., Hackneys, cobs, and ponies, each harness class being inserted under its proper section. Various points as to the purchase of champion cups, award of medals, etc., were decided, and it was agreed to renew for next year the offer of gold and silver medals to affiliated and other shows.

Editing.

The report of this committee, presented by Mr. John Rowell, dealt mainly with the question of illustrating the new volume of the Stud Book, which will be ready for issue at the commencement of February. The exclusive right to the following affixes was granted to the various applicants:—Ayton, Blackpool, Boulevard, Clonard, Crookes, Derwen, Drake, Hill, Heathfield, Hollin, J.P., Kingsbury, Longford, Maitland, Norbury, Normoss, Rollerton, Rossie, Salford, Sandringham, Whitegate, Wendle, Wolferton.

Finance.

Mr. Brunton moved the acceptance of the finance committee's report, showing a balance in the bank of £250 0s. 3d. Cheques were drawn in payment of accounts amounting to £217 13s. 3d.

Next Meeting.

The Council then adjourned until February 5th, 1901.

(Other Societies will be found on pages 825, 877.)

LIVE STOCK.

OUR ILLUSTRATIONS.

Three winners of special prizes at the Royal Dublin Society's Winter Show, held on the 11th, 12th, and 13th inst., form the subjects of our cattle illustrations this week. The heifer, which is the property of Mr. Joseph Lowry, Bachelor's Lodge, Navan, won first prize in the class for heifers other than Kerry or Dexter breed over two and under four years old, under 10 cwts. and under live weight, also winning the challenge cup, value twenty guineas, for the best animal in the class.

The pair of animals was exhibited by Mr. H. D'E. Strevens, Castle Cote, Roscommon, and they won the special prizes of £5 for the best ox and heifer, the property of the exhibitor, fed in the province of Connaught, from the 1st August last, to the date of the show. The ox, whose sire was an Aberdeen-Angus and dam Shorthorn, won the second prize in the class for in-fed natural polled ox, over two years eight months, and not exceeding three years; whilst the heifer was unnoticed in her class, that for in-fed horned or artificially-polled heifers over two years, and not exceeding two years and eight months.

In addition to the above we give a photograph of a section of the poultry show held in connection with the Smithfield Club's exhibition at the Royal Agricultural Hall, Islington.

Steer and Heifer, the Property of Mr. D'E. Strevens. Winners at the Dublin Fat Stock Show.

STOCK AND SHOW NOTES

By Herdsman.

On Tuesday the new railway service built to bring Deptford Cattle Market into direct communication, through the L.B. and S.C. Ry., with the outside systems of the metropolis, was opened. Property to the amount of about £12,000 has been acquired in order to carry the line to its destination. The estimated cost of the works outside the market is £13,000, and the amount expended in connection with the laying of lines and other works inside the Corporation's property is £5,000. At the same time extensive alterations have been made within the market, providing increased lairage accommodation, together with extra jetty space for the unloading of cattle ships at all states of the tide. The first truck-load of beef was loaded for Eastbourne. Carcases of meat will henceforth be sent to all parts of the kingdom without touching the Smithfield Market, and those connected with the trade are hopeful that the trade at Deptford will be developed very considerably thereby. Under the old system the meat was conveyed to Paddington and Nine Elms Stations, which meant much delay and inconvenience.

The total number of beasts received at the Foreign Market, Deptford, from January 1st to the 13th December, inclusive, amounted to 55 200 head, this being almost identical with last year's figures, but a comparative decrease of about 55,700 on the quantity available during 1898. Of the above total the United States contributed 106,150 as against 86,300 last year; Canada 24,990 against 15,000; and Argentina 24,070 against 54,600 during the corresponding period of 1899. Imports from both the United States and Canada show an appreciable increase, which was the reverse as regards the former at this period twelve months ago.

The excessive depreciation in Argentine shipments to this country—viz., 3,000 head—is attributable to the outbreak of foot-and-mouth disease in that country in April last, arrivals up to this time having been on a liberal scale. Under the circumstances the Board of Agriculture issued an order that all animals from the River Plate would have to be slaughtered within thirty-six hours of landing, and beasts from other countries within five days. In consequence of this restriction the order of the market days, viz., Monday and Thursday, was revoked, and offers have since been made on days, virtually, when salesmen have felt so disposed. The prohibitive law regarding Argentine animals still remains in force.

The head of a prize Hereford steer, purchased from Her Majesty's herd by Mr. F. M. Garlich, butcher, of Trowbridge has, it is said, been purchased by the British Museum, it being considered the most typical of its class ever seen.

Considerable interest was taken in the Swine Carcase Competition at the Suffolk Fat Cattle Show last week, but excitement ran high when it was rumoured that the Large Black, the Tamworth, and the cross-bred pigs were not this season to have quite a walk over, as entries had been made by Mr. Sanders Spencer, of Holywell Manor, near St. Ives, Hunts, who was to send two Large White pigs to compete for the coveted prizes. Of course, everyone who knows anything of pig breeding, and of bacon-curing has heard for the best part of half a century of Mr. Spencer's pigs, which have proved in all climes that utility and prize-winning points can be combined; it is therefore some consolation to the breeders of Large Black pigs to have to suffer so dire a defeat at the hands of such a master in the art of pig-breeding, but also, in one class, by a cross Holywell and Large Black pig. Both first prizes were easily won by Mr. Spencer's Large Whites, which have thus given the Large Black men a standard to breed up to in the future.

The Devon County Agricultural Association have accepted the invitation of Torquay to hold their show at that town next year, and the dates fixed are June 4th, 5th, and 6th.

The Department of Agriculture and Technical Instruction for Ireland desire to intimate that, until further notice, sheep from Great Britain, like other ruminant animals and swine, must be accompanied in each case by an official permit from this department before they can be imported into Ireland.

CATTLE.

Sale of Shorthorns at York.

At the Covered Cattle Market at York, on the 13th inst., Messrs. John Thornton and Co. offered a number of pure-bred Shorthorn bulls which, with two or three exceptions, had been exhibited at the fat stock show held the previous day. The highest price obtained was 71gs. for Sir John Swinburne's "Royal Earl Waterloo 5th," bred by the exhibitor. Lord Middleton's winner in the class not exceeding 21 months old, "Bellman," bred by the exhibitor, fetched 41gs. Altogether the 17 lots brought under the hammer realised £485, or an average of £28 8s. 3d. The chief prices were:—Bellman, Lord Middleton's, red, c. 1899, s. Wamba, sold to Mr. Jonas Webb, Melton Ross, for 41gs.; Alexander, exors. of late Thos. Stamper, Nunnington, York, red, c. 1899, s. Emperor of Waterloo 29th, Mr. A. A. Avis, Stoke Bardolph, Nottingham, 35gs.; Royal Earl Waterloo 5th, Sir John Swinburne's, Capheaton, Newcastle-on-Tyne, roan, c. Jan. 1900, s. Grand Earl of Waterloo 20th, Mr. C. H. Paine, Inglestone, Essex, 75gs.; Linguist, Lord Middleton's, roan, c. March 7th, 1900, s. Wamba, Mr. G. Scoby, Bradlam, Nawton, 50gs.; Sir George Millicent, Mr. J. M. Strickland's, red, c. 1899, s. Lord George, Mr. G. Scoby, 36gs.

Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

At Gorey Fair (co. Wexford), held on the 15th inst. there was a very small supply. Cattle were a very poor lot, and there was slow demand. Prices: Yearlings, 2nd class £6 to £7; two-year-olds, 2nd class £8 12s. 6d. to £10 7s. 6d.; three-year-olds, 2nd class £12 5s., 3rd class £9.

At the fair held at Coleraine, co. Londonderry, on Tuesday, there was a very small supply of cattle, which realised the following prices: Calves, 2nd class £3 15s. to £4; yearlings, 2nd class £5 11s. 3d. to £7 5s.; two-year-olds, 2nd class £7 12s. 6d. to £9 5s.; springers, 2nd class £12 7s. 6d. to £14; 3rd class £8 12s. 6d. to £10 5s.

At Dundalk Fair, which took place on Wednesday, there was only a small supply of stock, and the demand was dull for all classes. Quotations: Calves,

3rd class £2 13s. 4d. to £3; yearlings, 1st class £8 10s., 2nd class £6 10s. to £6 15s., 3rd class £4 15s. to £5; two-year-olds, 1st class £11 5s. to £13, 2nd class £8 5s. to £10 10s.; springers, 1st class £16 10s. to £22, 2nd class £13 10s. to £14 15s.; young pigs, 8 to 10 weeks old, sold at from 16s. 6d. to 21s. each.

HORSES.

Somerset County Council and Farriery.

The Bath and West and Southern Counties Society has for some time past been conducting, on behalf of the Somerset County Council, a travelling school for the instruction in farriery of shoeing smiths. On Tuesday last, the 18th instant, prize competitions were held at Weston-super-Mare for those pupils who had attended a complete course of instruction at the school during its stay within the district, comprising Bath, Keynsham, Bedminster, Bristol, Nailsea, Yatton, and Weston-super-Mare. Among those present on behalf of the society were Mr. Thos. F. Plowman, secretary, Mr. G. H. Helder, M.R.C.V.S., the veterinary surgeon attached to the school; and Mr. W. B. Blackall, farriery instructor. Mr. A. Wheatley, F.R.C.V.S., of Reading, acted as judge and examiner.

Mr. R. Tremlett, R.S.S., kindly gave the use of his premises for the competition, and also lent the necessary additional forges.

Seventeen smiths competed, of whose work the judge reported very favourably, and the following were the awards:—

Class I.—Nag Horses.—1st, James Ruck, Norman House, Keynsham; 2nd, Carmi Kirby, Gable Cottage, Wraxhall, Bristol; 3rd, Fred J. Sampson, Claverham, Yatton. Commended.—Frank J. Edward, Orchard Street, Weston-super-Mare; Frank Hole, North Street, Weston-super-Mare; and William J. Summerell Nailsea, Bristol.

Class II.—Cart Horses.—1st, Edwin Adams, Union Street, Weston-super-Mare; 2nd, Alfred Tremlett, Union Street, Weston-super-Mare; 3rd, Walter Snell, Brislington, Bristol. Commended.—Charles S. Barrett, Colebridge, Worle; Albert E. Drewett, Batheaston, near Bath; and Frederick Gummer, Claverton, Yatton.

Certificates were also awarded to the prize winners and commended competitors.

The Registration Committee of the Farriers' Company admit the winners of first prizes in these competitions to the official register free of charge, on their satisfying the judge that they have a fair knowledge of the structure of the horse's foot, while other competitors who satisfy the judge of their competency are admitted on payment of the usual fees. Several of the competitors on the present occasion were examined and passed for registration.

Special prizes were also offered for the best shoeing of a hunter by a pupil who had previously won a prize in a school competition and had again attended the school since 4th, 1900, and these were awarded as follows:—1st, Henry Garland, Upper Weston, Bath; 2nd, William Yelland, Berrow, Burnham; 3rd, Herbert J. Welland, Catcott Burtle, Bridgwater. Commended.—Fredk. G. Drewett, Batheaston, near Bath, and Richard Thorne, Palmer Street, Weston-super-Mare.

The first and second prizes in this class were given by residents at Weston-super-Mare, who took an interest in the operations of the school, and the first prize was supplemented by a case of farrier's tools presented by the Capewell Horse Nail Company.

Since January last fifty-four pupils have received courses of instruction, which satisfactorily indicates that the school is fulfilling a want.

The school will open at Banwell early in the new year.

York Christmas Horse Fair.—The Christmas Horse Fair at York took place last week, commencing on Monday. On this day the city presented an animated appearance, and in Blossom Street, Pavement, Clarence Street, and a few others, the horse trade was very prominent. The first day of the fair is usually devoted to hunters, harness horses and hacks. There was not so large a supply as usual from the Irish dealers, although there were a few useful animals. A few nice studs of horses from English dealers were also present. There was a good attendance of buyers present, including Mr. Oppenheimer (Hanover), who bought a few nice horses, Mr. Levison (Hamburg), Mr. Sergert (Homburg), Mr. Hess (Frankfort-on-the-Maine), Mr. Koch (Holland), and Mr. Brunnard (Brussels). The demand for hunters was fairly good, and although it cannot be said that any very high prices were realised, yet some made up to £180, and the general prices ranged from £50 to £100. Harness horses, £40 to £60; ride and drive horses averaged about £40. On the second day there were comparatively few animals of character on offer. The chief feature of the day was agricultural horses—these made from £20 to 50 guineas each. Trade was slow, and very little doing.

All farm live stock should be given "Molassine" It is an excellent food and condiment combined. See advertisement on back page of this issue.—[Advt.]

SHOWS.

Suffolk Fat Cattle Club.

Fine weather favoured the Christmas Show of the Suffolk Fat Cattle Club, held at the Drill Hall, Ipswich, on Monday and Tuesday, and altogether it was a most successful exhibition. The attendance of visitors was good each day, the total number admitted through the turnstiles being 8,143, and the amounts taken, first day, £170; second day, £185 5s. 6d.; total, £355 5s. 6d. In 1899 the total amount taken was £298, while in 1898 the total receipts were £398. The total number of entries was 810, as against 936 last year, 1,004 in 1898, and 1,014 in 1897. It will thus be seen that there was a considerable decrease, but the number compared favourably with those of years previous to the above mentioned. As to the chief sections—cattle, sheep, and pigs—the first-named were four fewer than last year, sheep nine more, and pigs fifty-two less. The quality of the exhibits was quite up to the average, the cattle classes including several animals in tip-top condition. The entries included Mr. John Wortley's Smithfield champion, Lord Roberts, and Mr. W. E. Learner's cross-bred heifer, Ladysmith, champion at Norwich and reserve at Smithfield. Unfortunately, Lord Roberts did not put in an appearance, having been sold at the Smithfield Show, so that what would have proved an interesting contest for the championships did not come off. Competition in all classes was fairly keen, but the awards seem to give general satisfaction.

Cattle.

The first of the cattle classes was for steers of any pure or cross-breed under three years old, and it was in this class that Lord Roberts was entered. In his absence the first prize went to Sir Hugh E. Adair, Bart., Flixton Hall, Bungay, for a cross-bred (Galloway and Shorthorn), weighing just over 16cwt., at two years nine months. The second prize and reserve ticket are awarded to Mr. C. H. Berners, Woolverstone Park, and Mr. R. J. Thurman, Semer, for older and younger cross-breds respectively. Five heifers entered the ring, amongst them being Mr. Learner's Ladysmith, which looks almost diminutive as compared with others, but the judges could not get away from her as first-prize winner. Mr. Russell Colman sent an exceedingly nice Red Poll (second prize), and was rather unfortunate in having such an exceptionally formidable competitor to meet. The steers not exceeding three years, bred and fed in Suffolk, were four in number only. Mr. Alfred Preston, Worlingworth, had a very nice Red Poll, which the judges placed over heavier cross-breds belonging to Mr. J. C. Dawson and Mr. J. C. Pike, who took second prize and reserve. Mr. Dawson's bullock, cross Shorthorn and Angus, was considered to be the best handler in the show, and it won the prize presented by the Ipswich and District Branch of the Meat Traders' Association and another special besides. In a corresponding class for heifers it was a very near thing between a cross-bred belonging to Mr. Spencer Dawson and another sent by Mr. D. W. Taylor, The Grange, Bury St. Edmunds, which were eventually placed in the order named. A Red P shown by Mr. Alfred J. Smith, and bred by Mr. Robert Edgar, of Cockfield, was reserve and highly commended.

The Red Polled breed was excellently represented. Mr. James E. Platt, of Howbury Park, near Bedford, secured first prize with a grand steer, which has won in London and elsewhere, but the Hon. Ailwyn E. Fellowes, M.P., Honingham, Norwich, was close up with a beautiful heifer. The executors of the late Mr. G. Gooderham had the reserve ticket. The pairs not exceeding three years old were not remarkable in any way, but in the younger class Mr. T. M. Rudland won first prize with a couple of smart and well-matched Devons, which would be noticeable in any company. The Shorthorns sent by H.R.H. the Prince of Wales, though heavier, were not so forward in condition. There were five entries of steers not exceeding two years old, bred in Suffolk, and grazed in the county by a tenant farmer, or owner farming all his own land. Mr. T. M. Rudland here won another first prize, with a well-topped cross-bred, having a good touch, and Mr. D. Black, of Flixton Abbey, was second with a nice Black Poll. The last-named exhibitor won outright in a class for heifers where similar conditions were imposed, and in which there was an excellent lot of entries. Mr. Pike's second, a Shorthorn, was rather over-ripe and patchy; the executors of Mr. George Gooderham again got the reserve ticket with a Red Poll from the once-famous herd at Monewden. Butchers' beasts were the largest collection of all, and the prizes were awarded to Mr. J. C. Pike and Mr. T. M. Rudland.

The championship awards in the cattle classes were not made until late in the afternoon of the first day. As a matter of course almost, the President's prize of 10gs. for the best beast in the yard went to Mr. Learner's heifer, the grand cross-bred shown by Sir Hugh Adair being placed reserve. Mr. F. S. Stevenson, M.P., again presented 5gs. for the best steer under two years old, bred and grazed in Suffolk, and the judges awarded this prize to Mr. T. M. Rudland's cross-bred steer. The best of the country-bred heifers was adjudged to be the cross-bred shown by Mr. D. Black, first in class 9, for which that gentleman obtained the special prize given by Sir Charles Dalrymple, M.P., and the champion Red Poll, for Mr. R. H. Tidswell's special, was the steer shown by Mr. James Platt. The final competition was for the new Challenge Cup of 25gs., for the best beast in the show, reared in the county, that has been the property of the exhibitor for not less than six months previous, and this was awarded to S. Hugh Adair's cross-bred, one of Mr. Rudland's Devons being reserved.

Sheep.

The sheep showed up uncommonly well, the Suffolks, as usual, being the chief breed represented. The lambs formed the great feature of the show, but Col. Harry L. B. McCalmont had a very good lot of pens of Suffolks in the class for pens of three wethers of any breed over twelve months and under twenty-three months old. Major E. W. Baird was second with an exceedingly nice pen. The class for three Suffolk wether lambs, lambed in the present year, was a remarkably good one, every pen sent, with one exception, being awarded honours. The successes gained at Smithfield by Mr. Herbert E. Smith, Walton Grange, were continued on this occasion. He literally swept the decks, taking first, second, and third, the nine choice exhibits including six which were at Smithfield, and the first prize in this class was awarded the 25gs. Challenge Cup for the best pen of sheep or lambs in the show, also the champion prize of 5gs. presented by Messrs. Geo. Mason and Co., Ltd., for the best pen of fat sheep in the yard, and the Mayor of Ipswich's 5gs. special for the best three lambs in the yard. The fourth prize in the class went to Mr. Thos. Goodchild for a capital pen of big, fleshy sheep. The cross-bred lambs also made a good appearance. Major E. W. Baird was first with a Suffolk and Southdown cross, with decidedly the best trio in the show, Mr. W. H. Hall being second for one pen and reserved for another, and Mr. Spencer Dawson, Stratton Hall, highly commended.

Pigs.

The pigs were of a character quite in keeping with the rest of the stock exhibits. Following the catalogue, the first in order was the class for fat pig of any breed, one year old and under. The first prize went to the Tamworth breed, shown by Lord Hastings, Melton Constable, the second prize going to a pen of Large Black pigs shown by Mr. John Matthew, Earl Stonham. The next class was for pen of three, under nine months old. There were but three entries, two of them belonging to Messrs. Robert Bond and Sons. Mr. A. H. Cobbald, Eldo House, Bury, carried off the chief honour with a specially fine pen of Large Blacks. If the special prize for the best fat pig had been for a pig taken from the best pen, the animals in this class might have stood a good chance; but the animal for this competition was taken out of an otherwise moderate class. Mr. A. H. Cobbald scored again also in the class for five fat pigs, suitable for the London market, under 112lbs. live weight, the entries from the Eastern Counties Dairy Institute being second. There were some particularly good animals in the collection for three pigs not under 112lbs., and not exceeding 190lbs. live weight. Here the entries from the famed home—so far, at any rate, as this club is concerned—of pigs of this class, were again to the fore, the executors of the late Mr. George Gooderham scoring with an uncommonly good pen, the second prize going to Mr. C. H. Berners, Woolverstone Park, for Berkshires. The last class was for three pigs for bacon, exceeding 190lbs. live weight, and this prize fell to a choice pen of Tamworths, eleven months old, sent by Mr. A. Gerald Smith, by whom they were bred, Lord Hastings taking second.

Miscellaneous.

The seed corn exhibition attracted an unusual amount of interest, especially in the barley section, a valuable Challenge Cup having on this occasion been offered, in addition to special prizes by Mr. Thomas Mortimer, Mr. John Cooper, and Messrs. R. and W. Paul, Limited. There were as many as twenty-five entries for the Challenge Cup, amongst them being the champion exhibits at the recent Brewers' Exhibition, namely, Mr. J. Pratt's Melton sample of Wrinch's Premier, and it again came out on top. Roots and vegetables made a good show, as did also the poultry and the fancy pen.

Royal Dublin.

The Royal Dublin Society's winter show, held at Ball's Bridge on the 11th, 12th, and 13th inst., was a most successful one from every point of view. The weather was most favourable, and there was a good attendance of visitors each day. Those on the first notable day, Exhibitors' Day, included Lord and Lady Cromer, Lord and Lady Londonderry, Lord and Lady Longford, Lady F. Doyne, Miss Ewart, Miss Ewart, and Lord Ardilaun. A.D.C. to his Excellency. With but few exceptions the entries compared favourably with those of last year, the principles on the chief sections being:—Horses, 232, as against 210 in 1899; out-fed cattle, 274—179; groups of cattle, 56—64; sheep, 55—51; pigs, 8—1. In the roots and butter departments

the entries showed a considerable increase, but grain was slightly less.

Amongst cattle, the great feature was the immense improvement amongst the in-fed. There was altogether a much better tone about the general look of the exhibits, and not only were first-class animals to be found as the winners, but there were less appearance of weeds, and every symptom of feeding being more systematically carried out all through the year. Amongst the out-fed and artificially sheltered the improvement was less marked, and there were many more of the hard, weedy-looking animals that were to be seen in former years; but it must also be said that the type is coming more into that blocky, low-set, all-meat stamp.

This is due in some measure to the influence of Aberdeen-Angus blood, which is becoming stronger every year, and is certainly making the Irish stock of a more typical beef stamp. Not only were the "black" crosses more plumper and more compact, but they looked fresher, and more thriving from the open-air treatment. Their influence is equally good, however, on the in-feds, as may be seen from the great bulk of prizes won by Aberdeen-Angus or animals of that cross.

For the Lord-Lieutenant's challenge cups for the best ox and the best heifer in the show there was a fine list of competitors and the keenest competition that has yet taken place at Ball's Bridge. After a lengthened period, the list was at length fined down to Viscount De Vesci's in-fed ox competing with an out-fed belonging to Colonel Pepper, and the Abbeyleix in-fed heifer against another out-fed belonging to Mr. Ternan, Drogheda. These were all cross-bred Aberdeen-Angus and Shorthorns of similar strains, but the out-feds were both over three years of age, while the others competing against them were only about one year eight months for the bullock and one year eight months for the heifer respectively. The contest was a keen one, and was all the more interesting as the contestants in each case represented different principles of feeding, both as to outdoor and stall feeding, as well as slow growth and forcing for early maturity. In the end the out-feds won both the Lord-Lieutenant's cups and the *Farmers' Gazette* challenge cup as the best animals in the show, and it is worthy of note that the premier honours were awarded for slow growth against the earlier maturity of the younger animals. This seems hardly the orthodox course of procedure, and rather upsets the principle of "baby" beef and quick returns.

The sheep made up but a very medium show, both numerically and in point of quality. If anything, they had, perhaps, a more level tone than last year, and there were practically no weeds. A very fine pen of cross-bred Border Leicester and Roscommon hoggets were shown by Mr. M. H. Franks, for which he was awarded the challenge cup, while the special prize went to Mr. Flanagan for a pen of three very nicely-finished wethers.

Pigs made a very poor show, especially considering the great part these animals play in the agricultural economy of the country, and Mr. Wilmington's first prize winners were well worthy of gaining the honours in a much keener competition.

If there were some features of the live stock section that left room for improvement, there is little complaint to be made about the crop exhibits. There was a fine display of malting barleys, and the barley committee have reason to be gratified at the ready response made by all the counties to their liberal prize list. Comparing with last year, the colour did seem quite so good this year, but, as a rule, the grain was plumper and better filled, and there was no scarcity of samples of good maturation. The wet season has been particularly favourable to the growth of roots, and never has there been a better display of these crops staged at Ball's Bridge.

Judges.

CATTLE (In-fed): Mr William Field, M.P., Blackrock, co. Dublin; Mr. John Handley, Green Head, Milnthorpe; Mr. Arthur W. Law, Sanquhar, Forres, N.B.

CATTLE (Out-fed): Mr Christopher Barry, Larch Hill, Kilcock; Mr. Denis Fay, Edenderry; Mr. F. Greaves, 104, Upper Leeson Street, Dublin

KERRY AND DEXTER CATTLE: Mr. William Field, M.P.; Mr. John Handley, Mr. W. Law.

GROUPS OF CATTLE AND SHEEP: Mr John Ennis, West Curragh, Ballbriggan; Mr W. P. Delany, 94, Upper Dorset Street, Dublin; Mr Charles J. Rush, Hinxton, Saffron Walden.

PIGS: Mr. P. Clune, Albert Model Farm, Glasnevin, co. Dublin

Special Prizes.

Championship cup for the best ox in the show: Colonel Pepper, Ballygarth, Julianstown, co. Meath; r, The Right Hon. Viscount De Vesci, Abbeyleix.

Championship cup for the best heifer in the show: Mr. Patrick W. Ternan, Sheephouse, Drogheda; r, The Right Hon Viscount De Vesci.

"Farmers' Gazette" challeng cup, for the best animal in cattle classes bred by the exhibitor: Mr. Patrick W. Ternan; r, Colonel Pepper.

Challenge cup, value 20gs., for the best animal in Class 18: Mr. Matthew Flanagan.

Challenge cup, value 20gs., for the best animal in Class 19: Mr. Joseph Lowry, Bachelor's Lodge, Navan

£5 for best in-fed ox entered in Classes 1 to 13, the property of the exhibitor, fed in the province of Connaught from August 1st, 1900, to date of show: Mr. H. D'E. Strevens, Castle Coote, Roscommon

£5 for the best in-fed heifer entered in Classes 1 to 13, the property of the exhibitor, fed in the province of Connaught from August 1st, 1900, to date of show: Mr H D'E Strevens

£2 for the best pen of three wethers, over one and under two years old, the property of the exhibitor, fed in the province of Connaught from August 1st, 1900, to date of show: Mr. Matthew Flanagan, Tomona, Tulsk; r, Mr. Matthew Flanagan

Cup for the best out-fed heifer in Classes 32 and 33: Mr. H. Tunstall-Moore, Stedalt, Balbriggan; r, Mr. Laurence F. Ball, Dowdstown, Maynooth.

£5 for the best in-fed ox in Classes 1, 2, 3, 7, 8, and 9: The Right Hon. Viscount De Vesci; r, Lord Rathdonnell, Drumcar, Dunleer.

£5 for the best animal in Classes 3, 6, 9, and 12: The Right Hon Viscount De Vesci; r The Right Hon. Viscount De Vesci.

£5 for the best animal in Classes 22, 23, 26, 27, 30, and 31: Mr J. Bradley, Dreminstown, Rathkenny, Slane; r, Colonel Pepper.

£5 for the best group in Classes 20 and 21: Colonel Pepper; r, Mr. Richard Williams, Rathdowney.

Prize List.

CATTLE.

IN-FED.

Class 1.—Horned or artificially polled ox, over two years eight months, and not exceeding three years: 1 and 2, Duke of Leinster; 3, Major R. Claude Cane; r, Duke of Leinster; hc, Sir Josslyn Gore-Booth, Bart., Lissadell, Sligo; c, Major R. Claude Cane, St. Wolstan's, Celbridge.

Class 2.—Horned or artificially polled ox, over two years and not exceeding two years eight months: 1, Lord Rathdonnell, Drumcar, Dunleer; 2, Mr. James N. Hone, Ballymacad, Oldcastle; 3, Mr. William N. Waller, Allenstown, Kells, co. Meath; r, Mr. H. L. Clifford, Ennistown, Kilmessan, co. Meath.

Class 3.—Horned or artificially polled ox, two years and under: 1, Miss Staples, Dunmore, Durrow; 2, Major J. Alexander, Milford, co. Carlow; 3, Marquis of Waterford; r, Miss Staples.

Class 4.—Horned or artificially polled heifer, over two years eight months, and not exceeding three years: 1, 2, 3, r, hc, and c, Mr. H. D'E. Strevens, Castle Coote, Roscommon.

Class 5.Horned or artificially polled heifer, over two years, and not exceeding two years eight months: 1, Mr. R. G. Nash, Finnstown, Lucan; 2, Mr. H. D'E. Strevens; 3, Mr. William N. Waller; r, Mr. Wm. P. Radcliff, Hurdlestown.

Class 6.—Horned or artificially polled heifer, two years and under: 1 and 2, Mr. William N. Waller; 3, Marquis of Waterford; r, Miss Staples; hc, Mr. H. L. Clifford; c, Mr. William N. Waller.

Class 7.—Natural polled ox, over two years eight months, and not exceeding three years: 1, Mr. R. G. Nash, Finnstown, Lucan; 2, Mr. H. D'E. Strevens; 3, Mr. Ernest E. Law, Great Freffans, Trim; r, Right Hon. Viscount Duncannon, C.B.; hc, Mr. Joseph Lowry, Bachelor's Lodge, Navan; c, Major R. Claude Cane.

Class 8.—Natural polled ox, over two wears, and not exceeding two years eight months: 1 and 2, Miss Staples; 3, Mr. Herbert Satchwell, Creggs, Roscommon; r, Mr. R. G. Nash; hc, Mr. James N. Hone, Ballymacad, Oldcastle, co. Meath; c, Major J. Alexander, Milford.

Class 9.—Natural polled ox, two years and under: 1 and 2, The Right Hon. Viscount De Vesci, Abbeyleix; 3, Mr. R. G. Nash; r, Right Hon. Viscount Duncannon; hc and c, Mr. William N. Waller.

Class 10.—Natural polled heifer, over two years eight months, and not exceeding three years: 1, Mr. Joseph Lowry, Navan; 2 and 3, Major R. Claude Cane; r, Mr. Richard Garnett, Summerseat, Clonee; hc, Mr. George F. Murphy, The Grange, Dunsany; c, Major R. Claude Cane.

Class 11.—Natural polled heifer, over two years, and not exceeding two years eight months: 1, Miss Staples; 2, Mr. J. Perry Goodbody, Clara; 3, Mr. Joseph Lowry; r, Mr Hubert Satchwell; hc, Mr. Ernest E. Law.

Class 12.—Natural polled heifer, two years and under: 1, Right Hon. Viscount De Vesci; 2, Viscount Duncannon, C.B.; 3, Mr. William N. Waller; r, Miss Staples; hc, Mr. Joseph Lowry; c, Mr. H. J. Cullen, Liscarton, Navan.

Class 13.—Cow of any age, which must have produced at least one live calf: 1, Mr. R. G. Nash, Finnstown, Lucan; 2, Mr. J. N. G. Pollock, Mountainstown, Navan; 3, Mr. Ernest E. Law; r, Mr. Richard Wilkinson; hc, Mr. Arthur J. Owen, Shanvaghey, Ballacolla, Queen's County; c, Mr. George F. Murphy.

IN-FED, ARTIFICIALLY SHELTERED, OR OUT-FED.

Class 14.—Ox, of the Kerry breed or type, under four years: 1, Mr. R. G. Nash; 2, Mr. H. D'E. Strevens; 3, Mr. Michael Dodd, Tommintown, Donabate.

Class 15.—Heifer of the Kerry breed or type, under four years: 1, and 2, The Right Hon. Lord Crofton; 3, Mr. Mathew Flanagan, Tomona, Tulsk; r, Mr. W. P. Radcliff, Hurdlestown, Navan.

Class 16.—Ox of the Dexter breed or type, under four years: 1, Mr. R. G. Nash; 2, Colonel Pepper, Ballygarth Castle, Julianstown, co. Meath; 3 and hc, Mr. H. L. Clifford; r, Mr. Thomas Leonard, Warrenstown, Dunsany; c, Mr. John Curtis, Oakley, Clontarf.

Class 17.—Heifer of the Dexter breed or type, under four years: 1, Mr. Laurence F. Ball, Dowdstown, Maynooth; 2, Duke of Leinster; 3, Colonel Pepper; r, Mr. H. L. Clifford.

Class 18.—Ox, other than Kerry or Dexter breed, over two and under four years, 11cwt. and under, live weight: 1, Mr. Mathew Flanagan; 2, Mr. Patrick O'Connor, Mylerstown, Naas; 3, Mr. H. D'E. Strevens; r, Mr. J. Perry Goodybody, Clare; vhc, Mr. Edward Kelly, Creakenstown, Ratoath, and H. D'E. Strevens; hc, Mr. Joseph P. Cuffe and Right Hon. Viscount Duncannon.

Class 19.—Heifer, other than Kerry or Dexter breed, over two and under four years, 10cwt. and under, live weight: 1, Mr. Joseph Lowry; 2, Mr. R. Ganly, 18, Usher's Quay, Dublin; 3, Mr. Richard Wallace, Belfield, Shinrone Roscrea; r, Mr. Richard Wallace; hc, Mr. Laurence F. Ball; c, Mr. Wm. P. Radcliff, Hurdlestown, and Mr. R. G. Nash.

Class 20.—Group of four horned or artificially polled cattle, artificially sheltered or out-fed, not exceeding four years: 1, Mr. Richard Wilkinson; 2, Mr Patrick Leonard, 17, Lower Dominick Street, Dublin; 3, Mr. Richard Walsh, Kingswood, Clondalkin; r, Mr. T. Leonard.

Class 21.—Group of four natural polled cattle, artificially sheltered or out-fed, not exceeding four years: 1, Colonel Pepper; 2, Mr. Richard Williams, Rathdowney; 3, Mr. Patrick Leonard.

OUT-FED, ARTIFICIALLY SHELTERED

Class 22.—Horned or artificially polled ox, over two years eight months, and not exceeding four years: 1, Mr. C. M. Doyne; 2, Mr Christopher M'Cormick, Ellextown, Dunboyne; 3, Mr. C. M. Doyne, Wells, Gorey; r, Mr. J. Perry Goodbody.

Class 23.—Horned or artificially polled ox, two years eight months and under: 1, Mr. Joseph Lowry; 2, Mr. J. Perry Goodbody; 3, Mr. Patrick Leonard; r, Mr. Thomas Butler, Jordanstown, Oldtown; hc, Mr. Richard Wilkinson.

Class 24.—Horned or artificially polled heifer, over two years eight months and not exceeding four years: 1, Mr. Richard Williams; 2, Mr. J. Perry Goodbody; 3, Mr. C. M'Cormick; r, Mr. Richard Wilkinson.

Class 25.—Horned or artificially polled heifer, two years eight months and under: 1, Mr. James N. Hone; 2, Miss C. J. Reynell, Killynon, Killucan; 3, Mr. William Dove, Kilcairne House, Navan; r, Mr. William Dove.

Class 26.—Natural polled ox, over two years eight months, and not exceeding four years: 1, Mr. Joseph Lowry; 2, Mr. Richard Williams; 3, Mr. Joseph Lowry; r, Mr. H. J. Cullen, Liscarton, Navan; hc, Mr. H. Tunstall-Moore, Stedalt, Balbriggan; c, Mr. Patrick W. Ternan, Sheephouse, Drogheda.

Class 27.—Natural polled ox, two years eight months and under: 1, Viscount Duncannon, C.B.; 2 and 3, Mr. J. Perry Goodbody; r, Mr. H. Tunstall-Moore; hc, Mr. H. J. Cullen; c, Mr. William W. Kilroy and Mr. H. J. Cullen.

Class 28.—Natural polled heifer, over two years and eight months and not exceeding four years: 1, Mr. Patrick W. Ternan; 2, Mr. Joseph Lowry; 3, Mr. Patrick W. Ternan; r, Mr. John M. Ennis, Naul Park, Balbriggan; c, Mr. Richard Wilkinson.

Class 29.—Natural polled heifer, two years eight months and under: 1, Mr. Joseph Lowry; 2, Mr. H. Tunstall-Moore; 3, Mr. Perry Goodbody; r, Mr. William N. Waller; c, Mr. Wm. N. Waller; and Mr. Edward H. Woods, Milverton Hall, Skerries.

OUT-FED.

Class 30.—Ox, horned or artificially polled, not exceeding four years: 1, Mr. John Bradley, Dreminstown, Rathkenny, Slane; 2, Mr. John Francis Ternan; 3, Mr. Nathaniel Hone; St. Dolough's Park, Raheny; r, Mr. John Francis Ternan; hc, Mr. Nathaniel Hone; c, Mr. N. J. Kelly, Greenogue, Killsallaghan, co. Dublin; Mr. James M'Cann, and Messrs. Murphy, Breemount, Laracor.

Class 31.—Ox, naturally polled, not exceeding four years: 1 and 2, Colonel Pepper; 3 and r, Mr. James Wilkinson; hc, Duke of Leinster; c, Miss Stewart, Mendon, Swords, co. Dublin; and Mr. Joseph Lowry.

Class 32.—Heifer, horned or artificially polled, not exceeding four years: 1, Mr. Laurence F. Ball; 2, Mr. Thomas Leonard; 3, Mr. Nathaniel Hone; r, Mr. John Francis Ternan; hc, Mr. James N. Hone; c, Mr. Nathaniel Hone, Mr. John M. Tiernan, Rathkenny House, Slane; Mr. Thomas Leonard, and Miss A. E. Magan, Killyon Manor, Hill of Down.

Class 33.—Heifer, naturally polled, not exceeding four years: 1, and 2, Mr. H. Tunstall-Moore; 3, Mr. Joseph Lowry; r, Mr. Thomas Leonard; c, Mr Michael Dodd.

Class 34.—Cow, of any age, which must have produced at least one live calf: 1, Mr. Laurance F. Ball; 2, Mr. Richard Wallace; 3, Mr. James Wilkinson; r, Mr. Joseph P. Cuffe; hc, Mr. Richard Wilkinson and Mr. James M'Cann, M.P.; c, Mr. Patrick Leonard, Mr. James Austin, Ballymaglasson, Batterstown, co. Meath, and Mr. Christopher Rooney.

SHEEP.

Class 35.—Pen of three long-woolled sheep of the Leicester, Border Leicester, or Lincoln breed, over one and under two years: 1, Mr. Mat H. Franks, Westfield, Mountrath.

Class 36.—Pen of three long-woolled sheep, of the Roscommon breed, over one and under two years: 1, Mr. Edward Kelly; 2 and 3, Mr. Mathew Flanagan; r, Mr. John Smyth, Oak Park, Castleknock; hc, Mr. Hubert Satchwell and Mr. Edward Kelly.

Class 37.—Pen of three crossbred sheep, over one and under two years: 1, Mr. Mat H. Franks; 2, Mr. Michael Dodd; 3, Mr. Thomas Leonard; r, Mr. Herbert Satchwell.

Class 38.—Pen of three short-woolled sheep other than Cheviot or Mountain, over one and under two years: 1, Mr. Michael Dodd.

Class 39.—Pen of black-faced Mountain sheep: 1, 2, and 3, Mr. Arthur Alexander, Glenmor, Drogheda.

Class 40.—Pen of three Cheviot sheep: 2 and 3, Mr. Laurence S. Cuffe.

Class 41.—Pen of three sheep, under one year: 1, Mr. Mat H. Franks; 2, Mr. Mathew Flanagan; 3, Mr. H. J. Cullen, Liscarton, Navan; r, Mr. Laurence C. Cuffe.

PIGS

Class 42.—Pen of three fat pigs, white, under ten months: 1, Mr. J. Willington, St. Kieran's, Rathcabbin; 2, Mrs. H. D'Esterre Strevens, Castle Coote, Roscommon

Class 45.—Pig, any breed, under ten months: 1, Mr. J. Willington, St. Kieran's, Rathcabbin; 2, Mr. George J. Smith, Curraghtown, Navan

Faversham.

The first of what it is hoped in the future will become one of the institutions of the town took place at the Faversham Cattle Market on Wednesday, viz., an exhibition of Christmas Fat Stock in connection with the Society, which was formed in the summer months. For some years past the need of such an institution has been keenly felt in the locality, especially when it was taken into consideration that towns of far less importance than Faversham boasted of their fat stock shows. After Wednesday's exhibition it was the unanimous opinion that the show was one of the best ever held in that part of the country. It was a source of the greatest regret that the hon. secretary, Mr. Gardiner, was not able to be present owing to indisposition. It must indeed have been a keen disappointment to him, after having worked as he did most indefatigably to make the venture supply a long-felt want, not to be able to see the efforts of himself and colleagues brought to a satisfactory issue.

It can safely be said that the Faversham Cattle Market never presented such an array of stock as it did on Wednesday. The entries were as follows: Sheep 348, bullocks 78, calves 2, pigs 102—a very good number for the first show. All stock had to be in the market by 9 o'clock, and very shortly after this hour everything was ready for the judges, who were Mr. G. F. Brown, J.P., of Margate, Mr. W. Long, of Folkestone, and Mr. M. H. Munyard, of Greenwich and Blackheath, three gentlemen who are well known throughout the county of Kent. Their decisions gave universal satisfaction, although in some cases the competition was exceedingly keen. Their work was rendered somewhat difficult from the fact that they had to award the prizes purely from a butcher's point of view, and that the entries were not divided into breed classes. In the class for steers of any age there were no less than twenty-eight entries. The first prize fell to Mr. J. G. Millen, who exhibited a magnificent animal with a splendid loin, and the acme of perfection from a butcher's point of view. In breed it was a blue grey poll steer with plenty of flesh, and in addition to capturing the first prize it proved to be the champion beast in the show, thus taking the ladies' prize of five guineas. The second prize was gained by Messrs. Millen and Phillips with a Sussex steer of good symmetry, and well fed, while third hon-

ours fell to Mr. H. A. Neame, with an excellent Shorthorn of good breed. The executors of the late Mr. G. W. Finn and Messrs. Millen and Phillips showed two good bullocks which were awarded cards by the judges of highly commended and commended respectively. In class 2 there were twenty entries, and the judges had an equally difficult task to separate the winners. The premier honours fell to Mr. J. P. Barnes with a Shorthorn heifer which he had bred himself. Mr. George Gardiner was second with a blue grey Scot, which was not far behind the winner, while Mr. Maylam Long was third with a fine grown white heifer. Mr. C. G. Neame in this class was awarded a highly commended distinction. In Class 3 for cows there were six entries, the competition being good. Mr. Gordon Neame was more successful here with a fine specimen of the Sussex breed, Mr. Robert Murton running him close with a good Shorthorn. In this class Mr. Frederick Neame was highly commended.

The sheep, taken as a whole, were excellent. In Class 1, for Kent wethers under two years old, there were three pens exhibited. Mr. F. Neame's lot proved to be the best, being well fatted. In the next class, for five half-breeds or Downs under two years old, the pens numbered seven. Mr. J. G. Millen was awarded both prizes at first, but under the conditions of the show he could only take one. This let Mr. L. H. Finn in with five handsome sheep as good as anyone wished to see. In Class 3, for five sheep of any breed under twelve months old, there were sixteen entries, the competition being very keen. Mr. W. Clark here took first honours with a pen of half-bred Hampshires, while Mr. R. Murton was second with five Southdowns of good breed and quality. In Class 4, for five barrens, there were three entries. Mr. C. G. Neame was first and Messrs. Millen and Phillips second, there being very little to choose between the two. The prize for the best pen of sheep, given by the ladies of the neighbourhood, fell to the lot of Mr. J. G. Millen, who thus had the unique distinction of winning both championships.

For pigs there was a capital entry, the three classes producing fifteen pens. All the animals under the conditions of the show had to be bred by the exhibitors, and the quality was good.

The Sale.

The whole of the exhibits were during the day sold by auction and made very good prices indeed, which fully confirmed the opinions passed previously of the excellence of the show. Mr. J. G. Millen sold the steers. For his champion animal in Class 1 he made the high price of £40, Mr. F. W. Boulding being the buyer. The following is the list of the prices made of the other prize winners in the class for beasts:—Class 1—2nd, £29 10s., Mr. J. H. Curling; 3rd, £30 10s., Mr. F. W. Boulding. Class 2—1st, £34, Mr. H. Burton (Lenham); 2nd, £31 10s., Mr. F. C. Wyborn; 3rd, £32, Mr. W. Vallance. Class 3—1st, £30, Mr. Wingrove (Milton); 2nd, £28, Mr. H. C. Wilkes (Whitstable).

The sheep and pigs were sold by Mr. Lewis Finn with the following results: Sheep, Class 1—1st, 57s., Mr. C. E. Harris (Westgate); 2nd, 57s., Mr. Britton (Ramsgate). Class 2—1st, champions, 65s., Mr. W. Vallance; 2nd, 65s., Mr. W. Vallance. Class 3—1st, 47s., Mr. F. C. Wyborn; 2nd, 53s., Mr. G. A. Filmer (Green-street). Class 4—1st, 52s., Mr. G. A. Filmer; 2nd, 53s., Mr. Elliott. Pigs—Class 1—1st, 32s., Mr. H. C. Wilkes; 2nd, 43s., Mr. G. Colyer. Class 2—1st, £5 7s. 6d., Mr. Hogben (Ramsgate); 2nd, £4 5s., Mr. F. C. Wyborn. Class 3—£12, Mr. Harlow (Dargate).

Dressed Poultry at the Smithfield Show.

The Stands at Smithfield.

Messrs. J. Rands and Jeckell, of Ipswich, occupied their usual position at Stand No. 222, Arcade Gallery, where they exhibited their celebrated sheep and lamb sheltering cloths, now universally used by the most successful sheep-breeders throughout the kingdom. The firm has just published the fourth and enlarged edition of their popular pamphlet on "Shelter for Sheep and Lambs," which every flockmaster should possess, and which can be obtained gratis on application. Their rot-proof and water-proof covers for waggons and engines and all classes of agricultural machines maintain the high reputation they have obtained, as do also their horse cloths, loin covers, nose bags, rick cloths, and stack sheets, binder and trussing twines, and hay and pressing cord.

That careful breeding will assert itself in the vegetable as in the animal world is an established fact, and a valuable object-lesson in this respect was to be seen in the magnificent specimens of mangolds, swedes, turnips, and other agricultural roots, exhibited at the stand of Messrs. Webb and Sons, the Royal Seed Growers, Wordsley, Stourbridge. This firm has always recognised the importance of raising the quality of farm crops to the highest possible standard of excellence, and a further proof of their successful work is shown by their varieties again winning principal honours in open competitions. We may mention that nearly the whole of the exhibits on this stand were grown by the aid of Webbs' special fertilisers, which are manufactured on a very extensive scale at their chemical manure works, Saltney, Chester.

At Stand No. 95, Mr. G. F. Strawson, of 71A, Queen Victoria Street, exhibited the now well-known charlock destroyers, with all the latest improvements and a very simple automatic gear for working these machines from the cart wheel. Mr. Strawson also showed a variety of potato spraying machines for both large and small growers, and some other new inventions in connection with spraying farm crops.

Messrs. Joseph Fison and Co., Ltd., of Ipswich, occupied Stand No. 214, which was in the Arcade Gallery. Here they exhibited samples of the champion prize barley of the world and the second prize barley (Brewers' Exhibition awards), also other barleys from practically every county in England, all of which were grown with their extra quality barley fertiliser. Samples of special fertilisers were shown for every crop of the farm or garden, whilst the collection of photographs of produce grown with these fertilisers attracted considerable attention.

One of the oldest exhibitors at the show was the well-known firm of Mr. John K. King, whose business was founded as far back as 1793, and who is seed grower to Her Majesty the Queen, and by special sealed warrant to H.R.H. the Prince of Wales. His displays have always been interesting, but this year he eclipsed all his previous efforts, and nowhere was there to be found better roots either in size or quality, while the arrangement of the stand was conspicuous for its good taste. From an educational point of view, Mr. John K. King's display was interesting, for here was a specimen of the wild beet Beta maritima—the parent of the cultivated mangold, and on comparing this with the magnificent specimens of perfectly formed roots close by, the process of development by pedigree selection was shown to be something marvellous. Mr. John K. King claims that his roots have not been grown simply for show purposes, but are drawn from field crops grown by his customers.

Messrs. Bamford and Sons, Uttoxeter, occupied their usual large space, filled with an excellent collection of the well-known "Bamford" machines, arranged with great care and taste. At the Paris Exhibition this year Messrs. Bamford obtained the gold medal award for their "Royal" mowers and reapers, "Progress" haymakers, "Rapid" grinding mills, and the new "Self-feeding" chaff cutter, with patent self-acting stop motion. These and other machines were well represented at the show, and formed altogether a very attractive display of the high-class manufactures produced by this firm.

The handsome and well arranged stand of the Queen's seedsmen, Messrs. Sutton and Sons, of Reading, with its marvellous display of mangolds, swedes, turnips, etc., was, as usual, one of the main features of the show, and probably this remarkable exposition of agricultural roots has never been equalled. To farmers the exhibition was an invaluable object lesson, demonstrating as it did by ocular evidence the profitable results that must accrue from growing only carefully selected pedigree stocks, a lesson not to be neglected in these days, when, to make a farm pay every acre should yield the best results obtainable. The roots in the enormous heaps, which reached from the floor almost to the ceiling, were collectively and individually as near perfection as it is possible for roots to be. They were the more remarkable considering that they had not been specially grown or "nursed" for exhibition, but were the product of ordinary field cultivation sent to Messrs. Sutton by customers in various parts of the United Kingdom.

Messrs. John Fowler and Co. (Leeds), Limited, occupied Stand No. 27, where they showed steam ploughing engines, road locomotives and agricultural traction engines. The exhibit comprised representative engines of some of the varieties they are constantly manufacturing. We are informed that pressure of business during the past year did not admit of the manufacture of any special engines for the show, and the engines shown were all sold beforehand, the owners having arranged to take delivery at the close of the show.

Messrs. Ruston, Proctor, and Co., Limited, of Lincoln, had a fine display of prize engines and machinery at Stand No. 11. The exhibits included an eight-horse power portable steam engine, six-horse power agricultural traction engine, a finishing thrashing machine, and a five-brake horse power "Ruston" patent oil engine. These were replete with all the latest improvements. We may mention that at the Paris Exhibition, recently closed, Messrs. Ruston, Proctor, and Co. received the largest number of high awards for the excellence of their exhibits.

Messrs. Gilbertson and Page's (Ltd., Hertford) stand was in the arcade entrance, and caught the eye of every person who entered the hall from the main road. Game, poultry, and dog foods, for which this firm is noted, naturally formed the major portion of the exhibits, but there were on view several appliances required by game and poultry keepers, etc., and a few miscellaneous exhibits, including "Renardine," which for hunting out rabbits has no equal.

A fine selection of corn and cake mills, hay presses, hay binders, etc., were on view at Stand No. 129, in the main gallery, which was in the occupation of Messrs. Barford and Perkins, of Queen Street Ironworks, Peterborough. The chief exhibit was a vertical engine for driving farm machinery. It is of a very convenient and economical type, as has been proved, for a large number of these engines are now in use in all parts of the country. This company manufacture a great deal of food-preparing machinery, and of their Royal first prize corn grinding mills no fewer than thirteen thousand are in use.

Messrs. Day and Sons, of Crewe, were to be found in their old position, and with a display of the veterinary medicines for which they are so well known, and which need no description here. Of course, "The Original" medicine chests, either for horses, cattle, or sheep, occupied a prominent position on the stand, and came in for their usual amount of attention from visitors. At this time of the year their "Huskolein" is in great demand, for it is a certain cure for husk or hoose in cattle and sheep.

Messrs. Ayre Brothers' stand was, as usual, taken up with a fine display of the well-known Waterloo cakes and other foods, meals, etc., for cattle, horses, and sheep. Their stand was No. 238, and was situated in the Berners Gallery, which had its share of the large number of visitors to the show, and, as may be imagined,

Messrs. Ayre Brothers' display came in for a good deal of attention.

A good display of farm implements was given by Mr. Thomas G. Slipper, Brundall, Norwich. Drills, mowers, potato sorters and planters, ploughs, harrows, cultivators, etc., were to be seen at this stand in great variety, all being up to date in style and made of the best materials.

Messrs. Samuel Corbett and Son, Park Street Works, Wellington, Salop, occupied Stand No. 108 with a nice selection of serviceable grinding mills and root pulpers.

Mr. James Coultas, of the Perseverance Iron Works, Grantham, exhibited a portable engine, a threshing and finishing machine, an elevator and stacker, and several manure distributors, drills, and horse hoes. All the machines were of the best workmanship and materials, and were of the latest pattern.

Oil engines of various shapes, sizes, and capacity were on view at Stand No. 19, which was situated on the ground floor of the large hall, and occupied by Messrs. Allen and Barker, Ltd., of the A.B. Gas and Oil Engine Works, Taunton.

Messrs. Richard Garrett and Sons, Ltd., Leiston Works, Leiston, R.S.O., Suffolk, exhibited at Stand No. 22 some of their well-known traction, portable, and semi-portable engines, and also a threshing machine and clover huller. This firm was founded over a hundred years ago, and it has a deservedly good and widespread reputation.

King Edward's Hall was the site of the stand of Mr. E. H. Taylor, successor to T. B. Blow, Welwyn, Herts, who, as the majority of our poultry readers well know, is the manufacturer of the celebrated "Popular" incubators. Those shown had a capacity of 50, 60, and 100 eggs, fitted with a drying box and self-filling lamp. Mr. Taylor also exhibited some specimens of his "Popular" foster-mothers and rearers, and some bee appliances.

The Campbell Gas Engine Company, Ltd., Halifax, were situated at Stand 8, which was on the ground floor of the large hall. They had their customary collection of portable and stationary oil-engines, suitable for various purposes, including farmwork.

Messrs. Dicksons, Ltd., Chester, who are seedsmen by special appointment to both H.M. the Queen and H.R.H. the Prince of Wales, had, as is their custom, a grand selection of grass and clover seeds suitable for laying down to permanent or temporary pasture, rotation crops, etc. Their other exhibits included some splendid apples, specimens of shrubs and trees of various kinds, and coloured illustrations of two new plants, namely, the Duchess Consuelo Carnation and the new Golden Hop, both of which were of exceptional merit.

Stand No. 265, which was in the Berners Gallery, had a special interest for breeders of cattle, as it was occupied by Messrs. R. Silcock and Sons, Poulton-le-Fylde, Lancs., the manufacturers of the well-known Silcock's Soluble Half Meal, on which thousands of calves are reared annually. It is a true milk substitute, is very easily digested, for it dissolves at once in water, and gives least trouble in preparing. It does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively.

At Stand No. 119, which was on the ground floor of the large hall, were several cultivators, horse-hoes, etc., forwarded by the Harrison Patents Co., Ltd., of the Lincolnshire Iron Worws, Stamford, a firm well known for the general excellence of the various machines and implements it turns out.

G. F. Dawes, of Bury St. Edmunds, is still to the front with his Foot Rot Cure, which leaves the hoof and foot soft and healthy, as it is a vegetable preparation, there being nothing burning in it. It is also a certain cure for grease, cracked heels and thrush in horses' feet. Mr. Dawes has thousands of testimonials with large orders for the Colonies, as well as home ones. It is used on the Royal Farms at Windsor and Sandringham.

The stand of Messrs. Robert Boby, Ltd., Bury St. Edmunds, was a particularly interesting one for growers of corn, as here were shewn corn dressing and screening machines, and patent machines for dressing and screening all kinds of seeds. That the machines do all that is claimed for them goes without saying, for over thirty-five thousand have been made and sold, whilst at the late Paris Exposition the company was awarded a gold medal.

As usual Messrs. Harrison and Sons, seedsmen, of 33, Market Place, Leicester, occupied a stand, No. 94, in the large hall, and they had their customary fine collection of seeds, roots, etc. The vegetables shown were excellent, and included Early Market carrots, Up-to-date onions, Magnum Bonum parsnips, Cheltenham beet, etc., whilst amongst the numerous farm roots were a splendid new green top swede named Nailstone, their purple-top Defiance swede—an old favourite—and several varieties of mangels.

The stand of Mr. E. Mackinder, of the Lamb Food Mills, Lincoln, was situated in the Berners Gallery, and was No. 253. Of course, his chief exhibit was his famous lamb food, which is used on the Royal farms and by most of the leading flock-masters, with unqualified success, as is evidenced by the hundreds of testimonials received. Mr. Mackinder's porridge meal for weaning calves has become almost as famous as his lamb food, he having received testimony of its efficiency from every county in England. Both can be obtained through merchants, chemists, etc., or direct from the mills.

Messrs. Day, Son and Hewitt, 22, Dorset Street, London, W., had their usual fine assortment of veterinary medicines. Their "Broncholine" for husk or hoose in heifers, calves, or sheep, has a widespread reputation, for it allays bronchial irritation, destroys the parasites, soothes the lungs, and gives the animals strength to overcome the malady. It also acts as a preventative, and is equally invaluable for getting rid of tapeworms. Of the other medicines shown, mention may be made of the Gaseous Fluid, an excellent remedy for fret, colic, or gripes, etc., in horses, whilst it instantly relieves hoven or blown cattle and sheep.

The Shellingford Engineering Co., Ltd., of the Trusty Engine Works, Cheltenham, had forward at Stand 16 a few specimens of their celebrated "Trusty" oil and gas engines, which combine with their efficiency simplicity and economy. The horse-power of the oil engines shown ranged from 1½ up to 12, whilst the gas engines varied from 5 to 18 horse-power.

A very interesting farm implement was shown at Stand No. 117, namely, an artificial manure distributor manufactured by Messrs. Ben Reid and Co., Ltd., Bon Accord Works, Aberdeen. This machine will distribute crushed or dissolved bones, nitrate of soda, superphosphate, or any artificial manure in good condition. It has gained numerous first prizes at public trials; in fact, it has never been beaten in a competition.

One of the best displays of fertilizers and manures for all kinds of crops was that at Stand No. 245, which was in the occupation of Mr. William Colchester, Ipswich, who has gained over a hundred highest awards at the leading shows. The samples of produce shown, all of which were grown with Mr. Colchester's fertilizers and manures, included: The Gold Cup barley winning sample, exhibited by R. J. Thurman, Semer, Suffolk, winner of Sir W. Cuthbert Quilter, M.P.'s silver cup at the Brewers' Exhibition this year, and also the Hadleigh Farmers' Club special, first prize and Messrs. Webb and Sons' special award for cultivation; the two samples of barley winning the silver and bronze medals and diplomas in the third annual gold cup competition, Ipswich, November, 1900; specimens of wheat, oats, and other grain crops in sheaf and berry; mangolds, Kohl Rabi, turnips, swedes, potatoes, and other root crops.

An attractive little stand for growers of fruit trees was No. 78, where Messrs. W. Horne and Sons, Perry Hill, Cliffe, near Rochester, showed specimens of fruit as well as the trees.

Mr. A. J. Learner, of Redhill, Surrey, had a small stand in the Berners Gallery, and here exhibited samples of his patent foot rot cure, which has been proved by flockmasters and shepherds to be a certain remedy for foot rot in sheep. Its great advantage over some other foot rot cures is that it leaves the hoof in a soft, pliable state, a value which anybody who has anything to do with sheep will understand. It is not expensive, for a 3s. tin will dress about three hundred feet.

Of the numerous implements shown by Messrs. Follows and Bate, Ltd., engineers, Gorton, Manchester, perhaps the most striking was the patent "Handy" grindstone, which has been awarded four silver medals by leading agricultural societies. It is an exceedingly useful and effective little grindstone, suitable for farmers, gardeners, etc. It is the only grindstone fitted with a seat and double treadles, by which arrangement the weight of the operator when seated keeps the machine as steady as a rock, and the double treadles balance the body and prevent the hands from wobbling during the process of grinding. Another special feature is its portability.

Amongst the older exhibitors at the show are Messrs. Cupiss, the The Wilderness, Diss, Norfolk, whose constitution balls for horses, cattle and sheep have been extensively used with such marked success for the past half century. Many customers have written in praise of these constitution balls, but a very striking testimony as to their efficiency is given by a well-known horse-breaker, who states that he has used the balls for over twenty years, and has always found them exceedingly useful for purifying the blood and keeping the animal in excellent condition.

Ploughs and cultivators to suit almost every farmer's requirements could be seen at the stand of Messrs. Ransomes, Sons, and Jefferies, of the Orwell Works, Ipswich. This firm occupies such a prominent position in the agricultural machinery world that their manufactures need no recommendation from us. It will therefore suffice if we say that the machines they exhibited were up to date and the best of their kind. At the late Paris Exhibition these ploughs and cultivators won a grand prize and gold medal.

The Parish Patent Steam Jacketted Cooker Co., Ld., 79, Queen Victoria Street, E.C., had a stand in the main entrance, where their cookers were shown in operation. The main feature of these cookers is, as most of our readers are aware, that being steam jacketted, it does not burn the food; whilst there is always a good supply of hot water, which is just now so much required in the dairy, farm, stable and kennel. A sixteen gallon apparatus will give you thirty gallons of hot water in the same number of minutes. These cookers have grown rapidly in favour with stockbreeders, etc., whilst they are used extensively by Her Majesty's Government, and the Midland and Lancashire and Yorkshire Railway Companies.

Messrs. Fidler and Sons, of Reading, had their usual grand display of potatoes and seeds for field and garden. Messrs. Fidler are well known for their numerous disease resisting potatoes, and this year they have added another variety to their already long list. To perpetuate the name of the founder of the firm it has been named the Charles Fidler; it is a most prolific cropper and is of splendid quality. Any potato growers who visited the show and failed to inspect the stand missed one of the most interesting sights in the hall.

Messrs. Richmond and Chandler, Ld., Manchester, had on view a number of safety feeder chaff cutters, for which at the late Paris Exhibition they were awarded a gold medal; whilst we may recall to mind that at the Royal Agricultural Society's Show at Birmingham in 1898, this firm's "Multiplex" safety feeder won the £10 prize, beating fifteen other makes. It has of course since been improved, and various other prizes have been awarded it.

Stand No. 274, which was in the Berners Gallery, was in the occupation of Messrs. Stephen Pettifer and Sons, of Malmesbury, Wilts, manufacturers of "Santovin," the famous sheep medicine, numerous samples of which were shown; also other animal medicines. Another article they showed of especial interest at the present time, namely, a patent lambing and farrowing forceps, a simple yet efficient instrument for the use of shepherds or pigmen. That the lives of many young animals that are often sacrificed may be saved when these forceps are at hand is an undoubted fact, and as the price is a moderate one, no lambing pen or breeding stye should be without them. At the Warwick Agricultural Society's Show at Coventry last August, these forceps gained a silver medal.

Amongst the exhibits of Messrs. Harrison, McGregor and Co., Ld., of the Albion Iron Works, Leigh, Lancashire, was an "Albion" Mower No. 9, an entirely new machine, which possesses several points of superior excellence, and is altogether one of the best mowers in the market. A number of specimens of the Albion harvesting machinery help to complete a most interesting stand.

The Molassine Co., Ld., of 36, Mark Lane, E.C., exhibited samples of Molassine food for horses, cattle, sheep, pigs, etc. It is a staple food and condiment combined, and replaces an equal quantity of fodder. It has not been on the English market very long, but it has met with a most favourable reception from stock breeders throughout the country. It is claimed that it is cheaper than any other provender of equal feeding qualities that has been put on the market, and that when it is used regularly cows give richer milk and the supply is increased—two important items for farmers. We may mention that it has been introduced into the Imperial and Royal stables of the Emperors of Germany, Russia and Austria, and is adopted throughout the German army.

To enumerate all the dairy appliances shown at the stand of Messrs. Thomas Bradford and Co., of High Holborn, W.C., etc., would take up a great deal of space, so that we can only make mention of two or three of the chief exhibits. The Diaphragm

churn, which was awarded two first prizes at the Royal Agricultural Society last churn trials, is still the principal churn, but there is another one which is a great favourite now, namely, Bradford's Anglo-Hibernia, which was awarded a silver medal at the last London Dairy Show. In addition to their stock of dairy implements Messrs. Bradford had on view a good selection of domestic laundry machinery, including, of course, their well-known wringing, washing and mangling machines.

Messrs. Garton, Ld., had, as usual, a most extensive display of their new and improved breeds of wheat, oats, etc., neatly mounted in cases, whilst the method of plant breeding was interestingly described by a series of enlarged micro-photographs. Their famous breeds of barley and oats were largely inspected, as were also the various roots, among the latter being five swedes and the same number of mangels, which gained two £25 prizes at county shows. Altogether the stand was an object lesson for farmers, showing the advantage of growing pedigree seeds.

The well-known firm of E. W. King and Co., of Coggeshall, exhibited a capital collection of mangels, swedes, turnips, vegetables, etc. Perhaps the most striking feature of this stand was a collection of their new prize-winner mangel, grown without any manure by one of their customers, who with twelve specimens, which weighed 314lbs., won five first prizes at a country root show. To demonstrate the keeping qualities of this mangel some specimens of last year's crop were shown, and they were in capital condition.

Messrs. F. C. Southwell and Co., of 75, Southwark Street, London, S.E., who are the general agents in England for the Deering Harvester Company, of Chicago, the Cockshutt Plough Company, of Canada, the Syracuse Chilled Plough Company, New York, the Ohio Hay Loader and Tedder Company, the Coulthard Scott Cultivator Company, of Canada, and the Keystone Weeder Company, had two important stands, the one in the east gallery, No. 163, for the Deering Harvester Company's machines, and that downstairs in the King Edward's Hall, Nos. 46 and 47, for the Ohio Hay Loader, the Ideal Cultivator, the Cockshutt Plough, and the Keystone Weeder, etc. On their stand in the gallery they showed their up-to-date Ideal harvester and binder, which now occupies the second place in this country in the point of numbers sold, so great and so rapid has been its growing popularity. On their stand downstairs we noticed for the first time Messrs. Southwell and Co.'s Ohio hay loader, a certain number of which they introduced into this country last hay harvest, and so superior in its action and construction did it appear to practical men that hundreds more could have been sold if they could have been obtained in time, as it saves from three to four men, and labour was, as is well known, so very scarce. It is claimed for this implement to be the most wonderful labour-saving harvesting machine introduced in recent years.

On Stand No. 184 the Walter A. Wood M. and R.M. Company, as usual, had a very creditable and highly interesting exhibit of their world-renowned haymaking and harvesting machines, and not the least attractive item on this stand was a large oil painting of the founder of the firm, Walter A. Wood, surrounded by a very valuable collection of hundreds of medals and trophies awarded to the "Wood" machines. The machines shown were:—One-horse steel mower, two-horse open gear iron frame mower, two-horse steel mower, tubular tilt bar mower, hay tedder, all-steel hay rake, harvester and binder, and knife grinder. The Paris Souvenir Exhibition Catalogue issued by this firm is a work of art. It contains illustrations of the early types of Walter A. Wood machines, and a list of prizes awarded to the "Wood" machines since 1853. Altogether it is an interesting and instructive publication, and farmers should secure a copy, which can be had post free on application.

At Stand No. 7, Messrs. E. R. and F. Turner, Limited, of Ipswich, and Mark-lane, London, occupied the same amount of space as usual. The general appearance of this stand is always most attractive, and certainly this year was no exception to that rule; on the contrary, the machines, if anything, looked brighter and more business-like than ever.

It would be difficult to find machines which enjoy a greater popularity with the machine-using public than do Messrs. Turner's crushing, kibbling, and grinding mills. These oat-crushers, or something very like them, were, unless we are mistaken, well to the fore in 1853, when they were awarded first prize in the R.A.S.E. trials. They have certainly undergone some few alterations which have kept them up to date, but the principle is the same, and it will take a lot of beating now.

Mr. Joseph Lowry's First Prize Heifer at the Royal Dublin Show.

SOCIETIES.

The Royal Agricultural Society.

The usual monthly meeting of the Council was held at 13, Hanover Square, on the 12th inst., Earl Cawdor (President) in the chair. Seventeen candidates were elected members of the Society, and Mr. W. A. Prout, of Sawbridgeworth, was, on the motion of Sir John Thorold, seconded by Mr. Martin, elected a member of the Council in the room of the Earl of Derby, appointed a vice-president.

Prizes for the Cardiff Meeting.

The chief business before the meeting was the settlement of the prize-sheet for the Country Meeting to be held at Cardiff from June 26th to July 1st, 1901, under the presidency of Earl Cawdor. The recommendations of the various committees as to prizes to be offered on this occasion were submitted, and an animated discussion arose as to the proposal made by the Stock Prizes Committee to make a separate section for Lincolnshire red Shorthorn cattle, for which a number of prizes had been offered by the Lincolnshire Red Shorthorn Association. Sir Jacob Wilson raised objections to the inclusion of these classes, and Sir Nigel Kingscote, seconded by Mr. Ashworth, moved that the prizes be expunged from the prize-sheet. Mr. Sanday, Mr. Frankish, and Mr. Hornsby defended the decision of the Stock Prizes Committee, and Mr. Dugdale, Sir Walter Gilbey, Mr. Stratton, Mr. Martin, Lord Moreton, Mr. Sutton, the Hon. Cecil Parker, and others, continued the discussion. Eventually, on a show of hands, the prize-sheet as presented by the Stock Prizes Committee, including the classes for Lincolnshire red Shorthorns, was approved by twenty-four votes to twelve.

Another debate arose on a motion by Mr. Howard P. Ryland, "that the Society offer prizes, under proper restrictions, for jumping competitions at the Cardiff Meeting of 1901." This was seconded by the Hon. C. T. Parker, who urged its acceptance by the Council on the grounds of financial expediency, and agreed with the opinion expressed by Mr. Ryland that these competitions would attract a large number of visitors to the show. Mr. Penn Gaskell opposed the motion on the ground that he failed to see how these competitions could be carried out under restrictions which would make them compatible with the objects that animated the Society in holding its annual shows, viz., to encourage in all branches of the community an interest in agriculture. Mr. C. W. Wilson, Mr. Neville Grenville, Sir Walter G[illegible], Col. Curtis-Hayward, Mr. Ransome, Mr. Stratton, Mr. Foster, Sir Nigel Kingscote, and others continued the discussion. The motion was carried on a show of hands by twenty-two votes to eleven, and the further consideration of the matter was remitted to a sub-committee to draw up the regulations for submission to a future meeting.

The total amount of prizes to be offered in connection with the Cardiff meeting will be £5,[illegible], of which the Cardiff Local Committee contribute £[illegible], and various breed societies £353. The prize sheet will include classes for the established breeds of horses, cattle, sheep, and pigs, as well as for poultry, butter, cheese, cider and perry, and hives and honey. The champion prizes for most of the breeds will be offered by the Stud, Herd, and Flock Book Societies identified with the breeds. There will be competitions open to the United Kingdom for shoeing smiths in two classes, for light and heavy horses; and the Worshipful Company of Farriers will present the freedom of their Guild to the winner of the first prize in each class. Prizes will be offered in the implement department for oil engines and ice-making plant, and judges for these were nominated, as well as for miscellaneous implements entered for the Society's silver medal. Mr. R. M. Greaves was appointed a steward of implements, Mr. E. W. Stanyforth a steward of stock, and Mr. W. Frankish and Mr. F. S. W. Cornwallis stewards of finance for the Cardiff meeting.

Future of the Journal.

Sir John Thorold reported from the *Journal* Committee that they had further considered the question of the further issue of the *Journal*, and were unanimously agreed in recommending to the Council that after the conclusion of the current volume the *Journal* of the Society should be issued once a year in a volume suitably bound, with the full reports as before of the Council, and of the scientific advisers, together with articles by expert writers on matters which appeared to be of permanent interest and of value for reference. Any reports or memoranda of immediate importance would, however, be communicated as soon as available to the agricultural and general Press, and circulated amongst members who might from time to time express a wish to have them. The Committee took the opportunity of the present occasion on which Dr. Fream would attend as editor of the Society's *Journal* of expressing their high sense of the editorial work done by him for the Society, not only in connection with its *Journal*, but also in the compilation of its text-book on "The Elements of Agriculture."

The Permanent Site.

Sir Nigel Kingscote reported from the Special Show Committee that since the decision of the Council on August 1st, "That it is desirable to obtain a site in the neighbourhood of London for the purposes of the Society's permanent showyard," the Special Committee had been actively engaged in considering various sites offered to them in the London district, and have made a certain amount of progress in their inquiry, though they were not yet in a position to present any definite recommendation. It appeared probable that it would be necessary for the Society to rent, and it might be hoped eventually to acquire, a site of its own, capable of adaptation to the Society's special needs and of being utilised—during the time it was not required for the preparations for the show and the show itself—for any other kindred or subsidiary purposes that might present themselves. The matter was so important for the future well-being of the Society that any proposals for the actual selection and equipment of a permanent showyard must be thoroughly well considered in all their bearings before a definite decision could be arrived at; and it was not, therefore, possible for the Special Committee on that occasion to do more than to report progress towards a solution of the difficult problem remitted to them.

The Council adjourned over the recess until Wednesday, February 6th, 1901.

Annual Meeting.

The half-yearly general meeting of Governors and members of the Royal Agricultural Society of England was held on the 15th inst. at the Society's house, Hanover Square, Earl Cawdor, President, occupying the chair. The report of the Council was taken as read.

Sir W. Vincent, in moving the adoption of the report, said there was no department of agriculture which had not received the close attention of the Society. Mr. W. F. Holt Beever seconded the motion.

Surgeon Lieut.-Colonel J. Ince asked whether the attention of the Council had been drawn to letters

in the Press dealing with the financial management of the Society. As to a permanent location for their annual shows, he hoped more discussion would take place before the whole matter was finally settled. He also suggested that they should not think of purchasing a site for the present.

The Chairman, in reply, said when the accounts were fully drawn up and audited they would show exactly the financial position of the Society, and he could not anticipate the auditors' statement. With regard to the selection of a site for the permanent location of the shows, it would be seen by the report that they were proceeding on the lines suggested by the last speaker.

The report was then adopted.

On the motion of Mr. J. More, M.P., the auditors were thanked for their services and re-elected.

Mr. Hanbury, who was received with hearty applause, proposed a vote of thanks to the Chairman. Lord Cawdor, he said, presided over a Society which practically dealt with every branch of agriculture, and watched over agriculture as a whole. He was bound to say, with regard to his experience at the Board of Agriculture, he almost wished the same thing could be said of that Department. (Laughter.) Perhaps it was a Board that might develop as time went on, but it occurred to him at once that one of the difficulties placed in the way of the President of the Board was that so many other departments dealt with agriculture, and that the Board of Agriculture had to deal with many things which did not belong to agriculture. He should do his best to work there with his colleagues, and do anything he could, at any rate, to assist that admirable Society to promote the interests of agriculture generally. (Loud applause.) Lord Cawdor was also chairman of a very large railway company. It must give the Society additional pleasure to have as its president a nobleman connected with railways, and he was sure that whenever the occasion arose the chairman would be only too anxious to let his duties coincide, and do his best for the interests of agriculture. (Applause.)

Mr. Henry Dudding seconded the proposition, which was carried with acclamation.

The Chairman, in acknowledging the compliment, expressed the hope that anything he did might not tend to diminish the usefulness of the Society. There were undoubtedly many difficult questions which they were endeavouring to solve at the present moment, and it was a very great satisfaction to the Council to feel that the members had confidence in them. (Applause.) So far as his relations with railway companies were concerned, there was nothing he and his co-directors would not do, so long as it was in accordance with their duty to their shareholders, to endeavour to promote the agricultural industry. In tendering the thanks of the Society to Mr. Hanbury for attending the meeting, they all recognised that the Board of Agriculture had at its head a very strong business man—(applause)—and it was a satisfaction to hear from the right hon. gentleman that during his term of office he would be glad to do everything he could to keep well in touch with agricultural societies and others, and do all he could for the benefit of agriculture. He was sure the interests of agriculture could not be in safer or stronger hands than those of the President of the Board of Agriculture. (Loud applause.)

The proceedings then ended.

Royal Counties.

The Royal Counties Agricultural Society's annual general meeting took place at the Council Chamber, Town Hall, Basingstoke, on the 28th ult. The attendance of members was not so large as usual. Mr. A. F. Jeffreys, M.P., was unanimously voted to the chair, and in proposing resolutions of condolence with Her Majesty the Queen and their Royal Highnesses Prince and Princess Christian of Schleswig-Holstein on the lamented death of his Highness Prince Christian Victor, said they all knew Prince Christian well, and were acquainted with the keen interest he took in that Society; and they also knew how great an interest Her Majesty the Queen had taken in their operations. (Hear, hear.) For himself he (Mr. Jeffreys) might say he personally knew Prince Christian Victor, and he could honestly say that he had never met a more engaging young man in his life, or one more beloved by those who were brought into contact with him. (Applause.) Prince Christian Victor was one of the most popular young officers in the Army, and men of every rank regretted his untimely death extremely. (Hear, hear.) He proposed that a vote of condolence be sent to the Queen and to Prince and Princess Christian. (Hear, hear.)

Mr. Harris, in seconding, said he was sure they all felt very deeply with their gracious patron the Queen and their good old friend Prince Christian and his consort in their great bereavement. (Hear, hear.)

The resolution was unanimously passed.

A Loss of £250 on the Year.

The next business was to receive and adopt the report of the Council and the audited statement of accounts for the past year. The report was as follows:—

In presenting their annual report the Council have once more to record a very hearty welcome from the ancient city of Winchester, which has on several occasions given a cordial reception to the Royal Counties Society. For the second time His Royal Highness the Duke of Connaught, K.G., honoured the Society by accepting the office of President, and in company with His Royal Highness Prince Christian of Schleswig-Holstein, visited the show on two days, being accorded a very warm reception. Following on the record show at Windsor it was only to be expected that the entries and receipts would show a falling off, and there is no doubt that the attendance was adversely affected by the war, the result being that the accounts show a loss of about £250 on the year, and the deficit would have been greater but for the generosity of the Winchester Local Committee in placing a surplus of about £168 at the disposal of the Society. The entries numbered 1,702, as against 2,088 at Windsor in 1899 and 1,461 at the last meeting at Winchester in 1890; and an excellent site for the show yard was placed at the disposal of the Society, through the courtesy of Mr. James Stratton, to whom the Council are much indebted. During the past year four life members and sixty-six annual members have been elected, and the amount received in subscriptions is very satisfactory. The Council have to report, with deep regret, the death of Sir Henry Simpson, who had for many years been a member of the Council, and took a very prominent part in the arrangements for the Windsor meeting. The audited statement of accounts shows a balance in favour of the Society of £1,873 19s. 5d. as against £2,130 18s. 1d. at the end of 1899. The Council have, in conclusion, to report a cordial invitation from the borough of Weymouth to hold the 1901 meeting in that town, and they look forward to a substantial increase in the membership during the coming year.

Not a Matter of Surprise.

Mr. W. M. Harris, in proposing the adoption of the report and financial statement, which he said he did with great pleasure, drew attention to a few of the items. Those who had gone through the figures would all recognise the fact that the work of the Society for the year just closed had ended in a loss of something like £250. He did not think that came as a matter of surprise to any of them, because although they had a successful show at Winchester, they were aware that the city was not a populous place, and also that Winchester, like other places, had been pretty well drained in connection with the war. All their purses, rich and poor alike, had as a fact been drained in that way; and they were thankful to know that nine out of every ten Englishmen had given something at any rate to help our soldiers and sailors in one way or another. (Hear, hear.) Still, that fact necessarily affected their income. On the other side the Council of the Society had been doing their best, as the balance-sheets would show. Their gate-money at Winchester was £900 less than at Windsor, and they also received £100 less on tenders, etc. That had had a bad effect on the results financially, but the Council and the secretary had tried to economise in the work of the Society. Agricultural societies had got more numerous throughout the country, and the public, also, having visited many shows took less interest in them than they did years ago, so that they could not expect the same great receipts at the gates. Therefore they had to practise economy, and a glance at the figures would show that the Council and the secretary had altogether saved about £500 on the expenses this year, as a set-off against the £900 less receipts. They hoped the visit to Weymouth next year would be rather more successful than the last show, as regarded finances, but whether that would be so or not he of course could not say at present. His business that day was to ask their acceptance of the report and financial statement as placed before them. (Applause.)

Mr. John Hutton seconded the resolution.

The Secretary called the attention of the members to one agreeable feature in the accounts which had been overlooked by Mr. Harris, viz., that the amount received in annual subscriptions this year was £655 14s., as against £626 15s. 6d., last year, which was the previous best year they had had for subscriptions in the history of the Society. (Hear, hear.)

The resolution was carried unanimously.

Election of President.

The Chairman, in proposing the election of the Right Hon. Viscount Portman as president for the ensuing year, said he had known his lordship for a great number of years, and could safely say that he was one of the most popular noblemen in the country—a good sportsman, a Master of Hounds, and one who, altogether, took a very great interest in every way in agricultural and rural pursuits generally. (Hear, hear.) He did not think, whether they held their next meeting in Dorsetshire or anywhere else, that they could get a better president than Lord Portman; and he was glad to hear that he was willing to accept the office if they elected him to it. (Applause.)

Mr. E. Hayter, in seconding, said he had known Lord Portman for the last forty years, and could endorse every word the Chairman had said.

Messrs. W. H. Forder and Joseph Marks, of Winchester, were added to the list of vice-presidents on the proposition of Mr. James Harris, seconded by Mr. J. Stratton.

Mr. W. M. Harris moved, and Mr. J. P. King seconded, the re-election of the retiring members of the Council, as below, with the substitution of the name of Colonel Willan for that of Mr. James Harris, of Winchester, who has become a vice-president:—Messrs. S. H. Allen, Eastover, Andover; C. Barfoot, Lake, Bishopstoke; Viscount Baring, Stratton, Micheldever; Newton Clayton, Selsey, Chichester; T. A. E. Hayter, The Mount, Whitchurch, Hants; W. J. Henman, Moulsford, Berks; F. M. E. Jervoise, Herriard Park, Basingstoke; Sir William D. King, Stratford Lodge, Southsea; G. F. North, Strathfieldsaye, Mortimer, R.S.O.; Walter Perkins, Portswood House, Southampton; G. Slater, Canterbury; J. E. Willis Fleming, Chilworth Manor, Romsey; Colonel Willan, Thornhill Park, Bitterne.

Mr. W. Newton moved, and Mr. E. Whitfield seconded, "That the members of the Royal Counties Agricultural Society beg leave to tender to his Royal Highness the Duke of Connaught, K.G., their warm and respectful thanks for the honour H.R.H. conferred on the Society by acting as president during the past year, and for his kind presence at the Winchester Show."

Several other votes of thanks were passed.

Royal Lancashire.

The annual general meeting of the Royal Lancashire Agricultural Society was held at the Town Hall, Preston, on November 26th, Colonel Royds, M.P., president, in the chair.

The Chairman said that since the report was issued certain matters had arisen which it was thought advisable to include in that document. The Council regretted to announce the resignation of Mr. Birch from the secretaryship, and to state that at a recent meeting a special committee was appointed to consider the means of filling the vacancy, together with the duties, remuneration, etc., also the situation of the society's offices. This committee's report had been under consideration, and the Council had decided to intimate by advertisement that they were prepared to receive applications for the position. They also considered that the present was a favourable opportunity to have the society's headquarters more centrally situated, and recommended that the central offices should in future be at Preston. The Council had unanimously decided to ask the retiring secretary's acceptance of an honorary life vice-presidentship of the society, together with 100 guineas, in recognition of his valuable services. The addition to the report submitted by Colonel Royds was approved.

Mr. Hamilton drew attention to a paragraph in the report making certain recommendations in regard to farm prizes. He suggested that in future prizes might be offered for various classes of crops. Many farmers might enter this competition who would not enter that for "the best managed farm." He contrasted the position of the owner of a Hackney who made a tour of the various shows and won probably valuable prizes on each occasion, with that of the tenant of a 200 acres farm competing for the farm prizes. This man was a credit to his neighbour, his landlord, and a benefactor to his country, but he was not able to drive his farm past the grand stand. Yet every three years they offered him as a prize a sum that would scarcely pay for the trimming up before the judges paid him a visit. He thought this society would be well advised if those prizes were considerably increased.

Mr. R. Webster pointed out that no prizes would be given for farms until 1902. The prizes Mr. Hamilton referred to were not fixed upon, but were only recommendations. He (Mr. Webster) hoped to see included classes for small as well as large farms.

The President rose to ask Mr. G. C. Hale's acceptance of an illuminated address conveying the honorary vice-president life membership of the Society. Col. Royds observed that there appeared in the annual report an exceedingly happily worded paragraph bearing on this presentation, and however he might try it would be scarcely possible for him to convey more cordially and more feelingly the sentiments of respect and regard expressed by the Council to Mr. Hale. They wished to do honour where honour was indeed due. They recognised the long period of valuable services rendered with unfailing tact and ability. Perhaps the greatest satisfaction Mr. Hale could have was the evidence in the report showing that the Society was in a flourishing condition. The address, of which he asked Mr. Hale's acceptance, was a token of the value they attached to his services, not only to the Society, but to agriculture generally.

Mr. G. C. Hale, cordially received, expressed the hope that his long services had in some respects been advantageous. Although this might be the termination of his active service in connection with the Society, his interest would still be maintained, and his endeavour would be to promote its welfare. It was fifty years since he joined the Society, being first introduced by the then president, Lord Stanley, at the union of the Manchester and Liverpool Societies in 1848. Mr. Hale referred to various phases in the Society's constitution, and contended that the position it held at the present time was second only to one in the country. With unanimity among its members it had every prospect of becoming the chief county society in the United Kingdom.

The Secretary announced that in consequence of 1902 being Guild year, Preston had invited the

Society to visit the town. It was now within the power of the Council to fix the date and place of that show.

Councillor J. Y. Foster, as a member of the Society and as the occupant of the Mayoral chair when the Preston Town Council accorded a unanimous invitation to the Society, moved the acceptance of that offer. The Corporation had been fortunate to secure Lord Derby for their Guild Mayor, for, as they knew, anything his lordship took in hand he made a thorough success. He ventured the hope that his lordship might be president of the Society for that year. As for the inhabitants and the raising of the local prize fund, the Society need not have the slightest apprehension. Mr. T. Nevett seconded. The Chairman observed that this was a happy suggestion, and augured well for the Society. The motion was unanimously carried.

A deputation, consisting of Alderman John Foster (Mayor of St. Helens), Mr. William Gamble (local treasurer), and Mr. David Gamble (local secretary), appeared to invite the Society to hold its 1901 show at St. Helens. Alderman J. Foster said the preliminary arrangements were practically completed. The municipality had unanimously agreed upon this invitation, and the water supply for the show and any roadmaking required would be undertaken free of cost. A committee had already been formed. During the fortnight the proposal had been before the town over £700 had been promised towards the local fund. This, however, only partly represented the sum that would be raised as soon as the public had definite information that the Society was to visit St. Helens. The proposed site was Grange Park, which had a considerably larger acreage than that required by the Society. It was conveniently situated, being about one and three-quarter miles from St. Helens, two miles from Rainhill, and electric cars traversed three sides of the park.

Mr. W. W. B. Hulton moved the acceptance of the invitation, feeling certain there existed all the elements conducive to success. Mr. J. T. Wood seconded, observing that no town would accord the Society a more enthusiastic reception than St. Helens. The resolution was unanimously carried.

Lord Derby moved the appointment as president for the ensuing year of Sir David Gamble, whose family was inseparably connected with St. Helens, and no less than three generations had enlisted themselves in the service of the Society. They had abundant evidence of the good work Sir David Gamble had done in St. Helens and neighbourhood, and by his intelligence, enterprise, and liberality had done honour to himself and conferred immense benefit on the town. Sir David had already earned the deep gratitude of the Society in consenting to undertake the duties of president for the ensuing year. He would have preferred the honour to have been in other hands but he (Lord Derby) made it his duty to ask his acceptance on the ground that it was a public service to his county and his society. He, therefore, put aside any personal inconvenience and consented. He asked the members to support him and help the St. Helens show to attain the success it deserved. Though this was a new field, it was a field of promise. Sir David Gamble would during his year of office add lustre to his own name, and confer advantage to the Society.

Captain Withington seconded. Carried. Sir David Gamble, on taking the chair, had a cordial reception. He entertained no doubts as to the success of the St. Helens Show, and felt sure the arrangements would be carried out to the satisfaction of the Society. The dates fixed for next year's show were July 25th, 26th, and 27th.

Lord Derby moved a hearty vote of thanks to the retiring President. In Colonel Royds they had had a president of the right sort. He gave up the privacy of his own grounds for the purposes of the show and worked up his fellow townsmen to the proper pitch of enthusiasm. Dr. Wingate-Saul seconded. Colonel Royds gratefully acknowledged the resolution. He had felt it to be a great honour to have occupied the position, and whatever shortcomings there might have been on his part, they did not arise through any lack of interest. It afforded him the greatest possible satisfaction to think he had done something to contribute to the Society's success, and to have brought it before a town which otherwise would not have been in touch with it.

The Council recommended that in view of the proposed second inspection of farms in August taking place after the show, the following clause in Rule 15, "The awards for best cultivated farms shall be declared by the judges at the special general meeting of members held during the annual show in the showyard," be transferred to Rule 11 (business of annual meeting). This motion was moved by Mr. W. Fitzherbert-Brockholes, in the absence of Mr. Philip Park, and carried.

It was resolved, on the motion of Mr. T. Nevett, that the approximate sum to be offered in prizes at next year's show should be £1,500. The revision of the prize list was deputed to a committee.

Council Meeting.

At the council meeting held just previous to the above, Mr. Birch, the secretary, showed that satisfactory decisions had been arrived at with regard to two disputes in the prizes at the Rochdale Show. For the first time in the history of the society they had restored to law under the following circumstances:- Mr. Tom Lund, chartered accountant, Keighley, a visitor at the Rochdale Show, purchased, through the secretary's office, an exhibit at the catalogue price (£4), which he paid for by cheque. The exhibit was forwarded him in the usual course on the Monday after the show. He refused to accept delivery, and stopped payment of the cheque on the ground that the bird was too late for his purpose, and that it had deteriorated in value. The railway company, after keeping the bird at Keighley for five weeks, sold it for 15s., deducted 7s. 6d. for carriage, and tendered the balance 7s. 6d. to the society. This he (the secretary) refused, and as the society was in the position of agent for the seller, after giving Mr. Lund notice he took proceedings against him in the Rochdale County Court. The evening before the case was to be heard Mr. Lund paid the amount and fees (£5 17s.) into court. As the society had been put to some considerable trouble and expense, he instructed the society's solicitors to appear on the following day and ask for costs, which they succeeded in obtaining.

A special committee appointed to consider the means to be adopted to fill the vacancy caused by the resignation of Mr. Birch as secretary, together with the duties, remuneration, etc., recommended for the new secretary a salary of £350, to include all clerical assistance. They also suggsted that in view of the removal of the society's offices to Preston, "that not fewer than one meeting of the council should be held in Manchester, one in Liverpool, and two in Preston annually."

On the proposition of Mr. G. C. Hale, seconded by Mr. J. W. Fair, it was recommended that, in recognition of his valuable services, Mr. J. Birch be elected an honorary life vice-president.—The council approved the recommendations.

Mr. Birch, in responding, said he had always had the greatest pleasure in serving the council of the Society. He had had the privilege of serving under a group of presidents as would probably hardly ever fall to the lot of another secretary. These comprised Lord Derby, Lord Lathom, Lord Cross, Mr. Victor Cavendish, Colonel Starkie, and Colonel Royds. If at any time his experience could be of any use to the society, it would always be available, and if any misfortune should happen to the society, he would be glad to temporarily fill the vacancy.

Mr. R. Webster, while admitting the honour conferred upon Mr. Birch in making him a life vice-president, thought a great society like theirs ought to do something in the way of an honorarium.—Mr. T. Backhouse also urged there should be some tangible form of recognition of the services of Mr. Birch, whose name was a household word in Liverpool. Mr. Webster moved that a grant be made from the fund of £200. A second proposition was for 100 guineas. Mr. J. T. Wood, in supporting the larger amount, said that in Mr. Birch's first year he paid for assistance £200 more than the society allowed him in salary. Lord Derby urged that Mr. Birch had kept open his office in Liverpool principally for the advantage of the society, and that he had been most liberal to them. Mr. Hulton remarked that if Mr. Birch were paid £200 it would only be his due. On a vote there was a majority in favour of the smaller sum.

Yorkshire.

Loss of nearly £3,000 on the Doncaster Show.

The annual meeting of the members of the Yorkshire Agricultural Society was held on Wednesday afternoon at the De Grey Rooms, York. The Earl of Feversham was voted to the chair in the absence of Mr. G. Bacon Frank, the president for the year. The Council met just prior to the general meeting, and approved of the report, which was afterwards submitted in form.

In the Secretary's report on the year's work it was stated that the financial result of the show at Doncaster was a loss of nearly £3,000. The site was everything that could be desired, the local committee spared no effort, and the weather was most favourable; yet the attendance was the lowest for over thirty years. The entries for cattle were 245, as against an average of 233 for the five years ending 1899, and sheep 161 as against 162, the falling off being in the horse section, where 539 were shown as against an average of 567. The entry for sheep might therefore be regarded as good, and that for cattle satisfactory. The entry for horses depends to a great extent on the locality in which the show is held, but, says the report, there has been a falling off in this section during the last five years. This would seem to indicate that the farmers are now devoting less attention to the breeding of horses than formerly, and more to cattle and sheep. With respect to the implements, there were 177 exhibitors, as against an average of 213, a difference of 36, but as compared with Hull the number of compartments taken was in the aggregate 204 less, with a diminution in the open space of 250 square yards. This great difference in the implement department was no doubt attributable to the Royal being held at York and the Highland at Stirling, the latter probably having the greater effect.

The attendance of the pubic as compared with the average was as follows:—First day, 2,255, average 7,265; second day, 14,615, average 39,771; third day, 3,343, average 12,350; respectave totals, 20,193, average 59,386. The total turnstile, season ticket, and grand stand receipts were:- Doncaster, £1,366 6s., against an average of £4,082 7s. 10d., or a decrease of £2,616 1s. 10d.

An Appeal for £10,000.

To meet this deficiency the Society have invested securities valued at £1,660, leaving, exclusive of the value of the rolling stock, a sum of £1,750 to be provided for, to meet which debt the Council have effected an arrangement with the Society's bankers. At the present day, owing to the increased cost of labour and materials and other outgoings, the total cost of placing the show before the public is nearly £10,000. The average profits for the five years ending 1899 have been £185 per annum, which is equal to £1 17s. per cent. on the outlay. This is a risk which no voluntary body should be asked to undertake, and the Council therefore recommend that they do not feel justified in holding another show until the funds of the Society are placed on a sounder basis, and to effect this they recommend that an appeal be made to the county for £10,000 to be raised by voluntary subscriptions of not less than £10 each. They also recommend that the reports of the Selection and Stock Prizes Committees stand over until the adjourned Council meeting on the 31st January, 1901, and that Mr. Stephenson's motion as to altering the date for holding the show be also allowed to stand over until such meeting. The Council regret to report the loss by death of two of its ablest members, the late Mr. Robert Eddison and Mr. Samuel Rowlandson. The Council particularly wish to direct attention to the meagre roll of membership, which now comprises 396 life members, 864 annual, and two honorary, a total of 1,262, and they trust that members will individually do their utmost to materially increase the income from this source. An invitation from the mayor and burgesses of Bradford to hold the show of 1901 in that borough has been accepted, and as there was a record attendance of the public when last the Society visited Bradford, the Council feel justified in looking forward with every confidence to a successful meeting in the ensuing year.

Colonel Gunter, M.P., in moving the adoption of the report, said the future of the Society was one entirely for the county. The finances were in a very bad condition, and it would depend altogether on the amount of subscriptions and donations sent in as to whether or not the Society should continue its career.

The motion was seconded by Sir Reginald Graham, and carried.

Election of Officials.

The Council recommended that Lord Masham be asked to accept the presidency of the Society for the ensuing year, and the proposal was very heartily endorsed by the meeting. One-third of the Council retire each year, and the members were re-elected, Mr. Reginald Wigram, of Leeds, and Mr. Hugh Rowlandson being elected to fill the vacancies caused by the death of Mr. R. W. Eddison and Mr. Samuel Rowlandson. The hon. director (Mr. Marshall Stephenson), the veterinary inspectors, the analytical chemist, and the auditor were all reappointed.

Lord Herries, in moving a vote of thanks to the retiring president, said that during his year of office Mr. Bacon Frank had done everything that lay in his power to promote the interests of the Society. Owing to unforeseen events, the show at Doncaster was not the success they had hoped for, but that was in no measure the fault of the president, who worked extremely hard in securing new subscribers, and in many other ways. (Hear, hear.) He sincerely hoped that the efforts now being put forth would enable them to place the Society on the stable footing it had occupied in former years, and that they would be able to cope with all the difficulties which confronted them. (Hear, hear.) It was not now merely a question of improving their position; the question was whether they were to exist at all, and their common desire must be to hand on the Society in the same state of efficiency in which they received it. The duty was incumbent on all Yorkshiremen, and he hoped they would readily respond.

The Hon. Henry Fitzwilliam seconded, and said he could not too strongly emphasise the words used by Lord Herries. They were on the verge of holding no show at all, and if Yorkshiremen did not respond to the appeal that was going out to them, he did not see that the show could be continued, even for the ensuing year.

In putting the motion, which was carried, the Chairman also emphasised the imperative need of putting the finances of the Society on a new foundation.

Presentation to the late Secretary.

On behalf of the Council and members of the Society generally, the Chairman then presented to Mr. Marshall Stephenson a beautiful and massive service of silver plate, consisting of a large silver Monarch bowl, candelabra, inkstand, two silver vases, and two cake dishes. The presentation was made "In general recognition of the valuable services he rendered to the Society during the years he occupied the position of secretary." Lord Feversham said the duty which had fallen to him was a matter of great personal pleasure and satisfaction, and he was sure Mr. Stephenson would accept the gift as a mark of

their regard and esteem, and as a recognition of the work he had done for the Society. During Mr. Marshall Stephenson's administration the Society's affairs rose to a high level of success. The arrangements for the annual show were always most satisfactory; the showground was a model of order and convenience, and the organisation seemed to be complete. These things could not have been achieved without hard work, great sacrifices of time, and steady perseverance in facing difficulties as they arose. Mr. Stephenson brought to bear all these qualities, and in all his dealings with members of the Society he showed a great desire to meet their convenience. In making the presentation, he expressed the hope that Mr. Stephenson's future career would be marked by every happiness and prosperity.

Mr. Marshall Stephenson, in acknowledging the tribute, said he was greatly embarrassed in attempting to express in words the depth of his gratitude, and he did not know what he had done to excite or deserve such a splendid testimonial. What he had been able to accomplish during a lengthened period of service to the Society was mainly, if not entirely owing to the kindly support and approval he received from those with whom he had the honour to be associated. That testimonial was, he believed, more owing to their liberality than to any merits he possessed. ("No.") Glancing back at the twenty five years during which he had been associated with the Society he was ready to acknowledge that the world had been very good to him, and that grateful recollection he could also extend to the friends of his youth in Northumberland, who accorded their warmest wishes on his leaving the county of his birth for the county of his adoption. His warmest thanks were due to all who had contributed in any way to that testimonial, and his obligations were particularly due to the gentlemen who acted as secretary and treasurer to the special committee. In conclusion, he wished every success to the Society, and all happiness to the members.

A vote of thanks was then passed to Lord Feversham for presiding.

Cheshire Chamber.

A meeting of the members of the Cheshire Chamber of Agriculture was held on the afternoon of the 10th inst. at Crewe, Colonel Cotton-Jodrell presiding. The secretary read a letter from Mr. C. E. Linaker, of Frodsham, referring to the Agricultural Rates Act of 1896, and combating the assertion that its effect was to benefit the landlords. He contended that the Act did not go far enough, and that one half of the rates was not a sufficient concession to the agricultural community. If they went back to the old system of maintaining the poor it would be found that agricultural districts had very light expenditure with regard to the relief of the poor, and it was a fact that the majority of the pauperism was furnished in large towns and urban districts. The land did not make paupers as a rule, and country districts, where they were purely agricultural, had only a small percentage of poor chargeable to the rates. If it was equitable that land should only pay one quarter of sanitary rates it was, in his opinion, fair that it should only pay one quarter of the poor rates.

Mr. W. J. Dutton said he was not quite satisfied that the time was opportune for a general discussion on the present fiscal system, because they knew there was pending a full and, it might be, a final report by the Royal Commission on Local Taxation, but it might be that that report would not be forthcoming in time, and that the Government would be required either to renew the Agricultural Rates Act or to allow it to lapse. They all hoped that the Government would renew the Act. He proposed "That this Chamber, recognising the justice of the Agricultural Rates Act, is of opinion that it shall be renewed and made permanent." He believed the Agricultural Rates Act of 1896 was the first attempt ever made by any Government to rectify what had been one of the gravest abuses known to the agricultural interest. When the Government of the day abolished the Corn Laws they took away from agriculture its protection, but they did not take away any share of their responsibility to pay rates. When agriculture was a protected interest this fiscal responsibility fell upon their shoulders as a natural consequence, and there was no argument in favour of agricultural burdens being reduced as long as they enjoyed agricultural protection. But when the Government, in their wisdom, abolished the Corn Laws, they took away that protection, but left them with financial burdens which had gone on increasing. There was an old Act of Elizabeth which contained the principle (which was always held to be a sound one) that responsibility to pay should bear some proportion to the ability to pay. The income tax recognised the principle of ability to pay, but the assessment of local rates did not make any distinction of this sort, and the consequence was that the agriculturist was called upon to pay an altogether undue proportion of them. From a statement made recently he found that 90 or 100 years ago the population of the country was 5½ millions, and of this number 4½ millions were agriculturists depending upon agricultural pursuits. The population of the country had increased to something like 35 millions, but the 4½ millions, as the number of the agricultural population remained stationary. Why should these 4½ millions have to pay an undue proportion of the local rates, while so many millions engaged in other pursuits did not bear their fair proportion?

Mr. W. Emberton seconded the motion, and said that agriculturists would be disappointed if the Act were not made permanent. He did not believe that the Act was a landlords' relief Act. It was undoubtedly a measure for the relief of the occupier or tenant. Even if the landlords had the benefit of it, he would defend it then, for it would be perfectly just, and the land would get the relief due to it.

Mr. J. Millington supported the motion, and said the word "relief" ought not to be used. It was a simple measure of justice. The land was overrated at the expense of other trades, and he thought, instead of being charged half the rates, it ought to be charged only a quarter.

Mr. Lomas supported the motion, which was carried unanimously.

The next subject for consideration was that of tuberculosis, and the working of the model milk clauses in the private Bills of local authorties. Mr. J. Sadler (secretary to the Cheshire Milksellers' Association) said he was of opinion that it would not be to the advantage of milksellers to ask for any modification of the model clauses. As they stood, if applied in a reasonable way, he did not see that much damage could be done to tenant farmers or milksellers. In the next place, he feared that if they raised the question with the hope of amending the model clauses, there would be a door opened for the municipal authorities to ask possibly for more stringent measures than they had at present. Moreover, they had had so little experience of the working of the clauses that he thought it would be premature on their part to take any action at the present moment. He moved a resolution, "That the Chamber considers it inadvisable to take any action at the present time."

Mr. Lomas seconded. He thought the farmers ought to do their best to help to promote the health of the great communities of the towns which took their milk, and that they had no reason to fear those authorities inspecting their shippons or carrying out the principle of the law which had been passed. There had been several scares lately—first there was the meat question, then the milk, and now the trouble was in the beer. The farmers were not afraid of the model clauses.

The motion was carried unanimously.

The chairman brought forward the proposals of the Council for dealing with the Cheshire Agricultural Memorial Benevolent Fund, the object of which is to make temporary grants to farmers who have been occupiers of land for a considerable length of time continuously in the county of Cheshire, and who, by adverse circumstances, have become destitute; or to the members of the families of such Cheshire farmers, living or deceased, who, in the opinion of the Council, are fit recipients for temporary assistance from the fund.

The scheme was approved.

Smithfield Club.

The annual general meeting of the Smithfield Club was held on the 11th inst., Mr. Leopold de Rothschild presiding. In the report of the proceedings of the Club during the past year sympathetic reference was made to the deaths of the Duke of Saxe-Coburg and Gotha and Prince Christian Victor. The report went on to state that, in accordance with a decision arrived at last December, the Association was on March 5th duly registered as the Smithfield Club, Limited. The invested funds were £4,616, with a balance on the right side of £1,576.

In moving the adopiton of the report, Mr. Leopold de Rothschild referred to the Queen's successes at this year's exhibition, and remarked that although Her Majesty did not own the champion beast, she had won her own cup, and had fully maintained the reputation of the Royal farm. The Club's success as an incorporated society seemed assured, and he warmly congratulated the members upon the fact that the Duke of Richmond and Gordon was to be their next president, and that in the following year this high office would fall to Earl Spencer. Under such auspices the best traditions of the Club would be upheld; and he thought it must be a source of gratification to those two noblemen that the Council's new medal, commemorative of the Society's second century of existence, bore on the obverse, with his Royal Highness's gracious permission, the portrait of the Prince of Wales, and on the reverse those of their illustrious ancestors, Lord Spencer and the Duke of Richmond, past presidents of the Club.

The Duke of Richmond was unanimously elected president for 1901, at the instance of Lord Tredegar, who declared that no name was more highly esteemed throughout English agricultural circles than that of his Grace, who, both in 1866 and 1873, had been the club's president. With no less alacrity the meeting subscribed to the proposition that Earl Spencer should serve in 1902, and his lordship, briefly acknowledging the honour thus conferred upon him, remarked that one of his family's proudest traditions was the connection of his uncle, Lord Althorpe as he then was, with agriculture, and for his part he promised to further, in every way possible, the interests of the Association of which his uncle had been one of the earliest presidents.

The vice-presidents were re-elected, with the addition to their ranks of Mr. Alfred Crosskill, while Mr. Leopold de Rothschild was warmly thanked for his admirable services to the Club in the office he was about to vacate.

Somerset.

The Prizes Committee of the Somerset County Agricultural Association met at the Municipal Offices, Bridgwater, on the 28th ult. Mr. H. Farthing was unanimously elected chairman of this Committee. The Committee went through the prize list for the Taunton meeting to be held next year (as a preliminary), and adjourned further deliberations thereon before bringing up their final report for approval of a subsequent Council.

The Poultry Committee met on the same day and unanimously elected Mr. Pitts chairman of this Committee. The Committee went through the prize list of the poultry and pigeon departments for the Taunton meeting, to be held next year, and adjourned further consideration thereof before presenting their final report for the Council's sanction.

The Council assembled at the Municipal Offices, Bridgwater, on the same day, under the presidency of Mr. James Cook, J.P.

The following resolutions of condolence were unanimously carried:—Proposed by Mr. T. Penny, seconded by Mr. Cook, as follows:—"The Council of the Somerset County Agricultural Association hears with sincere regret the loss which its president, Mr. C. E. J. Esdaile, J.P., of Cothelstone House, has sustained by the recent death of his son in China, and begs to offer Mr. Esdaile and his family its earnest sympathy and condolence." Proposed by Mr. W. Thompson (Mayor of Bridgwater), seconded by Mr. W. S. Bevis, as follows:—"The Council of the Somerset County Agricultural Association desires with very great respect to offer its most sincere sympathy and condolence to Mr. E. J. Stanley, M.P., of Quantock Lodge (a former president of this Association), and members of his family in their very sad bereavement by the recent death of Lieutenant H. T. Stanley (a life member of this Association) while fighting for his Queen and country in South Africa." Proposed by Mr. Cook, seconded by Mr. Stuckey, as follows:—"The Council of the Somerset County Agricultural Association, at its first meeting since the lamented death of Colonel Helyar in South Africa, desires to place on record its deep sorrow at the loss sustained by this Association and the country generally in being deprived of his generous, liberal, and zealous services through his falling a victim to Boer treachery when so ably serving his country, and at the same time to express to the bereaved members of Colonel Helyar's family sincere sympathy and condolence in their sad trouble."

The minutes of the last meeting were now read and confirmed.

The Secretary read the minutes of the Sites Committee, held at Taunton on the 28th August last, wherein the site adjoining Vivary Park was approved and selected. After some observations by Mr. T. Penny, the chairman of the Committee, upon the approaches and other matters, such minutes were approved and adopted. The Secretary reported that he had prepared the necessary agreement with the Taunton authority, and that same had been duly signed by the various parties thereto.

The minutes of the Prizes and Poultry Committees were read, approved, and adopted.

A vote of thanks to the Chairman for presiding closed the business.

Dairymen's Benevolent Institution.

The 26th anniversary dinner in aid of the Metropolitan Dairymen's Benevolent Institution was held in the King's Hall of the Holborn Restaurant on the 13th inst., Mr. E. G. Easton in the chair. The institution, which was founded in 1874, provides relief for the poor, aged, and afflicted but deserving members of the dairy trade, as well as the orphans and widows of deceased dairymen. No lavish expenditure in almshouses or other costly accessories is incurred, the funds being applied directly in aid of the most necessitous cases.

The Chairman proposed the toast of the evening, "Success to the Metropolitan Dairymen's Benevolent Institution," saying that they should never lose sight of the fact that no dairyman in London, whether he was an aristocrat in the West End or a small man in Plaistow or Stratford, providing he had become a member of the association, need ever sink into the depths of poverty and destitution. He did not think there was any charity in London which did so much good with so small a sum as was entrusted to the committee. Every shilling was properly placed, and nothing at all was wasted in extravagant expenses. As a trade they were waiting for the issue of a decree as to whether milk was to be sold at a standard or not. But one thing must not be forgotten, and that was that not all the departmental resolutions passed would ever make a cow give the same milk after two meals in succession.

Thirsk Christmas Fair was held on Tuesday. English two-year-old bullocks and heifers made £10 10s.; Irish two-year-old bullocks and heifers, £9 to £10 10s.; English year-old stirks, £6 to £7; Irish stirks, £4 10s. to £5; English calvers, to £18; calving heifers, to £15; drape cows, to £12; good bred lambs, 30s to 32s.; three-parts bred, 26s to 28s.; half-bred lambs, 21s. to 25s. each.

IMPROVED IMPLEMENTS AND MACHINERY.

Hay Loaders.

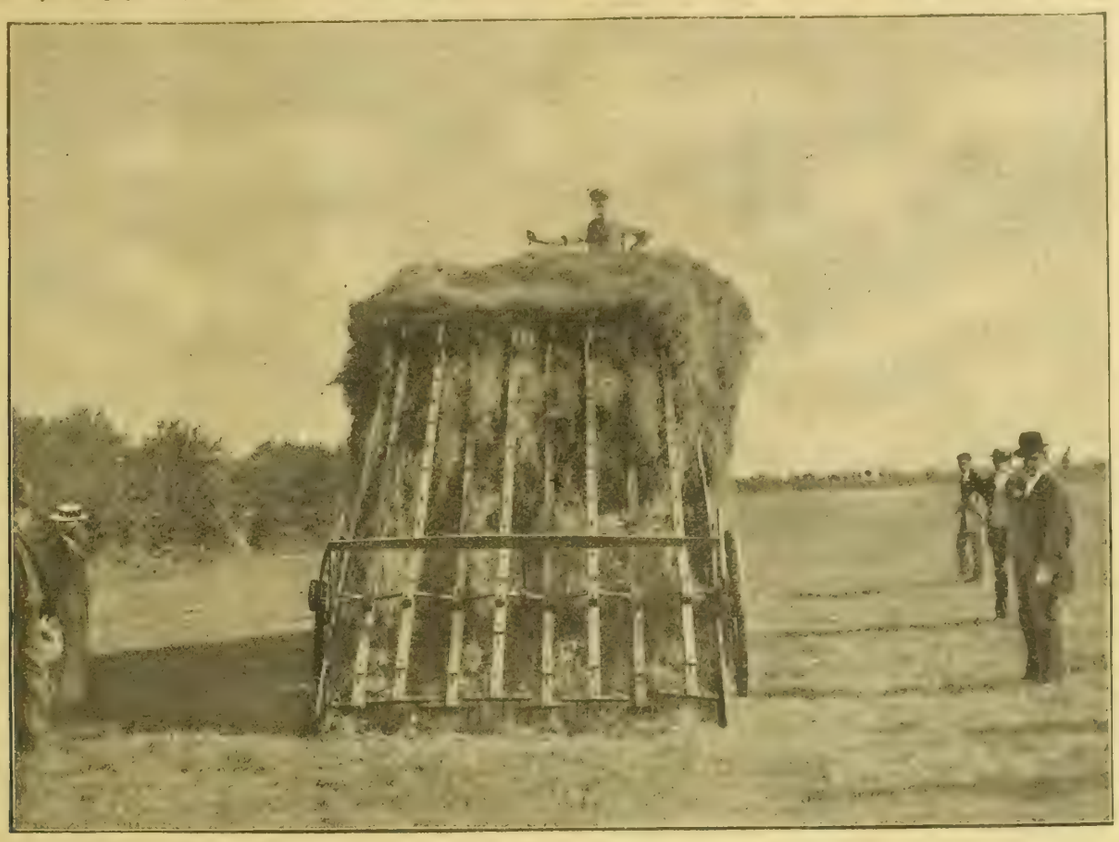
This week we give two photographs of the Ohio hay loader, a machine manufactured by the Ohio Rake Company, Dayton, U.S.A., and introduced into Great Britain by Messrs. F. C. Southwell and Co., of 75, Southwark Street, London, S.E. This machine has gained very wide popularity as a labour-saver, not only abroad, but in this country, as will be seen from the following, several of many testimonials given of its success:—

Messrs. Wm. Haine and Sons, Poulenot Manor Farm, Devizes, Wilts, writes:—"We have given the 'Ohio' hay loader a good trial on uneven as well as level ground, having made about 150 acres of hay this season, and loaded the greater part of it with that implement. The crop was very heavy, and we are really thankful for the wonderful invention. It is no doubt far superior to other makes we have seen at work, and will pick up a heavy crop clean from swath equally as well as a light crop when raked into windrow. A much lighter load can be put up than with other makes, and one man can load on the waggon. Wherever the waggon can turn, the 'Ohio' can follow without being put out of gear to prevent breakage, thereby cleaning and clearing the ground wherever it goes. There is very little raking indeed left. Loads do not really require tying on going a considerable distance to the home yards, and we unload very easily into the elevator. These are a few of the many good points in favour of the 'Ohio.' Some of our friends say they would rather buy this machine than have any other they have seen given them. We consider it saved the cost the first season, as we hired no extra labour, milkers doing all the hay-making, etc."

Mr. John Fry, Sutton Benger, Chippenham, Wilts, says: "I have this day tried the Ohio hay loader, purchased of your local agents, R. S. Hudnutt and Sons, Yatton Keynell, and I must say I am perfectly astonished and pleased with the work it does in picking up the hay out of swathe. I consider this to be one of the best labour-saving machines yet introduced into the hay field. I am quite satisfied with my purchase, and have pleasure in giving you this testimonial, and wish you every success with your good implement."

Mr. Wm. Fenemore, Moat Farm, Wroxton, Ayles-bury, writes: "I have used the Ohio hay loader, and think that it will be a great saver of labour, and that it picks the hay up clean, pushing it up on to the load so that one man can load it."

The above testimonials speak eloquently in favour of the "Ohio" hay loader, but it may be added that the machine is so well balanced that one man without assistance can instantaneously couple it up to



The Ohio Hay Loader: Attached to Wagon.

The Ohio Hay Loader: Side View.

the axle of a wagon or cart, and as quickly uncouple it. There are other machines which require two or more men to do this with safety to themselves and the machine. In an average crop, a boy to lead the horses, one man on the load, and one man on the horse rake to clean up the field where necessary, are sufficient to carry the entire hay crop of a farm, the horses in the cart travelling at a suitable pace, and where two men are on the load, the horses can travel at a quicker rate, when a ton of hay can then be handled in less than ten minutes. The width of the machine has been reduced to use seven forks instead of eight as formerly, so that it will now rake seven feet wide at the bottom (the top being contracted to six feet), and the overall width of the axle is not too large for ordinary gateways. No better labour-saving appliance for the hayfield has ever been invented, and there will doubtless be hundreds of them sold in the coming season. This machine was thoroughly tested last harvest in this country, and everyone says it is infinitely superior to anything of the kind they have ever seen before; it is therefore in no sense an experiment.

Water Finding by the Divining Rod.

There is no matter of such vital importance as that of a supply of pure water. Towns have their water supplies, but in many villages there is often a great lack of water, with the result that disease is generated, particularly enteric fever and diphtheria, yet authorities and private owners go on year by year contenting themselves with supplies of water, viz., land water, often of shallow depth, which are invariably contaminated with sewage. These supplies in dry seasons give out, and villagers have to go long distances to get water. There are many instances in the district of Chippenham where this has occurred, but when disease breaks out, the responsible authorities are at their wits' ends to get a supply of water. Wells are sunk often at low levels; in many cases water is not found. If it is, it is invariably let stand contaminated, and all the labour and expense is wasted. Happily there is now no excuse that owners of property can give, for we have in our midst in the person of Mr. B. Tompkins, of Pipsmore, Chippenham, a man who possesses remarkable ability in finding springs of water by means of the white thorn or hazel twig, or what is generally known as the divining rod. He has found water in places, not only in England, but abroad, where repeated trials have been made to find water, but without success, till he was called in. But what we want is purely local cases, such as all of our readers can, if they wish, investigate. Our local representative last week visited New Lease Farm, on the Monkton estate, Chippenham, where, after five previous attempts to find pure water proved abortive, the water found in a well at the bottom of the hill being contaminated and unfit for domestic purposes—and on a large dairy farm such as this is it was a most serious matter—Mr. Tompkins was called in, and he located a spring at the top of the hill, and estimated at the time of finding to be about 40 feet deep and yield 2,000 gallons per day. So confident was he that a good spring existed that he undertook the work on the principle of "No water, no pay." After sinking to a depth of 33 feet through what was mostly blue marl, the head of the spring was tapped. The water flows to this "head" from three different directions, and from analysis it was pronounced pure. The yield corresponded exactly with the amount estimated by the water-finder—2,000 gallons a day. The farmhouse being a quarter of a mile away, Mr. Tompkins erected a wind engine which pumps the water to a tank of 1,000 gallons capacity, from which water is conveyed all over the premises, the supply being regulated by means of ball taps. Owing to an ingenious automatic arrangement, the wind engine ceases to work as soon as the tank is full, but directly a couple of buckets of water are drawn off the engine starts again, as our representative saw. At the time of his visit the tank was filled, and there were 8 feet of water in the well, and that at a dry season when most springs are low. This is a recent local case that speaks for itself. There are other cases, however, of Mr. Tompkins's success to be remembered. He discovered a spring and carried out a water supply for Norton House, the property of Lord Lilford, and here, again, he erected a wind engine to pump the water from a well 78ft. deep, forcing it over hill and dale to the top of the house, a distance of a quarter of a mile, and this has proved a complete success. A few years ago the enterprising firm of Evans O'Donnell started their works here, and quickly found that there was no house accommodation for their hundreds of employés, and a building company was started in connection with their works. The company secured a site on the Marshfield Road, just outside the borough boundary, on which they have now erected over 100 houses; but here, again, the question of a water supply cropped up, and the services of Mr. Tompkins being secured, he discovered a spring in the highest part of the grounds, and a well having been sunk 85ft. deep, a spring yielding over 80,000 gallons a day was tapped. This supply has been in use for over three years, and is in every way successful. At Stanton St. Quinton Manor Farm the water supply is bad, and illness ensued; the tenant has left the house, and Lord Radnor's agents have employed Mr. Tompkins, who has localised a spring in the highest part of the grounds, and a well is now being sunk. He has also discovered a spring on Capt. Lovell's estate at Cole Park, near Malmesbury. A well was sunk to 50ft. deep, and then an artesian boring put down at the bottom of the well, and the water rises into the well and is pumped by a wind engine (12ft. diameter wheel on a 20ft. angle steel tower) into an underground reservoir, from which the house and stables are supplied by gravitation. Recently Mr. Tompkins erected a wind engine on His Grace the Duke of Beaufort's estate, to raise water from a well 89ft. deep, pumping it into a cast iron tank of 5,400 gallons capacity, built upon a brick tower, to supply Wick and Luckley farms with water for domestic uses, for refrigerating milk, for the cattle, and for the general uses of the farm, by gravitation. In these days of depression and competition everyone is anxious to get the best and cheapest article as a labour-saving appliance. Given a good position and ample storage room, the cost of a wind engine is soon recouped, and the cost of maintenance is practically nil. Many people are sceptical of the powers of a water-finder, and rather than employ one will spend time and money foolishly in sinking wells on chance. There are few men who have had a wider experience or achieved greater success in finding springs of water and utilising wind power for pumping water for villages, estates, country residences, etc., than Mr. Tompkins, who is not only an expert water-finder, but is experienced in artesian well-boring, well-sinking, supplying and erecting pumping machinery, keeping practical staffs of men for doing all the necessary works to make a water supply complete and satisfactory in any part of the country.—*North Wilts Herald.*

Sale of the Queen's Fat Cattle.—Her Majesty the Queen sent twenty-eight fat bullocks and one hundred and twenty-four sheep to the Slough Christmas Cattle Sale, which was held on the 11th inst., and there were competitors for them from all parts of the country. The bullocks composed sixteen blue-greys, ten Devons, and two Shorthorns, and the highest price given for a single animal was £38 for a fine beast estimated to weigh 130st. The blue-greys fetched an average of £31 16s. 3d., and the Devons £28 6s. Her Majesty's Highland sheep realised an average of £2 3s. 6d. and the Hampshires £3 11s.

SILCOCK'S CALF REARING.

CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 per cwt., carriage paid. 5 cwt. lots, 12/-.

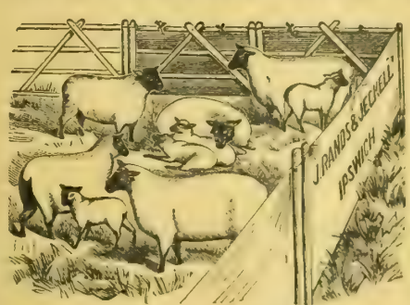
FLOCKMASTERS

Secure better Breeding Results and Reduced Mortality amongst Lambs by using

J. RANDS & JECKELL'S SHEEP & LAMB SHELTERING CLOTHS



Thurscoe Hall, Rotherham, March 11th, 1891.

Dear Sirs,—Please send me four more of the 20-yard Sheep Cloths, the same as you sent me in January; they are very convenient things.

Yours truly, W. A. ELLIS.

20 yds. long, 3 ft. deep, with Brass Eyelets and Cords for fixing to hurdles.

6d., 9d., and 1/- per yd.

Rot-proof, 1/6 per yd.

Wadhurst Park, September, 1892.

Sirs,—I can with every confidence recommend your Sheep and Lamb Sheltering Cloths, especially the "Dupla," when they form a most efficient, easily moved, and durable shelter.

Yours truly, W. W. CHAPMAN.

20 yds. long, 6 ft. deep, with Brass Eyelets and Cords for fixing to hurdles.

1/-, 1/6, and 2/- per yd.

Rot-proof, 3/- per yd.

Carriage paid on orders above £2. 5 per cent. discount for cash.

Write for Pamphlet on "SHELTER FOR SHEEP AND LAMBS," post free, on application to

THE "MARK LANE EXPRESS ANNUAL" commands a far greater circulation than any other Year-book issued in the interests of Agriculture. The Annual is published at the popular price of Sixpence (post free from the Office, Ninepence), and can be obtained at Messrs. W. H. Smith and Sons' Bookstalls, or through any Newsagent in the United Kingdom, by ordering early.

Subscribers are requested to order their copies from their Bookseller at once, and so save the postage.

(Established 1832.)

THE LEADING BRITISH AUTHORITY ON THE PRACTICE AND SCIENCE OF THE

Farm, Live Stock, Dairy, Milling, Malting, Hops, &c.

(REGISTERED AS A NEWSPAPER AT THE GENERAL POST OFFICE.)

VOL. LXXXIII. No. 3614. LONDON, MONDAY, DECEMBER 31, 1900. THIRTY-TWO PAGES. PRICE 3D.

SOCIETIES.

THE NATIONAL ASSOCIATION of ENGLISH HOP GROWERS.
(Founded June, 1894.)

PRESIDENT.—COLONEL BROOKFIELD, M.P.

HON. TREASURER.—E. ALBERT WHITE, ESQ., Beltring, Kent.

SECRETARY.—THOMAS IRONMONGER.

CENTRAL OFFICE.—61, HOP EXCHANGE, BOROUGH, LONDON.

GENERAL OBJECTS.

To promote united action among English hop growers as a body for the improvement of the industry.

To promote, support, or oppose such legislative and other measures as may affect the industry.

To collect and publish, for the benefit of members, special statistical and other useful information relating to English and foreign hop culture.

To arrange for arbitrations in cases of dispute between sellers and buyers of hops, for the avoidance of litigation.

ANNUAL SUBSCRIPTIONS.

Ordinary members, 3d. per acre of hops under cultivation; honorary members, £1 1s.; hop factors, £1 1s.

AUCTION SALES.

BRIDGWATER, SOMERSET.

HIGHLY IMPORTANT SALE OF VALUABLE SHIRE HORSES.

MESSRS. GREENSLADE AND KIDNER are favoured with instructions from Mr. JAMES BUCKNELL of Cannington, Bridgwater, to SELL BY AUCTION, at the RAILWAY HOTEL STABLES, BRIDGWATER, on TUESDAY, JANUARY 8, 1901, at 2 o'clock in the afternoon, about

40 SHIRE HORSES,

including those well-known Stallions, viz., DUKE OF CLARENCE III. 13997, CROSTON FASHION 16625, DUKE OF SOMERSET 14601, KING CHARMING IV. 15671; six superior registered BROOD MARES, an exceptionally valuable lot of Two-year-old FILLIES and COLTS, including several prize-winners at recent shows. The whole of these are registered or eligible for entry in the Shire Horse Book.

Also that very promising rising Three-year-old Hackney Stallion CANNINGTON DANEGELT.

Also, the property of Mr. T. CHAPMAN, Orchard Portman, that well-known Stallion ORCHARD HARRY 16881; BAY MARE, Vol. XXII., sire Orchard Willow 13415.

Also the property of Mr. B. BUCKNELL, Holcombe Rogus, Shire Filly, 28921 HOLCOMBE WELCOME, sire Calwich Prince 15531.

Catalogues in due course.

Dated Auction and Estate Agency Office, 3, Hammet Street, Taunton, December 12th, 1900

GREAT OPENING SALES OF THE TWENTIETH CENTURY IN THE NORTH WALES REPOSITORY, WREXHAM. THE LARGEST HORSE SALES IN THE WORLD.

FRANK LLOYD and SONS, PROPRIETORS.

45 GUINEAS IN PRIZES.

TUESDAY, WEDNESDAY, and THURSDAY, JANUARY 22nd, 23rd, and 24th, 1901.

ENTRIES CLOSE SATURDAY, JANUARY 12TH.

AUCTION SALES.

PARTON, WIGTON, CUMBERLAND.

HIGHLY IMPORTANT SALE OF PURE-BRED SHORTHORNS ON THURSDAY, JANUARY 10, 1901.

MESSRS. R. HARRISON & SON are instructed by Mr. HEWSON to SELL by AUCTION 40 head of superior pedigree SHORTHORN CATTLE from the well-known Parton Herd.

The foundation of this herd was laid some 30 years ago, and the many successes gained in the show-yards and sale-rings are a proof of the judicious care which has raised it to be one of the best in this noted Shorthorn district. Dairy qualifications have always been taken into consideration, and the animals will well repay inspection, being full of hair and in nice healthy condition, and with one or two exceptions have all been bred on the farm.

Lunch at 12. Sale at 1 o'clock.

Catalogues on application to R. HARRISON and SON, Carlisle.

PRIZES £51.

CHESHIRE REPOSITORY, CREWE.

FRANK LLOYD, NUTTALL & Co. will hold their FIRST GREAT QUARTERLY PRIZE SALE for 1901:

WEDNESDAY, JANUARY 9TH.—Hunters, Match Pairs, Single Harness Horses, Show Cobs, and Ponies.

THURSDAY, JANUARY 10TH.—Heavy Town, Van, Tram and Parcel Cart Horses, Two and Three-year-old Colts and Fillies.

Best Hunter wins 10-guinea cup, second best 5-guinea cup; Match Pairs, 5-guinea cup; Single Harness Horses, prizes £12; Best Heavy Horse, 10-guinea cup; Other Heavy Horses, 9 guineas.

Entries close January 1st. Prize lists ready.

PUBLICATIONS.

THE NEW ZEALAND FARMER. Bee and Poultry Journal. An illustrated monthly publication, containing practical and scientific information on Farming, Stock Breeding, Cattle, Horses, Sheep, Dairying, Fruit Growing, etc. The only paper entirely devoted to Farming matters and circulating throughout the Colony. Price 1s. ; by post, 1s. 2d. Proprietors, The Brett Printing and Publishing Co., Ltd., Auckland. London Manager, R. B. BRETT, 2 and 3, Imperial Buildings, Ludgate Circus, London, E.C.

RATIONAL PIG KEEPING, to ensure Profit. By W. J. MALDEN. Crown 8vo, cloth. Price 2s. ; post free, 2s. 3d. Illustrated. London : "Farm Field and Fireside" Offices, 1, Essex Street, Strand, W.C.

THE JOURNAL OF THE BOARD OF AGRICULTURE. Issued by the authority of Her Majesty's Board of Agriculture, and printed and published by Laughton and Co., 1, Essex Street, Strand. Published each quarter day. Price 1s. Yearly subscription, 5s. (post free). This publication contains information as to the position of agriculture at home and abroad, Crop Prospects in Foreign Countries, and further particulars obtained from Foreign and Colonial Reports, Diplomatic and Consular Dispatches, and other sources of intelligence accessible to the Department ; together with Notes on Dairying, Fruit Farming, Poultry Rearing, and other rural industries. Short descriptions of Noxious Insects and Fungi, with appropriate remedies ; statements of the Quantities and Values of Agricultural Produce Imported and Exported ; and records of the Current Prices of Grain, Meat, Dairy Products, Fruit and Vegetables, are given in each number. The official and highly valuable information contained therein commands for the Journal an unique position and circulation throughout the world amongst those interested in Agriculture and its kindred branches. The Statistical matter being of much service for frequent reference renders the Journal in constant demand by Members of both Houses of Parliament, Landowners, and others interested in the welfare and progress of Agriculture.—LAUGHTON and CO., 1 Essex Street, Strand, London.

REGISTER OF BRITISH LIVE STOCK BREEDERS

HORSES.

SHEEP.

LINCOLN LONGWOOL

HOYLES, GEORGE, Manor House, Skidby, near Hull.—Pure LINCOLN LONGWOOL SHEEP. Registered Flock 136. Sires used: Skidby Constitution 3069, sire Skidby Conservative 1346, g. sire Old Constitution 308; Skidby Tory 1583, sire Riby A 358; Leconfield Pride, sire Casswell (16) 1753; Skidby Friar, sire Abbot 1—from the celebrated flocks of Messrs. Henry Dudding, J. Casswell, Hy. Smith, jun., etc. Heavy-wool Sheep for export. Also prize and prize-bred Polled Angus, Shire Horses, and English Ponies for inspection and sale.

ANDERSON, JOHN, Chapel Farm, Barton-on-Humber, Lincolnshire, Breeder of pure-bred LINCOLN LONGWOOL SHEEP. Flock Book 106. These sheep are noted for having hardy constitutions, true character, and long, lustrous wool.—Telegrams: "John Anderson, Barton-on-Humber."

T. C. DIXON, Brandesburton, Hull.—Pure LINCOLN LONGWOOL SHEEP, of best blood. Wool a speciality, with quality and size combined. F.B. 69. Rams, Ewes, and Lambs for Sale. Inspection invited. Telegrams as above.

FIELDSEND, C. S., Belmont, S. Willingham, Lincoln. Flock No. 59. Pedigree RAMS and EWES for SALE.

DUDDING, HENRY, Riby Grove, Gt. Grimsby, Lincolnshire, has always for inspection and sale a large flock of pure LINCOLN LONGWOOL SHEEP, including many prize-winners, having taken the leading prizes for many years at the Royal and other shows for both rams and ewes including champion medals at both the Paris Exhibitions, Vienna, Amsterdam, Canada, Australia, New Zealand, and all the leading prizes at Chicago; also the first for the best collection of Lincoln fleeces of wool at the Royal Windsor Show, which proves the character of this flock, which is most famous for their great size and 125 years' good breeding. Rams from this flock made the highest average on record last year. Riby Grove is seven miles from Great Grimsby, and three from Stallingboro' Station. Telegrams, "Dudding, Keelby."

HAMPSHIRE DOWN.

FLOWER, JAMES, Chilmark, Salisbury. Undoubtedly the leading flock of the day; in show yard records at all the largest shows, including the Challenge Cup at the Salisbury Great Prize Sheep Fair six years in succession; also highest average for same period for 100 ram lambs at annual sale, at Britford Fair, August 12. The Flock is one of the oldest existing, combining fine quality, strength, constitution, and true character. "Fossil," sire of the highest-priced Hampshire Down Ram ever sold, was bred at Chilmark, and in service there last two seasons.

COLES, CARY, late C. and T., Manor House, Winterbourne Stoke, Salisbury.—Registered HAMPSHIRE DOWNS, prize-winners at the Royal, Bath and West, Royal Counties, and other shows. Sheep of all ages for sale; selections from 1,000.

SHROPSHIRE.

COOPER, WILLIAM, AND NEPHEWS, "Cooper's Dip" Works, Berkhamsted, England. Breeders and Exporters of pure Shropshire Sheep. First and Third Prize for Ewes, Royal Show, 1898. Five hundred breeding Ewes. The largest export flock of Shropshires in England. The sires used present season include 310 Guinea Champion "Royal Record," Two First, One Second, and One Third Royal Show Prize winners.

LIVE STOCK AGENTS.

INVERNESS, WEST HIGHLANDS.—JAMES ARNOTT, Scotch Live Stock Agent, Ellandonan, Inverness, established 1870, selects and supplies on commission all classes of SCOTCH STOCK. He attends all the leading markets to purchase Stock at lowest rates. References can be given if desired to customers who have been annually supplied. All orders are personally attended to. List of classes and approximate prices sent on application. Reference required; terms cash. Telegrams: "Arnott, Inverness." J.A. is now booking orders. N.B.—Polled Angus or West Highland Heifers and Black-faced Gimmers, Ewes, Wedders, and Lambs for crossing or feeding, in truck loads, at moderate prices. Fat Stock of all classes also purchased.

WINTERING and FEEDING CATTLE.—E. GOODWIN PREECE will be glad to receive orders for BULLOCKS and HEIFERS IN FORWARD CONDITION, suitable for yard or stall feeding; also WINTERING CATTLE OF ALL CLASSES, including Bullocks, Heifers, Dairy Cows, Dairy-bred Heifers, Stock Bulls, etc. Shropshire, Hereford, Cheshire, Radnor, and Montgomery being breeding districts noted for the high class of stock produced, buyers can rely upon having well-bred stock bought at lowest market prices, either by live weight or per head. A few lots of good in-lamb ewes for sale.—Address, Portland House, Shrewsbury.

Mark Lane Express Agricultural Journal.

The Only English Journal devoted exclusively to Agriculture.

MONDAY, DECEMBER 31, 1900.

Correspondents are requested to address all communications for the Editorial Department to THE EDITOR, "Mark Lane Express," 1, Essex Street, Strand, London, W.C.

Advertisements, Subscriptions, and business communications should be addressed to THE PUBLISHER, "MARK LANE EXPRESS," 1, Essex Street, Strand, London, W.C.

GAINS AND LOSSES.

The twentieth century will commence to-morrow under somewhat different circumstances affecting British agriculture than those which existed at the advent of the nineteenth century. One of the revolutionary changes brought about since then was prominently referred to by Mr. Hanbury, the Minister of Agriculture, in the speech he delivered at the agricultural dinner in Smithfield week. "At the beginning of the century," he said, "the rural population was more than one-half of the whole in England and Wales, whereas it is now, I think, a little under one-fifth; the whole population of England has increased from nine millions to twenty-nine millions during the century, but the rural districts have only increased two millions in population, and during the last 50 years they have actually decreased, which seems a black spot upon a century which on the whole has been for this country, at any rate, a hundred years of glorious history."

This is the revolution that brought other great momentous changes of vital importance to the farming community in its train. The interests of the rapidly-increasing towns, even before the century had run half its length, abolished the Corn Laws and opened our ports free for meat and all other food products necessary for human consumption, no less than for bread-corn. The natural effect of this was not felt to injure our home agriculture much for nearly thirty years, causing declarations to be set forth meantime that open ports and free trade were as beneficial for farmers as for the community generally. But a time arrived when it became perfectly evident that the high prices for agricultural products experienced in the fifties and sixties were attributable to three or four great wars that occupied successively the whole of that period, together with kindred collateral influences, such as the prosperity of manufacturing industries and of trade, the building of a network of railways all over the country, and the discovery of gold in California and Australia.

When our American cousins set about converting their swords into plough-shares and their spears into pruning-hooks, and it was discovered how vast were their resources for flooding the European markets with wheat at a much lower price than it was profitable to be raised in old heavily-taxed countries, the true, natural result of free trade were first experienced in Great Britain. The arable land, where at all practicable, and especially in the clay districts was laid down to grass; those who had the means adopted the breeding of live stock instead of corn-growing as their principal industry, but large numbers were devoid of the power to adapt themselves to circumstances, and fell out of the ranks, utterly ruined, to seek in old age the doles dealt out by the Royal Agricultural Benevolent Society. If, as stated by Mr. Hanbury, the exodus of rural population to the towns is a black spot on nineteenth century progress, how much more must this dismal agricultural depression, so disastrous in ruinous influences, be regarded as a black spot! Probably there are many heartless cynics ready to remark that the sacrifice of the lesser number for the well-being of the greater has always taken place, and will probably continue to do so to the end of time, but even if this be admitted, it is no less a direful calamity.

Let us turn, however, to a more pleasing theme—the advantages and increased facilities for agricultural prosperity the new century has in store for us. We are afraid these are limited very much to pedigree live stock interests, and possibly we shall meet with more cynics to hint that the remarkable high prices in recent years realised for these have enriched members of the upper classes and millionaires rather than tenant farmers. But if this has been the case to a considerable extent in the breeding of shire horses, a large proportion of our leading cattle breeders are farm-renters. Mr. H. Dudding, a Lincolnshire tenant farmer, has twice obtained a thousand guineas for a ram at his auctions, and the very fact that every cattle and sheep breed has been invested with a pedigree register proves how generally industrial farming communities are rapidly extending pure breeds to the exclusion of ordinary market stock. Very much is it to be hoped that the new century will be destined to develop this enterprise very forcibly and generally, so that Great Britain may not only in reality become the nursery of the world for pedigree stock, but that the humbler sections of farmers may be able very generally to have access to pure-bred stallions and bulls placed at their service either by patriotic landlords such as the Duke of Portland, the Earl of Crewe, Mr. Victor Cavendish, etc., or by such institutional agencies as the Northumberland Agricultural Society, or by co-operation amongst farmers themselves. All these agencies have been found in active operation recently, and it is of little matter which has adopted so that the object be attained, that of producing better young cattle to enable our graziers to compete with foreign imported beef, and to promote horse-breeding of all descriptions among the

rank and file of the farming community—now become one of the greatest wants of the age.

Mr. Chaplin would place the educational advantages of the period and the development of colleges and agricultural training schools among the most valuable boons the new century is bringing us. Mr. Chaplin appears to entertain a settled conviction that by means of educational agencies the heavy increasing imports of foreign dairy goods are to be overcome by superior products raised at home. At the recent agricultural dinner he propounded this question: "Why is it that with all the natural advantages which we possess for the manufacture of dairy products equal to any country in the world we continue to import such enormous quantities of dairy produce from abroad?" He furnished his own answer, that there must be more technical training, stimulated by a big outflow of Government grants. But the imports can never be stayed by such means, and Mr. Hanbury regards the matter in the right light. On the same occasion he said: "Why is it that the foreigner sends something like fifteen million pounds' worth of butter to this country in a year? It is because you want co-operation, not only to increase the quality of the product, but still more to sell it to the wholesale trader. You want it to produce uniformity, which is the real secret why the trader, as a rule, buys foreign butter."

Co-operation will, indeed, be found to be a question of urgency for the prosperity of agriculture in the coming century. Farmers require it badly, not only to serve this object, but for the general establishment of depôts of labour-saving implements.

SAMPLES.

By a Man of Mark Lane.

The *North-Western Miller* states that after January 1st next three of the big milling companies at Minneapolis will refuse to accept through bills of lading on London unless they bear an indorsement specifying that the dock charges there will not exceed one shilling and sixpence.

In several quarters (says the *Statist*) there is an inclination just now to think that the cycle of good trade years has come to an end, and that we are entering upon a period of depression. We ourselves take a different view. That there has been a breakdown upon the Continent is certain; that it will be followed by a period of depression is also true. But it is likewise beyond question that during the depression new savings will accumulate and gradually will prepare the way for a further period of activity. Here at home, however, we see no signs of a real set-back. And the goodness of the home trade has continually increased. It may almost be said that our business classes have been so actively employed in catering for the home public that they have given scarcely any attention to the outside world, and so have allowed an opportunity to our competitors, especially the Americans and the Germans, to take away a portion of our foreign trade. And, naturally, so active a trade continued so long has created a strong and persistent demand for capital. Yet, good as the home trade has been, there has been surprisingly little speculation. So far as we can see, then, we discover no evidence of unsound trade at home, such as wild speculation, or an accumulation of bad business that has to be liquidated. On the contrary, we think we perceive preparations for a stretching out of new enterprise in new directions, which is likely to prove exceedingly profitable and to be continued for many a day.

The *Law Journal* draws attention to the fact that four important Acts of Parliament, passed last Session, will come into operation on January 1st. The Companies Act has been passed with the object of checking the frauds which are perpetrated in the promotion and management of joint-stock companies; the Agricultural Holdings Act simplifies the procedure for the assessment of compensation by providing for a reference to a single arbitrator; the Colonial Solicitors Act enables a solicitor in any British Colony, to which the Act may be applied by an Order in Council, to be admitted to practise in England, provided the regulations as to the qualifications of solicitors in the Colony are calculated to secure professional competency, and English solicitors are admitted to practise in the Colony; the Burial Act effects a number of charges in regard to the consecration of burial grounds, the erection of chapels on burial grounds, and the fees of incumbents, and transfers various powers under seven preceding Burial Acts from the Secretary of State to the Local Government Board.

The Act extending the benefits of the Workmen's Compensation Act to agricultural labourers, and the Act amending the law relating to charges on land, both of which were passed last July, will not come into operation until next July.

In "Blackwood's Magazine" for January there is an interesting passage on the coming decay of the locomotive. It is observed that in the United Kingdom there are roughly 20,000 locomotives, each provided with an isolated and comparatively puny source of heat. Each little separate flame has constantly to be extinguished and rekindled, so that much of its transient life is spent in heating a cold engine or lying out on the ground so that a warm engine may cool. Even when steam is up, it is wastefully harnessed, for every second that an engine stands idle, whether at a platform, signal, or siding, its pent-up power is being dissipated. It is only by the most skilful manipulation that the bet can be got out of the coal. The engine is burdened with the weight of its own fuel, which falls, not on the driving-wheels, where it might prevent skidding, but upon the wheels of the tender. It is exactly as if the engine had to drag an extra carriage or two.

On the other hand, an electric locomotive carries no coal and no water, nor has it to maintain a furnace. There is no "getting up steam" to add to the cost of fuel as well as to wages. There is no ruthless scattering of white-hot embers at the close of the day. When energy is required the locomotive gathers it in its iron hand from a third rail at its side. When the machine is stationary, or running at half-speed or down-hill, there is no waste of power, for the current, for which there is no use at the moment, flows on and helps a locomotive somewhere else.

The electric locomotive, "Blackwood" continues, is simply a receiver and transformer of energy. It does not pretend to generate power. In the main its mechanism consists of smoothly rotating wheels, so that the desperate pulsations of a labouring piston will no longer afflict the nerves of passengers, nor will alternate motions of "reciprocating parts" create oscillations sufficient to disturb the soundest permanent way. A proportion of the cost of cleaning locomotives ought surely to be saved, for this process now involves an outlay of £40 per engine, or thereabouts, every year, the dusty and overheated mechanism having to be overhauled some three or four times a week, and always before it cools.

Other economies should be effected. Watering stations and troughs, coaling platforms, and firemen will possess only an antiquarian value, though no doubt two drivers will be required on all footplates. Sparks will no longer set fire to hayricks, nor will a plague of smuts continue to torment passengers who like a little fresh air. Against all this "Blackwood" sets the fact that, by the double transformation of mechanical energy into electrical and back again, there is lost a certain fixed percentage. A further loss is occasioned by the passage of the current through lengths of cable.

The receipts on account of revenue from April 1st, 1900, when there was a balance of £3,517,047, to December 22nd, 1900, were £77,191,557 against £74,390,158 in the corresponding period of the preceding financial year, which began with a balance of £8 919,173. The net expenditure was £128,757,261 against £81 542,644 to the same date in the previous year. The Treasury balances on December 22nd, 1900, amounted to £2,942,717, and at the same date in 1899 to £3,908,662.

AGRICULTURAL POLITICS.

By a Lobbyist.

I find that one of the questions which will have a considerable significance in the ensuing Parliament will be the great civil service grievance affecting the collection of the agricultural returns. The excise officials have always protested against being compelled to collect these returns without any remuneration. They have always, too, protested against the duty being placed upon them under circumstances which render it more irksome. In other words, they have declared that to make the presentation of the returns a voluntary obligation has rendered it difficult of performance, and has not unseldom subjected them to indignity. I am not going to say that this last assertion is the truth. I cannot think for a moment that it is; but at least I can agree that the manner of collection renders the returns unreliable and of no great value. However, the purpose of the officials is primarily to secure remuneration, and few will blame them for entertaining the ambition.

The labourer is worthy of his hire—even though the labourer be, as in this instance, an excise officer. Apart from this point, there is this fact of importance to all agricultural economists to be noted—that payment for the collection of the returns would tend to give them a greater authority. Of course, the supreme influence in this direction would be to render their compilation a compulsory obligation. Even, however, were this done there would still remain an element of insecurity in the fact that their official collection was an unremunerated work. Frankly, I do not believe in any unremunerated official work. It means not unseldom badly-done work; and hence, at least, I am glad that the excisemen have induced one or two M.P.'s to interest themselves in the matter. This business does not, of course, directly affect Mr. Hanbury as Minister for Agriculture. It is a question for the Lords of the Treasury. Still, Mr. Hanbury should be able to exercise some influence upon those dignitaries.

I am again making through the MARK LANE EXPRESS an appeal to those teetotal legislators who have already made up their mind to oppose any legislation whose purpose is to give us pure beer. Their argument is that the increased purity of beer would make for the increased consumption of beer. What if it does? Surely they would rather that the beer-bibber imbibed an honest beverage than a concoction in which arsenic prevailed? "Oh," will be the reply, "alcohol is also poison." Let us get away from this clap-trap assertion. In the one case the man who quaffs beer is likely, under certain conditions, to fall down dead—this has been an actual experience during the present poisoned-beer episode. In the other instance, the alcohol is likely to have only the most infinitesimal influence upon the body or the mind. "All the more insidious the danger," will be the retort. Ridiculous. Would they rather men, having an inherited taste, take poison wholesale or take it in such diluted doses that no direct danger arises?

A Liberal M.P. besought this week that I would use what influence I possess to stay any denunciation of Mr. Gladstone's action in repealing the Malt Tax. I am in agreement with the contention that in thus providing the brewer with an open door Mr. Gladstone's action also provided a direct avenue for the introduction of all kinds of chemical rubbish, and directly invited foreign grain. The point, however, of my legislating friend is that such a denunciation would seem to raise a doubt as to the inviolate infallibility of Mr. Gladstone, and would thus invoke the distrust of those Radicals who have made his memory and his work a fetish. His view—an exceedingly wise one, it seems to me—is that we should insist upon beer being treated as is food; that is should insist upon an adequate and real analysis. We should make the introduction of deleterious substances an actual offence, and we should refuse to reward the brewer who introduces false substances into his beer any more sacred a personage than the grocer who sands his sugar. "We have always been, as a party," said the legislator to me, "in favour of pure

food. Such a policy as this would fascinate us." And I really believe this would be so.

Of course, the great Northern towns and organisation will fight this matter to the death. They will, in fact, seek to make it a conflict between town and country; and, of course, if they should succeed there is no doubt as to what the result would be. The battle would be to the strongest; and the towns are infinitely the stronger. The policy of these Northern bodies is made sufficiently evident by the action of the Manchester and Salford Sanitary Association, a society which contends that, under some remarkable combination of circumstances, which they regard as easy of realisation, beer brewed from malt and hops would be deadly. This is to be the line which all will pursue, and they will pursue it in a disciplined fashion, which the agricultural bodies could not emulate, and would not if they could. Hence it is more and more necessary that in this matter we should run upon lines which would conciliate and not alienate. Let us remember that in obedience to the demands of what I may describe as the chemical districts a considerable body of Tories will be against us. Thus to make the issue a mere party one would be the height of foolishness.

May I make a proposal to the leaders of the movement? We are within a few weeks of the reassembling of Parliament. If this question is to be effectively agitated it must be brought to the attention of the House of Commons at once. Delay would mean that the advantage derived from the arsenical poisoning would be lost. Why not summon a meeting of the advocates of pure beer, and decide upon a common line of action? It may be urged that there will be ample time for this when the House meets. Well, if the conference is only held then—and I speak from experience in these matters—there will be a month lost; and that loss may imperil the movement. What think Mr. Chaplin, Sir Cuthbert Quilter, and Mr. F. W. Wilson of the idea?

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended December 22, 1900, together with the quantities imported in the corresponding week of the previous year:—

Mr. J. M. Fraser, of the firm of Macdonald, Fraser, and Co., the well-known Perth auctioneers, was entertained to dinner by his tenantry and friends in the Station Hotel, Perth, on the 21st inst., on the occasion of his entering into possession of the estate of Invermay, which he recently purchased. At first it was intended to confine the function to the tenantry and a few friends, but applications for permission to join in the proceedings were so numerous that many refusals had to be made. Mr. Wm. Whyte, Muirhead, the oldest tenant on Invermay, presided, and the croupiers were Mr. Robert Gardiner, Henhill, and Mr. P. M'Glashan, Easter Clevage. About 120 persons sat down to dinner, among those present being Sir Robert Pullar, Mr. J. A. Dewar, M.P., Col. Williamson, Mr. Lovat Fraser, and Lord Provost Macgregor.

LETTERS TO THE EDITOR.

The Royal Agricultural Society.

Sir,—There were four statements in the report of the Special Committee on the Society's show system that apparently influenced the Council in their decision to abandon the country shows, and to hold the show in future on a permanent site in London. The statements alluded to are: (1) That the shows from 1859 to 1899 resulted in a net loss of £33,624; (2) that if an unwarrantable drain on the Society's general resources is in future to be avoided the migratory shows must be discontinued; (3) that it is increasingly difficult to find 100 acres of old sward within convenient distance of the centres of large towns; (4) that it cannot reasonably be said that any educational effect has permeated the South of England because a show was held at Plymouth in 1890, and at Maidstone in 1899. As the Council refused to fall in with the very reasonable and considerate suggestion made by Mr. Martin Sutton, of Henley Park, to ascertain the views of the members of the Society with regard to the show questions, perhaps you will kindly permit me to deal shortly with the four statements above mentioned. The impression created by the statement that the sixty shows had resulted in a loss of £33,624 evidently was that the migratory shows are responsible for this loss, and that the country shows have proved to be an unwarrantable drain on the Society's funds. Indeed, the chairman, at the general meeting on the 22nd of May, said that "They all regretted giving up the migratory shows, but they did not wish that the Society should lose its accumulated funds and impair its usefulness by continuing to hold shows under present conditions. (By "country shows" the shows held elsewhere than in London are referred to in this letter; the "London shows" comprised those held at Windsor in 1851 and in 1889, at Battersea in 1862, and at Kilburn in 1879.) The loss by the 60 shows, according to the official statements in the R.A.S.E. Journals, 1864, 1878, and 1900, amounted to £33,284—practically the sum named by the committee. It may be well to apportion this loss in order that it may be clearly understood where the shoe has pinched most severely.

Loss by the 4 London shows	£24,958 – 75 per cent.
Net loss by the 56 country shows..	£8,326 – 25 per cent.
	£33,284
Average loss by the London shows	£6,240
Average loss by the country shows	£148

To some extent the enormous loss by the London shows was recovered by the increased membership that resulted from the shows held at Windsor, Battersea and Kilburn; but after making full allowance for this fact it cannot be denied that the London shows have proved to be an unwarrantable drain on the Society's funds. There are good grounds for believing that every shilling by which the cash expenses of the 56 country shows have exceeded the cash receipts has been fully recovered by the increase in membership that resulted from the shows. But even if this were not the case the loss by the country shows (taking one with the other) has been too trifling to form any grounds for the imputation cast upon them. The great difficulties that weighed like a millstone on the Society during the first 19 years of its existence are indicated by the fact that during that period (1839-57) £35,345 was lost by the shows—every one of the 19 shows resulted in a loss. The lack of railway facilities contributed in no small measure to the loss. It is greatly to the credit of the courageous men who conducted the Society's work in those days that by economy and the judicious administration of the income from subscriptions, life compositions, and dividends the surplus over the expenditure (irrespective of the shows) amounted in the 17 years 1841-57, to £35,215, a sum that practically covered the whole loss by the shows from 1839 to 1857. It is manifest that the present financial troubles can in no way be attributed to the shows held before 1858—the loss having been met at the time by surplus revenue. During the 35 years 1841-75 the revenue from subscriptions, etc., exceeded the ordinary expenditure by £52,000; by the shows held from 1841 to 1875 the Society lost £38,900; £2,100 was lost by the two shows held in 1839 and 1840. It will be seen that the surplus revenue from 1841 to 1875 not only covered the loss of £41,000 by the shows held from 1839 to 1875, but also increased the funds of the Society by £11,000. The remaining 24 years is surely a sufficiently long period for business men to deal with as a guide to future policy. The one prominent fact brought out by the financial history of this period (1876-99) is the highly satisfactory profit that was realised by the country shows.

22 [illegible] shows resulted in a profit of £41,948	
16 resulted in a loss of £1,766	
Net profit by the 22 shows £7,757	
	£41,948

The 22 country shows, notwithstanding the serious loss at Maidstone, left an average net profit of over £1,260. But this important fact was not alluded to by the Show Committee. But what of the London shows held during that period? By the two shows held in 1879 and in 1889 the Society lost over £22,000 [illegible] £10,015. The 24 shows resulted in a net profit of £7,722. By the 38 country shows held from 1858 to 1879 the Society gained £25,125. The loss by the London shows amounted to £25,664, and therefore reduced the net profit by the 41 shows to £2,060. Still the [illegible] 42 years 1858-99, the 41 shows—taking profitable and unprofitable [illegible] paid their way. The loss by the four London shows equalled 92 per cent. of the net profit by the 38 country shows. The last 20 country shows held by the Society resulted in an average net profit of over £1,000; the total net profit by the 20 country shows being £20,044. The bulk of this substantial profit was swept away by the London shows held at Kilburn in 1879 and at Windsor in 1889. In the face of these figures it is impossible to believe that the members of the Council realised the [illegible] the country shows have been a source of financial strength to the Society, whereas the London shows have depleted its funds to the extent of £20,000. If the decision was based on a misapprehension of the facts of the case, the Council may, I think, be reasonably asked to reconsider the decision which is regarded with grave apprehension by many of the members of the Society and by some of the most experienced members of the Council. In 1878 the Society's capital exceeded £30,000. In 1879 over £15,600 was lost by the London shows. On January 1st, 1880, we find the capital reduced to £18,404. On the 1st of January, 1898, the assets of the Society were valued at £48,572, an increase of nearly 164 per cent. in 18 years—the increase being £30,168. The 17 country shows held from 1880 to 1897 contributed £26,327 to the Society's funds, an amount that equals over 87 per cent. of the increased capital, and also equals 143 per cent. of the capital possessed by the Society on the 1st of January, 1880. The every-day expenditure of the Society, including depreciation, exceeded the actual cash income in 1898 by £1,747 and in 1899 by £1,794. Irrespective of the shows the Society's capital was drawn upon in the two years named to the extent of over £2,500. In 1893 house expenses amounted to £502. In 1898 these expenses, including depreciation of furniture and fixtures, painting and new work in connection with Harewood House, reached nearly £3,000. Last year the cost amounted to £2,170. This expenditure is out of all proportion to the income of the Society. With regard to the difficulty of finding 100-acre sites, it could be met by reducing the area and confining the exhibits to such as are purely agricultural. The show-yards have lately been unnecessarily and inconveniently large. If the shows have ceased to have any educational effect, as signified by the committee, the grounds for the assertion were not stated. If it is true that the shows have ceased to have any educational effect, then what object can there be in holding a show anywhere? Wherever the shows have been held they have, in the opinion of many competent observers, done much good, and might have done more had the Council encouraged every branch of farming, as was intended by the charter. The capital is still more than 50 per cent. greater than in 1880. By improved financial administration, and by strict adherence to the charter, prosperity can soon be restored.—I am, Sir, your obedient servant,

ROBERT E. TURNBULL.

2, Prince of Wales Terrace, Scarborough,
21st December, 1900.

The Smithfield Champion Prize.

Sir,—Having for many years taken a deep interest in the proceedings of the Smithfield Club, well knowing that the nation at large have been greatly benefited by its teaching, I read your annual reports of the doings of the Smithfield Club. Believing the success of the club depends upon the discretion of those who assembled around its council table, I am induced to send you my opinion respecting the champion prize.

My connection with the club dates a long way back, when its council consisted of a self-elected compost of a small body of able men, with a president of high standing and good repute. At that time I, with others, thought the election of the council should be more in accordance with the spirit of the age in which we live; in a word, that the members should have a voice in the election of their council, and brought about the change which has marked its great success.

With that brief explanation, I have to say that I am not surprised at the comments made in the *North British Agriculturist* of this week upon the decision of the very important duty attached to awarding the champion prize [illegible] being placed in the hands of a small [illegible] I do not think that they could have selected a more com- [illegible] competitive. [illegible]

FIRST [illegible] at the Crystal Palace [illegible] for particulars to the "MOLASSINE" CO., LTD., 36, Mark [illegible], E.C.—[ADVT.]

three judges, and a preponderance of these were men holding strong predilection views, which was usually the case, the decisions were open to much comment.

I write after many long years of experience at the council table on the selection of judges. In my early experience there were three judges for each of the different cattle classes. And one eminent Shorthorn breeder was proposed to be one of the three judges for Herefords and Devons. I at once protested, but was told that the man proposed was a good judge, and "knew a good Hereford as well as a Shorthorn," and that by one of the council who was an eminent breeder of Southdown sheep. I then asked him how he would like us to appoint a Cotswold breeder to judge in the Southdown classes. Orthodox as my point was, the majority voted against me, and never was a decision more severely commented upon, and, I may add, more justly so, by the public and the Press.

The decision of the champion prize is now become one of great importance and interest. It is by no means confined to the amount of money it represents (which in this case was considerable), but to the fact that the animal obtaining it is supposed to represent the most profitable breed to the grazier, yielding the best return for the food consumed, and the judge appointed to award it should, as far as possible, be removed from any suspicion of favouritism. With that object in view, I consider that the award should be in the hands of one or more first-class London butchers. I know there are many good men who disdain placing the award in the hands of a butcher, but I fail to see who is so competent as the man who is to be the last to deal with the animal.

It is not the perfection of the animal's breeding characteristics that he has to study, and through life may have studied, but the quality of flesh, and how best it will meet the taste of the consumer.

T. DUCKHAM.

Holmer, Hereford, December 20th. 1900.

The Pure Beer Question.

Sir,—At the meeting of the Central Chamber of Agriculture, a committee of five were appointed to draw up resolutions for meeting, and they drew up excellent ones. The meeting would not allow the numerous members of Parliament present to discuss the question, but though they unanimously supported a motion of mine in favour of proceeding with all despatch, I find they only propose to take a deputation of agriculturist pure samples, and that not till within a few days of the meeting of Parliament, which hardly gives Mr. Hanbury a fair chance. The question is drifting now without any responsible leaders, such as we had in the old anti-malt tax agitation and some means of enlisting the support of working men and of the opposition seems only prudent. The Poor Law Guardians are passing resolutions. Would a Poor Law Conference on the subject be possible? R. JASPER MORE.

Linley, Shropshire, December 27th.

Agricultural Holdings (England) Rules of 1900.

Board of Agriculture Rules.

The Board of Agriculture, by virtue and in exercise of the powers in them vested under the Agricultural Holdings Act, 1900, have prescribed and published the following rules:—

1. An award in an arbitration under the Agricultural Holdings Act, 1900, shall be in the form set forth in the First Schedule hereto, with such modifications of the recitals therein contained as circumstances may require.

2. The several forms for proceedings in arbitrations under the said Act, which are set forth in the Second Schedule hereto, shall, if used, be sufficient.

3. These rules extend to England and Wales only.

4. These rules may be cited as the Agricultural Holdings (England) Rules of 1900.

In witness whereof the Board of Agriculture have hereunto set their official seal this seventh day of December, One thousand nine hundred. T. H. ELLIOTT,

(L.S.) Secretary.

THE FIRST SCHEDULE TO THE ABOVE RULES.

FORM A.

Form of Award.

Agricultural Holdings (England) Acts, 1883 to 1900.

In the matter of a holding known as , lately in the occupation of A.B., of (the quitting tenant).

To all to whom these presents shall come I, F.G., of , [we, F.G., of , and H.K., of ,] send greeting.

Whereas, C.D., the landlord of the above-mentioned holding, and the said A.B., the tenant thereof, have failed to agree as to the amount and time and mode of payment of the compensation to which the said A.B. claims to be entitled in respect of the improvements made on the above-mentioned holding, which are comprised in the First Schedule to this award.

(Here insert recitals of appointments of arbitrator, arbitrators, or umpire. See Forms B., C., and D.)

And whereas the said A.B., by written notice to the said C.D., has required that the arbitration shall extend to the determination of certain further claims by the said A.B. against the said C.D. in respect of the said holding, the short particulars of which claims are set forth in the Second Schedule to this award.

And whereas the said C.D., by written notice to the said A.B., has required that the arbitration shall extend to the determination of certain claims by the said C.D. against the said A.B. in respect of the said holding, the short particulars of which claims are set forth in the Third Schedule to this award.

And whereas the said A.B. or C.D. has applied to me [us] to specify the amount awarded in respect of such of the improvements comprised in the First Schedule to this award as are in such schedule marked with an asterisk.

And whereas the time for making my [our] award has been extended by the Board of Agriculture to the day of , 190 ,

or,

And whereas we have duly enlarged the time for making our award to the day of , 190 .

Now know ye that I, the said F.G. [we, the said F.G. and H.K.], having taken upon myself [ourselves] the burden of the said reference, and having heard, examined, and considered the witnesses and evidence concerning the said matters so referred to me [us] as aforesaid, do make and publish this my [our] award of and concerning the same in manner following, that is to say:—

1. I [We] award and determine that the said A.B. is entitled to receive from the said C.D. the sum of pounds shillings and pence, as compensation in respect of the improvements comprised in the First Schedule to this Award, and I [we] do hereby declare that the amounts awarded by me [us] in respect of such of the said improvements as are marked with an asterisk are the amounts set against such improvements in such schedule.

2. I [We] award and determine that the said A.B. is entitled to receive from the said C.D. the sum of pounds shillings and pence in respect of the claims mentioned in the Second Schedule to this award.

3. I [We] award and determine that the said C.D. is entitled to receive from the said A.B. the sum of pounds shillings and pence in respect of the claims mentioned in the Third Schedule to this award.

4. I [We] award and determine that the said sum[s] of pounds shillings and pence [and pounds shillings and pence] awarded by me [us] shall, subject to the provisions of the Agricultural Holdings (England) Acts, 1883 to 1900, be paid by the said C.D. to the said A.B. on the day after the delivery of this award; and that the said sum of pounds shillings and pence awarded by me [us] shall, subject as aforesaid, be paid by the said A.B. to the said C.D. on the same day.

5. I [We] award and direct that the costs of and incidental to the arbitration and this award shall be paid by the said A.B. or C.D. or by the said A.B. and C.D. in the following proportions, namely, part thereof by the said A.B. and part thereof by the said C.D. [or otherwise as may be directed], or I [We] award and direct that each party shall bear his own costs of and incidental to this arbitration, and shall pay part of my [our] costs of this award, and that any costs payable by the one party to the other party under or by virtue of this award shall be so paid on the day after the delivery of this award. (Note.—The date in paragraphs 4 and 5 must not be earlier than one calendar month, nor later than two calendar months, after the delivery of the award.)

In witness whereof I [we] have hereunto set my [our] hand[s] this day of 190 .

Signed by the said F.G. [and H.K.] in the presence of

F.G.
[H.K.]

The First Schedule referred to in the above-written award:—

(Here insert each of the improvements comprised in the First Schedule to the Agricultural Holdings Act, 1900, in respect of which a claim by the tenant has been referred to arbitration. If either party has required that the amount awarded in respect of any particular improvement shall be specified, the person or persons making the award will mark such improvement with an asterisk, and place against the improvement the amount awarded in respect thereof.)

The Second Schedule referred to in the above-written award:—

(Here insert short particulars of any further claim by the tenant to which he has by written notice required that the arbitration shall extend.)

The Third Schedule referred to in the above-written award:—

(Here insert short particulars of any claim by the landlord to which he has by written notice required that the arbitration shall extend.)

Note.—The award may be endorsed as follows:—

This award was delivered to A.B. [or C.D.] on the day of 190 .

F.G.
[H.K.]

FORM B.

(Recital of Appointment of a Single Arbitrator.)

And whereas by an appointment, dated the day of , 19 , signed by the said A.B. and C.D. [or sealed by the Board of Agriculture, as the case may be], I, the said F.G., was duly appointed under the Agricultural Holdings (England) Acts, 1883 to 1900, to act as arbitrator for the purpose of settling the said differences, in accordance with the provisions set out in the Second Schedule to the Agricultural Holdings Act, 1900.

FORM C.

(Recital of Appointment of Two Arbitrators.)

And whereas by two appointments, dated respectively the day of , 19 , and the day of , 19 , we, the said F.G. and H.K., were duly appointed under the Agricultural Holdings (England) Acts, 1883 to 1900, to act as arbitrators for the purpose of settling the said differences, in accordance with the provisions set out in the Second Schedule to the Agricultural Holdings Act, 1900.

FORM D.

(Recital of Appointment of Umpire.)

(After recital of appointment of two arbitrators, M.N. and P.Q.)

And whereas by an appointment, dated the day of , 19 , signed by the said M.N. and P.Q. [or sealed by the Board of Agriculture, as the case may be], I, the said F.G., was duly appointed under the said Acts to act as umpire in the said arbitration.

[And whereas the said M.N. and P.Q. duly enlarged the time for making their award to the day of , 19 .]

And whereas the said M.N. and P.Q. have allowed their time to expire without making an award [or, as the case may be, have delivered to the said A.B. or C.D. or to me, the said F.G., a notice in writing stating that they cannot agree].

THE SECOND SCHEDULE TO THE ABOVE RULES.

FORM E.

(Application for Appointment by Board of Agriculture of a single Arbitrator.)

Agricultural Holdings (England) Acts, 1883 to 1900.

To the Board of Agriculture.

In the matter of the holding known as , lately in the occupation of A.B., of (the quitting tenant).

Whereas the said A.B. claims to be entitled to compensation in respect of certain improvements made on the above-mentioned holding.

And whereas C.D., of , the landlord of the said holding, and the said A.B., have failed to agree as to the amount and time and mode of payment of such compensation, and as to the person to act as arbitrator for the purpose of settling the differences that have so arisen.

And whereas there is not any provision in any agreement between the said A.B. and C.D. relating to the appointment of such arbitrator, and such arbitrator may accordingly be appointed by the Board

of Agriculture on the application in writing of either of the parties.

Now I, the said A.B. or C.D., do hereby apply to the Board of Agriculture for the appointment by them of an arbitrator for the purpose of settling the said differences.

(Signature of A.B. or C.D., or his duly authorised agent.)

Note.—Delay in making the appointment will be avoided if the application is signed by or on behalf of both parties.

FORM F.

(Application for Appointment by Board of Agriculture of Arbitrator for party failing to appoint.)

Agricultural Holdings (England) Acts, 1883 to 1900.

To the Board of Agriculture.

In the matter of the holding known as , lately in the occupation of A.B., of (the quitting tenant).

Whereas the said A.B. claims to be entitled to compensation in respect of certain improvements made on the above-mentioned holding.

And whereas C.D., of , the landlord of the said holding, and the said A.B. have failed to agree as to the amount and time and mode of payment of such compensation.

And whereas by writing, dated the , the said parties agreed, in effect, that the differences which have so arisen should be settled by two arbitrators or an umpire.

And whereas the said A.B. of C.D. has, for fourteen days after notice by the said C.D. or A.B. to him to appoint an arbitrator, failed to do so.

And whereas there is not any provision in any agreement between the said A.B. and C.D. relating to the appointment of an arbitrator for or on behalf of the said A.B. or C.D., in case of such default as aforesaid, and such arbitrator may accordingly be appointed by the Board of Agriculture.

Now I, the said A.B. or C.D., do hereby apply to the Board of Agriculture for the appointment by them of an arbitrator for or on behalf of the said C.D. or A.B.

(Signature of A.B. or C.D., or his duly authorised agent.)

FORM G.

(Application for appointment by Board of Agriculture of Umpire.)

Agricultural Holdings (England) Acts, 1883 to 1900.

To the Board of Agriculture.

In the matter of the holding known as , lately in the occupation of A.B., of (the quitting tenant).

Whereas the said A.B. claims to be entitled to compensation in respect of certain improvements made on the above-mentioned holding.

And whereas C.D., of , the landlord of the said holding, and the said A.B. have failed to agree as to the amount and time and mode of payment of such compensation.

And whereas by writing, dated the , the said parties agreed in effect that the differences which have so arisen should be settled by two arbitrators or an umpire.

And whereas M.N., of , and P.Q., of , having been duly appointed to be the arbitrators for the purpose of settling the said difference, have for seven days after a request in writing in that behalf by the said A.B. or C.D. failed to appoint an umpire.

And whereas there is not any provision in any agreement between the said A.B. and C.D. relating to the appointment of an umpire in case of such default as aforesaid, and such umpire may accordingly be appointed by the Board of Agriculture.

Now I, the said A.B. or C.D., do hereby apply to the Board of Agriculture for the appointment by them of an umpire for the purpose of such arbitration.

(Signature of A.B. or C.D., or his duly authorised agent.)

NOTE.—Delay in making the appointment will be avoided if the application is signed by or on behalf of both parties.

FORM H.

(Application to Board of Agriculture for extension of time for award.)

Agricultural Holdings (England) Acts, 1883 to 1900.

To the Board of Agriculture.

In the matter of an arbitration under the above-mentioned Acts between A.B., of (the quitting tenant), and C.D., of (the landlord), relating to the holding known as lately in the occupation of the said A.B.

Whereas the time for making the Award in the said arbitration will expire [or expired] on the day of , 19 .

Now I, the undersigned, do hereby apply to the Board of Agriculture to extend the time for making the said Award to the day of , 19 .

[This may be signed by an arbitrator, or by an umpire, where the matter is referred to him, or in any case by either party to the arbitration or his duly authorised agent.]

ALL farm live stock should be given "MOLASSINE." It is an excellent food and condiment combined. See advertisement on back page of this issue.—[ADVT.]

LITERARY NOTICES.

The December issue of the "Agricultural Students' Gazette," which is edited by the students at the Royal Agricultural College, Cirencester, contains a brief sketch of the life of the late Sir John Bennet Lawes, Bart., written by Mr. R. Warrington, F.R.S. A capital portrait of the deceased baronet is given with the number, which is altogether a very interesting one. Mr. P. W. Kimber describes farming in Natal, Mr. Henry Wray, M.R.A.C., "Agriculture in the Isle of Wight," and "E. K." has a paper on "Chlorine in Rain Water."

"The Commonwealth Pictorial" is the title of a new monthly social and commercial review of Australasian matters. It is edited by Mr. Charles S. Rutledge, F.R.G.S., F.R.C.I., and published by the Commonwealth Publishing and Advertising Co., Ltd., Martin's Chambers, Martin's Lane, Cannon Street, E.C. It is of the size of the sixpenny weekly illustrateds, and is of similar style, being printed on fine art paper and abounding with capital illustrations. The principal contents of the first number include an illustrated description of the farewell dinner to Lord Hopetoun, and of a visit to the Royal Colonial Institute; a poem entitled "The Young Queen," by Rudyard Kipling; an interesting account of some royal and viceregal residences, which article is accompanied by eight full page illustrations; and some particulars of Victoria, written by Mr. J. Stirling, the Government Geologist. In this journal will be recorded and fostered the developments in the great industries of Australasia—pastoral, agricultural, and mineral. The journal is essentially Australian in tone, but it is not intended to be for the Australian world alone, the contents including news of all that is latest and best in the social and commercial world. We share the editor's opinion that the pictorial representation of Australian matters will help in some small degree to a fuller appreciation of the beauties and vast possibilities of the Australian Commonwealth. The "Pictorial should make a name for itself.

Messrs. Vinton and Co., Ltd., 9, New Bridge Street, E.C., have lately published another work on horses by Sir Walter Gilbey, Bart. It is entitled "Horses Past and Present," and gives a brief history of the horse from a period before the Conquest, the evolution of the race being explained in an interesting style, perfectly intelligible even to those unacquainted with the mysteries of horse flesh, and to whom the work will be as interesting as it will be useful to breeders, agriculturists, etc. There are several excellent illustrations, among them being a likeness of the Norfolk Phenomenon, a famous Hackney stallion of a bygone generation, and of Grey Dromed, winner of the first Derby. The volume is nicely bound and printed in uniformity with others of the series, and it will form a worthy companion to the other many interesting and valuable works on horses which Sir Walter Gilbey has given to the public.

There has come to hand from the West of Scotland Agricultural College a bulletin (No. 5), containing reports on the experiments on the comparative merits of varieties of oats carried out in 1899 by Professors R. Patrick Wright, F.H.A.S., F.R.S.E., and A. N. M'Alpine, B.Sc. (Lond.) and Assoc. R.C.S.

From the Ontario Government Agency, 7, James Street, Liverpool, we have received a pamphlet entitled "An Instance of Industrial Evolution in Northern Ontario, Dominion of Canada." This paper was delivered at a general meeting of the Board of Trade of the City of Toronto by Mr. Francis H. Clergue, president and manager of the Sault Ste. Marie Pulp and Paper Co., Sault Ste. Marie, Ontario. It is a very interesting paper, having a direct bearing on the alleged decay of British trade and manufacturing industry, and as this subject is just now being so freely discussed, the publication of the pamphlet is most opportune.

The London agency for the Anglo-Continental (late Ohlendorff's) Guano Works have favoured us with a copy of a nicely got up blotter and diary for 1901. In it is given some interesting views of a Peruvian guano island, and some particulars of the firm's great business, which has been in existence over fifty years, and can now lay claim to being the most important undertaking of its kind in the world.

The 1901 edition of Messrs. Toogood and Sons garden seed catalogue has made its appearance. Like its predecessors, it is a most artistic production, and is something more than a price list, containing, as it does, some interesting and at the same time useful notes for gardeners.

The 1901 edition of "Vinton's (late Morton's) Agricultural Almanac," which is now in the forty-sixth year of publication, is produced on similar lines to its predecessors. A prominent feature consists in the large collection of up-to-date (December 15th) statistics and other official information which it contains. These figures are carefully compiled and comprehensive. The lists of societies embrace all the leading institutions dealing with agriculture and stock breeding, and there is an ample fair list. The special articles cover a wide field, and are contributed by experts in their several departments. Professor Wrightson deals with the subject of "The Cost of Ploughing," an important item in these days of scarcity of labour. Under the heading "Cost of Implements," Mr. Primrose McConnell gives suggestions which should be helpful alike to manufacturers and farmers. Mr. A. T. Matthews handles the subject of "How to Check the Rural Exodus." Mr. Gilbert Murray treats of "The Economical Effects of a Mixed Ration in the Health and Development of the Stock of the Farm." Mr. A. E. Bromehead Soulby deals with "Stray Dogs," and Mr. Eldred G. F. Walker has a very readable paper on "The Production and Popularity of Cider." The almanac contains portraits of Earl Cawdor, President of the Royal Agricultural Society, and Mr. R. W. Hanbury, M.P., President of the Board of Agriculture. Several illustrations are given of prize-winning live stock of the year. The price of this almanac is 6d., post free 8d., and it is published by Messrs. Vinton and Co., Ltd., 9, New Bridge Street, London, E.C.

Messrs. Chapman and Hall, Ltd., have lately issued a little book entitled "A Mule Driver at the Front," being the transport experiences in Natal of Roland Cecil Billington, who for nine months served first as a driver, and then as a sub-conductor with the Imperial forces in South Africa. The book was edited by Mr. M. F. Billington, who condensed the voluminous diary written by his brother, and the result is a most interesting description of a branch of the war operations which has received but scant attention. Mr. R. J. MacHugh, the "Daily Telegraph's" special correspondent in Natal and Orange Free State, contributes an introduction, in the course of which he says: "Mr. Billington's references to the defects in the equipment and management of the transport are very pertinent, and his proposals for improvement are of great value. It is not by any means certain that it is anybody's business to try for a better state of things. It may be hoped, however, that the experiences of an expert and intelligent observer will be taken cognisance of, and that the suggested improvements in a most important portion of an army's outfit will not be altogether fruitless."

Land Law Reform.

The annual meeting of the Land Law Reform Association was held in the Conference Room at the National Liberal Club on the 12th inst. Sir Walter Foster, M.P. (president of the Association), occupied the chair. The report of the executive committee stated that the association was in a generally prosperous condition, and recorded an increase in the number of subscribing members. The committee expressed regret that in spite of the revelations made as to the conditions under which tens of thousands of people were compelled to live, both in town and country, no adequate legislation had been enacted by the late Parliament.

In moving the adoption of the report, the Chairman said that since the last meeting the association had had three great questions before them—the housing of the working classes, the taxation of land values, and the compensation of agricultural tenants for improvements. There were a number of articles on the programme of the association which had not received during past years the attention that they all desired. In the future, the whole basis of social reforms must depend upon the carrying of those reforms which were the objects of the association.

Mr. Channing seconded the motion, which was carried unanimously.

Sir J. T. Brunner moved a resolution to the effect that the association awaited the Report of the Royal Commission on Local Taxation, in the confident hope that the incidence of rating would be made more just in town and country, and that new sources of revenue would be found in the rating of ground values by local authorities, and that no new legislation would be enacted to relieve a special class at the expense of the community, as was done in the Agricultural Rating Act of 1896.

The resolution was seconded by Mr. J. H. Whiteley, M.P., and carried.

Sale of Horses at Leicester.—Messrs. Warner, Sheppard, and Wade held their usual weekly sale on Saturday, when there was a large company present at the Repository, and some good prices were realised. The highest figure reached was 280gs. for a bay gelding, Majestic, the property of Lord Middleton, whose four horses averaged £276 17s. The following were the chief other prices:—The property of Lord Middleton: Mascot, 240gs.; Majestic, 250gs.; Mendicant, 250gs.; Scuttler, 150gs. Other lots: Brown gelding, 35gs.; Follow Me, 90gs.; His Lordship, 80gs.; Davis, 80gs.; Black Jack, 75gs.; Sportsman, 75gs.; Misty Face, 70gs.; Spaniel, 70gs.; Dancer, 70gs.; Ivy, 65gs.; black gelding, 60gs.; Kippen, 59gs.; grey gelding, 55gs.; Resolute, 57gs.; Duchess, 55gs.; Young Jim, 53gs.; Shamrock, 50gs., etc.

By Lupulin.

General Notes.

There is but little necessity this week for me to discriminate between the hop markets at home and abroad, for all alike have been influenced by the relaxation that marks the Christmas holidays. The season says to every community of workers,—

"Mix with your grave designs a little pleasure,
Each day of business has its hour of leisure."

And, happily, the utilitarian spirit of the age has not yet prevailed sufficiently to banish the festivity and hospitality which all of us claim and indulge in just now as our right. Let us hope that amidst the many changes to be inaugurated in the new century our old-fashioned institution, with its family gatherings, its kindliness and cordiality, and it consequent amelioration of the hard experiences of daily life, may be preserved intact for us and for those who may tread in our footsteps when we busy folk have attained to the "peace which passeth understanding."

With such surroundings there is much difficulty in finding any material for comment upon the condition of the hop trade. Nevertheless there is satisfaction in the general outlook, which affords glimpses of improving business, when operations are once more resumed. The calmness now so evident does not amount to stagnation, for such transactions as are passing through are at prices which show that current values are maintained.

At Nuremberg,

for instance, the sales have exceeded the new supplies, and in Bohemia a slight increase in demand, with reduction of stocks, has created an advance in quotations. The market at Munich, the great centre of the Continental brewing industry, also remains strong, there having been no new arrivals, while sales have been steadily constant. The spot stocks are therefore considerably reduced. Recent reports from Belgium indicate but little alteration, but there is no present sign of reaction from the downward tendency lately noted. A few planters are still holding hops, and these are firmly held in the expectation that better prices will be realisable in the New Year.

The Trade in America

has been active up to the very eve of Christmas, extensive export clearances having been made, and there is still a considerable quantity waiting shipment. This reduction of stocks has aroused the local brewers to further action, with the result that previous quotations are fully upheld, and the tendency of the markets both at New York and San Francisco is distinctly towards advanced figures.

In the Borough

the majority of the offices have been closed from the Saturday before Christmas till the following Friday morning, but by inquiry from some of the factors I find that there are indications of the likelihood of healthy activity as soon as business has emerged from its present holiday lethargy. Although the war and its home consequences may have cast a shade over many families, it appears that the expenditure of the general public has been quite up to the normal standard. Perhaps the consumption of beer may have suffered a little from the recent scare, but judging from personal observation I do not suppose the output of the breweries has been appreciably affected, and as most of the artisan class are in full work at good wages, I should conclude that on the whole the holiday beer consumption has rather exceeded the average than otherwise. Be that as it may, the hop traders in the Borough are quite confident that before we have seen the close of January a good demand for English hops will set in, and advanced values will then be easily established. I trust that these predictions, which I am inclined to support, will be confirmed, so that my friends who have followed my advice may be well rewarded for their patient endurance.

For each and all of the English hop-growers I heartily wish

"A Happy and Prosperous New Year."

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interest and benefit to the members of the society.*

Employers' Liability: A Hop-Picker's Claim.

At the Maidstone County Court on the 19th inst. a married woman named Childs, of Kennington Road, London, claimed of Messrs. White, hop-growers, of Paddock Wood, compensation under the Employers' Liability Act, for personal injuries received. The plaintiff's case was that on the 15th of September last, while engaged by the defendants as a hop-picker, she, owing to the defective condition of a ladder which enabled her to reach her sleeping hut, was thrown heavily to the ground, sustaining somewhat serious injuries. It was argued that, as the hut was situated on the hop farm, in close proximity to the kiln, it was a factory within the meaning of the Act. For the defence, it was urged that the hut was an ordinary dwelling-house, and that, as plaintiff was not employed in any agricultural pursuit at the time of the accident, she could not recover. His Honour, in deciding in favour of the defendants, said he still hoped they would do something for the plaintiff. The defendants did not ask for costs.

The Lodging and Conveyance of Hop-Pickers.

At the annual meeting of the Society for the Improved Lodging and Conveyance of Hop Pickers, held at Maidstone, it was resolved to dissolve the Society. The chairman, Mr. Charles Whitehead, said that this had been caused by no disagreement among the committee, as its members had always worked harmoniously, nor from want of funds, as subscriptions had always been generously given; but it was felt there was no necessity for the continuance of the Society, as it had accomplished its purpose. It had drawn the attention of the public, when it was founded in 1865, to the fearfully bad arrangements for the lodging of immigrant hop-pickers, to the great overcrowding, and the absence of sanitation, productive of immorality and disease. The Society pointed out to the Local Government Board the necessity for special bye-laws for regulating the accommodation for hop-pickers, and in 1874 bye-laws were framed, with the assistance of the Society, and their enforcement relegated to the local sanitary authorities.

Mr. Whitehead stated that at the present time the rural district councils in hop-growing localities enforced these bye-laws with satisfactory results, and that generally the accommodation provided for immigrant hop-pickers was as good as could be expected, considering the depressed condition of the hop-producing industry, and that the lodgings were only required for three weeks in each year. The Society had also been instrumental in obtaining cheap fares from the railway companies for hop-pickers, to induce them to come down straight to their work, and not to straggle down by road, as so many of them did formerly. It also advocated a system of hiring by agents in London, in order to get a somewhat better class of pickers, and it had strongly impressed upon employers the necessity of notifying to all "binsmen," or gangers, the exact date when the pickers were required, so that they might not swarm about in the villages before work begins, and the important duty of arranging that, when the "hopping" was over, the pickers should find trains ready for them at the stations, to take them home before they could spend their money on drink.

Other useful minor matters to promote the welfare of pickers carried out by this Society had been transferred to the Church of England Missionary Society for Hop-pickers. Votes of thanks were given to Mr. Whitehead and to the Rev. J. Z. Stratton, who organised the Society.

To Hop Growers.—Users of Wire Work should buy the Best English Galvanised Steel Hop Strand, made by Rylands Bros., Ltd., Warrington, Lancs. For prices, &c. apply to their London office, 86, Leadenhall-street, E.C.; or their Sole Agent for Kent and Sussex, Mr. Edward Ball, 3 Newstead-road, Lee, S.E.—[Advt.]

Hops for Cattle Food.

A profitable outlet for old hops which have become valueless for brewing has long been sought for. Hitherto the only use to which they could be applied has been for litter. Trodden under the feet of animals they are sufficiently absorbent to take up a proportion of the fluid evacuations, and in due course they attain a limited value as manure. But this provides only a poor return to the farmer who has expended so much in the production of the crop, who must deeply regret the "base uses" to which his hops are put, and who would be glad to find that they still contain some properties which may be of further service to him.

Experiments recently made by the Royal Agricultural Society of the East of Belgium appear to demonstrate satisfactorily that old hops may be profitably applied as food for cattle. By analysis it has been ascertained that such hops include constituents which give them value from a feeding point of view, the following being the results arrived at:—Fatty matters, 9.91 per cent.; albuminoids, 14 per cent.; hydrocarbonates, 39.87 per cent.; and in addition there are some valuable combinations of phosphoric acid and potash, which yield as follows: Phosphoric acid, 1.28 per cent.; potash, 2.33 per cent.

The problem of the utilisation of these constituents for the purpose proposed has occupied the attention of the society, and experiments have shown that while goats and sheep may be induced to eat the hops in their normal condition, horses, cows, and pigs resolutely refuse to accept them. The presence of the bitter flavour arising from the lupulin is doubtless the cause of this rejection, and the director of the agricultural laboratory at Louvain, recognising the value of sugar as an addition to the food of animals, finds in molasses an excellent corrective to the objectionable bitterness, and is thus enabled to overcome the difficulty of making old hops palatable to cattle. The professor does not recommend the constant use of hops as the principal food, but states they can be employed with advantage in mixture with watery foods, such as turnips, mangolds, etc. If at first the cattle do not appear to relish the combination, the hops and molasses should be introduced gradually and in small proportions until at last about 10lbs. to 11lbs. per head per day will be consumed. It is stated that the tannin and lupulin contained in the hops are advantageous in exciting the appetite, assisting the digestion and renewing the energy of animals.

In the Antwerp journal *La Metropole* I find it stated that recently a Liege buyer has acquired more than 12,000 bales of old hops for the purpose of preparing from them a tonic food for cattle in conjunction with sugar in accordance with these proposals, for the details of which I am indebted to *Le petit Journal du Brasseur*, Brussels.

It appears as if the matter is worthy of further investigation. The materials are near at hand, as I suppose an old pocket or two of "old olds" are to be found at almost every hop farm. A few pounds of treacle or coarse sugar can easily be purchased, and an experiment may soon be made. I think there is much probability of the success of the venture, and if my anticipations prove to be correct good service will undoubtedly be rendered to the industry. I shall be glad to be informed of the results if any of my friends test the value of these suggestions.

(*For Hop Market Reports, see pages* 859, 861.)

Birds and the Crops.—The County Council of Kent propose making an order prohibiting the killing of birds on Sunday. Some of the district councils, however, whose opinion with respect to the order has been invited, do not agree with it, pointing out that the rapid increase of birds is becoming a matter of very serious moment in view of the immense damage done to growing crops by the birds. They think that an order prohibiting the shooting of such birds as the hawk, which destroy the smaller birds, would be more sensible.

IMPURE BEER.

Twenty-one Inquests in Manchester.

Since the outbreak of the beer-poisoning epidemic in Manchester the City Coroner has held twenty-one inquests on people whose deaths were attributed, wholly or partially, to arsenical poisoning. The epidemic is much milder now than it was, though the city is not yet free. Summonses were issued on Friday against seven more Manchester beer-sellers. Meetings are being held all over the country asking for pure beer.

Information for the Local Government Board.

Dr. Niven, the Manchester medical officer of health, has addressed the following questions to the Manchester brewers with the object of collecting certain information desired by the Local Government Board:—

1. Have you used Bostock's glucoses or inverts, or both, during the last six months? If so, kindly state the period.

2. In what proportion, relative to the total amount of particular beers and stouts, stating the qualities, is the quantity of malt used, given either in bulk or in weight, as may be customary for both?

3. In what proportion, relative to the total amounts of beer and stout, has been the amount of glucose and invert added, and at what stage in brewing? If Bostock's glucose and invert have been used, please state the amounts of each employed relative to the total quantity of beer in what is known as "fourpenny" and "sixpenny" beer and stout.

4. Have you used for this class of beer a mixture of glucose or a mixture of inverts, or do you use only one kind of glucose or invert for each kind of beer or stout?

5. What was the total amount of your production of "fourpenny" beer or stout during the first nine months of the present year? How much of this remained in Manchester and Salford, and how much was exported?

6. On what date did you (if Bostock's materials were employed) issue an instruction to all public-houses supplied by you recalling beers or stouts made with Bostock's glucoses or inverts, and requiring their entire destruction? Has any exceptional illness occurred among your workpeople since these materials were used?

Messrs. Bostock and Co.'s Reply.

"With reference to the report of the experts who have been investigating the question of arsenical beer poisoning on behalf of the Manchester Brewers' Central Association, a correspondent learned from Messrs. Bostock and Co. (Limited) that, pending the conclusion of legal proceedings connected with the supply to them of impure acid, they were not disposed to make any detailed reply on the subject. The representative of the company remarked that whatever experts in Manchester might say, they themselves were told by chemists at Liverpool that arsenic had been found in other sugar than their own. With them it was not a matter of cheapness. They could have bought acid in Liverpool at a lower price than they paid for the contaminated article. Their object was to get the best article, and they contracted for acid manufactured from brimstone, which could not have contained arsenic. As to their contaminated sugar, its sale was stopped immediately the discovery of arsenic was made, and all their customers were advised to discontinue using it. Any further elucidation of the matter so far as they are concerned must, they say, be deferred until the legal proceedings come to an issue.

A Revenue Official's View.

I do not know (says "A Revenue Official" in the *Daily Telegraph*) whether Sir C. Quilter intends to reintroduce his Pure Beer Bill of 1896, in practically the same form; but, if so, I would beg to point out the necessity for one or two important changes in the light of recent disclosures.

Clause 2 allows the use of sugar as an adjunct for colouring or priming purposes to the extent of 3 per cent. by volume of the beer. The existing regulations restrict the quantity to 1½ per cent. by volume, and the original gravity of such solution must not exceed 1,150 degrees—*i.e.*, 38 per cent. of solid matter. Sir C. Quilter does not define the class of sugar which may be used, and herein lies one defect of his Bill of 1896. As a matter of fact, the class of sugar generally used for priming beer is the very class from which nearly all the recent mischief has sprung. Again, the addition of 3 per cent. of priming solution to a beer made exclusively from malt and hops would cause such wide differences in the chemical analysis as to render the beer indistinguishable from that brewed from a mixture of malt and sugar. Mr. R. Bannister, late Deputy Principal of the Government Laboratory, in his evidence before the Pure Beer Commission, stated that "without knowing the history of the beer it would be impossible, by chemical analysis alone, to determine whether the sugar present in excess of that which could be derived from malt used had been used in brewing the beer, or been added as priming." He further stated, "In such circumstances the brewing trade must be at the mercy of the common informer, and such informer must be, or have been, an *employé* at the brewery." These are weighty words, and, coming from a gentleman who spent thirty-three years in the Government Laboratory, are entitled to our respect.

If the law restricted the brewer to malt and hops only, and sugar were prohibited at any subsequent stage, chemical analysis would disclose at once the fraudulent addition of sugar, and the Revenue and the public would alike be protected. As, however, the great bulk of the brewing trade in this country are strongly of opinion that the use of sugar is essential to successful ale brewing, it would be somewhat arbitrary to prohibit its use altogether, especially when we consider that they have been enjoying the privilege for upwards of fifty years. I beg to suggest the following way out of the difficulty. It has, I think, one great merit—that while it places no harsh restrictions on a great existing industry, it offers a fair prospect of infusing new life into our greatest and oldest—viz., farming—and, perhaps, preparing the way for a new industry in our agricultural districts. I refer to the cultivation of white beet, which has never had a fair trial in England. Thousands of acres could be profitably grown in East Anglia, and away further North, among the wolds and fens of Lincolnshire and Yorkshire. And in the West, too, along the banks of the Severn and the Wye tens of thousands of acres could be profitably raised.

The sugar made from this beet possesses one merit in the light of the recent poisoning disclosures. In it there is little or no glucose at all, and the process of conversion does not involve the use of sulphuric acid or anything dangerous to health. The brewer might therefore be allowed to use this class of sugar with safety to the beer consumer and profit to the country. As a cattle food, one ton of English beetroot is equivalent to one and a-half ton of ordinary mangold. Beetroot distilleries in the districts named would, as a natural consequence, spring into existence. The spirit made from this root is quite equal, if not superior, to that made from raw grain, most of which is purchased abroad. Thus a new industry, where it is most wanted, would come into being, and a part at least of the vexed problem of the depopulation of our rural districts would be solved. In France there are 500 beetroot distilleries. A similar number might be profitably worked in our agricultural districts. Napoleon encouraged and subsidised the growth of beet in order, as he thought, to ruin our colonies. Let us now encourage it in the interests of the farmer, the labourer, the brewer, and the beer consumer.

Sulphate of Lime in Beer.

"A. R." writes:—"As the question of pure beer is now before the public, permit me to draw attention to one other ingredient which goes to make up that very mixed beverage called beer, and that is sulphate of lime, which, I am informed by brewers, is added to give a taste of dryness to the beer. And is it not probable that poisonous ingredients may sometimes find their way into the beer through this unnecessary and unwholesome addition? The discovery of arsenic in the beer has proved a blessing in disguise, as it has been the means of drawing the attention of the public to the manner in which the national beverage has been adulterated. No one will say that the substitutes for malt and hops have been used because they are better than the genuine article; only because they are cheaper and the beer can be brewed quicker with them.

"The beer is now made so very weak that it would not keep good many weeks if certain drugs, such as salicylic acid and boric acid, etc., which are known to arrest fermentation, were not added. All medical authorities are agreed that these drugs cannot be taken daily for a long time without producing certain ill-effects. The brewing interest is such a powerful one in this country, and the capital invested in breweries is so enormous—even much more than in railways—that unless in every county throughout the kingdom a Pure Beer League be started, and an agitation got up to influence the Government of this country to legislate on this most important matter, nothing will be done."

The Alleged Kiln Contamination.

Mr. F. L. Berry says that brewers "may be reassured as to the safety of using malt, provided they take reasonable care in their selection. It has already been suggested that the malt is probably contaminated during the kilning process, when it is exposed directly to the smoke of the fuel used; in fact, arsenic could not contaminate the malt at any other stage, unless present in the barley, which is altogether out of the question. Now, where coal is used we may reasonably suppose that a very slight contamination may take place from the smoke evolved, for the pyrites in the coal are known to contain traces of arsenic; but where coke only is used (as is the custom with many maltsters), surely the arsenic, which is easily volatilisable, has been driven off in the manufacture of this fuel, and I think it is reasonable to suppose that there is absolutely no danger of contamination where coke alone is used. Business requires that I should taste a great deal of malt (as flavour constitutes one of the chief points in judging a malt from the brewer's point of view), and I may say that, though I have tasted a great deal in the course of a few hours, I have never experienced the slightest ill effect—in fact, I always consider it a very good food for one, and malt extracts, which are widely known, will be contaminated to a far greater degree than beers brewed from the same malt, should that malt contain traces of arsenic."

Suggested Danger from Artificial Manures.

The *Lancet* says:—"During the past week our laboratory commissioners have undertaken the examination of a number of substances, including certain foods and drugs in common daily use, in the preparation of which sulphuric acid is used. It will be found, after a few months' consideration, that a fairly lengthy list of articles of every-day use may thus be drawn up. The results are not yet ripe for publication, but we feel bound to divulge one important result, since the disturbing announcement has this week been made by the analyst of Manchester that arsenic has been found in malt in a quantity equal to that found in glucose or malt substitutes. Moreover, arsenic was found in beers which were known to be brewed from malt and hops only. Now that this remarkable statement has been made, we may say that we have found, in the course of the inquiry alluded to, artificial manures to be rich in arsenic easily soluble in water. This is hardly surprising, since the basis of artificial manures—namely, superphosphate of lime—is made by acting on ordinary bone ash with common oil of vitriol. The important point is that it has been established that plants to which arsenical manure is applied take up arsenic in their tissues. Cabbages and turnips gathered from fields manured with superphosphate have given unmistakable evidence of the presence of arsenic. It is probable that arsenic accumulates in the soil which is constantly being dressed with superphosphates, so that plants raised on such soil would absorb arsenic and exercise an injurious effect on the health of man and animals. The question arises, therefore, may not the arsenic in malt be traceable to the somewhat large amount of arsenic inevitably present in artificial manures? This aspect of the subject is very serious, and needs further inquiry. We shall return to it in a future issue, when we hope also to be able to record the results obtained in an examination of other more or less familiar articles in which arsenic may be possibly introduced through the employment of impure sulphuric acid in the course of manufacture."

Proposed Meeting at Reading.

The Town Hall, Reading, has been engaged for Saturday, January 19th, for a monster demonstration in favour of a Pure Beer Bill. A thousand agriculturists, maltsters, corn merchants, etc., are expected to attend. More than twenty leading farmers are canvassing villages for signatures to petitions. The agricultural labourers are all signing for pure beer. The speaking campaign commences at Lamborne next week, to be followed on by other meetings in all parts where an audience of at least 200 can be gathered. Agriculturists all over England should, like the Berkshire etc., farmers, circulate petitions in their own villages. Victory would soon crown their efforts. Forms of petitions, leaflets, etc., can be obtained from Mr. George Baylis, Wyfield Manor, Newbury.

A Cattle Dealer and Anthrax.—A cattle dealer named Robert G. Hatley, of Broughton-in-Furness, was summoned at the Ulverston Police Court on Thursday, for cutting the skin of an animal infected with anthrax. The evidence was that the defendant cut the carcase of a heifer which had died from anthrax, and that a considerable quantity of blood went into a stream close by. He had already lost four cows and one horse by anthrax. The defence was that he cut the skin in order to have the spleen examined. He was fined £10 and costs, the Chairman remarking that it was the duty of the Bench to stamp out anthrax in the interest of farmers. The defendant should have called in a veterinary surgeon.

Proposed Agricultural Hall for Ipswich.—In moving the adoption of the accounts presented at the annual meeting of the Ipswich and East of England Horticultural Society, held at Ipswich last week, Mr. T. E. Mayhew said he considered the falling off in the receipts of the November show was mainly due to the lack of an Agricultural Hall, and he was very pleased that the Mayor had publicly advocated the desirability of such a building being erected in the town. The Mayor of the borough (Mr. W. F. Paul) said he felt very strongly that the Society would never gain a firm footing until they had a large building in which the winter show might be held. He had long since given up attending the show for pleasure; he always attended as a matter of duty. He could not commit himself as to anything which might happen in the future in regard to the suggestion for an Agricultural Hall, but he intended to move as far as he could, and according how far his fellow-townsmen were prepared to support him. Their agricultural friends were, he might say, full of the idea, and he hoped that horticulturists would be full of it too.

THE WEATHER.

MONDAY (December 24th).—Fog was prevalent over the central and south-eastern parts of England, but it was less dense than on Sunday. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, at all the northern and western stations, but it was only in a few places that the fall was heavy. Rain again fell in the west during the day. Temperature was generally rather higher than on the preceding day, and the highest readings were chiefly above fifty degrees, although at some places in the east of England the thermometer remained below forty degrees. Fog prevailed throughout the day in London, but it was at no time thick. The air was excessively damp, and the highest temperature in the metropolis was forty-one degrees.

TUESDAY (December 25th).—Mild and rainy weather prevailed over our islands, and the fog had quite disappeared. Rain was measured nearly everywhere as the result of the fall in the preceding twenty-four hours, and the amounts were large in the north. A cyclonic disturbance had spread over us from the westward, and a moderate to fresh south-west gale was blowing at several places on our north and west coasts, where the sea was rough. A considerable rise of temperature had occurred, and in many parts of the kingdom the thermometer during Monday night touched a higher reading than at any time on the preceding day. Scarcely any rain fell in London, but the air was very damp and mild, the thermometer touching fifty-two degrees, which is ten degrees above the average.

WEDNESDAY (December 26th).—The weather was remarkably fine for the time of year, over England, and the temperature was again high. A considerable fall of temperature had occurred in Scotland and Ireland, and rain again fell at many places in the west. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, over the entire kingdom, except at a few stations in the north-east of England, and in Ireland the fall was heavy, the measurement at Valentia exceeding an inch. The winds were south-westerly, and they were strong in places on our west and south-west coasts. The midday temperatures exceeded fifty degrees in many parts of England, and the air was generally very damp. In London the day was very fine, and the shade temperature rose to fifty one degrees.

THURSDAY (December 27th).—A warm south-west wind was still blowing over England, but in other parts of our Islands the air was rather colder. Rain was measured in the morning over nearly the entire kingdom, as the result of the fall since the previous day, and the fall was very large in parts of Ireland. Rain was again experienced during the day, and the weather was extremely unsettled. The midday temperatures again exceeded fifty degrees in the south of England. Rain fell in London during a great part of the day, and the air was very mild, the thermometer registering fifty-two degrees.

FRIDAY (December 28th).—A heavy gale occurred over the British Islands, and both wind and sea were very rough on our coasts. The barometer had fallen very briskly, and the readings were much lower than for a considerable time past, the mercury being below 29in. over the greater part of the country. A strong gale was experienced in many places during Thursday night, and it continued to blow very hard throughout the day. The centre of the storm traversed the north of Ireland, and afterwards passed completely over the extreme north of England. In London the wind was very strong throughout the day, and in the squalls the force of a strong gale was attained.

SATURDAY AND SUNDAY (December 29th and 30th).—The weather became very much quieter over the whole of our islands on Saturday, and the disturbance which had occasioned the severe gale on Friday had traversed the North Sea, and its centre was situated over Denmark. A brisk fall of temperature had occurred over the whole country, and there was a slight frost during Saturday night in Scotland as well as at places in Central England. A fresh fall of the barometer occurred on Sunday, and the thermometer readings were again high for the time of year. The wind was blowing a moderate gale at several places on our coasts, and rain fell over a large part of the country during the day. In London the weather was very fine on Saturday, but it was raining heavily again on Sunday, and the temperature rose to fifty degrees.

At Northampton, on Saturday, an Artillery-man, named Howard, was charged with stealing two horses. According to the evidence, Howard and another soldier broke into a farmer's stables, took away two horses, and started on a ride to London. After going fourteen miles, one of the animals fell over a heap of stones and the other went lame. The soldiers then turned the horses loose on the road. Howard was caught and charged with stealing the horses. The magistrates thought there was not sufficient evidence to show that Howard intended to steal the horses, and discharged him.

POULTRY.

A Mammoth Incubator.

The rapid expansion of the British demand for Australian poultry, combined with the possible immense future of the Australian poultry export trade, is leading to some remarkable developments in the colonial dairy farming industry. Hitherto China has enjoyed the reputation of utilising the incubator system on the largest scale, but that distinction is now being secured by New South Wales, which has not only the largest duck farm in the Commonwealth, but also probably the largest incubator in the world.

The farm and incubator are situated at Botany, near Sydney, the latter, according to a Sydney paper, having a capacity of 11,440 duck eggs, or 14,080 hen eggs. It is not necessary that it should be filled at any one time. The eggs can be put in at intervals, as they are available. With 50 eggs only it will work just as well as if it were filled. The incubator, which was designed and constructed by its proprietor, with the aid of an ingenious local mechanic, is on the hot-house principle; in fact, it is a hot-house. It stands in the open, and is constructed of ordinary pine weather-boards, with a corrugated iron roof. It is lined with ½in. pine lining, precaution, of course, being taken to prevent the ingress or egress of air except through the ventilation channels provided. The inside measurements are 9ft. by 11ft. by 7ft. in height. The egg trays each hold 130 duck or 160 hen eggs, and there are four of these end to end in eleven tiers, one above the other, on either side of the room, or a total of 88.

Moisture is supplied in pans beneath the bottom tiers of trays. The heat is supplied by means of steam pipes from a boiler, which is kept constantly going to furnish motive power for the various works in connection with the establishment. Two steam pipes run along under the lowest set of trays each side. The floor is composed solely of sods of rich black loam. This being on a bed of moist sand throws off a certain amount of moisture, which is a distinct advantage, as there is some indefinable virtue in the moisture derived by eggs from the soil. The system of ventilation introduced acts admirably. Underneath the eggs on each side of the room two pieces of 3-inch down-pipe, punctured at short intervals, pass right through the walls at each end, and allow a free current of air. Then there are a number of ½-inch ventilation holes along the wall above the top tier of eggs. These, combined with two 3-inch automatic valves in the ceiling, and check valves on the steam pipes, regulate the temperature to a nicety.

One of the strong points about the room, and perhaps the most surprising, is the regularity of the temperature. Since it has been started it has hardly varied a degree, but experience has shown the unwisdom of having various sets of eggs at all stages of incubation in the one temperature. Eggs during the first few days of incubation require an actual temperature of seven to nine degrees higher than during the last few days. That is, the eggs, as the young life grows, generate an increasing amount of heat. To counteract this the temperature of the room is regulated, enabling the eggs in the early stages to be kept as low as 95deg., while those during the last week range about 102deg. The early eggs are also placed nearest the steam pipes.

To perfect the system, it is intended to build a duplicate room, so that the eggs can be transferred from the first to the second room during the latter part of the period of incubation. In some respects the new system has eclipsed the ordinary incubator. For instance, the average of bad eggs when tested has been three to four to the tray. "I have never seen any incubator that could touch it for that," said the proprietor. The first hatchings gave 43 per cent., and the proprietor, with the eye of an expert, considered that those about due would go about 50 per cent. "If I got an average of 50 per cent. from all my eggs," he says, "I would be well satisfied." So far this season, his incubators—he has all makes, colonial and American—have given from 10 to 80 per cent.; and since he began hatching in June (the Australian mid-winter) he has lost over 8,000 eggs in incubation.

One recommendation of the new system is its cheapness. As a matter of fact, it costs virtually nothing, as the excess of steam from an engine boiler furnishes all the heat required. In any case, the boiler only consumes 9s. worth of fuel per month. Contrast this with the fact that the ordinary incubators in use on the farm cost 15s. a week for kerosene, and consider how much of the cream this takes off the profits. Should the hitherto successful results be maintained, the ordinary incubators now in use will be dispensed with, and another mammoth incubator constructed in their place. A few of these latter would speedily enable New South Wales to export immense quantities of ducks and poultry to the British and other markets, thus largely increasing the food resources of the empire.

DRESSED POULTRY AT THE SMITHFIELD SHOW: THE TURKEY CLASSES.

A Valuable Hunter Suffocated.—A fire broke out shortly after four o'clock on Christmas morning, on the Hawkstone Estate of Lord Hill, at Mr. Topham's farm, known as Tremlows, which is some four miles from Whitchurch, Salop, and is one of the largest farms in the county. Both the Whitchurch Brigades attended, but before they could subdue the flames considerable damage was done. Mr. Topham's best hunter, valued at a hundred guineas, was suffocated, the loose box which he was in being near the saddle-room, where the fire originated. Mr. Topham is fully insured.

The Government and Agriculture.—At the annual Conference of the National Union of Conservative and Constitutional Associations, held at the Hotel Metropole on Tuesday, Mr. Charles Meerin (Eccleshall Division, Sheffield) moved: "That this Conference recognises with satisfaction the legislation promoted by Her Majesty's Government, tending to remove the disadvantages under which the agriculturists of Great Britain and Ireland have so long laboured, yet desires to urge the necessity of further relief, so as to enable them to compete more successfully with foreign importations, and thereby obviate the great danger of increased cost of food in the event of war with any maritime power." Mr. Robert Jackson (Sheffield) seconded the resolution. Mr. Terry (Somerset) moved an amendment, with the object of including in the relief asked for the renewal of the Agricultural Rating Act; but, after some discussion, accepted an alteration to the effect that in future legislation the relief should not be less than that given by that Act. On a show of hands the amendment as modified was negatived, and the resolution was carried.

FARM PROSPECTS.

Devon.

The season continues mild and open, no sign of winter having yet appeared. Wheat is looking very well and promising, but not so much has been sown as in some seasons. Winter keep is fairly abundant, and live stock is doing well; sheep in swedes are having a muddy lair, and drier weather would be beneficial for them. Grass lands look green and fresh, and afford a picking for cattle that are daily turned out on them. Fat stock has sold well this past Christmas, as regards beef, but mutton has not sold so well. Prices for corn keep low, and are no doubt influenced by the mild weather.—L. B. G. (December 26th).

East Ulster.

It is certainly quite as well that farmers in Ulster have given up the desire to grow wheat, for in such seasons as this autumn has been there was no opportunity of sowing it. It is questionable if all the potatoes are yet dug out. In many fields farmers were just able to get the crop out of the ground, and put into little bings, as the soil had become so saturated that it was quite impossible to bring a cart on it; these are still so with a light covering of soil, farmers hoping for a few dry days, which have not yet come.

Hay and Turnips

are likely to last out well, as the former has not been yet much required, as pastures continue green owing to the continual rainfall, and for the same reason turnips keep growing. There is a good demand for beef; even unfinished animals have found a ready market, and stores are also marketable, as pastures still supply sufficient keep without much addition of other feeding stuff.

Fruit was Abundant,

and one was often reminded of Mr. Gladstone's advice at the beginning of agricultural depression—"Grow fruits"—and perhaps where fruit is of the best quality and within easy reach of cities this may still be good advice. But damsons at 4s. 6d. per cwt., and apples at 1s. per cwt.—prices at which they were actually sold—would pay no better than wheat-growing. Much might be improved here if the Agricultural Department could or would introduce good fruit trees, and get the farmers a few

Practical Lessons

on their planting and culture. Mention has been made above of the excessive rains. Now, in travelling through Ireland there is perhaps nothing calls forth the regretful observations of the practical agriculturist more than the superabundance of rushes on the pasture land and meadows. This is a rapidly increasing evil, and arises largely from the neglect not only of

New Drainage,

but owing to the dearness and scarcity of farm labourers the mouths of old drains have become choked. Pasture lands and meadows are growing sour. The sweet pasture of former years is fast giving place to coarse grasses, reeds, and rushes, to the loss, not only of individuals, but the increase of poverty among a large class of over-burdened farmers. Here is a point in which the Agricultural Department should make its influence felt. The principal

Watercourses

in many districts are so neglected—from the farming standpoint—that with every heavy rain the water in field drains is held back, and meadows and pastures flooded much longer than they would be if the natural watercourses were kept open as they should be.—E. U. (December 27th).

Glamorganshire.

Christmas Day was mild but dull. Boxing Day was bright and sunny—almost a perfect spring day; in fact, the last six or seven weeks have been very mild for the season, but rain has fallen on most days the last two months, although not heavily: it has made the land rather tenacious, which has delayed the ploughing on strong lands, and the carting of roots has been carried on under difficulties. They are generally a good crop, and swedes have been growing up to the present where not pulled. The mild weather has allowed store stock to remain out and do well, thereby saving the hayricks. The early-sown wheat is looking well and would be none the worse for a little frost. The trade for beef and mutton during the Christmas markets has not come up to the feeders' expectations, but this is partly attributed to the mildness of the season. The prices of all cereals are most discouraging, and, to make the matter worse, the threshings of grain have turned out rather damp, owing to the continued humidity of the atmosphere.—(December 28th.)

North Herefordshire.

The year now drawing very near to a close, with regard to the markets of beef and mutton at the Christmas sales, have not been at all satisfactory, more beef making under 6d. per lb. than over, except a few exceptional lots, and the mutton also. The weather may have had some little weight in this matter, and the markets being overdone. Everyone seems to keep a few fat things for Christmas, though it generally sells better either a month before or after. The weather has been most favourable for stock owners; hundreds of cattle and sheep have not had a handful of dry food yet, therefore must be wintered at much less cost, and seem to do well, too, where they are not too heavily stocked. The root crop is rather above the average in this district, and about one half soiled, therefore safe from frost when it comes.

Corn Growing

seems to have died out in this district. I have not seen a field of wheat planted. The clover roots are left down, and if ploughed at all come up for oats in the spring. They are useful to run some sheep on for a few months in the winter, and much is left down for three or four years. The farm is carried on at much less cost and requires less manure, therefore is found to pay better in the end; keeping the expenses down seems to be the only way to make the two ends meet.

The Apple Crop

seems to be hardly worth gathering, lots being sold at 1s. per bag, and delivered some distance. People prefer doing this to storing a lot of cider, but probably this may be useful, and is generally drunk in this district. No doubt it is the most wholesome drink you can find. People seem to be at liberty to poison you with beer and go scot free.—W. H. (December 27.)

Somerset.

Agricultural work is generally well in hand, the autumn having been dry and favourable for working the arable land. The autumn crops are looking well, and with continual mild weather vegetation continues very green, although I do not look upon a green Christmas as being very beneficial, as land requires rest. Wheat is but very little grown here in consequence of the bad return. The outlay very often exceeds the income. This I very much regret, as I feel it the bounden duty of those in authority to encourage the growth of wheat, although it is a problem yet to be solved; but in some way or other wheat should be grown as much as possible for the safety of our national food supply, and it also provides a good amount of labour. If

Agricultural Work

on the arable land is to be continued some more encouragement must be given to the rising generation—extra wages, etc. At this season of the year there is a good amount of work required to be done on the farm, but in consequence of the cost I fear much is shelved. Fruit trees require attention, as during the past summer a great deal of apple wood has succumbed. Cattle generally are looking well, but in consequence of the very wet weather many more will have to be housed. The prospect generally is about as usual.—A. L. W. (December 27th).

East Somerset.

Whilst I am writing the elements are very much disturbed, and I don't think we have had such a hurricane for several years; tiles and thatch have been going in all directions, and there will be a considerable bill to pay to put all things straight again. We have had more rain during the last two days than has fallen in the same time for years. This is entirely a pasture district, in which dairying and grazing are carried on.

Cheddar Cheese

is the principal product; this has not been making such a good price as was expected, considering the short make owing to the drought. Pastures are looking very green, and cattle are still on them, as they can get a very good picking, and besides, there is not such a demand on the haystacks, although these are very numerous and substantial, but a good brown loaf (as farmers say) is always useful, and after the short makes of hay that we had three and four years ago people are very glad to have their stackyards well filled. Best bullocks sold well at the Christmas markets, but inferior ones were not wanted. Apples for cider-making are largely grown, and have been a fair crop, but prices very low.—W. T. A. (December 28th).

The cereals in the West of England were secured in good condition, but their general yield as shown by the threshings is very disappointing, especially the barleys. There is a full average bulk of hay, which with the exception of the early clovers and sainfoin was easily made (especially where the swath turner was used), and without damage from rain. Mangolds were a good crop where allowed to remain growing to the end of October. Swedes and turnips are even now increasing in size. Cattle have had a bite of grass, and in consequence have eaten much less hay than of late years before Christmas. The continued rains have made the sheepfolds very wet and heavy, probably too much so, and prices of farm produce do not admit of any margin to the good on the year's work.

The Agricultural Rating Act

was an instalment of justice to the tenants, but the positive fact that it still leaves them paying sixteen times more than other classes of ratepayers towards local taxation clearly shows that further legislation is most urgently needed. The above Act will soon come to an end; it has been a great boon to many a hard-working, struggling man, and there is neither reason nor justice in the present terrible over-burden now levied upon farmers for local rates. An immediate

Revision of Assessment

whereby all classes of ratepayers shall contribute to these rates in proportion to their ability to do so is an act of justice to farmers long overdue.—C. C. (December 28th).

Wiltshire.

The yield of all kinds of corn is disappointing, both in quantity and quality, and with the continuous low prices and labour more scarce and expensive, the prospect for arable land is most discouraging. All autumn-sown crops are looking remarkably well (possibly too well), the weather being exceptionally mild. There was a dull, dragging trade for fat stock at the Christmas markets, and prices were lower than anticipated. The long drought during the summer and early autumn added greatly to the expense of producing both beef and milk, and there is no compensating advantage. Owing to the scarcity of grass, young cattle have not made their usual growth, and if sold at present prices would make

A Poor Return for the Summer's Keep.

The recent outbreak of foot-and-mouth disease in this county was fortunately arrested by the very stringent, though reasonable, measures taken by the Board of Agriculture, remembering the great losses caused by the disease in former years. With a fair crop of roots and hay plentiful, the outlook for owners of stock is favourable.—(Dec. 28th.)

Foreign Prospects.

FRANCE.—Crop prospects on the whole are considered satisfactory. The commercial situation is upset by the uncertainty respecting the final action of the Senate as to *bons d'importation*. The Finance Commission have rejected the principle of the *bons* by a large majority, and as the matter has still to be considered by the Chamber it is impossible to know when the final vote will be taken.

BELGIUM AND HOLLAND.—Dry weather is desired for farm work. Antwerp ruled quiet, but steady, but the holiday period naturally interferes with trade.

GERMANY.—Weather has been mild and drier, and wheat and rye fields are flourishing. Trade in Berlin and Hamburg was quiet all through the week, and both places noted easier prices and dull tone.

UNITED STATES.—The *Cincinnati Price Current* says the current prices and other conditions favour liberal marketing, and the movement of maize is growing. Wheat is unchanged as regards outlook, but marketings are restricted.

ARGENTINA.—Our Buenos Aires cable states that in some portions of the province of Santa Fe the wheat yield is expected to be a poor one, the crop having been hurt by the rainy weather some time ago.—*Dornbusch.*

Dingwall and Cromarty Light Railway.—The solicitors to the promoters of the above railway have been informed by the Treasury that the Department is prepared to make a free grant of £25,000 and a loan under Section 5 of the Light Railways Act not exceeding £12,500.

Herefordshire Without a Chamber of Agriculture. — Mr. Thomas Preece, of the Old Hall, Ross, writing to the *Hereford Times*, says:—"It seems strange, in such an important agricultural county as Herefordshire undoubtedly is, that it does not possess a Chamber of Agriculture. This county, with its fine breed of cattle, its varied and excellent products—hops, fruit, cider, and in the south its sheep and malting barley—is second in importance to no county of its size. Therefore, is it not a reflection on those engaged or interested in these pursuits that they have no combined organisation through which their interests may be attended to and their wants or grievances made known? True, there are some institutions in the county, such as the Hop Growers', Fruit Growers', and Cider Makers' Associations, which to some extent look after the interests of those particular branches; but I am strongly of opinion that were these interests joined together in a properly constituted Chamber of Agriculture their power for good would be much greater. In these days of combinations, when almost every trade has its association, by which it is enabled to keep up or increase the price of its produce and otherwise look after its interests (generally to the disadvantage of agriculture), it behoves landlords, farmers, and all who are interested in the welfare of agriculture to unite together for common good. I do hope, therefore, now at the commencement of a new century that the blight upon the public spirit of the farmers of Herefordshire will be removed. Such an institution would be exceedingly useful at the present moment, when every man's voice should be heard protesting against the adulteration and impurities in beer.

CORN MARKETS.

LONDON.

Mark Lane, Friday.—There was nothing whatever of incident concerning to-day's market, which wore a holiday aspect from early hours (notwithstanding the Exchange being closed since last Friday evening) and the attendance continued of small dimensions. Prices were, however, generally steady. Good red, 29s 6d 63lb; not thoroughly conditioned, 29s; fine white, 30s delivered up. Foreign sorts unchanged. The London Millers' Association made no alteration at this afternoon's meeting. Town households, 25s; whites, 28s per sack; Cascadians, 23s 3d ex store; American first patents quoted at 25s to 26s; second, 23s to 24s. First bakers, 20s to 21s; seconds, about 18s to 19s per sack. Grinding barley in fair supply. Fine English malting ranges up to 38s. Oats firm: American mixed clipped, 14s 9d ex ship, 15s ex quay; white clipped, 15s 7½d in the former, and 16s in the latter positions, 40lb. Common Petersburg, 14s 9d to 15s, 38lb, and 16s 3d upwards, 40lb. Vologdas, 14s 6d to 14s 9½, ex quay, 38lb. Maize unchanged, but feeding stuffs were against buyers. American mixed, new, 20s 3d ex ship, and old 20s 6d. Bessarabian, new, 22s 9d ex ship, 23s 9d ex quay. The market for beans and peas remains lifeless.

COUNTRY.

Aylesbury, Saturday.—There was scarcely anything doing. Wheat was practically the same as last week, 26s to 29s per imperial quarter; and barley, oats, and beans underwent no change.

Banbury, Thursday.—Wheat, white (old), 27s to 28s 6d per qr; wheat, red (new), 27s to 28s 6d per qr; beans (new), 28s to 30s per qr; oats (new), 16s to 18s per qr; oats (old), black, 21s to 22s per qr. Very small attendance, figures exactly the same as last week.

Brighton, Thursday.—The market opened as usual, but scarcely any business was done. There was a small attendance. The following are last week's prices:—New white wheat, 27s 6d to 28s 6d; new red ditto, 27s to 28s; barley, 30s to 35s; grinding ditto, 21s to 22s; feeding ditto, 26s to 27s; English oats, 17s to 22s.

Bristol, Thursday.—There has been little business passing since our last. Owing to the Christmas Holidays our market to-day partook of quite a holiday character, and there was but a very small attendance. We cannot report any change in either wheat or feeding stuffs.—GRACE BROTHERS.

Cambridge, Saturday.—During the week the wheat trade has been of a holiday character, and very little business has been transacted. At this market to-day there was a moderate supply of wheat, which met with a good demand at last week's full prices. Red 27s to 29s, and white up to 29s per 504lb. Barley made quite as much money as last week.

Canterbury, Saturday.—Wheat the turn cheaper; barley dull. Ruling prices:—White wheat, 29s to 31s; red ditto, 27s to 29s; malting barley, 25s to 35s; ditto black, 16s to 20s; peas, 30s to 35s; tick beans, 32s to 33s; mazagans, 27s to 29s; flat maize, 23s to 24s; round ditto, 27s to 28s per qr; winter tares, 6s to 6s 6d per bushel.

Carlisle, Saturday.—Small supply of oats in our market to-day, slow sale at unchanged prices. New, 17s to 18s 6d; old, 23s 6d to 26s per 336lbs.—THOMAS ROBINSON.

Chester, Saturday.—There was a small attendance, and few samples offering. Wheat was a slow trade at recent values, but oats were in good demand, and for good samples full prices were obtainable. Quotations:—Wheat, white and red, 4s to 4s 1d per 75lb; grinding barley, 3s to 3s 3d per 64lb; beans, 4s 8d to 5s 6d per 80lb; oats, new, 2s 3d to 2s 6d; old, 3s 6d to 3s 9d per 46lb; Indian corn, 11s to 11s 3d per 240lb.

Colchester, Saturday.—Very small supplies both of wheat and barley here to-day; condition somewhat improved, there was a fair demand and prices favouring sellers. Beans, peas, and oats, few offering, prices firm.—FRANCIS AND CO.

Devizes, Thursday.—We had a small supply and a small attendance to-day, and comparatively little business done Best wheat, 15s 6d to 16s 6d; new wheat, 14s to 15s; malting barley, 26s to 35s; grinding barley, 20s to 24s; oats, 18s to 23s; beans, 16s to 20s; fine flour, 24s 6d to 25s 6d; extra fine, 26s to 30s; best bread, 10d.

Dorchester, Saturday.—Not much business transacted. English wheat showed practically no alteration in price, the demand being decidedly dull. Foreign also showed but little variation. No quotable change in barley. Feeding stuffs unaltered.

Edinburgh, Wednesday.—Wheat, 317qr were sold, averaging 26s 9d; down 3d. Barley, 693qr sold, averaging 23s 11d; up 3d. Oats, 440qr sold, averaging 19s 4d; up 7d. Flour unchanged; first quality, 28s; second, 26s.

Glasgow, Wednesday.—Wheat and flour were idle, and Monday's prices were quoted. Maize dull at 11s 9d per 280lb. Oats steady. All feeding stuffs were quiet.

Glasgow, Wednesday.—There was a small attendance at our corn exchange to-day. Our market is of quite a holiday character, and there is very little business passing. Wheat remains dull and unchanged. Flour quiet and the turn lower. Indian corn slow of sale at a reduction of 1½d to 3d per boll on the week. Other articles quiet at late rates.—GIBSON AND CLARK.

Leicester, Saturday.—A fair attendance of buyers and dealers, with moderate supply of home-grown wheats in variable condition. Trade sluggish for all, except fine dry samples at 27s to 31s per 36 stones. Fine oats firm.

Lincoln, Friday.—Trade in all kinds of grain to-day very flat; wheat a slow trade at last week's rates. In barleys scarcely anything passing; oats, beans, maize, and peas all quiet.

Liverpool, Friday.—Wheat market firm with a fair business at full prices of last Friday. Flour is steadily held with only a small inquiry at last Friday's prices for foreign. The Liverpool Millers' Association make no change in the minimum price of bakers'. Maize is quiet with a moderate business passing, old mixed making ½d lower, whilst new is making ¾d under last Friday. European, owing to larger arrivals, tends in favour of buyers. Plate is also easy with a smaller trade. Barley quiet for brewing and feeding, but prices remain steady. Beans are firmly held, but the demand is quieter with only a small trade passing. Peas are slow with hardly anything doing. Canadians a shade lower. Oats: Both English and foreign are extremely dull, with prices the turn in buyers' favour. Oatmeal quiet at quotations. Oilcake steady with a holiday tone. Tuesday, the first of January next, being an Association holiday, the Liverpool market will be closed.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Small attendance at the market, and very little business doing. Wheat firm at former prices, and other articles no change, as trade not sufficient to report upon. We are hoping for the position to improve when the new year is introduced. The weather very wet and boisterous.

Newcastle-on-Tyne, Saturday.—Our to-day's market was quiet, not much business passing, quite a holiday nature; where sales were made, late rates were maintained for wheat and maize. Beans in favour of sellers. Peas unaltered, fine quality barley made full prices, common sorts neglected. Oats quiet, unchanged in value. Flour unaltered. Our market will be closed on Tuesday.—JOSEPH POLLARD AND CO.

Newcastle-on-Tyne, Saturday.—This day's market was of the usual holiday character, and to make a long story short, prices for wheat and feeding stuffs, flour included, were unchanged.

Northampton, Saturday.—Quiet market; supply and demand small. No alteration in price. Flour inactive, nothing doing. White wheat, 29s to 30s; red wheat (old), 23s to 30s; red wheat (new), 26s to 28s; barley, 25s to 32s; barley (grinding), 20s to 24s; oats, 19s to 22s; old, 24s; beans, 28s to 32s; old, 35s; peas, 26s to 36s; flour, 20s to 25s.

Norwich, Saturday.—Our market to-day was of a holiday character. Wheat was in rather better condition but trade slow, millers buying only for present consumption. A fair supply of barley offering, sufficient for all requirements. Wet and stormy weather has prevailed during the past week, with a gale of wind and rain on Thursday and Friday nights, doing much damage. Wheat, red, 27s 6d to 28s 6d per qr, weight 63lbs per bushel imperial. Corn Inspector's return for the week ending 25th December, 1900:—Wheat, 1,697-2, 26s 8¾d; barley, 14,748-3, 25s.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat in small supply and values fully supported. Barley, fine samples sought after and made extreme rates. Oats and barley poor show, and prices in sellers' favour.—ROBERT HUBBLE.

Oxford, Saturday.—Small supply of wheat and barley. Quiet demand for wheat. Inquiring for useful secondary barley at full price.

Peterborough, Saturday.—The attendance at market again to-day was under the average and there has been very little corn of any kind showing. Wheat was firm in tone and full prices were paid. Spring corn also made quite as much money as before the holiday.—THOMAS HILL AND SON.

Reading, Saturday.—The attendance here to-day was much larger than usual and a corresponding briskness in trade was experienced. Wheat proved plentiful, and the rates of last week's market were fully upheld, while barley, which was in good supply, met a ready sale at recent quotations. Other descriptions of corn changed hands at unaltered figures.

Ripon, Thursday.—The market presents a holiday appearance. There is nothing being done, and prices are difficult to fix. Wheat, English, new, 27s to 28s; ditto, old, 31s; ditto, foreign, 30s 6d to 34s 6d; barley, malting, 24s to 29s; ditto, grinding, 21s to 23s; oats, old, 25s to 26s; ditto, new, 17s to 19s; maize, round, 24s to 27s; ditto, flat, 23s 6d per qr; beans, old, 1s per stone.

Stamford, Friday.—Very few samples of wheat showing, some of which fetched 27s to 27s 6d per qr. A few samples of barley made 25s to 28s, and beans 28s to 30s. All spring corn about the same.

Stratford-on-Avon.—Market still of a holiday character, a poor attendance, and a very short supply of English wheat. Business barely sufficient to test values, but last week's prices were given for the few samples that changed hands. No change in malting barley, and very little doing owing to the holidays. Foreign wheat trade also quiet, and prices practically unaltered. Grinding barley and round maize as last week, flat maize 3d lower. Oats, foreign beans, and peas without quotable change.

Sunderland, Saturday.—Market is still of a holiday character. Wheat quiet, at about late rates. Barley and oats unaltered. Arrivals coastwise—Wheat, 1,140 qrs. Foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Wheat was quiet at last week's prices. Maize and grinding barley an easier tendency. Malting barley firm at full prices.

Wakefield, Friday.—A firm feeling has prevailed in wheat during the holiday week, and in the small business done last week's prices have been obtained. Barley meets with a dull demand, and only the finest qualities sell, at about former price. No alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LIMITED.

Wakefield, Friday.—We have a thin attendance here to-day, and wheat meets a limited inquiry at last week's prices. Malting barley is in better demand, but factors fail to obtain any advance. Feeding stuffs quiet and unchanged.—DUNNS AND CO.

Winchester, Saturday. — Wheat in extremely short supply, which met a firm trade at fully last week's prices. Barley steady; best qualities in good demand at late rates. Oats and maize unaltered. Flour, 24s to 25s. The market still of a holiday character.—FEAR, COLEBROOK, AND CO., LIMITED.

Wisbech, Saturday.—Holiday market. Very little grain offering. Wheat firmly held at late rates, red 27s 6d. Spring corn unchanged.—JAMES FLETCHER.

Worcester, Saturday.—The trade was only of a retail character. Wheat sold slowly at late rates. Feeding corn dull, without quotable change in value.

York, Saturday.—Wheat in fair supply without change in price. Good samples of malting barley firm at former prices; common sorts difficult to sell. Oats firm. White Tartary, 16s to 17s; black ditto, 17s to 18s; and short oats, 18s to 19s per quarter of 24 stones. Rye, 7½d; and old beans, 10d to 11d per stone. The official averages of the week have been:—Barley, 24s 3d; and oats, 16s 10d per quarter.

FOREIGN.

The Antwerp wheat market has been inactive, in sympathy with the tone of business at Brussels. The intelligence received with respect to the French growing crops continues satisfactory. A spell of colder weather would, however, be acceptable, as it would destroy noxious vegetation and hurtful insects. The French provincial wheat markets have shown little change, but there has been some upward tendency as regards the best qualities. Business in wheat has been inactive at Marseilles, last week's sales amounting to only 3,000 quintals. The attendance of buyers has been somewhat limited at Paris. Wheat prices have shown little change. Flour for consumption has also remained without variation in the French capital. The wheat trade has been quiet at Lille. Flour has been fairly well supported, but business has shown little activity. Ibrail advices state that the damp and cold weather of November has been followed by a dry cold, which has, upon the whole, been favourable for the autumn-sown wheats. The Ibrail wheat trade has exhibited rather a weak tone, the demand having been dull. The favourable reports received with respect to the Argentine and Australian crops have not been without their influence. Rather more activity has been noticed in the central Russian markets, supplies have declined, while the demand has increased, and some advanced prices have resulted; the wheat trade has exhibited, however, a dull tone in the principal Russian ports. The total quantity of wheat and flour now en route for Europe is estimated at 3,120,000 qr.

Hamburg, Saturday.—The weather continues mild and wet. Trade dormant; where sales are forced lower prices have to be taken, but this is the case only with maize, which is offering from secondhand considerably lower than direct. The imports during the week amounted to 9,058 tons wheat, 2,640 tons rye, 8,843 tons barley, 11,922 tons maize. German wheat continues in scanty supply. Fine red Saale, Holstein, and Mecklenburg is held at 27s to 27s 9d, inferior qualities at 24s 9d to 26s 3d per 504lb, f.o.b. Hard Winter No. 2 and fine River Plate 28s 3d to 28s 9d per 480lb c.i.f. Hamburg. Rye quiet; 9 15-20 South Russian prompt is held at 22s 6d 9 10-15. May-June at 22s per 480lb. Stocks of malting barley here are light, but the open water permits supplies being drawn from the interior as required. A few parcels of good to fine Bohemian are offering on the spot at 34s to 38s; Saale to arrive per barge at 32s 6d to 37s. Holstein, Danish and Mecklenburg at 24s 6d to 27s per 448lb. Russian feeding barley maintains its value, 17s 6d to 18s per 480lb. being paid. Mixed maize is offering from second hand at 18s to 18s 3d prompt till May shipment; River Plate on the spot 18s 3d per 480lb, first cost Hamburg.—JOHN TAYLOCK.

Closing quotations:—Fowls, Yorkshire, 3s to 3s 6d; Essex, 3s 3d to 3s 9d; Welsh, 2s to 2s 3d; Boston, 2s 6d to 3s; Surrey, 3s 6d to 4s 6d; Sussex, 3s 6d to 4s 3d; Irish, 1s 10d to 2s 3d; turkey, cock, 9s to 15s; hen, 4s 6d to 5s 6d; geese, 3s 9d to 4s 6d; country ducks, 3s to 3s 6d; Bordeaux pigeons, 10d to 1s 2d; feathered, 9d to 1s; wild rabbits, 9d to 11d; tame, 1s 2d to 1s 4s each; Australian, 7s 9d to 8s 6d per dozen; pheasants, 4s to 5s; young partridges, 3s to 3s 6d; old, 2s per brace; hares, 3s to 3s 6d; leverets, 1s 9d to 2s 6d; wild duck, 2s; pintail, 1s 6d; widgeon, 1s; teal, 10d to 1s; snipe, 6d to 10d; woodcock, 2s to 3s; golden plover, 8d to 10d; black, 5d each.

Liverpool, Saturday.—Bacon: The market has been slow, demand being of retail character, and prices show a further decline. We quote to-day: Choice Cumberland cut, 20lb to 22lb, 46s to 50s; 26lb to 30lb, 44s to 47s; 32lb to 38lb, 44s to 46s; long middles, rib-in, 18lb to 22lb, 48s 6d to 52s 6d; clear bellies, 14lb to 16lb, 51s to 53s; 18lb to 20lb, 50s 6d to 52s 6d; Staffordshire cut (lean on), 35lb to 40lb, and Birmingham cut, 33lb to 38lb, 44s 6d to 45s 6d; clear Staffords (lean off), 40lb to 44lb, and Yorkshire cut, 40lb to 45lb, 42s 6d to 44s; singed and Wiltshire Canadian, 45lb to 55lb, 51s to 55s; American, 44lb to 50lb, 42s to 48s; short clear backs, 12lb to 16lb, 41s to 42s; 16lb to 20lb, 41s to 42s; fat backs (export), 38s 6d to 40s 6d; long clear middles, 35lb to 40lb, 43s to 44s; 40lb to 45lb, 42s 6d to 43s 6d; short clear middles, 45lb to 50lb, 42s to 43s; short middles (rib in), 18lb to 23lb, 44s to 46s; shoulders, square cut, 12lb to 14lb, 32s 6d to 37s; 14lb to 16lb, 31s 6d to 36s; New York cut, 11lb to 13lb, 33s to 35s per cwt. Hams quiet, and the turn lower. We quote choice long cut, 8lb to 12lb, 44s to 49s; 14lb to 16lb, 42s to 46s; short cut and A.C., 10lb to 12lb, 44s to 48s; 12lb to 14lb, 43s 6d to 47s; 14lb to 16lb, 40s to 46s per cwt. Lard dull and easier, cables coming lower. We quote pails and kegs, 38s to 38s 9d; prime Western (in tierces), 36s 9d to 37s 3d per cwt. Beef unaltered in value, with moderate demand. We quote extra India mess, 66s 3d to 70s; Plate and Packet, 60s to 65s per 304lb. Pork steady, with fair inquiry. We quote finest prime mess 66s to 70s per 200 lb. Cheese.—The demand shows signs of improvement, and holders are firm at recent quotations for finest quality, but summers are pressed for sale at irregular values. We quote finest Canadian, September-October, coloured, 53s to 53s 6d; white, 52s to 53s; finest States, coloured, 51s 6d to 52s 6d; white, 51s to 52s; summer cheese, ripe flavoured, sell steadily from 44s to 48s 6d; but lower grades are dull and neglected, offered from 20s to 32s per cwt. Butter.—The enquiry has been small this week, the holidays interfering with business prices rule steady. We quote fancy fresh made Canadian creamery, 105s to 110s; second quality, 80s to 92s; finest States (none); finest ladles and imitation creamery, 72s to 80s; finest Danish, 112s to 124s; Australian and New Zealand, 104s to 110s; Irish creamery (none); Cork firsts, 108s; seconds, 91s; thirds, 80s per cwt.—HODGSON BROTHERS.

BUTTER.

Wednesday.—Colne: 1s 3d per lb. Kirbymoorside: 1s 2d to 1s 3d per lb. Masham: 1s 8d to 1s 9d per roll of 24oz. Northallerton: 2s per roll of 24oz. Stockton: 1s 4d to 1s 5d per lb. Uttoxeter: 1s 4d to 1s 5d per lb.

Thursday.—Brigg: 1s 1d to 1s 3d per lb. Devizes: 1s 3d to 1s 4d per lb. Driffield: 1s 1d per lb. Kidderminster: 1s 3d per lb. Penistone: 1s 4d per lb. Ripon: 2s to 2s 2d per roll of 24oz. Wetherby: 1s 3d to 1s 5d per lb.

Friday.—Derby: 1s 4d per lb. Easingwold: 1s 2d to 1s 3d per lb. Grimsby: Danish, 125s to 127s per 112lb; Dutch, 112s to 118s; Canadian, 100s to 112s; Colonial, 100s to 112s. Helmsley: 1s 2d to 1s 3d per lb. Leeds: Danish, 126s to 130s per 112lb; Irish creameries, 104s to 110s; York lump, 15s to 16s per stone; ditto long rolls, 1s 1d, 2s to 2s 3d; fresh butter in 1lb prints, 1s 3d to 1s 4d per lb. Leyburn: 1s 9d to 1s 10d per roll of 24oz. Lincoln: 1s 2d per lb. Otley: 1s 11d to 2s 2d per roll of 24oz. Scarborough: 10d to 1s 6d per lb. Whitchurch: 1s 2d to 1s 3d per lb.

EGGS.

Wednesday.—Colne: 2s 8d per score. Kirbymoorside: 10 to 11 for 1s. Masham: 10 for 1s. Northallerton: 9 for 1s. Stockton: 6 or 7 for 1s. Uttoxeter: 2s to 2s 3d per score.

Thursday.—Brigg: 11 or 12 for 1s. Devizes: 10 to 12 for 1s. Driffield: 10 for 1s. Kidderminster: 10 to 12 for 1s. Penistone: 8 for 1s. Ripon: 10 for 1s. Wetherby: 8 or 9 for 1s.

Friday.—Derby: 8 or 9 for 1s. Easingwold: 8 or 9 for 1s. Grimsby: Austrian, 7s 3d to 9s 2d; Styrian, 7s 8d to 10s 6d per 120. Helmsley: 10 or 11 for 1s. Leeds: Yorkshire, 17s to 18s per 120; Irish, 13s to 14s 6d; Danish, 10s 6d to 12s 6d; Austrian reds, 6s 6d to 7s; ditto blues, 6s 3d to 9s 3d. Leyburn: 10 or 11 for 1s. Lincoln: 10 for 1s. Otley: 8 or 9 for 1s. Scarborough: 7 for 1s. Whitchurch: 10 and 11 for 1s.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Moderate supplies of greenstuffs were in slow request. Potato trade quiet. Arrivals of fruit were on a good scale, meeting with a good demand. Greenstuffs—Cabbages, 3s to 3s 6d; savoys, 4s; beetroots, 2s. 6d. per tally; cauliflowers, 2s to 3s per dozen; Brussels sprouts, 9d to 1s 6d. per half-sieve; parsnips, 2s 9d per bag; carrots, 2s; turnips, 2s to 2s 6d; parsley, 1s 6d per dozen bunches; celery, 10s to 12s per dozen rolls; horseradish, 1s per bundle: English onions, 4s 6n to 5s per cwt; Valentia, 7s to 7s

per case; potatoes—maincrops, 95s to 100s; British Queens, 75s to 90s; Reading grades, 80s to 85s; Imperators, 80s per ton; German, 2s 9d; Belgian, 3s 3d to 3s 6d; French, 2s 6d; Dutch, 2s to 2s 9d per bag. Fruit: English grapes, 9d to 2s per lb.; Almeria 10s 6d to 29s per barrel; English apples, 2s 6d to 7s 6d per bushel; Nova Scotian, 16s to 20s per barrel; Californian 7s 6d to 10s 6d per box; Messina lemons, 8s to 16s per case; Jaffa oranges 7s 6d to 10s 6d per box; Denia, 14s to 15s; Valencia, 8s to 16s per case; pineapples, 1s 6d to 5s each; bananas, 5s to 10s 6d per bunch; Italian chestnuts, 12s to 15s; Redon, 7s 6d to 10s 6d per sack.

Borough, Saturday.—Supplies of potatoes were in excess of the limited demand, and values were weaker. Good arrivals of greenstuffs experienced a moderate sale. Potatoes: English, Reading Giants, 3s to 3s 6d; Professor Maerkers, 3s 3d to 3s 9d; British Queens, 3s 6d to 4s 6d; Up-to-dates, 3s 3d to 4s 6d; Imperators, 3s 6d to 4s 6d; Belgian and Dutch, Imperators, 2s 6d to 3s; Magnums, 2s 9d to 3s; French and German Magnums, 3s to 4s per cwt. Cabbages, 2s to 3s per tally; Brussels sprouts, 1s to 1s 6d per half-sieve; parsnips, 2s 6d to 3s per bag; parsley, 1s to 1s 6d per dozen bunches; celery, 6s to 12s per dozen bundles; English onions, 3s 6d to 4s 6d per cwt; Valencia, 6s to 6s 6d per case; English apples, 3s 6d to 6s per bushel; Nova Scotian, 12s to 16s per barrel; oranges, 10s to 16s per box; grapes, 8s to 12s per barrel; chestnuts, 6s to 9s per bag.

POTATOES.

Borough and Spitalfields, Saturday.—The arrivals at this market have been in excess of the limited demand, and prices have ruled in buyers' favour. English Reading grades, 3s to 3s 6d; Professor Maerkers, 3s 3d to 3s 9d; British Queens, 3s 6d to 4s 6d; Up-to-dates, 3s 3d to 4s 6d. Belgian and Dutch: Imperators, 2s 6d to 3s; Magnums, 2s 9d to 3s; French and German: Magnums, 3s to 4s per cwt.

HOPS.

Canterbury, Saturday.—The market has opened well, and several transactions are reported. Holders decline to accept less than the rates lately current, and believe that the whole of the stocks in hand will speedily find a market.

Worcester, Saturday.—One or two sales have been made since the holidays, but trade is not yet in full swing. Stocks are exceptionally low, and growers are holding back their hops in anticipation of higher prices in the new year. No hops passed the public scales this week.

HAY AND STRAW.

Whitechapel, Saturday.—A fair demand prevailed for the shorter supplies on offer. Best clover, 85s to 105s; inferior ditto, 80s to 87s 6d; specially picked hay, 92s 6d; good ditto, 80s to 87s 6d; inferior ditto, 50s to 60s; mixtures and sainfoin, 70s to 90s; and straw, 25s to 36s per load.

FOREIGN HAY AND STRAW.

London, Saturday.—Owing to the Christmas holidays there has been practically nothing doing this week, and prices remain about the same. We quote: Canadian timothy and clover mixture, 83s to 85s; Dutch 1st cut clover, 88s 6d to 90s; Dutch and French 2nd cut clover, 90s to 92s 6d; Good Dutch hay, 75s; inferior Dutch hay, 68s. All per ton delivered alongside.—FULLER AND PRENTIS, 9 and 10, Great Tower Street, E.C.

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cakes: The trade continues quiet and inactive, with occasional lower prices being accepted for arrived parcels, while quotations remained unchanged. Russians are in fair supply, and values remain steady. Americans offer on slightly easier terms for shipment, but landed parcels are firmly held. English, in consequence of the small production and the strong position of the seed market, crushers ask full prices. Cotton cakes: There is still a good demand, especially for Egyptian, which find a free sale, while English are unaltered. Decorticated: The recent arrivals of new seed cakes and meal move off quietly and are unchanged. Maize germ meal: American only offers sparingly on spot at £5 5s to £5 6s 3d, but for January arrival £5 3s 9d has been taken; English sells steadily at last week's prices. Rice meal: Parcels of Rangoon in warehouse are held at a slight reduction, and for this month's shipment £4 7s 6d ex ship would be accepted:—

Arrivals and Sailings of Grain.

The arrivals of grain and seed laden vessels at ports-of-call for the week were 1 wheat and 2 barley and wheat (all from San Francisco).

The sailings of grain and seed laden vessels from ports-of-call for the week were 3 wheat (1 Birkenhead, 1 Sharpness, 1 Tyne Dock).

Since January 1st, 1900, the total arrivals have been 327 wheat, 16 wheat and barley, 1 wheat and pease, 7 flour, 12 maize, 1 maize and oats, 27 barley, 19 beans, 10 locust beans, 2 pease, 1 linseed, 6 canaryseed, 2 fenugreek seed, 5 valonea; total, 436.

Last year during the same time the arrivals were 285 wheat, 10 flour, 6 maize, 11 barley, 1 barley and beans, 1 rye, barley, and oats, 12 beans, 5 locust beans, 7 linseed, 6 canaryseed, and 7 valonea; total, 351.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The old century bequeaths to the new an area of perhaps 1,750,000 acres under wheat. This is about the figure to which the last few years have accustomed us, but it is a great change from the five million acres with which the old century commenced. In 1839 Philip Pusey estimated that four million acres yielded twelve million quarters, but this did not include Scotland or Ireland, which before the Free Trade era produced a much larger quantity of wheat than they have done of the last fifty years. Of the wheat now growing little can yet be said. It is healthy in appearance and not very precocious, but the large amount of moisture in the soil is scarcely good for it, and the farmer is wanting a month of cold, drying winds. Such weather would also help the land for the barley in the early spring. There is some talk of the barley acreage being increased, but prices have been very unremunerative of late, and there is little likelihood of any very important rise. The pure beer cause has the enthusiastic support of farmers, but the latter know how politically weak they are in opposition to the congeries of vested interests controlling the House of Commons. Little faith, therefore, is put in an increased demand for barley from English brewers.

America surprised the trade on Friday by the publication of a lengthy crop report which had not been expected till January 11. Why American Government returns always used to appear on the 11th of the month nobody out of Washington probably could say, but the fact remains that the markets have long ceased to look for them on any other day. The report now before us gives the chief crops as follows :—

	Bushels.
Wheat	522,229,505
Maize	2,105,102 516
Oats	809,125,959
Barley	58,925,833
Rye	23,995,927
Buckwheat	9,566,966
Potatoes	210,926 807

The wheat crop may be considered an average, while the yields of oats and maize are large.

The Argentine crop of wheat is now being reaped. It is not reckoned anything like so good a yield per acre as last season, but the area is probably increasing every year, and the more settled state of the country reduces the waste of grain when grown. When access to the coast was barred by political troubles crops could not be marketed even when safely reaped, but Argentina appears to find that peace pays, and the extension of agriculture has been the immediate result of peace.

The British markets have been very quiet, but there is a rather better feeling from the days just before the holidays. There was a large attendance at Mark Lane on Friday ; from two to three p.m. both of the exchanges were thronged. Business was not brisk in any article, but the foundation, doubtless was often laid for future business. The basis of value with which the new century will start will be about 30s. for wheat, 21s. for maize, 18s. per 336lb. oats, 16s. per 320lb. oats, 14s. per 304lb. oats, and 30s. for ordinary beans and peas.

English wheat is now 5d. below the septennial or tithe average, oats 1s. 3d. above it, while barley is exactly level in value with the mean. Maize is cheap, but this is a condition which two big American crops in succession may be said to impose ; in fact,we expect the cereal to go 1s. to 2s. lower before the American surplus is reduced to manageable dimensions.

The Government Blue Book just issued shows that on the average wheat is 5s. 5d. per qr. higher in France than in England, and oats 2s. 7d. higher ; while barley is 2s. 11d. lower. These figures are somewhat remarkable, and in view of the increased beer drinking in France are unexpected. The price of wheat in Germany appears to range from 30s. to 34s., barley from 24s. to 28s., and oats from 17s. to 20s. per qr. The heavy protective duties levied by Germany do not keep up prices as we should have expected. The French home production is so considerable that protection is a minor point, but Germany is second only to Great Britain as an importing country, and a 10s. duty on wheat, leaving the price at 32s., might seem to argue that but for protection 22s. per qr. would be the German wheat average.

There are now on passage to the United Kingdom 1,930,000 qrs. of wheat against 1,325,000 qrs. a year ago, and 1,815,000 qrs. two years since. Present expectations are thus divided :—

Californian	1,140,000 qrs.
American	310 000 ,,
Argentine	200,000 ,,
Australasian	220,000 ,,
Russian	50,000 ,,
German	10,000 ,,
Total	1,930,000 ,,

Of maize the quantity on passage is 880,000 qrs. against 890,000 qrs. in 1899 and 755,000 qrs. in 1898. Present supply afloat is divided as follows :—

Flat maize	580,000 qrs.
Yellow ,,	140.000 ,,
Round ,,	160,000 ,,
Total	880,000 ,,

Of barley there are now 465,000 qrs. on passage against 545,000 qrs. a year ago. Present expectations are thus divided.

	Qrs.
Malting	390,000
Grinding	75,000
Total	465,000

Of beans there are now 9,000 qrs. on passage.

The arrivals of foreign grain at our ports have not been quite up to the average of wheat or flour, but this has been balanced by exceptionally heavy arrivals of maize. Actual quantities have been :—

Wheat	236,000 qrs.
Flour	144,000 sacks
Maize	346,000 qrs.
Barley	126,000 ,,
Oats	121,000 ,,

Sales of English wheat were estimated at 114,000 qrs., and stocks in granary on the 22nd being estimated at 2,906,000 qrs. of foreign wheat and flour, the reserves on 29th inst. may be put at 2,819,000 qrs.

The flour trade has been inert, and, with very few exceptions, prices of the leading marks and brands are in buyers' favour. A better demand, however, is confidently anticipated with the new year. The top price is maintained at a nominal 30s., but it is not supposed to differ by more than 5s. from Town Households, which are offered freely at 24s., with buyers at 23s. 9d. Stone and roller English make 20s. and 22s. respectively, or thereabouts, at most local markets. Good mixtures of English and foreign make 24s., and the fine American patents 25s. per sack.

The visible supply of wheat in the United States is cabled at the following figures :

	Qrs.
Dec. 29, 1900	7,685,000
1899	7,135,000
1898	3,820,000

The present supply being thus liberal has a weakening effect upon trade on both sides of the Atlantic.

The price of red winter wheat at New York thus compares :

	s.	d.	
Dec. 29, 1900	27	0	per qr.
1899	26	8	,, ,,
1898	26	9	,, ,,

This is a remarkably level record, and when we consider present liberal holdings is not unsatisfactory.

The trade on Thursday, Friday, and Saturday in spring corn did not reveal any price changes of special note, but it was possible to obtain 19s. for the best Russian oats, 23s. 6d. for Russian maize, and 27s. for French buckwheat. A fairly good sale of dari at 24s. to 25s. is reported, but muttor and other small sorts of Indian pulse are scarce and difficult to quote. Barley meal has a good steady sale at 6s. per cwt., while rice meal at £4 10s. per ton ex dock has also its purchasers. There are sales of rye flour at 18s. 9d per sack, and the winter is a good time for oatmeal. Special Midlothian makes £14 per ton.

THE BALTIC.

Two newly-arrived cargoes have changed hands, but the trade has been mostly in cargoes for January shipment. Sales of wheat include Californian arrived at 30s. 3d. ; Australian, new crop, February shipment, at 30s. 3d. ; New Zealand, old crop, January shipment, at 29s. 3d. ; No. 1 Northern, January shipment, at 30s. 9d., and February shipment at 30s. 10½d. per qr Maize sales were old American, on passage, at 20s. ; new, for January shipment, at 18s. 9d., and for February at 18s. 6d. ; Galatz, for May shipment, at 20s., and Roumanian at 18s. 9d. per qr. Barley sales included a half cargo of Californian, arrived, at 26s. 6d., and a cargo on passage at 26s. 7½d. Of feeding barley, Persian, on passage, made 16s. 9d. ; Azoff, 18s. 6d. ; Novorossisk, 18s. 6d., and Roumanian, 19s. 3d. per qr. Other sales included pure black 336lb. oats for January shipment from Sweden, at 18s., and white peas for April shipment, from Calcutta, at 28s. 6d. per qr.

With the New Year will readers kindly note that when we use the name of a month it means "shipment guaranteed on or before the last day of that month." Thus the single word "January" will imply "shipment on or before January 31." This short phraseology is the custom of the "Baltic," and by saving space will enable us to record more sales.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The last day of the year brings a slight fall in the temperature, but the weather is still open for the time of year. On the Exchange to-day excellent La Plata wheat was offered at 31s., with buyers at 30s. 6d. New Zealand made 29s. 6d. for the long-berried and 28s. 6d. for the short. German, at 29s., sold well. But as compared with these elements of briskness we have to report a very poor inquiry for English and ordinary spring American wheat at barely former quotations. Barley was unchanged for both descriptions. Malt was steady, with 42s. paid for some exceptionally fine English and 34s. for crystalised. Maize was not quite so weak as on Friday. Oats were a fair trade at currencies ; the demand was chiefly for 320lb. sorts. Beans, peas, and lentils were not the subject of a full winter demand, and prices favoured buyers. Tares made 56s. per quarter for good English, 35s. per quarter for good Konigsberg, and 50s. for the best Hamburg. Fenugreek realised £7 per ton whole and £10 ground. Good English canaryseed made up to 40s., the price of Turkish being about 33s. 6d. per quarter. Hempseed was offered at 35s., with buyers at 33s. per quarter.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

THE MARKET CLOSED A LITTLE BETTER THAN IT OPENED, BUT THE AMOUNT OF BUSINESS PUT THROUGH WAS BELOW THE AVERAGE BOTH FOR WHEAT AND FOR FEEDING STUFFS.

THE FLOUR TRADE.

MARK LANE, Dec. 31st.

There was a fillip given to the closing market of the month by Government purchases for South Africa. The sorts selected were good American; and, while the holders of English makes blamed the "unpatriotic" character of the choice, it cannot be denied that excellent value for the national money was obtained. Purchases, we hear, amounted to about 20,000 sacks. English sorts were 3d. lower from the markets of Friday, and sold very slowly. "Gilt Edge" makes, 18s. to 18s. 6d.; "Iron Duke," 19s. to 19s. 6d.; Oregon flour, 23s. to 23s. 9d. per sack; maize cones, at 18s. to 19s., have a good sale, and are far cheaper than rice cones, which are at least a guinea per sack, and generally more. The three great mills of the American North West, Pillsbury's, Washburns, and Morrison's are offering to ship their finest make of flour on receipt of order at 24s. 9d. per sack. Spot price is 25s. to 25s. 3d. per sack. Hungarian was 6d. per sack lower on the fortnight.

LONDON TERM MARKET.

This market is held twice a day, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made:—

WHEAT.—Calls.		Dec.	March.	June.

Dec. 29 11 a.m.	.....	— ..	6 7 ..	6 8
To-day, noon.	.....	— ..	6 8 ..	6 8

January delivery at 6s. 6d. was a small business. Maize made 4s. per cental for Feb. delivery of New American, which was a fair price, and helps to sustain trade at Mark Lane.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

The deposit required from members of the Term Market has been fixed at £50 *minimum* and 1s. per quarter margin on any purchases above 1,000 quarters.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: The market has opened after the holidays with a good inquiry for copper hops, and offers a shilling or two below current rates are being refused by holders, consequently prices are extremely firm. Stocks are very limited.

GRAIN AND FLOUR FACTORS' REPORTS.

The last day of the century and the trade on the Corn Exchange is dull and unprofitable, which is the characteristic of the whole trade, including milling offals. The reported short crop in the United States last June did a great deal of harm, putting prices up, and with most disappointing results. The compliments of the season to my readers, hoping for a bright New Year.—RICHARD JOGGETT, Mark Lane.

Small arrivals of wheat and dearer markets in America caused sellers to hold for an advance and prices are 6d. per qr. higher. Flour is held for 3d. to 6d. per sack advance. Maize, barley, and oats are all fully as dear as last week.—COVENTRY, Mark Lane.

There was a small attendance at to-day's market, and, as usual on the last day of the year, no disposition was shown to enter into fresh transactions. We have no change to note in the value of any article, and the general tone is firm. Supplies of English red clover continue scanty and of poor quality. Dry, frosty weather is much wanted to enable farmers to thresh their seeds. Birdseeds are quiet. Owing to the mildness of the weather, the sale for blue peas is slow.—JOHN PICARD AND CO., Mark Lane.

Following the advance advised from the American markets wheat has been much firmer to-day, and an advance of 3d. to 6d. per qr. can be generally obtained. Maize and barley steady at fully last week's prices. Oats are strong, old crop making 3d. advance, new unchanged.—W. P. WOOD AND CO., Mark Lane.

Flour.—A fair trade at 3d. to 6d. advance on the week.—T. S. MEDILL, Mark Lane.

Offals: Bran and pollard not much inquiry. Weather mild. Prices unchanged.—GREENHILL BROTHERS, Belfast, December 29.

The demand for all articles is quite of a holiday character. Supplies are liberal and prices in buyers' favour.—MCKINNON AND MCDONALD, Glasgow, December 29.

Wheat—Market firm with a fair business at full prices of last Friday. Flour is steadily held with only a small inquiry at last Friday's prices for foreign. The Liverpool Millers' Association make no change in the minimum price of bakers. Maize is quiet with a moderate business passing, old mixed making ½d. per cental lower, whilst new is making ¾d. under last Friday. European owing to larger arrivals tends in favour of buyers. Plate is also easy with a smaller trade. Barley quiet for brewing and feeding, but prices remain steady. Beans are firmly held, but the demand is quieter with only a small trade passing. Peas are slow with hardly anything doing. Canadians a shade lower. Oats—Both English and foreign are extremely dull, with prices the turn in buyers' favour. Oatmeal quiet at quotations. Oilcake steady with a holiday tone. Tuesday, the 1st of January next, being an Association holiday, the Liverpool market will be closed.—ROSS T. SMYTH, Liverpool, December 29.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

Wheat cargoes are firmly held for January and February shipment, but remoter dates are rather weak. Maize is 6d. lower on the fortnight for February shipment, but for cargoes actually on passage is even firmer than before Christmas. Barley is dull, but oats are a better trade. Oilseeds, on the whole, are decidedly firm.

BUSINESS DONE.

WHEAT.—Californian, 30s, January shipment; Walla Walla, 29s, off coast; Australian, 30s, Feb. shipment: No. 2 Hard Winter, 28s 3d, Feb. shipment: best Duluth, 32s 6d, on passage; Argentine, 28s, March shipment; fine Azima, 30s 6d, on passage; good Ghirka, 29s 3d, on passage.

MAIZE.—American, 19s 9d, on passage; American, 18s 6d, Feb. shipment; Argentine, 20s 9d, on passage; Roumanian, 19s, May shipment.

BARLEY.—Crimean, 18s 9d, on passage; Persian, 17s, on passage.

OATS.—American mixed, 14s 3d, on passage; Petersburg, 13s 9d, arrived.

LINSEED.—Calcutta, 57s 6d, arrived; Libau, 54s 6d, on passage; Argentine, 48s, February shipment.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, Seed Merchants, of Great Maze Pond, Borough, London, S.E., write that business in grass and cloverseeds, as is usual at the turn of the year, is just confined to narrow limits. Meantime, stocks generally are moderate, and a good spring business is anticipated by holders. The prices still asked for Koenigsberg tares are regarded as prohibitory. Supplies of English winter vetches are small. As regards canary and hempseed, the tendency of values is distinctly upwards; whilst blue peas, haricot beans, and Spanish lentils command former terms. Other articles, in view of the holiday spirit prevailing, show no quotable alteration.

CATTLE.

Metropolitan Market, Islington.

Monday, Dec. 31st, 1900.

	British	Total.	Jan. 1st, 1900.
Beasts	1,100	1,100	1,230
Sheep and lambs	6,570	6,570	5,770
Calves	—	—	9
Pigs	50	50	10
Milch cows	30	30	40

Quotations per 8lbs (sinking the offal).

ENGLISH.	Inferior.	Second.	First.
	s. d.	s. d.	s. d.
Beasts	2 8 —	4 2 —	4 10
Sheep	3 4 —	5 2 —	6 0
Pigs	2 10 ..	3 10 ..	4 6

Milch cows, per head, £16 to £22 10s.

British arrivals include as follows:—Scotland, 21; Eastern Counties, 305; Midland, Home and Western Counties, 644; Devon, 60; Ireland, 22.

In the beast market to-day there was a moderate supply of both prime and second quality. Owing to the weather being so unfavourable, trade ruled slow, though for prime quality rates were firmer, there was more demand for butchering cows and bulls by country buyers; prices in consequence were steady, and a clearance expected.

The following are the top quotations per 8lb. (sinking the offal):—

	To-day.	Jan. 1st, 1900.
Scotch	4s 9d to 5s 10d	4s 10d to 5s 0d
Devons	4s 8d to 4s 9d	..
Norfolks	—	4s 8d to 4s 10d
Runts	—	4s 4d to 4s 6d
Lincolns	4s 2d to 4s 6d	4s 2d to 4s 4d
Irish	4s 2d to 4s 4d	4s 4d to 4s 6d
Fat cows	3s 8d to 3s 10d	3s 10d to 4s 0d

The supply in the sheep market was a fair average, and included 2,920 from Eastern Counties and 230 Scotch. Ewes were short in number, and sold readily at 2d per 8lb more money; for wethers trade was slow, but rates were firm. The heavy rain interfered greatly with business, though a clearance will be made.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned:—

	To-day.	Jan. 1st, 1900.
7½ to 8 stone Downs	5s 10d to 6s 0d	5s 8d to 5s 10d
9-stone ditto	5s 8d to 5s 10d	5s 4d to 5s 6d
10-stone half-breds	5s 4d to 5s 6d	5s 2d to 5s 4d
12-stone Lincolns	5s 0d to 5s 2d	4s 10d to 5s 0d
10-stone Irish	—	4s 10d to 5s 0d
10-stone Down ewes	4s 6d to 4s 8d	4s 0d to 4s 2d
11-stone halfbred ditto	4s 0d to 4s 2d	— to —

The pig trade was extremely dull; best breeds were quoted at 4s 6d per 8lb.

London Central, Monday.—Good supplies, trade slow. Beef: Carcases, 3s 8d to 3s 10d; hindquarters, 4s to 4s 4d; roastings, 5s 2d to 5s 6d. Sheep: ewes, 2s 10d to 3s 2d; wethers, 4s to 4s 2d; hindquarters, ewes, 4s 4d to 4s 8d; wethers, 5s 4d to 5s 8d. Pigs, large, 3s 8d to 4s; small, 4s 2d to 4s 6d.

St. Ives (Hunts), Monday.—Beasts, 164; sheep, 387; pigs, 211. Beef, 7s 6d to 8s; mutton, 7s 7d to 8s 11d; pork, 6s to 7s 3d; sows, 4s 3d to 6s. Fat beasts good demand. Stores slow. Fat and store sheep fair. Fat and store pigs better. Milch cows, prices £13 to £20.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 334. To-day's supply, compared with Monday last, showed an increase of 1,632 head, and consisted entirely of shipments from the United States. The above number does not include all arrivals, 449 more being held back. Trade was of a firm and steady nature at a slight advance in value; the best on offer to dress about 720lb made 4s 5d, and occasionally 4s 6d per 8lb, offal given in. Heavy beasts about 880lb were quoted at from 4s 2d to 4s 3d. No sheep on the market. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 1,369, 4s 8d per 8lb, to dress from 720lb to 760lb; sheep, 3,823, 3s 10d to 4s per 8lb to dress from 68lb to 72lb.

Liverpool, Monday.—Larger supply of cattle in market. Trade brisk for all classes at prices in favour of sellers, a good clearance being effected. Sheep also larger in numbers; prices better for all descriptions, quotations being: Beef 4½d to 5½d per lb; mutton, 8d to 5½d per lb. At market: 1,227 cattle, and 2,644 sheep.

PROVISIONS.

London, Monday.—The arrivals from Ireland for the past fortnight were 5,381 bales bacon, and from foreign ports 12,875 bales bacon. The bacon market opened well on Thursday after the holidays, and this, coupled with the very small killings of last week, gave it quite a buoyant tone, and prices were firm at about 2s. better than previous week. Irish, 56s, 62s, to 66s; Danish, 54s, 62s, to 65s; Canadian, 52s., 58s. The demand for butter was steady, but principally for the finest grades. Danish, strong, 124s, 126s, up to 128s. Colonial, 104s, 108s, up to 110s. Lard unchanged.—J. AND W. J. COURTENAY.

FEEDING STUFFS.

London, Monday.—Linseed Cake: Trade very dull, prices nominally unchanged. Cotton cake keeps steady and in good demand. Decorticated cotton cake unchanged. Meal very scarce on spot. Linseed as before.

English linseed cake	£8 10 0 to £8 12 6	ex mill
Indian Calcutta linseed cake	.. —	ex quay
American Western linseed cake	7 12 6 to 7 15 0	ex quay
Russian oil cake	7 12 6 to 7 17 6	ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 per cent. oil)	6 12 6 —	ex warehouse
Prime compo. cake, Samuelson's S.P.F. (10 to 12 per cent. oil)	6 12 6 —	ex warehouse
Decorticated cotton cake	6 15 0 to 7 0 0	ex quay
Decorticated cotton meal	6 17 6 —	ex quay
London made cotton cake (best)	5 0 0 —	ex mill
Egyptian cotton cake (in bags)	4 15 0 to 4 17 6	ex quay
Burton desiccated ale grains (bags included)	4 12 6 —	on rail, Burton
Rangoon Rice Meal	4 15 0 to 4 12 6	ex warehouse
Russian linseed in bulk, per 416lbs	2 14 0 to 2 17 6	ex warehouse
Calcutta linseed in bags, per 410 lbs	2 18 6	ex warehouse

—ROBT. AND JOHN HEWETSON

Messrs. W. H. and H. Le May, seed factors, of 67, Borough High Street, London, S.E., announce that they have made arrangements with Mr. A. V. Linder Cross, formerly with Messrs. J. Pound & Co., to join the staff of their seed department.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

With regard to the trade for beasts at the Islington Market, there is practically nothing to note. Monday being a *dies non* owing to Tuesday being Christmas Day. On Thursday a few fresh arrivals were noted; these, however, were not placed on the market, being held back in the lairs. Quotations are in consequence not worth noting. At the Foreign Cattle Market, Deptford, there was an increase of 1832 in the number shown compared with the previous week here. Markets were held only on Monday and Saturday, trade on both days was of a firm and steady nature at about the previous week's quotations, the best on offer making 4s. 4d. per 8lbs., sinking the offal, plain descriptions making from 3s. 11d. to 4s. The total number offered for sale on both markets was 3,880, consisting of 260 British, these mostly comprising butchering cows and bulls, and 1,966 from the United States. The few sales of sheep made were confined to the Islington Market, none being on offer at Deptford, and these only took place on Thursday, when there was a short supply of only 620 head. Trade for both wethers and ewes was rather firmer, especially for the latter, these making 2d. per 8lbs. more money. The following were the top quotations paid per 8.lbs. (sinking the offal):—7½ to 8 stone Downs, 6s.; 9-stone Downs, 5s. 10d.; 10-stone ditto, 5s. 6d. to 5s. 8d.; 10-stone halfbreds, 5s. 4d. to 5s. 6d.; 12-stone Lincolns, 5s. to 5s. 2d.; 10-stone Down ewes, 4s. 4d. to 4s. 6d.; 11-stone halfbreds, 3s. 10d. to 4s. No calves or pigs were on the market.

Trade in the West.

The Christmas holidays have so completely disorganised everything that we have very little, if anything, to chronicle relating to business, which has been quite of a nominal character—that in respect to fat stock, because very little has been offered, and still less wanted, whilst operations in store stock have been confined almost exclusively to milch beasts and barreners. The restricted demand for both beef and mutton led to a very weak trade at prices decidedly favouring buyers, and the same may be written of almost all other classes of fat stock.

Trade in Ireland.

With a decrease of 329 head of cattle and 2,207 sheep, and a large attendance of buyers, last Thursday's market in Dublin was a very brisk one. Best quality of heifers and bullock were up fully 20s. per head, and other sorts from 10s. to 15s. Choice beef was worth from 54s. to 56s., and some extra good stall-feds made up to 60s. per cwt.; medium quality, 47s. 6d. to 52s. 6d.; and inferior, 44s. to 46s. per cwt. The mutton department also shared in the improvement, and there was an advance of from 1s. to 2s. per head. Prime wether mutton made from 6d. to 6½d.; ewe, 5½d. to 6d.; and coarse and inferior, 4d. to 5d. per lb. Best veal still scarce and worth up to 8d. per lb., but coarse calves sold as low as 4½d. per lb. Milch cows in very limited supply, and anything choice changed hands very quickly at good prices. In the pig market there was only a moderate show of swine. An early clearance was effected at well-sustained prices.

Trade in Scotland.

John Swan and Sons, Ltd., give the following as their report on above for the current week:—The supplies of fat cattle all over this week have been small, but the general quality fairly good. An active trade has been experienced, and prices on an average 10s. a head higher than the previous week. Sheep have also been shown in small numbers, and they have met a good inquiry at slightly higher prices. Fat pigs and calves shown in moderate numbers, and selling excessively dear. First fat lambs of the season have made up to 50s. A small supply of store cattle, anything of a good class and in fair condition gets well sold; inferior neglected. For store sheep of a good class there is plenty of inquiry, and full rates are obtained, with a clearance in this department. Milch cows a fair show, but trade was quieter, and prices under those of last week. Quotations:—Best beef, 7s. 9d. to 8s. 6d. per stone; mutton from 7½d. to quite 8½d. per lb.

LONDON.

London Central, Thursday.—Fairly good supplies on offer, but very slow sale. Arrivals of beef included 60 tons Scotch, 1,040 Liverpool sides, 2,100 hindquarters, and 700 forequarters American refrigerated. Quotations:—Beef, Scotch, short sides, 4s 4d to 4s 8d, long 4s to 4s 4d; English, 4s to 4s 2d; American, Deptford killed, 3s 10d to 4s; Liverpool, 3s 9d to 3s 11d; American refrigerated hindquarters, 3s 4d to 3s 8d; forequarters, 2s 2d to 2s 6d. Mutton: Scotch, 4s 4d to 4s 8d; English wethers, 4s to 4s 4d; ewes, 3s to 3s 4d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s 4d to 4s 8d; and Dutch, 4s to 4s 4d per 8lb.

London Central, Friday.—Supplies good, and with steady demand a fair business was effected. Arrivals of beef included 80 tons Scotch, 280 Liverpool sides, 2,500 hindquarters, and 1,000 forequarters American refrigerated. Quotations:—Beef: Scotch short sides, 4s 2d to 4s 6d; long, 3s 10d to 4s 2d; English, 4s to 4s 2d; American, Deptford-killed, 3s 10d to 4s; Liverpool, 3s 9d to 3s 11d; American refrigerated hindquarters, 3s 6d to 3s 10d; forequarters, 2s 4d to 2s 8d. Mutton: Scotch, 4s 6d to 4s 10d; English wethers, 4s 4d to 4s 6d; ewes, 3s 4d to 3s 8d; Canterbury, 3s 2d to 3s 4d; Wellington, 3s to 3s 2d; Sydney and River Plate, 2s 7d to 2s 9d. Veal: English and Dutch, 4s 8d to 5s 4d. Pork: English, 4s 8d to 5s; Dutch, 4s 4d to 4s 8d; and Irish, 4s 2d to 4s 4d per 8lb.

Islington, Thursday.—Only a restricted supply of beasts met quiet demand, at about previous values. A small supply of sheep penned; very fair demand, a clearance being effected at firm rates. 7½ to 8-stone Down wethers, 5s 10d to 6s; 9-stone ditto, 5s 6d to 5s 8d; 10-stone Down ewes 4s 2d to 4s 4d; 11-stone half-breds, 3s 8d to 3s 10d per 8lb, to sink the offal. No calves or pigs were on offer. Total supplies: 20 beasts, 510 sheep.

COUNTRY.

Brigg, Thursday.—With a limited show of horned stock, and poor attendance, very little business was transacted. Milch beasts and in-calvers, £12 to £17; drapes, £8 to £11; two-year-old steers and heifers, £9 to £12; calves, 25s to 35s per head. Small supply of sheep, and business inactive at about late rates.

Bristol, Thursday.—Only a few fat cattle, and they found buyers. Best descriptions, 60s per cwt; others, 56s. A small number of sheep; trade quiet; choice wethers, 7¼d per lb, ewes, 6d; very few wanted. At the holiday market no store cattle offering, and for the few pigs on hand the quotations were for bacon pigs 9s per score, porkers 10s 3d to 10s 6d.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs ..	2½ in. and under.. ..	9s 6d
Under 10 sc 10 lbs	Not exceeding 2½ in. ..	9s 0d
Under 11 sc 10 lbs	Not exceeding 2¾ in. ..	8s 6d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Canterbury, Saturday.—Trade was practically at a standstill, owing to the holidays. There is no alteration in values.

Carlisle, Saturday.—Supply of Irish store stock smaller than usual, consisting principally of heifers for wintering and stall-feeding, with a small group of bullocks. Attendance of buyers moderate, but fair trade done at £8 10s to £10 10s for wintering heifers, £14 10s for stall-feeding specimens, and £10 10s for bullocks No pigs offered.

Chester, Thursday.—Market of a holiday character. Milch cows, £14 to £20; calvers, £12 to £18; barrens, £10 to £12; heifers, £10 to £14; bullocks, £12 to £15; and stirks, £6 to £8.

Chichester, Thursday.—In consequence of the usual market day falling on Bank Holiday, the market was put off until to-day, but there was a very scanty supply of stock and a thin attendance of farmers and dealers. Under the circumstances the market was simply a holiday affair, although there was sufficient business doing to clear off the little stock brought in.

Dorchester, Saturday.—Comparatively small deliveries of stock. The limited supply was fully equal to the demand, and showed but little animation, prices being with difficulty maintained. Store beasts met a fair sale; milch beasts were in better demand; barreners difficult to sell. Mutton unchanged.

Dublin, Thursday.—Small supplies in all departments, and there being a good attendance of buyers, keen competition was experienced, and an early clearance effected. Even the rougher descriptions of cattle and sheep shared in the general advance in prices. Cattle (best), 32s to 34s per cwt. Inferior descriptions, 27s to 30s per cwt. Mutton, 5¾d to 7d per lb.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Good demand at rather more money, beef realising up to 36s 9d per live cwt, horned bullocks to £19 15s, horned heifers to £14 17s 6d, polled bullocks to £14 12s 6d, polled heifers to £14 5s, ewes to 39s, Cheviots to 33s, black-faced ewes to 27s each.

Gisburn, Wednesday.—Very few beasts were offered, and with a few sales of English calvers, which went at recent rates, trade was extremely stagnant, similar conditions prevailing regarding sheep and lambs, prices for which experienced no material change.

Glasgow, Wednesday.—Demand fair, supplies of sheep less than last week. Cattle a moderate show. Top Scotch cattle made 62s per cwt. Top Irish 60s. Top mutton 8½d to 9d per lb, secondary, 7½d to 8d. Dead meat firm, best Scotch 6¼d to 6¾d, states 6d, Canadian 5¾d, cows 5d to 5¼d, wedders 7½d to 8d, ewes 6d to 6¾d.

Leicester, Saturday.—Small supplies of stock in fair condition. Trade steady, milch cows being in fair demand at £18 to £22 per head. Calves a dull trade, at easier prices.

Lincoln, Friday.—Holiday class of market. The few cows offered fetched usual prices, though there was but little demand. Only one lot of sheep, the lambs selling at 35s, and the ewes up to 30s. Moderate show of pigs, but little business; young pigs realised from 10s to 20s, and for others no sale could be effected.

Norwich, Saturday.—The supply of store beasts here today was taken off at about former terms. Business was generally quiet. Fat beasts were dull, at 8s to 8s 6d per 14lb. Store sheep were in moderate supply. Business was quiet at barely former terms. Keeping hoggets were quoted at 34s to 42s per head. Fat sheep made 8s to 8s 6d and 8s 9d per 14lb.

Stockton, Wednesday.—There were 79 cattle and 148 sheep on offer. Best cattle made 7s 6d to 8s per stone, and rougher kinds 6s 6d to 7s per stone. Sheep made 8s per stone, whilst ewes and tups sold at last week's prices.

Taunton, Saturday.—Very short supply. Small attendance. Quiet trade.

Uttoxeter.—Falling so close on Christmas Day there was not a particularly large supply of horned stock in the Smithfield, and not a deal of business was done. Good calving cows sold from £14 to £17, calving stirks £8 to £9, barren stirks £7 to £8, yearlings £4 10s to £5; beef 5d to 6½d per lb, mutton 6d (ewes) to 8½d (wethers); fat calves sold up to 7d per lb, young calves 15s to 18s apiece, pigs 8s 6d to 9s per 20lb.

Wakefield, Wednesday.—The market, which was held in summer-like weather, was of a holiday character, and very little business was done. There were about 200 beasts and the same number of sheep on offer, but intending purchasers seemed in no particular hurry to buy. There was little, if any variation in the prices, and mutton fetched 5½d to 8¼d per lb, whilst beef made 5d to 6½d per lb.

York, Friday.—Calves, 7½d per lb; small sheep, 8d ditto; large sheep, 7½d ditto; ewes, 5d to 6d ditto; small pork pigs, 7s per stone; large pork pigs, 6s 6d ditto; bacon pigs, 5s 6d to 6s ditto.

WOOL.

Bradford, Thursday.—Market is quiet and without change, but the better feeling is maintained, and it is thought that the opening of the New Year will show great readiness to do business on the present basis. Merinos are stationary; but cross-breds and English are the turn against the buyer. Yarns and pieces quiet, but improving.

Canterbury, Saturday.—Rent fleeces are still in demand at prices ranging from 6¾d to 7d per lb. Lamb wool, 4d to 5d per lb; half-breds, 7d to 7½d; Downs, 8d to 10d per lb.

Leicester, Saturday.—Turnover in wool small, but tone improved. Buyers of merinos purchase at an advance, but refuse full concession demanded by holders. A better demand for choice crossbreds, but transactions are at late rates. Trade in medium and strong crossbreds is better, but in pure white lustre long-wools there is little doing. Orders for yarns are encouraging.

MANURES.

Liverpool, Friday.—The produce markets are inanimate and will remain so until the opening of the new year: meantime quotations must be considered purely nominal ones in the absence of business, although the tendency of feeding stuffs seems to point in buyers' favour. Nitrate of soda, best quality, i.e., guaranteed 95 per cent. pure, in bags, £8 7s 6d to £8 10s per ton; East India bone meal, in bags, £4 5s to £4 7s 6d per ton; Kainit, prime, 23 per cent., in bags, £2 7s 6d to £2 10s per ton; palm nut cake, prime, in bags, £5 5s to £5 7s 6d per ton; linseed cake, American thin oblong, prime, in bags, £7 10s to £7 12s 6d per ton; linseed cake, English, prime, in bulk, £8 15s to £9 per ton; linseed cake, foreign, round, prime, soft and oily, in bags, £8 10s to £8 13s 9d per ton; cottonseed cake, N.A., decorticated, as in quality, in bags, £9 12s 6d to £7 1s 3d per ton; cottonseed cake, English, decoticated, prime, soft, in bags, £7 5s to £7 7s 6d per ton; cottonseed cake, English, undecorticated, prime, in bulk, £4 15s to £5 per ton; cottonseed, crushed, 20 to 25 per cent. oil, prime, in bags, £7 5s per ton; maize, germ meal, English, prime, in bags, £5 7s 6d to £5 10s per ton; rice meal, Rangoon, as imported, in bags, nominal; Indian meal, coarse to fine grinding, prime, in bulk, 11s to 11s 6d per 240lb; linseed, fine bold feeding, in bags, £3 3s to £3 5s per qr 416lb; N.A. cloverseed, new red, fair to good, in bags, nominal; D.N.S. brand, superphosphate of lime, guaranteeed 25 to 27 sol, in bags, nominal; D.N.S. brand, superphosphate of lime, guaranteed 30 to 31 sol. in bags, nominal; D.N.S. brand superphosphate of lime, guaranteed 35 to 36 per cent., in bags, nominal; basic slag, prime quality, guaranteed 30 to 35 per cent. phosphate, in bags, £1 11s to £1 12s 6d, at the producing depots; basic slag, prime quality, 35 to 40 per cent. phosphate, in bags, £1 13s 6d to £1 14s 6d, at the producing depots; basic slag, finest quality, guaranteed 38 to 45 per cent. phosphate, in bags, £1 16s to £1 17s 6d, at the producing depots.—H. JONES LANGAR AND CO.

Winsford (Cheshire), Saturday.—Current prices for salt at the works: Common white salt, 11s per ton; fine screened rock salt, 8s 6d per ton (for truck loads in bulk).—THE SALT UNION, LIMITED.

SOCIETIES.

Lincolnshire Chamber.

A special meeting of the Lincolnshire Chamber of Agriculture was held at Lincoln on the 30th ult., Lord Heneage presiding, when the working of the Agricultural Rates Act of 1896 and the question of its renewal was considered.

The Secretary (Mr. S. Upton) read resolutions in favour of the renewal of the Act which had been passed by the branch Chambers.

Lord Heneage said he did not suppose anyone acquainted with practical politics expected that the Act would be renewed in its present form, unless it might be for another year while other legislation was going on. The Bill passed through the House of Commons because it was thought it was an equitable Bill, but at the same time it was not altogether satisfactory, and there were other questions connected with agriculture which also wanted looking into. There was also another question which was very likely to arise, and one which was not dealt with when this Act was passed. There was a great deal of discussion at the time with regard to the form the Bill took. The Act was based on the rates; but the worse a man's land was, and the more difficult it was to get a living out of it, the less he was rated; therefore the less relief he got under the Act. On the other hand, the grass land in some counties which required no labour, and was therefore rated on a much higher value, got greater relief, though the farmer did not require it so much. It was also pointed out that, as the Bill was drafted, what they called in towns accommodation lands were included, and it might be that in some cases, where the landlord let his accommodation land to the highest bidder, that the result would be that the relief would practically go into the landlord's pocket and not into that of the tenant. When the Bill went before the House of Lords this last point was very strongly commented upon, and he might say, without any breach of confidence, that a late lord and himself, with the full knowledge of their respective leaders, drafted an amendment to the Bill which would have eliminated all the town holdings from the operation of the Bill, and which would rather have benefited the farm lands by giving them a little more. That, however, was ruled out by the Lord Chancellor because, he said, it was a taxation Bill, and therefore the House of Lords could not interfere with it in committee. They held it was a rating Bill, but the Lord Chancellor's argument was that the amount which would have to be met would come out of Imperial taxation, and in that sense it was a taxation Bill. He mentioned these facts just to let them know that there were many things to consider, and that they should be careful to point out exactly what it was they did want hen the Bill came to be considered again.

Alderman Frankish said the point about grass land was one which they ought particularly to bear in mind.

Lord Heneage said his opinion was that the poorest land did not get as much benefit as it ought to get, whereas there was a good deal of the more valuable land which got relief it did not want. To put it broadly, what relief was necessary for any accommodation land in towns? It was not there a question of rent for the land, but a man considered himself lucky to be able to get it at all.

Mr. Mountain: But is not the rental a fair basis to take of the value generally?

Lord Heneage: Yes; but those who are paying

the highest rental and farming the most valuable land are getting the most relief. My point at the time was that grass lands paying over £2 an acre or something like that should not be included, but that lands paying under 10s. an acre should have the whole of their rates remitted. But all I say is that you must be prepared for some alterations in the Act, and that you must make up your minds what really is the most equitable arrangement for all purposes.

Mr. Mountain: Pressure should be put upon the Government to renew the Act pending further legislation.

Mr. Mawer said agriculturists generally regarded the Act as partially meeting their requirements, and it was accepted on that principle. They should now press strongly for something more than this Act gave.

After further discussion the following resolution was adopted:—"That this Chamber considers the Agricultural Rates Act has been an equitable instalment of relief from the undue proportion of local taxation which real property has so long borne, and strongly urges its renewal pending the issue of the report of the Royal Commission on Local Taxation."

Tuberculosis and the working of the model milk clauses in the private Bills of local authorities was the next subject considered. The Secretary said he understood that no boroughs in Lincolnshire had adopted the clauses.

Mr. Evens said that did not say that Lincolnshire was not affected. So far as he understood the clauses, they meant that inspectors from the large towns could, if they thought necessary, over-ride the regulations of the county authorities. He strongly objected to this, and thought that any grievance should be stated to the local authority for the district from which he milk was supplied.

The Chairman: You say the original inquiry should take place by the local authority.

A resolution was passed expressing this view, and agreeing with the recommendations of the Central Chamber on the question of the model milk clauses.

The Chamber adopted a resolution of the Brigg branch that all pig dealers should be registered and their premises and vehicles inspected and disinfected under the officers of the County Council.

The statement of legislation required in the agricultural interest, which had been submitted by the Central Chamber, was considered, and the Chamber placed local taxation as the first requirement, pure beer as the second, and regulations as to the fraudulent sale of foreign meat as the third.

Sussex.

The annual meeting of the Sussex County Agricultural Society was held at Lewes on the 29th ult., Mr. W. F. Ingram presiding. The chairman, in moving the adoption of the report, said he was sorry to say that the accounts did not come out on the right side, the subscriptions from members being less by about £50 than in 1898. He took 1898 as a comparison, as in 1899 a special effort was made owing to the visit of the Prince of Wales, and therefore they could hardly take that year to compare with this year. The falling off in subscriptions was owing, he thought, to the fact that it had been a very trying year for everyone, and there had been so many calls upon their pockets. Proceeding, he said the subscription fund raised in Brighton was £40 more than in 1898, the entrance fees £15 less, gate money £23 more, and the receipts from the grand stand were within 4s. 6d. of the amount in 1898. The grand stand, he thought, did not pay well, and the cost of constructing it was much greater. As to the expenses, they had given £55 more in prizes, and the shedding cost about £10 more, while the printing and advertising cost about £71 more. The expenditure, under the latter head, he thought, ought to be looked into to see if they could not be reduced, and the committee asked the printing and advertising sub-committees to consider such reduction. The expense of judging amounted to £44 as compared with £85 in 1898. The band cost £27 more than in 1898, and it was questionable whether it was worth while to pay for a good band, for he did not think people attended the show to hear it. (Hear, hear.) Practically there was a loss of £88 on the last show.

Messrs. H. M. Simmons and Frowd thought the provision of a band a waste of money, the former thinking £20 for the two days quite enough.

The chairman continuing, said it was a question for the committee to consider whether it was worth while having the working dairy under the present system, as, notwithstanding the £12 in prizes given by the County Council and other privileges, the dairy cost the Society about £40 a year, and in economising that was a thing to be considered.

Mr. Simmons said he did not see any record of payment for the refreshment stand. The chairman said in previous years they had received a premium, but there had always been complaints, and this year refreshments had been supplied without paying a premium, with general satisfaction.

Mr. Simmons thought it should be put out to tender. He referred also to the cost of shedding, which he thought they should erect themselves. Captain Fraser said hardly any shows had been successful this year. Mr. Lindsay Hogg agreed, but pointed out that there was a good gate.

Mr. Fletcher having seconded the adoption of the accounts, the resolution was carried.

Mr. Lindsay Hogg said there was no doubt the accounts were unsatisfactory, and that the Society could not go on at a loss, and he proposed that a small committee be formed to go into the accounts and make suggestions to the Council as to the future. Captain Fraser seconded, and the resolution was carried.

The chairman and Messrs. H. M. Simmons, P. Chasemore, W. H. B. Fletcher, and J. Woodhams were selected to serve on the committee.

The chairman remarked that there was no more liberal Society than theirs. Mr. Lindsay Hogg questioned whether it was wise to practise liberality when they could not afford it. The chairman referred at length to an interview and correspondence with the Mayor of Arundel as to holding next year's show at that town, and a letter was read from the Town Clerk of Arundel that the Corporation were unable to guarantee the amount required by the Society.

Captain Fraser said the railway accommodation at Arundel was inadequate for the show and the ground would be a long distance from the station. Mr. Chasemore suggested holding the show permanently at Brighton, and Mr. Simmons advocated Eastbourne.

Mr. Lindsay Hogg said they had to consider whether the show should be a roving one or should have a permanent home, and suggested calling a meeting to consider the question. It was ultimately decided that the chairman approach the Mayors of Brighton, Hove, Hastings, and Eastbourne with regard to the venue for next year's show. Mr. Lindsay Hogg remarked that Eastbourne had a Mayor who had shown what he could do for the town. They made the show a success at Eastbourne before, and if they had it there next year he was sure the town would come out handsomely with regard to the guarantee fund.

Mr. Chasemore gave notice that at the annual show he would move that the show be held permanently at Brighton.

The Council were re-elected en bloc with power to add to their number. Mr. F. B. Dyer was unanimously re-elected secretary, Mr. Chasemore, Captain Fraser, and the chairman eulogising Mr. Dyer's work. Mr. R. H. Powell was re-elected treasurer, and Messrs. H. M. Simmons and S. S. Titt were unanimously appointed as auditors, an amendment by Mr. Wadman to reappoint a paid auditor being negatived.

Gloucestershire Chamber.

A meeting of the Gloucester Chamber of Agriculture was held at Gloucester on the 1st inst., the president (Mr. J. H. Jones) in the chair. A communication was received from the Worcestershire Chamber, stating that agricultural implement makers and agents in Worcestershire, Gloucestershire, and Herefordshire had joined themselves into an association for the purpose of abolishing or reducing the discounts hitherto given to purchasers of implements and machinery. The Worcestershire Chamber had passed a resolution to the effect that the aim of the association to limit discount ought to be opposed by all legitimate means, and they wrote the Gloucester Chamber to know what action, if any, the members of that body intended to take.

Mr. R. A. Lister defended the Association of Implement Makers and Agents, and said that since the disastrous season of 1879 the retail agricultural implement trade had been going down, and the formation of an association for combined action had become an absolute necessity.

The Chamber decided to obtain further information from Worcester before expressing an opinion on the subject.

A resolution was passed urging upon Parliament the desirability of renewing the Agricultural Rates Act, and it was agreed to invite the agricultural valuers of the county to express their views on the Agricultural Holdings Act, 1900.

Traction Engine Owners and Users.

At the annual meeting of the National Traction Engine Owners and Users' Association, held on the 13th inst. at the Royal Agricultural Hall, Mr. John Allen, who presided, remarked that there were many signs that the prejudices against traction engines were being gradually lived down. They hoped that, after the public had had a few years' more experience of these horseless vehicles, further liberty would be allowed them. About £100,000,000 was spent annually on road conveyance throughout the country, and if all this were done by steam haulage on common roads, a saving of £60,000,000 would be effected.

Lieut.-Colonel Crompton, late South African Field Force, referred to the advantages of traction engines in time of war. He remarked that Colonel Templer, who had charge of the steam sappers in South Africa, was the first who introduced traction engines to the War Office, and had always advocated their use. He had had no opportunity, however, of showing what they could do until the present campaign, but directly war was declared he obtained permission to organise a traction engine brigade. An immense amount had been saved to the nation by their use during the South African War. Colonel Templer received a great blow by the wreck of the "Denton Grange" at Las Palmas, in which 13 engines were lost, but more were sent out as soon as they could be built, and that officer had now a large number of engines in the country. Traction engines would have to play [illegible] a very important part in the defence of the country. The Government found it impossible to get their big guns into the fortresses round the coast except by the aid of traction engines. At the present time the Government were getting very considerable benefit from the use of these engines in the construction of the new lines for troops on Salisbury Plain, for there were about 20 engines working between Ludgershall and the [illegible] camps. His report to the Government on the work of the engines during the war was generally of a satisfactory character.

Mr. A. Griffith-Boscawen, M.P., and Mr. J. Allen were respectively elected president and chairman of the council.

(Other Societies will be found on page [illegible].)

THE GARDEN.

The shortest day is now past, and the New Year close at hand. In the course of another two or three weeks a slight increase in the amount of daylight—and, it is to be hoped, of sunlight too—will be noticeable, and this will quickly be followed by renewed activity in vegetation—at first in the case of plants under glass, and later on of those in the open air.

Any arrears of works that properly belongs to the autumn, such as the trenching and manuring of vacant ground, pruning fruit trees and bushes in the open air, and so forth, had better be made good as quickly as possible, before the usual rush of the spring work begins. Unfortunately the soil is in too many instances even now in a far from proper condition for working, owing to the prolonged and frequent rainfall. I was in hopes that a change would occur at the solstice, but though a slight improvement in the weather took place last week this appears to have been only temporary.

Directly a fairly good seedbed can be obtained, a few rows—more or less, according to requirements—of peas for an early crop, also some broad beans, had better be sown, especially if no seed was got in in November or last month. But except on the lightest and warmest of soils autumn-sown peas will probably not do much good this season, the soil, though not very cold, being too wet to suit the plants, and the growth will probably be weak and sickly in consequence. For the earliest gathering many gardeners sow peas in pots, boxes, or strips of turf under glass, planting out the seedlings later on, and under certain circumstances this is an admirable plan. Which plan should be preferred depends chiefly on the nature and condition of the soil, the weather experienced, etc., of course.

Peas are grown to a considerable extent under glass in these days, and in this way gathering may take place decidedly earlier than from plants outside, while the crop is more independent of the weather, and consequently more certain. The seed may be sown in pots, those from 9in. to 11in. in diameter being probably most suitable, or in beds of any good soil, while I have also secured excellent results from plants grown in good sized boxes. Some of the best kinds for indoor culture are [illegible] Gem, Dwarf Defiance, and English Wonder—this I decidedly prefer to American Wonder. Do not sow too thickly, and admit air freely, while affording cool treatment generally throughout, as a rule, though when the plants are well in bloom and setting the pods the temperature may be increased to some extent, and a system of gentle forcing adopted, if necessary. One advantage of growing peas in pots or boxes is that these can be moved from place to place if required. Where there are plenty of fairly deep frames or pits an early crop of peas may be easily obtained in these.

Lose no time in laying out seed potatoes for early planting to sprout. This should be done in a single layer only, placing the "eye end" uppermost. A temperature of 45 to 50 degs. is sufficient, and the shoots ought not be allowed to attain a greater length than about 1in., at the outside, before planting.

Where tomatoes are required as early as possible a sowing had better be made at once, in a steady warmth of 60 to 65 degs., especially if no plants were raised in the autumn. But those [illegible] and grown on vigorously and freely will be very little behind the others in point of time, while they will also prove stronger, will ripen better, and remain in bearing much longer.

Pine-apples (so called, they are termed plants by gardeners) are now [illegible] to some extent in this country as [illegible] or more years ago under glass, the delicious and unhealthy Waldensian [illegible] handsome, fruit is now imported in such immense numbers from the Azores and elsewhere, and sold at so low a price, that there is no longer the [illegible] of a chance of any profit being made by its culture in England, this being essentially [illegible] to a comparatively few gardens in which [illegible] is no object.

LIVE STOCK.

OUR ILLUSTRATIONS.

The Highland steer was exhibited at the Smithfield Club's Show by Lieutenant-Colonel H. E. S. Home Drummond, of Blair Drummond, Perthshire, and was bred by the Duke of Athole, K.T., Blair Castle, Blair Athol. This steer, which is without a name, was shown in the class for Highland steers or oxen above three years old, and was awarded the first prize, and also the £20 silver cup for the best animal of the Highland breed. At the time of the exhibition it was nearly three years and nine months old, and weighed 17cwt. 0qr. 4lb.

In our last issue we gave a view of some of the fowls exhibited at the poultry show held in connection with the Smithfield Show, and this week we give a portrait of the turkey classes.

STOCK AND SHOW NOTES

By Herdsman.

Sir George Macpherson Grant has forwarded me a copy of a private catalogue of the bulls now at Ballindalloch. There are about twenty, all of the choicest pedigree and of the highest individual excellence. Some of them are for sale by private treaty, and it is intended to dispose of the others at the spring sales of 1901. Mr. M. Gilchrist, Home Farm, Ballindalloch, N.B., will supply any information required by intending purchasers.

One of the latest additions to the Sandringham herd is the pretty yellow heifer Lady Dee 4815, which took second prize at the Royal Show at York, and a third at the Scottish National. She was purchased for the Earl of Southesk, K.T., by Mr. Duncan M'Diarmid, of Camusericht, on behalf of the Prince of Wales and is to be put into training for the fat stock shows of next year. It may be mentioned that His Royal Highness won the first and third prize in the two-year-old steer class at the Smithfield Show with two animals from the same herd as Lady Dee.

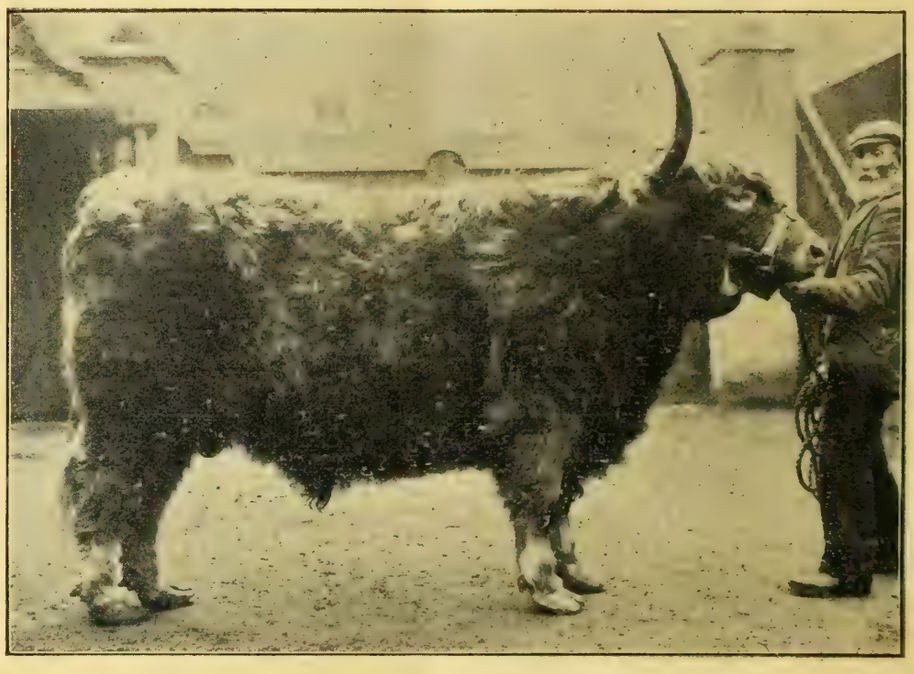
Messrs. Alfred Mansell and Co., live stock exporters, Shrewsbury, have just despatched from Liverpool, per ss. Bovic, of the White Star Line, consigned to Mr. Duncan, the manager of the Niagara Stock Farm, 32 high-class Shropshire sheep, selected from the old-established and carefully bred flock of Mr. T. G. Juckes, of Tern, comprising twenty choice breeding ewes, sired by Tern Safety 8261, bred by Mr. G. Lewis, by Tern Medallist 8778 Tern Chief 9265, bred by Mr. J. Bowen-Jones by Farmer Chief 8030; Solidity 9694, bred by Mr. T. J. Juckes, by Friendly 7502; Thickhead 9721, bred by Mr. A. E. Mansell, by Fair Star 5177; Tern Coat 9266, bred by Mr. T. G. Juckes, by Tern Medallist 8778, Tern Medal 1015, bred by Messrs. Evans, by Medallist 7605. These ewes were all served by high-class sires from the well-known flocks of Mr. Minton and Messrs. Evans, viz., Montford Wonder, by the Royal winner, Phenomenon 8580, and Sherlowe Star, by Star of the Morning 10145; Royal Member 8715, by the Member 8264; and Tern Solidity 10152. Six beautiful ewe lambs sired by Kruger's Hope 10394, bred by Reps. of the late W. Nevett, by Lord Broughton 6196, and Montford Jorrocks 10012, bred by Mr. T. S. Minton, by Vice-President 9295; the balance comprising five well-grown ram lambs, all sired by Kruger's Hope 10394, and a typical shearling ram, bred by Messrs. Evans, by Star of the Morning 10145, from a Corston Artist ewe.

A Stourbridge correspondent of the *Morning Post* draws attention to the dangers arising from the driving of cattle on country roads and through narrow lanes. He says: "Any of your readers who spend much time in country districts, especially if within easy reach of some centre for despatching fat cattle to our large towns and seaports, can give you instances of terrible injuries or 'hair-breadth 'scapes.' I need not take up your space with details of cases that have come under my own notice, such, for instance, as a lady now sixty years of age who has been a hopeless paralytic since her girlhood through being knocked down by a bull as it was being driven to market; another person who was knocked down in a similar way last summer, and who has been in bed nearly ever since; and a child gored to death by a bullock on a road between two large towns.

"I could easily specify many more cases, including two or three of the very narrowest escapes I have had myself. A farmer who has had a large grazing farm all his life told me a few months ago that he had no patience with women who did not get out of the way of fat bullocks, and that they were always dangerous to women. 'Perhaps,' he said, 'they are irritated by petticoats.' He added that he always had his bullocks roped and led, not driven, to market. Could not some such rule be enforced, at any rate in cases where, as has lately happened to myself, a drover has to shout 'Get out of the way, ma'am, he's a bit wild.' Will none of our new members of Parliament take the matter up?"

The prize schedule has just been issued for the first of the London Spring Horse Shows, namely that of the Shire Horse Society, which will be held on Tuesday, February 26th, and the three following days. The Society has once more increased its prize money, this time to the extent of £215, the total offered being £1,537, as compared with £1,322 for the 1900 show. Few will find fault with the increase in the number of breeders' prizes, as a large portion of these will be sure to go to tenant farmers. Five fourths and two fifths have been added in the stallion section, three fourths in that for mares, and three seconds for geldings, all being of the value of £5. The classes remain as at the last show with but two exceptions, namely, that for mares 16 hands high and over, five years old and upwards, has been divided into two classes, one for animals over 16 and under 16.2 hands, and the other for animals over the last-mentioned height; and in the gelding section the three and four-year-olds will have separate classes instead of only one. As to the number of prizes offered in each class I may mention that they have in nearly every case been increased by one, value £5, that for three-year-old stallions having no fewer than ten prizes, the first of £20, the second £15, third £10, and the remainder £5 each. The special awards will be the same as in 1900. Entries close on January 21st, post entries at double fees being received up to the 28th of that month. Entry forms, etc., can be had of the Secretary, Mr. J. Sloughgrove, 12, Hanover Square, W.

Pedigree Herefords Burnt to Death.—On Tuesday night a fire occurred at Stretford Court, Herefordshire, a whole square of farm buildings being destroyed. Fifteen pedigree Hereford cows and two fat pigs were burned to death. The damage is roughly estimated at £5,000.



Lieut.-Colonel H. E. Home Drummond's Highland Steer, First Prize at the Smithfield Show.

CATTLE.

Disease in Essex and Herts.

By order of the Board of Agriculture a large number of head of cattle and swine have been destroyed on farms in Essex on which outbreaks of foot-and-mouth disease and of swine fever have occurred. Owing to the scarcity of labour, a gang of twenty-two navvies was borrowed from the Great Eastern Railway Company for the purpose of burying the carcases. At Canfield twenty-six bullocks and twelve swine were killed by London butchers and buried in a trench. At Stansted and Harlow this number was exceeded. The owners of the slaughtered animals are to be compensated in full, but, none the less, the outbreak has produced consternation among Essex farmers, who in recent years have taken to raising stock on account of the unremunerative price of wheat. Half the county of Essex and part of Hertfordshire have been officially declared an infected area, and there is reason to hope that the vigorous action taken by the Board of Agriculture will confine the outbreak to the declared infected area.

SHEEP.

The Winchester Wool Case.

Our readers will remember that a short time ago a case of much importance to wool growers and wool buyers was tried at the Winchester County Court, and was reported in our columns at the time. In this action the County Court Judge decided in favour of the defendant, whose wool had been purchased by the plaintiff at a local auction sale. The claim was for damages sustained in consequence of a considerable quantity of "clegg" or dirt having been found in some of the fleeces sold. In connection with this matter it is interesting to note that a Winchester contemporary publishes the subjoined letters. The first was written by Messrs. M. Mahony and Brothers, Ltd., of Blarney, Ireland, the well-known dealers in wool, to Messrs. James Harris and Sons, auctioneers, of Winchester.

9th Nov., 1900

Dear Sir,—At your wool sales last July you may remember that I drew the attention of growers to the necessity of greater care in keeping their unwashed wool free from daggings. My remarks did not apply to the washed wool, as I had no complaint to make of it. I am sorry to say that the testing of some of the unwashed lots we bought has shown a very large amount of these daggings in the fleeces. In one case actually eight per cent. of the entire weight was made up of absolutely useless dirt. I may say that every lot was carefully examined by both our manager (Mr. Henry) and myself before the sale, with the special object of avoiding lots with daggings, but we seem, in spite of all our care, not to have succeeded.

It is impossible in the time and space at the disposal of buyers to examine every fleece, and we are therefore compelled, in order to avoid loss, to consider how we can curtail our purchases of Down wool in future, as the bulk of this wool is now shown in grease. With this object we are devoting our attention to Colonial wools, which are now to be had in immense variety, and which are satisfactorily shown to purchasers, and about which we never have to make such a complaint as we now bring before you. We have made some alterations in our machinery to suit this class of wool.

As we think we may claim to be among the principal supporters of the wool sales started by you, we wish to frankly tell you why we are compelled to change our attitude. The Down wool suited us very well, but, as growers choose to show it in so undesirable a style, we are compelled to go to a

market where we shall be able to judge exactly what we are buying.

You may make any use you please of this letter.

Yours, etc.,
(Signed) F. W. MAHONY,
Director to M. Mahony and Bros.

Messrs. James Harris and Sons, Winchester.

Sir,—I understand that Mr. Forder has sent you for publication a copy of a letter which Mr. Mahony (of the firm of Martin Mahony and Bros., Limited, of Cork), well known as the largest buyer at our South of England wool sales, addressed to my firm on the 9th November—Mr. Mahony having sent Mr. Forder copy of same.

I have not the slightest objection to its publication, in fact, I had decided to take steps by which the substance of it should be brought to the notice of all wool auctioneers in the South of England, as well as to all those gentlemen who send me their wool for sale.

I fully endorse every word Mr. Mahony has used, and hope that the farmers generally will take note of it, and see that it is to their interest that in future their wool is sent to the sales in a proper state.

I am, etc., JAMES HARRIS.

Auction and Estate Agency Offices, Winchester,
December 12th, 1900.

HORSES.

Horse Sale at Glasgow.

A sale of carriage, van, and cart horses and a few cobs and ponies was held on Tuesday afternoon by Mr. Vine, within the Horse Bazaar, opposite Buchanan Street Station, Port Dundas Road, Glasgow. There were eighty animals catalogued and the majority showed well, being of good substance and suitable ages. There was a fair attendance of buyers, contractors, and dealers, but country purchasers were scarce. Trade was very slow throughout. The ages of the animals ranged from five to twelve years, and they were from 11 to 16.2 hands high. Carriage and good draught horses secured the best demand and realised satisfactory prices. Vanners and lorry animals, which were of a secondary class, met a bad trade, and were very stiff to cash. Cobs and ponies met a fair sale, and made fairly good prices. Best carriage horses realised 40gs.; secondary, 10gs. to 20gs.; and inferior, down to £5; best draught horses to 36gs.; secondary, 10gs. to 18gs.; and inferior, 4gs. to 8gs.; vanners, to 24gs. and down to £4; best cobs, 23gs.; secondary and inferior, 4½gs. to 10gs.; best ponies, 18gs. and down to £3; and lorry animals to 30gs. and down to 6gs., according to style and substance.

SOCIETIES.

Polo Pony.

Sir Richard D. Green Price, Bart. (President) occupied the chair at a meeting of the Council of this Society held at 12, Hanover Square, London, W., on December 14th, when fourteen new members were elected.

Mr. Tresham Gilbey (chairman) presented the financial statement of the Finance Committee, showing a balance at the bank of £60 6s. 7d.; receipts since the last meeting, £49 10s. 7d.; arrears of subscription, £7; and accounts for payment, £39 5s. This report was adopted.

Editing Committee.

Sir Richard Green Price stated that the committee had determined to print off 700 copies of Vol. VI., which was now in the press, to be issued to the members early in the new year. They had very carefully considered the conditions of entry for Vol. VII., together with several suggestions made by members of the Council and by Irish members at the meeting at Dublin, and their suggestions were submitted herewith:—

(a) That for all ponies entered under the inspection condition, a veterinary certificate shall be sent in, certifying the height—in the case of yearlings, that it does not exceed 13 hands 2in.; two-year-olds, 14 hands; three-year-olds, 14 hands 1in.; and in the case of four-year-olds, and upwards, that it does not exceed 14 hands 2in.

(b) That in the case of ponies, for which pedigrees are tendered, confirmed by the name and address of the breeder, the Editing Committee shall determine upon their suitability for registration.

(c) That in other cases the pony must be inspected and passed by a member of the Society or Inspector appointed by the Editing Committee.

(d) That all inspection fees be abolished, and that the entry fees for stallions and mares be revised as follows:—

	Members.	Non-Members.	
Stallions	10s. ..	£1	each entry
Mares	5s. ..	10s.	,,

With no charge for produce entered under their dams.
Re-entries to be charged half-fees.

The committee thought that the insertion of entries with any alien blood, other than thoroughbred, would have to be very seriously considered in the early future, while the desirability of giving prizes for yearlings at the Spring Show was also a matter which should occupy the attention of the Council. As regards the Mountain and Moorland breeds, it was determined that two Welsh sections be fused into one, and that one General Committee be appointed for Wales, while the rules relating to these breeds were referred to the next meeting for consideration. The photographing of the champion Polo ponies at the next show was entrusted to Mr. Charles Reid. This report was adopted.

Horse Show Committee.

Sir Richard Green Price stated that the following gentlemen had consented to act as judges:—Young Stock—Mr. E. Mucklow, jun., and Capt. G. S. Phipps Hornby. Riding Classes—Capt. Denis St. George Daly and the Earl of Harrington.

Messrs. Tattersall had kindly agreed to reserve thirty stalls for Polo ponies belonging to members of the Society, for Monday, March 18th, the ponies to be at Albert Gate on the Friday evening of the show. The last date of application for these stalls to be February 18th, addressed to the secretary, and in the event of the applications exceeding accommodation the stalls to be balloted for. The arrangements for the jumping competition on the Friday were left in the hands of Mr. Goodson and the secretary. In passing the prize list for press, it was resolved to make the third prize in Classes 20 and 21 £5 each, instead of £3, and Classes 29 and 30 to be headed "Ponies, five years old and upwards." The revised scheme of medals at country shows in 1901 was presented in print, and it was resolved to add that the brood mares must be in-foal to, or with foal at foot by, a registered pony stallion or thoroughbred stallion. A letter was read from the Royal Agricultural Society of England intimating that they cordially accepted the Society's offer of prizes, amounting to £94, towards the schedule of Polo ponies at Cardiff, and this amount was supplemented by the Cardiff Local Committee to the extent of £35, making a total of £129. The two gold medals offered by the Polo Pony Society would be offered for the best Polo pony stallion and the best Polo pony mare, while the Royal Agricultural Society also accepted the offer of a silver medal for the best pony exhibited in the two classes for Welsh ponies.

Army Remounts.

The Special Committee appointed to confer with the Inspector-General of Remounts had met that morning and preliminarily discussed the question. The President was deputed to convey to him the views of the Council upon the matter.

Election of Council.

The Selection Committee of Candidates for Council was appointed to consider the nominations sent in by members of the Council, and to draw up a list of sixteen names for submission to the members of the Society for their election of ten Councilmen. It was constituted as follows:—The President, Rev. T. F. Dale, Mr. Stuart Forster, Mr. Tresham Gilbey, Mr. G. Norris Midwood, Rev. D. B. Montefiore, and Mr. E. Mucklow, jun.

The Council adjourned till Friday, February 15th—after the close of the entries for the show.

Hunters' Improvement.

Mr. J. C. Straker, M.F.H. (President), occupied the chair at a meeting of the Council of the Hunters' Improvement Society, held at 12, Hanover Square, London, W., on December 13th. Thirteen new members were elected.

Lieut.-General Fryer submitted the report of the Finance Committee, indicating a balance at the bank of £94 6s.; receipts since the last meeting, £36 8s. 6d.; arrears of subscriptions, £21, as compared with a similar sum in December, 1899; and accounts for payment, £100 0s. 5d. This report was adopted.

Horse Show Committee.

Sir Richard Green Price stated that the Royal Commission on Horse Breeding had accepted the invitation of the Council to hold their 1901 exhibition in conjunction with the Society's next show.

The following gentlemen had intimated their willingness to officiate as judges:—Young Stock—Mr. C. B. Robson and Mr. T. Wickham-Boynton. Riding Classes—Mr. R. A. Barkley and Mr. Owen C. Wallis. Chargers—Viscount Downe and Colonel R. F. Meysey-Thompson.

Upon the suggestion of Lord Downe it was decided to indicate the weights in the Charger classes as follows:—Light weights, under 13st. 7lb.; heavy weights, 13st. 7lb. and over. Professor J. Wortley Axe accepted the Council's invitation to act as the Council's inspector, and from the list of six names submitted the Council had selected Mr. E. H. Leach, F.R.C.V.S., of Newmarket, and Mr F. Danby, M.R.C.V.S., of Driffield, to assist him in the veterinary examination. The prize list as revised by the committee at their last meeting was passed, and ordered to be printed and issued to the members.

This report having been adopted, Lieut.-General Fryer was elected a member of the committee, to fill the vacancy caused by the death of Mr. William Wright.

Soundness of Stallions Committee.

Mr. J. P. Cross (Chairman) reported that the committee had met that morning to make the necessary arrangements to carry out the conditions of the scheme, and it was resolved to leave the inspections in the hands of the secretary, with instructions to call a meeting of the committee early in January if necessary. For all the Irish inspections the committee suggested that one English member of the Council, together with one Irish member of the Society, should jointly inspect. Two applications had come before the committee, and had been referred to members of the Council in the districts from which the entries had come.

This report having been adopted,

Sir Richard Green Price questioned whether the scheme was sufficiently well known, and thought that owners of stallions were ignorant of the fact that the Society was prepared to grant certificates of soundness to stallions complying with the conditions of their new scheme. He thought that greater publicity was needed.

Mr. Cooper believed that it would be a good plan if members of the Council were invited to give the names of the owners of stallions in their particular districts to whom the secretary could send application forms. Representing the whole of England as they did, the members of the Council could do a great deal in this way to make the scheme known.

Dr Bond thought it was an excellent plan, and speaking for himself he would do all he could in West Somerset.

Lieut.-General Fryer said that they should supplement this by some public announcement in the agricultural and sporting press in England and Ireland, and it was finally arranged that the secretary should issue certificates and circular letters to the members of the Council for their distribution, and also to advertise the last date of entry.

Selection Committee of Candidates for Council.

The following gentlemen were elected to form this committee: The President, Dr. Bond, Lieut.-General Fryer, Captain Heywood Lonsdale, Colonel Sir Nigel Kingscote, Sir Richard Green Price, and Mr. Romer Williams, and it was arranged that they meet on Thursday, January 17th, at 2.30 p.m.

Council Meetings in 1901.

The dates of the Council meetings next year were then arranged, and it was decided that in future a summary of the proceedings at the previous meeting should be issued with each agenda. The Council then adjourned till February 14th

Norfolk.

The annual meeting of the Norfolk Agricultural Association was held at the Agricultural Hall, Norwich, on the 22nd inst., the High Sheriff (Sir E. C. Nugent) presiding over a large attendance of members. The statement of accounts showed that the year was begun with a balance at the bank of £1,438. Subscriptions brought in £755, and special prizes and donations £205, while Downham guaranteed £100. The show at Downham brought in £286 as entrance fees and from stallholders; the gate money was £587, against £988 received in 1899. The total receipts of the summer show amounted to £1,112 12s. 1d., against £1,508 0s. 7d. in 1899. The spring show brought in £68 8s. 6d., against £87 10s. 9d. in the previous year. The total receipts of the year from all sources, including the cash on deposit, amounted to £3,713 11s. 4d., against £3,697 in 1899. The total expenses incurred in connection with the summer show amounted to £935 10s. 6d., while the spring show cost £79 19s. 5d. The total of the year's working expenses was £1,170 11s. 4d., and there was on deposit at the end of the year £1,299 7s. 9d.

Mr. H. Mason moved the adoption of the report, and Mr. Mitchell, one of the auditors, seconded. He stated that the prize money was in excess of the previous year, being £1,242, against £1,160. There had been a loss on the year of £139 5s. 10d., and that was entirely the result of the poor attendance at the Downham Show. The accounts were then passed.

Mr. Garrett Taylor moved that the Association should hold its show next year at North Walsham They had not yet received an invitation to visit the town, but he had every reason to believe one would come. A guarantee of £150 would be required, and a ground and water would have to be provided free. Perhaps the inhabitants were looking round before sending a formal invitation to see if they could meet the requirements of the Association.

Col. B. B. Sapwell seconded, and said it was twenty-two years since they had visited North Walsham. Although it was not such a fashionable place as Norwich, Lynn, or Yarmouth, they must bear in mind that the Association was not established for the purpose of making profit, but for educating the people in agricultural matters, and North Walsham would be a good neighbourhood in which their efforts would be appreciated. (Hear, hear.)

The motion was carried, and on the suggestion of Mr. Garrett Taylor it was decided to invite Sir Fowell Buxton to become the president for 1901.

Mr. T. L. Hare, who was unavoidably absent, was thanked for filling the office of president in 1900 Mr. Caleb Barker was re-elected secretary of the Association.

Irish Industries – The Queen has purchased this Christmas several handsome pieces of Carry Hall work from the depôt in Brook Street, Grosvenor Square, the handiwork of the Irish peasants whom Viscountess Duncannon banded into an "Industry" in 1884, and has successfully carried on ever since. Her Majesty has on several occasions thus encouraged the Irish workers.

OFFICIAL REPORT BY THE JUDGES OF THE MALTING AND SEED BARLEY COMPETITION

AT THE

BREWERS' TWENTY-SECOND ANNUAL EXHIBITION AND MARKET,

ROYAL AGRICULTURAL HALL, LONDON, OCTOBER 20TH TO 26TH, 1900.

Judges

C. HOWARD TRIPP, Esq., Burton-on-Trent.

* Seed barley judges.

OFFICIAL REPORT.

To Messrs. Dale and Reynolds, Managing Directors,
The Brewers' Annual Exhibition and Market,
46, Cannon Street, London, E.C.

MALTING-BARLEY COMPETITION.

We have pleasure in presenting our report, as usual, upon the competition held at the Twenty-second Annual Brewers' Exhibition and Market, Royal Agricultural Hall, Islington.

Although the number of British samples has only been exceeded once before, smaller entry in the foreign classes has led to the total entries showing a falling away from the large numbers of the two previous years. One of the chief features of the year is a large addition to the number of classes and extension of the prize lists, and this growth in the value of the prizes now obtainable has not yet reached its limit, for already very valuable additional prizes have been voluntarily offered from several sources for next year.

The most important new departure of the year is a matter which gives us very great satisfaction. Through the courtesy of the Board of Agriculture and at its recommendation we have been brought into direct association with a number of the principal agricultural colleges, technical schools, and experimental farms throughout the country, and we have been enabled to distribute to them for experimental seed purposes a good proportion of the large number of very beautiful samples of barley which were sent to the exhibition this year. We also sent to the Principals of Wye College, at their request, samples of every exhibit, which we understand will be kept by them for record purposes, and will be used in the museum they are forming. This will remain an interesting record of the barleys shown at the last exhibition of the century. We trust that the action thus initiated may lead to very satisfactory results hereafter.

Already we have had intimation that there will be earnest efforts made to take advantage of Class XXII. Exhibitors and visitors to the exhibition will also have exhibits of much interest placed before them by Gartons, Limited, who will show the very remarkable varieties of new breeds of barley which they are now so successfully cultivating. Entries will also be made by Professors Hall and Percival, Wye College, and M. Philippe de Vilmorin from France.

We again direct attention to the fact that our labours are not simply devoted to adjudicating upon a large number of fine samples of barley, but to make the exhibition of the highest practical service to technical education within our power, which is our chief aim. This we do by exposing the defects that should be avoided or remedied, as well as by attempting to indicate the right methods of cultivation so far as our exhibits permit, together with the types and varieties of barleys most suited to maltsters' and brewers' needs.

It is to be regretted that there is so little proper competition in the colonial and foreign sections. To meet the strong objections of would-be exhibitors in these sections to 50 quarters as bulk open to inspection to substantiate the samples, which it was urged was very onerous in certain cases, we advised the same limit of 20 quarters in all classes. We did not see our way to alter our request being complied with for the right naming of the barleys shown. Dealers ought to be able to say if the barley they offer for sale is two or six rowed. In order to give the utmost consideration to these classes we set aside the provision of the numbers requisite to secure awards.

The number of county classes was considerably increased, and we again urge the desirability of growers in several other of the larger and more important barley growing counties having this additional incentive offered to show. Large numbers of important buyers attended the show throughout the week, with satisfactory results in the case of some of the counties which had a good and representative set of samples on view, even in those cases where the county gained no conspicuous notice.

For the first time the honours were divided between East Anglia and the West Country, which indicates the peculiar nature of the weather during the spring and summer. The abnormal heat and amount of sunshine with irregular and erratic rainfall of the season did not conduce to the production of barleys of such weight and quality as we saw in 1896 and the subsequent years.

Our efforts to refute the unjust imputations upon the threshing-machine makers of this country led to the establishment of Class 19, and we are glad to be able to report that no samples were submitted which were sufficiently damaged by threshing, dressing, or through any other cause, to warrant the rejection of the bulk by any practical maltster for the reason of excessive damage. Therefore the stigma which has been placed upon the producer or threshing-machine maker is now removed. It is a difficult matter to determine to what extent the drum of the threshing-machine works defectively through imperfection in manufacture through wear or through carelessness on the part of the user. It is quite obvious that a large number of our best machine makers can and do make machines which, under proper management, thresh without damaging the grain to any serious degree. Probably it will be found (as the result of the methods we have adopted of determining proper working in this particular) that more careful attention on the part of those controlling the working of the threshing machines is nearly all that is required. It is, however, still desirable for all makers of threshing machines to give particular attention to the working of the drums for the purpose of threshing barley.

The system we established of determining the value of the work done by the threshing machines attributed to certain makers by giving awards on a uniform standard or test, irrespective of its position otherwise to each and every exhibit, the result ultimately being worked out by percentages of the total marks gained, divided by the number of machines represented, should give satisfactory results, as it is a fair, practical, and common-sense method.

Some of the following tables may appear complex, and a few of them require considerable attention before their true meaning or value becomes apparent. But we hear from many sides of the care with which many growers throughout the country examine these tables, and conform to the improved practices suggested by them with very material benefit to themselves. It is also obvious that the quality of the barley submitted to us year by year is materially improving. Perhaps the greatest advantage is the experience gained by many growers which prevents them producing barleys totally unfit for malting purposes.

TABLE I.

ENTRIES OF ENGLISH, COLONIAL, AND FOREIGN GRAIN FOR THE TEN YEARS 1891-1900.

	English.	Colonial.	Foreign.	Total.
1891	61	—	16	77
1892	64	—	22	86
1893	63	—	21	84
1894	124	—	80	204
1895	109	—	42	151
1896	169	—	32	201
1897	92	—	27	119
1898	143	—	30	173
1899	196	3	23	222
1900	162	—	10	172

The following table gives the relative positions of British and foreign corn for five years 1896-1900:

TABLE II.

It is significant that for the first time in the history of the exhibition a lower weight is recorded for British grain than the lowest Foreign.

The following is a list of the English, Welsh, and Scotch counties competing during the four years 1897-1900, and for the two years (1899-1900) the true average weight per bushel of all samples in each county:—

TABLE IV.

LIST OF COUNTIES AND NUMBER OF ENTRIES.

	1897. Number of Entries.	1898. Number of Entries.	1899. Number of Entries.	1899. Weight per Bushel.	1900. Number of Entries.	1900. Weight per Bushel.

Suffolk	2	3	3	3	7
Stafford	—	—	1	—	—
Surrey	1	2	2	3	1
Sussex	1	1	1	2	1
Warwick	1	—	2	2	2
Wiltshire	1	—	—	1	2
Worcester	2	1	2	3	3
Yorkshire	—	1	—	3	1
	53	39	51	67	60

These sixty samples obtained in all 125 awards, apart from the threshing machine and a few other prizes.

The weights of the various counties are difficult to understand, especially as so many stand so high. No less than ten counties sent no grain below 56lbs. per bushel, whilst the average in twenty-three counties exceeded that weight.

TABLE VI.

List of counties, showing number of entries and prizes awarded, together with the highest, lowest, and average weight per bushel :—

County.	Number of Samples.	Number of Prizes.	Highest weight per bushel.	Lowest weight per bushel.	Average weight per bushel.
Bedford	14	4	58·0	56·1	58·4
Berkshire	8	2	58·0	56·0	57·0
Buckingham	4	2	59·1	57·9	58·5
Cambridge	1	—	—	54·5	54·5
Cornwall	1	—	—	53·9	53·9
Devon	12	2	59·8	57·7	58·7

Yorkshire	2	1	56·3	56·0	56·2
	151	60	—	—	56·6

The actual weight per imperial bushel of barley is an important and ever-increasing factor in the determination of values, and it would be a great advantage to many if uniformity of sale existed.

The following tables refer to the manures used, and have been worked so as to show the effects of manuring for two years. This is a practical point which has already received attention. For its particular use in barley we trust that this form of showing it may be conducive to good results. The many valuable prizes now offered by manure manufacturers have caused additional classes to be added this year, with the result that a considerable amount of money has been divided amongst successful competitors. These classes are already increased in number and value of prizes very considerably for next year.

TABLE VII.

MANURES USED.

Manure used, or name of Maker.	Number of entries.	Number of prize winners.	Weight lbs. per bushel.
J. Fison & Co., Ltd.	70	27	56·5
None	24	9	57·5
Nitrate of soda	20	8	56·7
Sulphate of ammonia	5	4	56·3
Prentice's	7	3	56·0
E. Webb and Son's	13	8	56·7
Colchester's	5	1	55·1
Superphosphates	2	—	56·5
Sheepfolded	1	1	55·0
Farmyard	7	1	56·6
Packard's	2	—	56·3
Guano	1	1	57·9
	159	63	56.6

Eight entries are placed under more than one heading in consequence of combining manures.

TABLE VIII.

MANURES USED 1900-1899.

In the following list can be seen the order of use of all the manure employed in two successive years. It will be understood that the date covers the use (or absence) in its own columns only :

Name. 1900.	No. of Entries.	No. of Prizes.	Name. 1899.	No. of Entries	No. of Prizes.

TABLE XII.

Particulars of entries defining sweating, steeping, and dressing in steep prior to sowing :

	No. of Entries.	No. of Prizes.	Weight. lbs. per bush.
Not treated in any way	128	47	56·8
Not stated	22	10	56·3
Dressed with sulphate of copper	4	2	58·9
Steeped with Carbolic	2	—	56·3
Sweated (Kiln dried)	5	1	56·4
	161	60	56·6

The above table summarises the information furnished from exhibitors in cases where the barley prior to sowing had been sweated or dressed. It is significant that in the selected number of exhibits so large a proportion relatively should have been scientifically attended to prior to planting. This is another instance in which failures and defective exhibits might prove of great practical value if entered and shown. It is curious that so simple a question remains unanswered by so many growers.

TABLE XIII.

PRECEDING CROPS.—PERCENTAGE OF PRIZE WINNERS TO TOTAL ENTRIES.

	No. of Entries.	No. of Prizes.	Per cent.
1895	109	104	35·5

1896.			
Wheat	31	10	57·4
Barley	39	13	57·0
Oats	9	4	57·9
Clover and Sundries	32	13	57·0
Roots	26	10	57·1
Not described	6	1	57·0
	143	51	57·0

These tables show a variety of points of considerable interest. Taking the chief crops of 1897 preceding barley in 1898, and succeeding the other crops defined in 1896, we get the following particulars. Probably the most striking point is the remarkable uniformity of weights.

The weights of every class and sample are given singly or as an average of the class.

The position also of wheat and oats preceding barley is most suggestive. When a white straw crop goes in front of barley it seems to have the effect of levelling up weights curiously.

Rotation of crops has grown to be a part only of right manuring. These figures are best taken in conjunction with the manurial tables. At present we are only just beginning to feel our way, consequently suggestions are of value solely as influenced by the after determinations of large numbers of samples and for a long succession of years.

TABLE XVIII.

SUMMARY OF CROPS—1898—6.

Preceding crops in 1897.	1896.	Number of Entries.	Number of Prizes.	Weights per bushel.
Wheat	Grass, clover fallow, seeds, and lucerne	13	6	57·1

The alteration to the usual rotation of crops suggested in our former reports as if not necessary at least desirable is again confirmed, notwithstanding the peculiar climatic conditions of the abnormal season of 1900.

In the following tables referring to the character of soils we direct especial attention of all who are seriously interested in improving the methods and adding to the knowledge of husbandry to the position taken by the calcareous and non-calcareous heavy and light lands. The tables agree very closely with others formerly published by us, but before coming to any conclusion in the matter we again suggest it may be necessary for us to acquire the experiences furnished by a series of wet and inclement summers.

TABLE XXIV.

We give in the following table the list of makers and prizes awarded to samples which were treated by the dressing machines entered by growers:

TABLE XXV.

DRESSING MACHINES NAMED.

Name of Maker	No. of Entries.	No. of Prize Winners.
Robert Boby, Limited, Bury	83	32
Not entered	22	9
Baker, Wisbeach	16	8
Gooch, Harleston	12	1
Rainforth, Lincoln	9	1
Coleman, Chelmsford	4	2
Penney and Co., Lincoln	4	2
Ward	3	1
Ordinary	3	1
Gentry	2	1
Brenton	1	
Eaton	1	
Farmer	1	1
Mason	1	
Tetts	1	1
Corbett	1	
Turner	1	1
Phillips	1	
	166	—

Note.—Six machines were attributed to two makers. It is curious that all six won prizes.

The threshing machine prizes are in the appended list.

In the following table we give a list, as entered, of the varieties of seed barley used. It is still matter for regret that the divisions are not more clearly defined, especially as the whole industry owes so much to our seedsmen for their splendid efforts in improving the seed used; and we are in a period of transition when new views concerning the development and propagation of seed are likely to exercise influences in the near future, concerning which we do not venture to give any opinion, but we throw out the suggestion that they may prove of great potency.

TABLE XXVI.

LIST OF SEED BARLEYS ENTERED 1900.

Name.	No. Entries.	No. of Prizes.	Per-centage of Prize-winners.
Webb's Kinver Chevalier	50	21	42·0
Carter's Prolific and Goldthorpe	17	9	53·0
Chevalier	13	7	54·0
Webb's New Burton	10	2	20·0
Hallett's	8	3	37·5
Jarman's	7	2	28·5
Garton's Standwell	7	2	28·5

Gent's Premier	1	—	—
Vosper's Perfection	1	—	—
Scotch	1	—	—
	151	60	39·7

The number of prize winners to prizes gained is as 60 to 125.

In bringing our report to a conclusion in this the commonly accepted last year of the century we cannot refrain from pointing out that in the exceedingly old and long-established industries of barley-growing and malt-making great changes have occurred in the comparatively short period through which we have laboured. We have been trying, we believe with some success, to exercise some influence for good upon the right production of fine barleys fit for brewers' use, which can also give satisfaction to maltsters. We are willing to

admit that our methods may be termed empirical. But we claim that with the practical knowledge (the outcome of considerable experience) which we, as a body collectively, or any of us taken individually, can bring to bear upon this subject, we endeavour to combine practice with science, without exaggerating the value of science so-called.

One of the best influences which will survive the nineteenth century when carried into the twentieth must inevitably prove the broad toleration that has led to practical men recognising the value of their scientific leaders, and still more of scientific men having found that practice cannot be disregarded by scientists without grave disadvantage.

We have laboured assiduously for many years in attempting to show the barley growers of this country the types of barley best suited for brewers' needs, and we have ventured to suggest (always with much deference) modes of cultivation as to times of sowing, seeds used, preparation of the soil, manures added, rotation of crops, and the other points involved in the foregoing Tables, which we feel convinced have tended to attain the end we started out to seek.

The barley now grown by the best of our farmers in this country has improved in character, and is well fitted for brewers' needs, and we believe it to be the experience of our leading maltsters that for some seasons past the finest pale ale malts have been made from barley grown in England. This is a national gain which may be ascribed mainly to climatic conditions most likely, but it is a state of things far different from what existed before the Brewers' Exhibition began its operations, when it was the fashion to give the preference to foreign barleys for pale ale purposes.

We still, however, say emphatically that there is room for further improvement, and this improvement can best be secured by a still better understanding between all the honest and loyal workers who endeavour to secure our common end than even that which happily already exists.

Although little alteration (if any) of the schedule for next year's exhibition will arise through reduction, the number of classes must necessarily be considerably larger than it has been in any former exhibition. The view we have often expressed of the desirability of having district prizes is taking vigorous root, and we shall probably have almost all of the best barley-growing districts open to such encouragement and further incentive for improvement the exhibition offers.

We are glad that the interesting and important barley-growing county of Shropshire will this year derive the advantages conferred by the kind offer of Lord Wenlock to add to the prizes already open to growers in that county. Through the generosity of Messrs. Smith, Dereham, the Norfolk prize list was materially extended, and we note with peculiar satisfaction that the honoured name of our respected colleague Mr. Clare Sewell Read is given to these prizes. Suffolk also has its long list added to by Captain Pretyman, M.P.

We again urge upon all would-be competitors the desirability of their answering *all* the questions that are put in the entry form accurately and adequately.

We again record our warm thanks to the many donors of prizes and friends who help forward our efforts in various ways. More especially would we tender our thanks to many members of the Press who have placed us under much obligation. We have a large audience in the many visitors who attend the Exhibition, but we have continually brought under our notice a much larger number of practical men with whom we are brought into more or less close relationship, and who are influenced by the publications of the very numerous papers that deal so kindly with the subject of proper barley growing.

Signed on behalf of the judges,
H. STOPES,
Chairman

In addition to the above awards, there are numerous other very substantial money prizes and articles of plate, etc., given by eminent firms of seed growers, barley factors, brewers' engineers, malting manufacturers, etc.

BARLEY AND MALT.

By Hordeum.

Arsenic in Beer.

A matter deeply affecting the interests of beer-drinkers and barley-growers has been brought to the notice of everyone near the end of the year now dying.

What it will lead to or how it will end it is impossible to foretell. As it is still subject to judicial investigation it is impolitic to criticise it freely.

There is at present much conflict even as to the facts, and it seems probable that many hitherto unsuspected people will be drawn into the meshes by the inquiry.

The suggestion is that arsenic was present in much beer, in some cases in sufficient quantities to cause great suffering and even death.

Glucose treated by impure sulphuric acid containing arsenic was at first thought to be responsible for it all.

Quite recently it has been asserted that the poison has been found on malt in considerable amount, but it is significant that the style of malt is not defined nor are the names of any makers referred to.

It has been suggested that the fuel used in drying is the cause, and it had also been previously asserted that the source of the poison might be the spraying of the growing hops or the fuel used in hop-oasts during drying. The chemical manures used by both hop and barley growers have been accused of causing the mischief.

No one has as yet pointed out the probability of the numerous antiseptics commonly used by brewers and many other classes of traders in nearly every item of food having any responsibility in producing the existing deplorable state of affairs.

Probably the most serious point next to the known suffering and death is the inexplicable attitude of those responsible (whoever they may be) for the attachment of the blame to beer solely. Still, more remarkable is the attempt by brewers to show that malt is as baneful as sugar. The public confidence in beer had already received a rude shock, but if it is intended to try to prove that genuine beer is as deadly as the article sold as beer, but which is known to be largely composed of sugar or other substitutes, the brewing trade will receive a very severe blow.

Brewers and barley growers have common interests, and should have one interest in common. No one will suffer more than the brewers if they, by selfish or unthinking action, make it impossible to grow barley in this country at a profit.

Consumers, as well as barley growers, have awakened to the necessity of the enormous substitution of malt by other substances coming to a stand, and that beer as such will have to be understood to be the product of malt and hops. If other substances be used, then the consumer will insist upon his right to be informed of the fact.

Brewers' apologists contend that this must lead to the larger employment of foreign barley for malt and to a decreased demand for British grain.

The foregoing report is opportune, as upon this matter it gives clear evidence of the good quality of British grain. It is approved by some of the best and largest brewers and maltsters in the country, as well as farmers and others directly interested in barley-growing. British barley has nothing to fear from fair, free, open competition. If it be true that our barley cannot brew satisfactorily, then our farms can be turned into sheepwalks. Nearly a score centuries of successful barley-growing can bid us look confidently forward to the future. In honesty and truth we can still trust.

Uckfield Agricultural College.—The Surveyors' Institution have included the Uckfield Agricultural College among the places of professional instruction providing the necessary training to qualify for the examination for admission to the Institution's membership. Two members of the staff, Mr. Burke and the Principal, have been members of the Institution for many years.

Essex Agricultural Society.

A meeting of the Council of the Essex Agricultural Society was held at the Shire Hall, Chelmsford, on the 21st inst, Mr. James Round, M.P., President, occupying the chair. A letter was read from Mr. Ernest Prentice, secretary of the Large Black Pig Society, suggesting the desirability of including classes at the next show for Large Black pigs. The letter stated that there were twenty owners of this breed in Essex, and the Earl of Onslow (Tendring) was president of the Society. The Earl of Onslow also wrote, offering to give a special prize of five guineas if these classes were included. The letters were referred to the Prize Committee.

The annual report, read by the assistant secretary (Mr. Fred. Taylor), expressed sincere regret at the loss sustained by the Society by the deaths of Mr. J. R. Vaizey and Mr. T. A. Spencer. The year began with a balance at the bank of £170 6s. 7d.; the net receipts were £2.666 19s. 11d., and the payments £2.656 18s. 3d., leaving a surplus of £10 1s. 8d. on the year's working. A sum of £33 1s. 7d. was invested in Consols early in the year, bringing up the reserve fund to £524 7s. 6d. The amount of the gate-money taken at Chelmsford exceeded by £26 the sum taken the previous year. The thanks of the Society were due to the donors of special prizes, to the stewards, to the Local Committee at Chelmsford, and especially to the Secretary, Mr. S. A. Smith, who spared no trouble to make the show a success. (Hear, hear.)

A sub-committee of the Council [illegible] report upon Mr. T. C. Darby's digger or cultivator. "We are of opinion that as an [illegible] digger is worthy of great commendation. The [illegible] principle acts very well, and does not [illegible] on the underside of the soil [illegible] different. We desire to record our appreciation of the [illegible] and ingenuity of Mr. Darby in the matter."

A letter was read from Mr. E. Whitmore, the secretary, stating that the day had arrived when he found he could no longer [illegible] time to carry out the work required [illegible] for the Society. He therefore begged to [illegible] with great regret his resignation [illegible]

could not do this, however, without saying that during the twenty-three years he had acted as secretary he had received from the various presidents, the Council, and the members of the Society, the very greatest kindness and courtesy. He desired to ask all to accept his most grateful acknowledgments, and to assure them of his continued interest in the welfare of the Society.

The Chairman said they would all be sorry to lose Mr. Whitmore. The way in which Mr. Whitmore had performed his duties reflected the greatest credit upon him (hear, hear), and had given the greatest satisfaction to the presidents, Council, and the public at large.

Mr. Whitmore replied that it had been a great pleasure to him to act as secretary, but he now found it was really impossible for him to devote as much time as was required to the Society. With regard to the date on which the resignation took effect, he would leave that in the hands of the Council; but he should be glad to leave as soon as possible.

Mr. T. Usborne, in proposing a hearty vote of thanks to Mr. Whitmore, said he was not surprised at the resignation, as Mr. Whitmore had been appointed to the post of county architect. Mr. Usborne also promised they should elect Mr. F. W. Taylor, who had acted for some years as assistant secretary, as secretary, for he was sure Mr. Taylor had given universal satisfaction, and he knew the work well. (Hear, hear.) Mr. W. W. Glenny seconded the vote of thanks to Mr. Whitmore, observing that the position the Society now held in the country was due very much to the energy of Mr. Whitmore. (Hear, hear.) The vote of thanks was carried unanimously, and a committee was elected to arrange for the appointment of a new secretary and the terms.

The annual general meeting of the Society was then held. The first business on the agenda was the election of a new president, but this was postponed, as no place has yet been definitely fixed upon for the 1901 show. It was intimated, however, that probably it would be held at Colchester, the chairman stating that, although there had been no official invitation from that borough, there was a strong disposition to welcome the Society. On the proposal of Mr. T. Usborne, seconded by Major Rasch, M.P., a hearty vote of thanks was accorded the retiring president, Mr. Round, who, in reply, expressed his gratification at the success which attended the Clacton Show.

WATERLOO ROUND CAKES

SILCOCK'S CALF REARING.

CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 per cwt., carriage paid. 5 cwt. lots, 12/-.

R. SILCOCK & SONS,
Poulton-le-Fylde, Lancs.

MACKINDER'S LAMB FOOD

Used on the Royal Farms and by Large Flockmasters everywhere.

Mr. Jas. Bennett, Aure, Glos., writes:—"I have never had any Food of any sort or kind on which lambs did so well."

Mr. F. Jakeman (agent for C. T. Hoare, Esq.), Bicester, writes:—"I find it capital food both for lambs and cattle."

Hundreds of Testimonials, Samples, Pamphlets, etc., free through agents, or direct.

THE "MARK LANE EXPRESS ANNUAL" commands a far greater circulation than any other Year-book issued in the interests of Agriculture. The Annual is published at the popular price of Sixpence (post free from the Office, Ninepence), and can be obtained at Messrs. W. H. Smith and Son's Bookstalls, or through any Newsagent in the United Kingdom, by ordering early.

Subscribers are requested to order their copies from their Bookseller at once, and so save the postage.
